CLERK

Re: Docket No. 060547-TL

Dear Ms. Bayó:

Enclosed are the original and fifteen copies of Embarq's redacted Petition for expedited Review of NXX-X Code Denial, which we ask that you file in the captioned new docket.

Copies are being served on the parties in this docket pursuant to the attached certificate of service.

If you have any questions regarding this electronic filing, please do not hesitate to call me at 850-599-1560.

Sincerely,

Susan S. Masterton

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for Expedited Review of Growth)	Docket No. _____
Code Denials by the North American Numbering)	
Plan Administration for the Winter Park Exchange)	Filed: August 9, 2006
_____)	

PETITION FOR EXPEDITED REVIEW OF NXX-X CODE DENIAL

Embarq Florida, Incorporated (“Embarq”), pursuant to 47 C.F.R § 52.15(g)(iv), Federal Communications Commission (“FCC”) Order FCC 00-104, and Florida Public Service Commission (“Commission”) Order No. PSC-01-1973-PCO-TL, petitions the Commission to review the Pooling Administrator’s (“NeuStar”) denial of Embarq’s requests for additional numbering resources in the Winter Park Exchange. In support of this petition, Embarq states:

PARTIES

1. Embarq is an incumbent local exchange company (“ILEC”) regulated by the Commission and authorized to provide local exchange telecommunications and intraLATA toll telecommunications in the State of Florida.
2. NeuStar is an independent non-governmental entity, which is responsible for administering and managing the numbering resources in pooling areas. See 47 C.F.R § 52.20(d)

JURISDICTION

3. The Commission has jurisdiction of this matter pursuant to the Industry Numbering Committees (INC) Number Pooling Guidelines Sections 3.7 and 12(c). This provision provides that a carrier may challenge NeuStar’s decision to deny numbering resources to the appropriate regulatory authority.

BACKGROUND AND REQUEST FOR RELIEF

4. On March 31, 2000, the FCC issued Order No. 00-104 (“FCC 00-104” or the “Order”) in the Numbering Resource Optimization docket (Docket No. 99-200). The goal of FCC 00-104 was to implement uniform standards governing requests for telephone numbering resources in order to increase efficiency in the use of telephone numbers and to avoid further exhaustion of telephone numbers under the NANP.

5. Among other things, FCC 00-104 adopted a revised standard for assessing a carrier’s need for numbering resources by requiring rate center based utilization rates to be reported to NANPA. FCC Order at § 105. The FCC further required that, to qualify for access to new numbering resources, applicants must establish that existing numbering inventory within the applicant’s rate center will be exhausted within six months of the application. Prior to the ruling, the Central Office Code Assignment Guidelines, used by the industry and NANPA to make code assignments, required the applicant’s existing number inventory within the applicant’s serving switch to exhaust within a specific months-to-exhaust (“MTE”) of the code application in order for a code to be assigned or for the carrier to prove that it was unable to meet a specific customer’s request with its current inventory of numbers. The FCC stated that the shift to a “rate center” basis for determining the need for new numbering resources was intended to “more accurately reflect how numbering resources are assigned” and to allow “carriers to obtain numbering resources in response to specific customer demands.” FCC Order at ¶ 105.

6. On December 29, 2000, the FCC also released FCC 00-429, which reaffirmed FCC 00-104 and required carriers to also meet a 60 percent initial utilization threshold. FCC 00-429 at ¶ 26. Based on these two FCC orders, carriers are required to meet six MTE criteria as well as a utilization threshold on a rate center/exchange basis in order to be granted additional numbering resources. Id. At ¶ 29.

7. In FCC 00-104, the FCC directed the industry and the Pooling Administrator to comply with the INC Pooling Guidelines. FCC 11-104 ¶ 183. Pursuant to the INC Guidelines, in order to obtain thousand-block allocations, the carrier must demonstrate that its existing numbering resources for the rate center will exhaust within six (6) months and also have a utilization of 75 percent for the specific rate center. See INC Guidelines Section 4.3 (c) [THOUSANDS-BLOCK NUMBER (NXX-X) POOLING ADMINISTRATION GUIDELINES (TBPAG) dated May 20, 2005] and Appendix 3. These requirements are known as the six (6) months-to-exhaust (“MTE”) and utilization threshold.

8. Embarq has utilized mechanisms such as number pooling to manage its numbering resources in the most efficient manner. However, Embarq is required in this instance to petition the Commission for relief.

9. On May 25, 2001, BellSouth petitioned the Commission to develop an expedited process to review NANPA’s denial of a request for additional numbering resources to minimize the delay carrier’s experience in attempting to challenge a denial by NANPA. As a result of BellSouth’s Petition and the Commission’s efforts to make numbering resources available to carriers, the

commission issued Order No. PSC-01-1973-PCO-TL setting forth an expedited code denial process. On March 15, 2002, the Commission issued Order No. PSC-02-0352-PAA-TL adopting the same expedited code denial process for pooling areas.

10. The Winter Park Exchange consists of Six (6) central offices and eight (8) switching entities that utilize numbering resources: Altamonte Springs (ALSPFLXADSO), Casselberry (CSLBFLXADSI), Goldenrod (GLRDFLXADSO), Lake Brantley (LKBRXADSI), Maitland (MTLDFLXARPO), and Winter Park (WNPFLXAPSO).

11. On July 31, 2006 Embarq requested additional numbering resources from NeuStar for the Winter Park exchange. See Attachment 1. Specifically, in order to meet the telephone number needs of one of its customers, Embarq requested a complete NXX in the Lake Brantley (LKBRFLXADSI) wire center. The customer has requested 10,000 numbers. Embarq cannot currently meet this request given the inventory of numbers available at this time in this switch.

12. At the time of the code request, the Winter Park exchange had a MTE of much greater than six months and a utilization of 82.6%. On a switch basis, the Lake Brantley Switch (LKBRFLXADSI) has an MTE of longer than 6 months and utilization of 56%. There are no blocks of un-assigned numbers large enough to meet the request of this customer in this switch.

13. On July 31, 2006, NeuStar denied Embarq's request for additional numbering resources because Embarq would not exhaust all the blocks within six months, notwithstanding the fact that Embarq's Lake Brantley switch does not

have available blocks of numbers in sufficient quantity to meet the customer's requirements. See Attachment 1.

14. Embarq's request for additional numbering resources to meet this customer's requirement in the Winter Park Exchange would not materially impact exhaustion of available numbers in the 407/321 area codes.

15. As discussed above, both the FCC Order and INC guidelines provided that state regulatory authorities have the power and authority to review NANPA's decision to deny a request for numbering resources. See INC Number Pooling Guidelines Sections 3.7 and 11.1(c).

16. Under earlier procedures used by NANPA, waivers or exceptions were granted when customer hardships could be demonstrated or when the service provider's inventory did not have a block of sequential numbers large enough to meet the customer's specific request. Under existing procedures, NeuStar and NANPA look at the MTE criteria and utilization threshold for the rate center and allow exceptions. The current process is arbitrary and may result in (1) decisions contrary to the public interest and welfare of consumers in the State of Florida; and (2) decisions that do not necessarily promote the efficient use of telephone numbers.

17. Embarq's inability to provide this customer with the requested blocks of numbers prevents Embarq from providing the quality of service this customer desires and expects.

18. This Commission has previously received similar requests from numerous

carriers, both ILECs and CLECS in which the carriers have asked the PSC to overrule a decision of NANPA and NeuStar. The Commission has granted these requests.

19. Embarq requests that the Commission reverse NeuStar's decision to withhold numbering resources from Embarq on the following grounds:

- (a.) NeuStar's denial of numbering resources to Embarq interferes with Embarq's ability to service its customers within the State of Florida.
- (b.) As a result of NeuStar's denial of Embarq's request for additional numbering resources, Embarq will be unable to provide telecommunications services to its customers as required under Florida law.

WHEREFORE, Embarq requests:

1. The Commission review the decision of NeuStar to deny Embarq's request for additional numbering resources for the Winter Park exchange, and
2. The Commission direct NeuStar to provide the requested numbering resources for the Winter Park exchange as discussed above.

Respectfully submitted this 9th day of August, 2006

Susan S. Masterton
