Re: LRN NPA-NXX for New Gainesville Switch

Dear Ms. Bayó:

US LEC Corp. seeks intervention of the Commission in securing an NPA-NXX assignment for LRN purposes. US LEC Corp., on behalf of US LEC of Florida Inc., recently requested a new NPA-NXX for the Gainesville rate center from Neustar. The request was for an NPA-NXX to support a new US LEC switch, GSVLFLSMFMD that will be delivered to 400 SW 2nd Ave., Gainesville, FL 32601. US LEC does not have the NPA-NXX resources in the Gainesville LATA sufficient to provide a unique NPA-NXX to support the new switch LRN. In the request, US LEC notified Neustar that US LEC would retain 1 thousands block from the NXX to support the LRN needs and a provide a small group of numbers for customers and return the remaining blocks to the pool for other local carriers to use.

In its request, US LEC notified Neustar that the request was for an NXX to support an LRN (see paragraph 1.2 on Part 1A and on page 2 of 2 of the *Months to Exhaust and Utilization Certification Worksheet*). In its response, Neustar stated, "Your utilization calculates to 65.180 percent. The FCC requires a utilization of 75.000 percent."

US LEC requests that the Commission intervene on its behalf to secure an LRN NXX in the 352 NPA from Neustar. In accordance with ATIS Guidelines IN 980713-021, LRN Assignment Practice, a company can request the Commission to override the utilization requirement in instances of a need for an NXX for LRN purposes in a new switch. Enclosed are copies of the pages containing US LEC's request and Neustar's response with certain portions highlighted.
