CLEC TABLE-1: TRADITIONAL ACCESS LINES on a VOICEGRADE EQUIVALENT (VGE) Basis

DO NOT INCLUDE VoIP, WHOLESALE PLATFORM LINES (lines formally known as UNE-P), ANY UNE-P LINES THAT HAVE NOT YET TRANSITIONED, RESOLD LINES (INCLUDING THOSE SOLD UNDER COMMERCIAL AGREEMENTS) OR PRIVATE LINES IN THIS TABLE

1	2	3
ILEC Territory	Res or Bus	Total VGE Lines
BellSouth	Bus	
Grand Total		

NOTES/INSTRUCTIONS FOR COMPLETING TABLE-1:

A. The purpose of this table is to obtain CLEC retail access lines on a VGE basis, exclusive of VoIP, wholesale platform (lines formerly known as UNE-P), any UNE-P lines that have not yet transitioned, and resale (whether leased under an Interconnection Agreement or a Commercial Agreement).

B. An access line connects the end user's customer premises equipment (CPE) to the serving switch and allows the end user to originate and/or terminate local telephone calls on the public switched telephone network (PSTN). **Do NOT include VoIP lines, Wholesale Platform lines, UNE-P lines or Resold access lines (including those leased under a Commercial Agreement). Do include UNE-L and EELs obtained from ILECs even if leased under a Commercial Agreement.** The access line counts in Table-1 above must be based on all of your different types of access lines (including fixed wireless) with the exception of those used to provide VoIP service.

C. Each field must be populated. Do not use quotation marks.

D. Residential and business VGE access line counts may be obtained by querying your billing database, provisioning database, etc.

TABLE COLUMN INSTRUCTIONS:

Column 1. List ILEC Territory in alphabetical order (e.g. BellSouth, Verizon, etc.).

Column 2. Enter the abbreviation Res for Residential lines or Bus for Business lines. **Each type must be entered in separate rows.**

Column 3. Enter line count as voice-grade equivalents (VGEs). Report VGE Access Lines based on how you bill the customer. If you bill a customer for 1 DS1, the access line count would be 24 even if the customer is not utilizing all 24 channels. If you bill a customer for 10 channels in a DS1, then the line count would be 10. Report 2 VGEs for each ISDN-BRI and 23 VGEs for each ISDN-PRI. Lines must be entered without duplication, e.g., Enhanced Extended Link (EEL) loops must not be included in UNE-L counts and vice versa. **Each line count must be entered in separate rows.**
