Docket No. 060007-EI
July 14, 2006

PRELIMINARY LIST OF NEW PROJECTS TO BE SUBMITTED FOR COST RECOVERY

Project: Clean Air Mercury Rule (CAMR) Compliance Project

Law/Regulation: Final Rule Issued by the U.S. EPA on May 18, 2005

Brief Description of Project: The CAMR is a regulation imposing nation-wide standards of performance for mercury (Hg) emissions from existing and new coal-fired electric utility steam generating units. The CAMR is designed to reduce emissions of Hg through implementation of coal-fired generating unit Hg controls. In addition, CAMR requires the installation of Hg Continuous Emission Monitoring Systems (HgCEMS) to monitor compliance with the emission requirements. The rule is implemented in two phases with an initial compliance date of 2010 for Phase I and the final required reductions of Phase II in 2018. The State of Florida has begun the implementation of the requirements for reduction of Hg through rulemaking process. Plant Scherer Unit 4 and St. John's River Power Park (SJRPP) Units 1 & 2, in which FPL has ownership shares, are affected units under this rule and will require the installation of Hg controls and HgCEMS.

2007 Preliminary Estimate:	\$ 82,000 Capital	SJRPP HgCEMS
	\$ 1,596,000 Capital	Scherer 4 Hg Testing & HgCEMS
2008 Preliminary Estimate:	\$ 1,400,000 Capital	Hg Controls
2009 Preliminary Estimate:	\$ 9,600,000 Capital	Hg Controls
2010 Preliminary Estimate:	\$36,200,000 Capital	Hg Controls
