**Re: Docket No. 060166-WS; Application of Gold Coast Utility Corp., for amendment of water and wastewater certificates in Polk County**

Dear Mr. Friedman:

The filing in this docket has been examined for compliance with minimum filing requirements. Deficiencies are listed below:

Rule 25-30.036(b), Florida Administrative Code (F.A.C.), requires a statement addressing the need for service. No such statement is found in the filing.

Rule 25-30.036(f), F.A.C., requires a map showing proposed lines, treatment facilities, and the territory proposed to be served. Exhibit B will suffice for the territory portion of this rule. The application states on page 2 that a detailed development plan has not yet been developed, and further on page 5 that the wastewater treatment plant may need to be expanded. Once the utility has determined the development plan and has concluded what modifications will be required for the wastewater treatment plant, please submit a map showing proposed lines and treatment facilities.

Rule 25-30.036(j), F.A.C., requires a statement of capacity of the existing lines, treatment facilities, and the design capacity of the proposed extension. No capacity of the proposed extension is provided in the filing.

When the above noted data is filed, along with late-filed exhibit I, the application should be ready for processing by the staff. Usually it is requested that the data be filed within thirty days, but due to the development plan and potential wastewater plant expansion, it might be best if you contact staff engineer Tom Walden and let him know how much time is needed to complete the application.

If you have any questions, please contact Mr. Walden at 850-413-6950.
