Re: Docket No. 000121A-TP

In Re: Investigation into the establishment of operations support systems permanent incumbent local exchange Telecommunications companies

Dear Ms. Bayó:

In connection with the upcoming review of the current BellSouth performance assessment plan (SQM/SEEM plan), please find enclosed for filing BellSouth's comments regarding the proposed SQM/SEEM plan revisions made by parties other than BellSouth. BellSouth's comments are contained in the matrix prepared by the Florida Staff and distributed to the parties on August 3, 2006. A copy of the same is being provided to all parties of record.

Sincerely

Robert A. Culpepper

## BellSouth and CLEC Proposed Florida PAP Modifications August 16, 2006

		August 10, 2000	
	BellSouth Proposed SQM Changes/Comments (7/28/04)	- CLEC's Proposed SQM-Changes/Comments (7/28/04)	Staff Comments
		SON	
INTRODU	CTION/REPORT PUBLICATION DATE/REPO	RT DELIVERY METHOD	
Introduction	This plan results from the many divergent forces evolving from the 96 Act. This specific SQM is based on Order No. <u>PSC-06-0172-FOF-TP TBD</u> regarding non-vacated change of law issues ordered issued by the Florida Public Service Commission (FPSC) on March 2, 2006 TBD and the FPSC's April 4, 2006 vote on its staff recommendation in Docket No. 041269-TP 000121A-TP.		
PRE-ORDI			
Definition	The response Interval (Pre-Ordering/Ordering/Maintenance pre-order/order/maintenance and repair information from a given legacy system.	ana Kepair)	
Exclusions	Syntactically Incorrect queries Scheduled OSS Maintenance Test Transactions/Records Timeouts Bundled transactions and/or use of any process that results in excessive volumes that exceed a reasonable distribution of daily and/or hourly transactions		
Business Rules	The average response interval for retrieving Pre- Ordering/Ordering/Maintenance & Repair information from a given legacy system is determined by summing the response times for all requests submitted to the legacy systems during the reporting period and dividing by the total number of legacy system requests for that	Added systems to be measured. Added Tier 1 due to CLEC loss of productive hours.  The following systems are observed in the Pre-Ordering/Ordering OSS Response Interval measurement: RSAG-Address, RSAG-TN,	

	BellSouth Telecommunications, Inc., Responses to CLECs' Proposed Changes

,	measurement; CRIS, DLETH, DLR, LMOS, LMOSupd,		
	LNP Gateway, MARCH, OSPCM, Predictor, SOCS, and	,	
	NIW.	BST Response	
		BellSouth disagrees with adding the systems proposed by the	·
	The percent response interval for retrieving Maintenance and Repair	CLECs to this measure. The FCC defined an ILECs' obligation	
	information from a given legacy system is determined by dividing	with respect to OSS in this way: "in order to comply fully with	
	the number of responses returned within 10 seconds by the total	section 251(c)(3) an incumbent LEC must provide, upon request, nondiscriminatory access to operations support systems functions	
i	number of queries submitted in the reporting period and multiplying	for pre-ordering, ordering, provisioning, maintenance and repair,	
	<del>by 100</del>	and billing of unbundled network elements under section	
	The following systems are observed in the Maintenance and Repair	251(c)(3) and resale service under section 251(c)(4)." See Local	
	OSS Response Interval measurement: CRIS, DLETH, DLR, LMOS,	Competition First Report and Order ¶525 [Emphasis added].	İ
	LMOSupd, LNP Gateway, MARCH, OSPCM, Predictor, SOCS,	, , , , , , , , , , , , , , , , , , ,	
ĺ	and NIW.	The additional systems, CAFÉ, SOEG, and CPSS, proposed by the	
		CLECs are not systems used by CLECs for UNE or Resale services.	
		CAFÉ (Common Access Front End), is a web-based interface that	
		uses the Access Gateway to submit orders to EXACT and perform	İ
		preorder validations. This system is used by IXCs, and wireless	
		carriers to submit ASRs for special access services. SOEG (Service	į
		Order Entry Gateway) is used to order, modify, cancel and	
		disconnect the interstate special access wholesale DSL service sold	
		to NSP/ISPs and create custom reports. SOEG only supports	
		NSP/ISP customers and is not CLEC supporting. The CPSS	
		(Circuit Provisioning Status System) functionality that previously	
1		allowed IXC and wireless carriers, through a web-based interface, the ability to electronically check circuit status via the Internet, is	•
		now handled in CAFÉ. The Trouble Administration functionality of	
		CPSS (CPSS-TA) that remains deals with Maintenance as opposed	
		to Pre-Ordering/Ordering and allows IXC and wireless carriers the	
		ability to enter, update, cancel, etc., trouble reports on designed	
}		circuits.	
		TAFI (Trouble Analysis Facilitation Interface) is a front-end	
1		application to BellSouth's legacy systems for trouble administration.	
İ		CLECs use TAFI to access legacy systems, which places it in the	
		same position in the query process as LENS for example. TAFI is	
		noted for this measure along with the legacy systems TAFI accesses	· · · · · · · · · · · · · · · · · · ·

SEEM Measure		SEEM Tier I Tier II	
		YesX	
		BST Response	
		BellSouth disagrees with the CLECs' proposal to add this measure	
	}	to Tier I of SEEM. There is no feasible way to identify the data by	
ĺ		CLEC in order to assign remedies by transactions. This measure	
		tracks response times for queries made to regional systems and cannot be broken down by CLEC. The SEEM plan is structured so	
		that Tier 1 remedies are paid to a specific CLEC when a measured	
		problem affects that CLEC in a specific way. In others words, the	
		harm to CLEC A is different from the harm to CLEC B because the	
		events causing the problems are different. When a problem affects	
j		CLECs generally in the same way and becomes so pervasive that it	
		affects the entire industry, then a Tier II remedy applies. If system problems occur so that there are delays in response times, which are	
		captured by this measure, CLECs as a group are affected. Further,	
		the CLECs have presented no such need here and have not indicated	
		anything that has happened since this plan has been in effect that	
		would justify this action. This proposal was discussed at length	
		during the last review and was not implemented for the reasons	
		stated here. Nothing has occurred since the current plan has been implemented that should change that conclusion.	
		implemented that should change that conclusion.

ORDERING			
Notes Notes	The Flow-Through Error Analysis will be posted with the Flow-Through Error Analysis will be posted with the Flow-Through Error Analysis provides an analysis of each error type (by error code) that was experienced by the LSRs that did not flow through or reached a status for a FOC to be issued.  CLEC LSR Information, (a.k.a. LSR Detail Report) is available by subscription. A CLEC wishing to receive a copy of their report should submit a feedback form (see link located in the "Resources" section on left side of PMAP website). Enter the name of the report in the Comments section. The CLEC LSR information is available for any CLEC on the PMAP website.	Although CLECs did not ask for specific changes to this measure, they are gravely concerned about level of flow-through, the increase in required manual service order submission, and the lack of a task force to improve the situation. CLECs request that BellSouth present at the workshop the current state of electronic and manual order processing, and its plans for the future so that appropriate measure(s) can be established.  BST Response BellSouth's data does not indicate any increase in manual service order submissions. Approximately 95% of all LSR submissions are electronic and have been for some time. The better forum to address electronic and manual order processing is the Change Control Process ("CCP"). CCP can provide expertise for any product specific ordering plans for the future for which CLECs desire to have addressed.

	HellSouth Proposed SQM Changes/Comments: 4: (7/28/04)	CLECIS Proposcu SOM Change // om minis	A Company of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Control of the Cont
		seconds. Small Business has a universal call center where the same service representatives handle both ordering and maintenance calls. Twenty percent of these calls stem from ordering related activity and are reported in this measurement. (CLECs request a discussion	
		of the 20% amount)	
		BST Response When Small Business went to a universal call center (combining ordering related calls and maintenance and repair related calls in one center), a study was done to determine the percentage of calls that	
		were ordering related versus maintenance and repair related. The study results, which were reviewed during the last SQM review, indicated that approximately, 20% of the calls were ordering related and 80% maintenance and repair related.	
SEEM Measure		SEEM Tier I Tier II YesX	
		BST Response BellSouth disagrees. Adding this measure to Tier 1 of SEEM would	
		be inappropriate for at least two reasons. First, The Average Answer Time measure (O-12) is a measurement of a regional process and accordingly already has Tier II remedy treatment. When the process	
		does not function properly, negative effects will be region-wide and they will affect all CLECs, not just a select few. Second, there is no feasible method of breaking out calls by CLEC and associating remedies based on failed transactions.	
		The CLECs seek an allocation method in an attempt to force-fit this measure into a Tier I framework. The necessity of arbitrarily devising an allocation method to accomplish this proposed change is evidence enough to demonstrate the inappropriateness of adding this	·
		measure to Tier 1.  Finally, calls to ordering centers are for information and not to place orders and experience has shown that many of those calls are for	
		information that the CLEC already possesses. Consequently if any change is made, BellSouth proposes that this measure should be removed from the SEEM plan.	

- 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1	BellSouth Proposed SQM Changes/Comments (7/28/04)	CLEC's Proposed SOM!Changes/Comments (7/28/04)	State Comments (1997)
PROVISION	VING		
P-2A PJ48: Pe	rcentage of Orders Given Jeopardy Notices >= 48 Hours		
Exclusions		Order activities of BellSouth or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc., which may be order types C, N, R, or T)Disconnect OrdersOrders jeopardized on the due date. This exclusion only applies when the technician on premises has attempted to provide service but must refer to Engineer or Cable Repair for facility jeopardyOrders issued with a due date of less than 48 hoursListing Order	
		BST Response BellSouth disagrees. The reason for the CLECs' proposed change is unclear. If an order has a due date of less than 48 hours, how can notice be given in 48 hours or greater? This exclusion should remain.	
Business Rules		When BellSouth can determine in advance that a committed due date is in jeopardy for facility delay, it will provide advance notice to the CLEC. Orders that have a due date in the reporting period are included in the calculation. The interval is calculated using the date/time the notice is released to the CLEC/BellSouth systems/FAX Server until 5 PM on the due date of the order. This report measures both non-dispatched and dispatched orders enly.	
		BST Response  BellSouth disagrees. Non-dispatch orders do not receive jeopardy notices and are often due in less than 48 hours.	
		Percentage of Orders Given Jeopardy Notice >= 48 Hours = (a/b) X 100	
	•	a = Number of orders given jeopardy notice >= 48 consecutive hours in the reporting period b = Number of orders given jeopardy notices in the reporting period	
Date:	8-16-2006	11	

	BST Response  BellSouth agrees. This measure is currently reported using consecutive hours, and therefore BellSouth has no objection to the proposed clarification.

	BellSouth Proposed SOM Changes/Comments.	CLEC's Proposed SOM/Changes/Comments.	Staff Comments
		BST Response BellSouth disagrees. See response above. Even if the measure was established, there is no basis for the disaggregation. In each case, the UNE is Dedicated Transport and there is no reason to measure the same UNE four different ways. Further, RetailDS1/DS3 is not an analog for unbundled transport provisioning.	
SEEM Measure		SEEM Tier I Tier II Yes X X	
		BST Response BellSouth disagrees. The commingled circuits are already captured in the SEEM plan for measure P-3 where applicable.	
	Completion Interval		
Business Rules		The completion interval is determined for each order processed during the reporting period. The completion interval is the elapsed time from when BellSouth issues a FOC/SOCS date time-stamp indicating receipt of an order (application date) from the CLEC to BellSouth's order completion date. Orders worked on zero due dates are calculated with a .33-day interval (8 hours). Orders can be either dispatch or non-dispatch.  Only valid business days will be included in the calculation of this interval. Valid business days may be found at the following website (http://www.interconnection.bellsouth.com/#localorderinghandbook/intervalguide) are (BellSouth and CLECs to define.  BST Response BellSouth disagrees with specifying hours of operation in the SQM. Rather than stating in the SQM the current operating hours, which are subject to change, BellSouth website for the hours of operation. This will avoid a conflict between the hours stated in the SQM and actual	
		hours of operation if the hours change after the SQM document is approved.

	BellSouth Proposed SQM Changes/Comments: (7/28/04)	CLEC's Proposed SOM Changes/Comments	The Staff Comments
	UNE Digital Loop >= DS1	LNP (Standalone) Retail Residence and Business (POTS)*[is this count duplicated?]	
	UNE xDSL (HDSL, ADSL and UCL) without conditioning<= 5-Days Published in the interval Guide with conditioning<= 12 Days Published in the Interval Guide UNE ISDN/UDC/IDSL	BST Response BellSouth is not entirely clear regarding the CLECs' question. However, the retail analog 'Retail Residence and Business (POTS)' does contain data from the retail analogs 'Retail Residence (Non- Design)' and 'Retail Business (Non-Design)'. So, from that standpoint there is some duplication.  UNE xDSL (HDSL, ADSL and UCL)	
	Interval Guide	without conditioning <= 5 <u>Business</u> Days with conditioning <= 12 11 <u>Business</u> Days  UNE Line Splitting without Conditioning	
		BST Response BST agrees to use the intervals in the ordering guide, and in fact made that recommendation. However, the intervals specified by the CLECs only match the ordering guide in certain cases. For example, the interval for UNE XDSL in the ordering guide is 11 days for 1-5 circuits and 16 days for greater than 5. The SQM has a separate breakdown for <=6 circuits and >= 6 circuits. The intervals for each category should follow the interval guide. If the performance standard is less than the guide, it simply means the measure will be missed in most cases.	
P-7 CCI Coordi	inated Customer Conversions – Hot Cut Duration		
Exclusions		Canceled Service OrdersDelays caused by the CLEC [what is used to determine?]Non-Coordinated ConversionsOrder activities of BellSouth or the CLEC associated with internal or administrative use of local services (Record Orders, Test Orders, etc., which may be order types C, N, R or T)Listing Orders

		Scheduling System ("CCSS") when the CLEC causes a delay. CCSS logs this information into the OSSLOG section of WFA.		
Business Rules	Add  When the cut interval for a conversion is greater than zero, yet less than one minute, that conversion will reflect a zero cut interval.			
P-7C CPT Hot	Cut Conversions - Percent Provisioning Troubles Received	l within 5 Business Days of a Completed Service Order		
<u>Definition</u>		This report measures the percentage of provisioning troubles received within 5 <u>business</u> days of a completed service order associated with a Coordinated and Non-Coordinated Customer Conversion and ensures the quality and accuracy of Hot Cut Conversion activities.		
		BST Response BellSouth disagrees. BellSouth takes trouble reports 7 days a week, 24 hours a day, and therefore there is no reason to use business days. This measure should remain based on calendar days. Extending this interval will only increase the number of troubles included in this measure that are not related to a conversion. There is nothing that has occurred since the plan has been in effect that indicates a need to modify this interval.		
Calculation		Percentage of Provisioning Troubles within 5 <u>business</u> Days of Service Order Completion = (a / b) X 100  a = The sum of all Hot Cut Circuits with a trouble within 5 days following service order(s) completion		
		b = The total number of Hot Cut Circuits completed in the previous reporting period  BST Response BellSouth disagrees. See rationale above.		
P-9 PPT Percer	nt Provisioning Troubles within "X" Days of Service Orde	r Completion		
<u>Definition</u>		This report measures the quality and accuracy of the provisioning process by calculating the percentage of troubles received within "X" business days of service order completion.

	(7/28/04)	7.7(7/28/04)	
		measure. The CLECs were dissatisfied with that method and insisted	
		on a mechanized process to check the universe of partially	
		mechanized orders, which resulted in this measure. The current	
		process is based on an agreement with the CLECs with respect to:  (1) the fields on the service order that should be reviewed in	
		determining service order accuracy ("CLEC-impacting" fields); (2)	
		the disaggregation levels associated with the measure; and (3) the	•
		benchmark to be used. This is based on a mechanized process for	
		partially mechanized LSRs. The CLECs now want to add non-	
		mechanized LSRs to this measure, which would require BellSouth	
1		to conduct a sample on manual LSRs and expend limited resources	,
)		without any corresponding benefit. Only about 5 % of the LSRs are submitted manually and many of those could be submitted	
		electronically.	
		olecuonically.	
1		There has been no indication of any events since the plan has been	
ļ		in effect that would necessitate changing this measure back to the	
		way that it was calculated before the CLECs requested it to be	
		changed to the way it is calculated now. The CLECs proposed	
		change would add very little benefit to this measure and is in fact unnecessary.	·
		diffecessary.	
P-12-A POC Pe	ercent Orders Clarified Multiple Times (NEW)		·
Definition		This report measures the percentage of rejected service requests for	
	·	which BellSouth rejected the service request in error.	
		nom n	
		BST Response BellSouth disagrees with adding this measure. As an initial matter,	
		BellSouth provides extensive training to its employees and believes	
		that to the extent that there may be any rejections of LSRs in error,	
		they are small in number. The CLECs have presented no evidence	
		otherwise. The CLECs raised this same issue during BellSouth's	
		271 applications and the FCC noted that the state commissions	
		hearing the CLECs claims of a high percentage of rejections by	
		BellSouth in error were not persuaded that the high rejection rates were entirely attributable to BellSouth. There is no credible	
		indication that there is a problem in this area that would warrant a	
		new measure.

("Zero Due Date Orders")Order activities of BellSouth or the CLEC associated with internal or administrative use [how determine??]of local services (Record Orders, Test Orders, etc., which may be order types C, N, R or T)Disconnect OrdersListing Orders	
		BST Response BellSouth disagrees with adding this measure. See rationale above.	
Business Rules		All Service requests are screened for errors and when returned placed in "duration" for 48 hours. During the duration, the order is not available for any expedite, update or change. In those instances where the CLEC's service request was rejected in error or multiple times the service delivery date is delayed. Invalid rejections are those rejections that would not have occurred if BellSouth the provided the capability to review the entire service request for errors. Rejections in error are those that are rejected despite accurate data or are rejected because a BellSouth system such as RSAG has provided the CLEC with erroneous data.  BST Response BellSouth disagrees with adding this measure. See rationale above. The CLECs' statement regarding service requests "placed in duration for 48 hours" is not understood by BellSouth.	
Calculation		Percent Service Requests Clarified in Error/Invalid Clarifications = (a/b) X 100  a = Number of service requests with erroneous or invalid rejections b = Total number of service requests rejected  BST Response

State Short	BellSouth Proposed SQM Changes/Comments (7/28/04)	CLEC's Proposed SOAL Changes (Company)	Comments
	(), <del></del>	customer. This is in contrast to an employee report that is made by an employee who may have been working in a cable and found a line that had trouble on it. In this case, the employee wants to go ahead and get the trouble cleared prior to it becoming customer affecting.	
<u>Calculation</u>		Customer Trouble Report Rate = (a / b) X 100  a = Count of initial and repeated customer trouble reports closed in the current reporting period (Clarify what is in and what is out) b = Number of lines in service at end of the reporting period  BST Response  Currently, all initial troubles, repeat troubles as well as provisioning troubles that qualify for this measure closed during the reporting month are in the calculation. BellSouth, however, proposes to remove provisioning troubles and repeat troubles from this report since they are already in other measures.	
SEEM Measure	SEEM Measure SEEM Tier! Tier!! Yes <u>No</u> XX		
M&R 3 Mainter	nance Average Duration		
<u>Definitions</u>		This report measures the average duration of customer troubles closed during the reporting period.  BST Response BellSouth agrees with definition change.	
Business Rules		The duration starts on the date and time of receipt of a repair request and stops on the date and time the service is restored (when the technician completes the trouble ticket on his/her CAT or work systems).  For tickets administered through WFA, (CLECs and BellSouth), durations do not include No Access, Delayed Maintenance and Referred Time. (Clarify)	

	BellSouth Proposed SOM:Changes/Comments (7/28/04)	CLEC: Proposed SOM Changes Comments (7)	77 Mary Comments
		BST Response This language was added at the request and approval of CLECs to clearly state that the data received from WFA already had these intervals excluded. BellSouth does not believe that it needs to be in the measure, so if the CLECs are not clear about its meaning, it would be more appropriate for them to propose a specific change.	
		All three situations listed in the business rules (i.e., No Access, Delayed Maintenance and Referred Time) specify time-periods when BellSouth's technician does not have access to the circuit for maintenance or testing functions. The 'No Access' case is clear. 'Delayed Maintenance' is a situation where BellSouth begins the repair process and cannot complete the work because, for example, the customer is closing the office and requests that BellSouth come back later to complete the work. 'Referred Time' results when BellSouth has to refer some portion of the work to another party, such as an independent company, for that party to complete its portion of the work. These are all cases when BellSouth is available to perform the work, but is unable to complete the work due to another party.	
M&R-4 [PRT]:	Percent Repeat Customer Troubles within 30 Days		
Title		M&R-4 [PRT]: Percent Repeat Customer_Troubles within 30 Calendar Days	
		BST Response BellSouth agrees with the change.	
Definition		This report measures the percentage of customer trouble reports received within <u>calendar</u> 30 days of a previous trouble report.	
		BST Response BellSouth agrees with the change.	
Business Rules		Customer trouble reports considered for this measure are those on the same line/circuit, received within <u>calendar</u> 30 days of an original customer trouble report	
		BST Response BellSouth agrees with clarifying as "30 calendars days."	

	BellSouth Proposed SQM Changes/Comments (4)	GERCS Proposed SOM Ghanges/Gomments (7/28/07)	ge s ponte le constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constant de la constan
<u>Calculation</u>		a = Count of repeat customer trouble reports, within a continuous 30 calendar day period  BST Response	
		BellSouth agrees with the change.	
M&R-5 [OOS]: Ou	ut of Service (OOS) > 24 Hours		
Title		M&R-5 [OOS]: Out of Service (OOS) > 24 <u>Clock</u> Hours  BST Response BellSouth agrees to this change.	
<u>Definition</u>		This report measures the amount of Out of Service Customer Troubles (no dial tone, cannot be called, or cannot call out) and is represented as a percentage of Total OOS Customer Troubles cleared in excess of 24 <u>clock</u> hours.	
		BST Response BellSouth agrees to this change.	
Business Rules		Customer trouble reports that are out of service and cleared in excess of 24 <u>clock</u> hours. The clock starts when the customer trouble report is created in LMOS/WFA and is counted if the elapsed time exceeds 24 <u>clock</u> hours.	
		BST Response BellSouth agrees to this change.	
Calculation		Out of Service (OOS) > 24 <u>clock</u> Hours = (a/b) X 100 a = Total Cleared Customer Troubles OOS > 24 <u>clock</u> hours	
		BST Response BellSouth agrees to this change.	
			是一个是一个人,但是一个人的一个人,但是一个人的一个人的一个人的一个人的一个人的一个人的一个人的一个人的一个人的一个人的

oosed Changes	to CLECs, Prop	nc., Responses	communications, I	BellSouth Tel

	b = Total number of usage records sent during the reporting period.	<u>Calculation</u>			
B-5 (BUDT): Usage Data Delivery Timeliness					
	BCT Response BellSouth agrees, with the understanding that this is simply a clarification of the current calculation and is not intended as a change in the calculation.				
	b = Absolute value of total billing error related adjustments <u>enfered</u> during data month	- Calculation			
	BSTT Response excluded because they have nothing to do with the accuracy of the excluded because they have nothing to do with the accuracy of the bills that BellSouth render to CLECs. These adjustments are administrative in nature due to regulatory requirements, attempts to astisfy the customer, etc. The resulting adjustments are often based on a negotiation between BellSouth and a CLEC to resolve the master at hand. Further, in the last workshop, the CLECs requested that BellSouth be more specific with respect to this exclusion for request and agreement that BellSouth added these items as examples of adjustments not related to billing errors." It was at the CLECs, tequest and agreement that BellSouth added these items as examples of adjustments not related to billing errors. These items as examples of adjustments not related to billing errors. These items as comples and agreement that BellSouth added these items as examples of adjustments in the last and have been excluded appropriately excluded from this metric and have been excluded excluded from this metric to require deleting these exclusions.				
	customer, adjustments as per agreements and/or sottlements with CLEC, adjustments related to the umplementation of regulatory mandated or contract negotiated rate changes)  Test Accounts

BellSouth Proposed SQM Change (7/28/04)				
	BellSouth agrees, with the understanding that this is simply a clarification of the current calculation and is not intended as a change in the calculation.			
B-10 [BEC]: Percent Billing Adjustment Requests (BA)	R) Responded to within 45 Business Days			
Title	B-10 [BEC]: Percent Billing Adjustment Requests (BAR) Responded to within 45 22 Business Days			
	BST Response BellSouth disagrees. See rationale below.			
Business Rules/	45 22			
Disaggregation Disaggregation	BST Response BellSouth disagrees. The language concerning billing disputes in BellSouth's standard Interconnection Agreement (ICA), Attachment 7, section 2, provides that the CLEC "shall electronically submit all billing disputes to BellSouth using the form specified by BellSouth. In the event of a billing dispute, the Parties will endeavor to resolve the dispute within sixty (60) days of the notification date." Within this 60-day period, BellSouth would either agree to the adjustment, or provide a denial, or partial denial, of the dispute. Thus, the 45 business days reflected for this measure is consistent with the terms of the standard ICA.  Further, BellSouth, the CLECs and Staff addressed this measure extensively in prior workshops and the 45-day interval was adopted as a result of such workshops. This measure involves activities that are administrative in nature and is not service affecting to the CLEC customer. BellSouth does not see the need to change this measure, nor has there been any activity since the plan went into effect to suggest a need for a change.			
TRUNK GROUP PERFORMANCE & CHANGE MANAGEMENT				
TGP-1 [TGP]: Trunk Group Performance				

		Bensouth Telecommunications, inc., Responses to CEEes Troposed Changes		
	BellSouth Proposed SQM Changes (Comments (7/28/04)	22 CLEC's Proposed SQM/Changes/Comments: \$\(\frac{5}{28}\)(0.4)	Staff Comments (24)	
Exclusions		☐ Trunk groups for which valid data is not available for an entire <del>study reporting</del> period		
		BST Response BellSouth agrees, with the understanding that this is simply a clarification of the current calculation and is not intended as a change in the calculation.		
CM-5 [ION]: Notification of CLEC Interface Outages				
Disaggregation		CAFÉ CLEC CPSS CLEC		
		BST Response BellSouth disagrees. These are not UNE or Resale interfaces and should not be included in this measurement. CAFÉ is a web-based interface used by IXCs and wireless carriers to submit ASRs for special access services. The CPSS, or more appropriately, CPSS-TA, is a web-based interface that allows IXCs and wireless carriers the ability to enter, update, cancel, etc., trouble reports. See rationale for OSS-1.	·	
CM-7 [CRA]: Percentage of Change Requests Accepted or Rejected within 10 Days				
Title		CM-7 [CRA]: Percentage of Change Requests Accepted or Rejected within 10 <u>Business</u> Days		
		BST Response BellSouth agrees.		
Business Rules		The acceptance/rejection interval begins when the acknowledgement is due to the CLEC per the Change Control Process, a copy of which can be found on the Interconnection website: (http://www.interconnection.bellsouth.com/markets/lec/ccp_live/ind ex.html). The interval ends when BellSouth issues an acceptance or rejection notice to the CLEC. This metric includes all change requests not subject to the above exclusions that have been responded to within the reporting period. [what is data input for this measure?]		

	BellSouth Proposed SQM Changes/Comments		Stati Comments
THE STREET	(7/28/04)	CLEC's: Proposed SQM Changes/Comments 76-90 (7/28/04)	
		BST Response	
		The data counts that go into this measure are the change requests	
		due in the reporting period, as specified in the measurement description.	
		description.	
CM-8 (CRR) - F	Percent Change Requests Rejected		
CAT O JERRAS. 1	orem ominge requests rejected	This report measures the percentage of change requests (other than	
Definition		Type 1 or Type 6 Change Requests) submitted by CLECs that are	
		rejected within the report period. ICLECs do not submit Type 2, and	
		BellSouth is supposed top use Type 4, so should this read Type	
		5 CR's used?]	
		BST Response	
		BellSouth agrees in part. The definition should be changed to read	
		"This report measures the percentage of Type - 5 (CLEC Initiated)	
		Change Requests submitted by CLECs that are rejected within the report period."	
	•	report period.	
		SQM Level of Disaggregation SQM Analog/Benchmark	
Disaggregation		Reason - Cost [can we get dollar or clarity on how this calculation	
		is applied?] Diagnostic Reason - Technical Feasibility Diagnostic	
		Reason - Technical Feasibility Diagnostic Reason - Industry DirectionDiagnostic	
		[need to discuss OQS-Out of Scope]	
		BST Response	
		BellSouth is unclear as to what issues the CLECs want to	
		specifically address in the areas noted in their remarks above.	
		With respect to the CLECs' question regarding the basis for	
		rejecting a request due to cost, this process was provided in the CCP	
		Monthly Status Meeting held on October 23, 2002, which is still the	
		process used. The following is taken from the minutes from that	
		meeting:	
		(NV)	
		"When a change request is received, SMEs and other departments	
		evaluate the CR to determine if it can be supported. SMEs review the industry standards and also evaluate whether a change request is	<b>[</b>
		the midden y standards and also evaluate whether a change request is	·

BellSouth Proposed SQM Changes/Comments	CLEC's Broposed SOM Changes/Comments	Staff Comments (1997)

	technically feasible. Factors that are considered in this evaluation include:	
	Determining if an industry standard exists otherwise	
	consider opportunity to partner with CLEC at OBF for a standard	
	<ul> <li>Cost (both from a Center and System perspective) in high, medium or low categories</li> </ul>	
	<ul> <li>Estimating the additional work steps required to support the request (reviewing complexity of the change request and estimate of the system costs)</li> </ul>	
	<ul> <li>Impact on Flow Through</li> </ul>	
	Order Volume	
	Parity	
	<ul> <li>Considering an alternative solution that can be provided to support this CR"</li> </ul>	
	With respect to the CLECs' statement of a need to discuss "out of scope", the scope of CCP and Out of Scope definitions are defined in the CCP document, which can be accessed from the CCP website: <a href="http://interconnection.bellsouth.com/reference_library/processes/ccp_live/index.html">http://interconnection.bellsouth.com/reference_library/processes/ccp_live/index.html</a> . This Out of Scope process was jointly agreed to by the CCP Sub-Team comprised of BST and CLEC representatives. Section 4.0, Part 2, Types 2-5, Step 3 in Version 3.8 was added to the CCP document on 08/26/03.	
CM-9 [NDPR]: Number of Defects in Production Releases (Type 6 CR		
	None [are documentation defects being excluded?]	
Exclusion	BST Response This measure was not intended to address documentation defects. The CM-9 measure captures software defects.	
CM-11 [SCRI]: Percentage of Software Change Requests Implemented	within 60 Weeks of Prioritization	

	BellSouth Proposed SQM Changes/Comments (7/28/04)	CLEC stProposed SOM Changes/Comments + 8 - (5/28/04)	Staff Comments
Title/Exclusion/		60 48	
Calculation		BST Response BellSouth disagrees. The CLECs state as their reason for this proposed change from 60 weeks to 48 that the numbers of request have decreased. However, small volumes have always been a problem with this and the other change management measures. Even if the number of requests decrease, the development process involved and the associated time requirements from the point that a request is prioritized to the point in time it is implemented is still the same. There are factors related to system design life cycle requirements and release management that still affect the interval required. The 48-week interval is not appropriate and nothing has happened in the last six months to justify a change. To address the fact that small volumes have historically been a problem with this and the other change management measures. BellSouth would propose that these measurement results only be calculated once a year.	
APPENDIX			
Appendix A	IBS Integrated Billing Solution- Processes and rates UNE data as it flows from CRIS to CABS for billing	CAFÉ Common Access Front End – The BellSouth application CLECs use to submit ASRs for access services	
		CPSS This system enables access, wireless, and general carriers to perform Trouble Adminstration tasks including creating, maintaining and viewing the status of circuit trouble reports (serial format, carrier format, telephone format, message/trunk format circuits) from a desktop via the World Wide Web. To accomplish this, CPSS-TA interacts with the BellSouth WFA systems and the carrier users.	
		BST Response BellSouth disagrees with the proposed added interfaces. See BST's rationale for CLECs' proposed changes to OSS-1.

	BellSouth Proposed SEEM Changes (7/28/04)	CLEC's Proposed/SEEM/Changes 1/2/25 (7/28/04)	Staff.Comments.
		SEEM	
General	SEEM payments are considered remedies as opposed to penalties. Therefore, all occurrences of the words "penalty" or "penalties" when applied to SEEM liabilities have been changed to "remedy" or "remedies." respectively.		
Scope			
1.1	This Administrative Plan (Plan) includes Service Quality Measurements with corresponding Self Effectuating Enforcement Mechanisms to be implemented by BellSouth pursuant to Order No. PSC 05 0488 PAA TP TBD issued on May-5, 2005 TBD by the Florida Public Service Commission (the "Commission") in Docket No. 000121A-TP	,	
1.2	Upon the Effective Date of this Plan, all appendices referred to in this Plan will be located on the BellSouth Performance Measurements and Analysis Platform Reports website at: https://pmap.bellsouth.com.		
Reporting			
2.2	BellSouth will make performance reports available to each CLEC on a monthly basis. The reports will contain information collected in each performance category and will be available to each CLEC via the Performance Measurements and Analysis Platform website. BellSouth will also provide electronic access to the raw data underlying the SQMs.		
2.4	Final validated SEEM reports will be posted on the Performance Measurements and Analysis Platform website on the 15th of the month, following the posting of final validated SQM reports for that data month or the first business day thereafter.		
2.5	If BellSouth does not post any of the SOM or SEEM reports by the required due date. BellSouth shall pay penalties remedies to the Commission, in the aggregate, for all late SQM and SEEM reports in the amount of \$2000 per day. Such payment shall be made to the Commission for deposit into the state General Revenue Fund

150 200	7/28/04) Staff Comments 12: 12: 12: 12: 12: 12: 12: 12: 12: 12:
	Measurement Benchmark compliance criteria the fee paid for a
	particular submetric that failed at the Tier I level will be
	differentiated based on whether the same submetric that failed at
	the Tier 1 level (CLEC-specific) also failed at the CLEC
	aggregate level in the same month. In addition, fees will be assessed differently based on BellSouth's performance relative to
	the benchmark (> 5% or <= 5%). A different multiplier will be
	applied to the Fee Schedule (shown in Appendix A, Table 1: Fee
	Schedule for Tier 1 Per Transaction Fee Determination) to
	determine the amount of the Tier 1 payments. The chart below
	shows the applicable multipliers:
	CLEC Aggregate Per Transaction Fee Per Transaction Fee
	Performance > 5 % Below the Benchmark <= 5 % of Benchmark
	Passes (Fee)*(3/21) (Fee) * (1/3)
	Fails (Fee)*(5/22) for Ordering and (Fee) (2/3)
	Flow Through
	(Fee)*(3) for all other
	benchmark measures
4.3.2	Tier-2 Enforcement Mechanisms will be triggered by BellSouth's
4.3.2	failure to achieve applicable Enforcement Measurement
	Compliance or Enforcement Measurement Benchmarks for the
	State of Florida for given Enforcement Measurement Elements for
	three consecutive months. The method of calculation is set forth in
	Appendices C <sub>2</sub> and D <sub>3</sub> and E of this Plan.
4.4 Payment of Tie	er 1 and Tier 2 Amounts
4.4.1	If BellSouth performance triggers an obligation to pay Tier-1
	Enforcement Mechanisms to a CLEC or an obligation to remit
	Tier-2 Enforcement Mechanisms to the Commission or its
	designee, BellSouth shall make payment in the required amount
	on the day upon which the final validated SEEM reports are
	posted on the Performance Measurements and Analysis Platform website as set forth in Section 2.4 above.
4.4.2	For each day after the due date that BellSouth fails to pay pays a
7.7.2	CLEC less than the required amount, BellSouth will pay the
	CLEC 6% simple interest per annum on the difference between
	the required amount and the amount previously paid. The

	underpayment and interest will be paid to the CLEC in the next month's billing cycle.
4.4.3	For each day after the due date that BellSouth feils to pay pays the commission less than the Title T-beforementations.  For each day after the due date that BellSouth feelbattening the Commission less than the Title T-beforementation and the Commission as
	required anyone, beneficially with pay we are commission; and additional \$1,000 per day-6% simple interest per annum on the
	<u>difference between the required amount amount the amount amount to the previously paid. The underpayment and interest will be paid to the previously paid. The underpayment and interest will be paid to the</u>
	Commission in the next month's billing cycle.
4.4.7.1	If a SEEM overpayment is made to a CUEC in a prior month.
	Deligoum with apply the amount of its SEEM Hability to that
	overpayment made to the CLEC.
4.4.7.2	If a SEEM overpayment is made to a CLEC, and BellSouth's
	SEEM Hability satisfied and payable to that CLEC. In the text
	overpayment, then within 30 days of BellSouth's request, the
	CLEC shall repay the amount necessary to satisfy the remaining
	SEEM overpayment balance.
4.4.9	
	operating in more than one state regarding Selem payments land the recovery of SEEM overnavments) is a matter that is beyond
	the scope of this SOM/SEEM plan. For example, many CLECs
	operate in more than one state in BellSouth's region and the
	determination of what SEEM payments (if any) are owed to such
	about 2.5 Statustical paralle to seat state very seat and seat states of seat seat seat seat seat seat seat seat
	regional consolidated SEEM payment (instead of possibly nine
	monthly, state-specific SEEM payments). Such administrative
	arrangements have no impact upon Bellsouth's periorniance of
	with the performance standards set forth in any Commission
	approved SOM/SEEM plan.
4.4.10	SEEM remedies will not be made if total remedies due for an individual Of EC or the Commission total large than \$100 in a
	then month.
4.6 Change of Law	
4.6.1	Upon a particular Commission's issuance of an Order pertaining
	to Performance Measurements or Remedy Plans in a proceeding
	expressly applicable to all CLECs, beliaboun shall implement such properties of all clearly plants overing its such performance measures and remedy plants covering its such performance of the control of any changes to these allows.
0	mice for the Celebra, as well as any changes to those plans
Date: 8-16-2006	6-2006

	RellSouth-Rroposed-SEEM-Changes: 7/78/04/9	GLEC's Proposed SEEM Changes (See 1997)	Stati Comments
	ordered by the Commission, on the date specified by the Commission. If a change of law occurs which may relieve BellSouth's provisioning of a UNE or UNE combination, BellSouth shall Petition the Commission within 30 days if it seeks to cease reporting data or paying remedies in accordance with the change of law. Performance Measurements and remedy plans that have been ordered by the Commission can currently be accessed via the Internet at http://pmap.bellsouth.com. Should there be any difference between the performance measure and remedy plans on BellSouth's website and the plans the Commission has approved as filed in compliance with its orders, the Commission-approved compliance plan will supersede as of its effective date.		
4.11	Some metrics are calculated for the entire BellSouth region, rather than by state. Where these metrics are a Tier 1 SEEM submetric, a regional coefficient is calculated to determine the amount of the penalty remedy for the CLEC in each state. For example, the Acknowledgement Completeness Measurement can be measured for an individual CLEC, but only at the regional level. In several states it is also a Tier 1 SEEM submetric. Thus, if there is a failure in this measurement for a CLEC, it is necessary to determine the amount of penalty remedy for the CLEC in each state. A Regional Coefficient is used to do this. (Appendix E, Section E.6 describes the method of calculating the Regional Coefficients.) The amount of Tier penalty remedy for the CLEC in a state is determined by multiplying the regional affected volume by the Coefficient for the state and by the state fee.

	l Properties and Definitions		
C.2	Additionally, there are measures that are compared to a retail		
(Retail analog	analog at least in part where cell definitions do not exist that		1
measures not using	permit assignment of data for these measures to cells so the	l l	
the truncated z	truncated Z statistic cannot be calculated. The measures below		
statistic)	use a retail analog for comparison, plus or minus a variability	· ·	
	factor applied to the retail analog, resulting in a benchmark	<b>!</b>	
1	standard: These measures are:		
į į	OSS Response Interval(Pre-		
	Ordering/Ordering/Maintenance & Repair ) (+ 2 seconds)	!	
İ	Average Response Interval (M&R)	·	
	Billing Invoice Accuracy (- 5%)	<b>!</b>	
	Billing Mean Time to Deliver Invoices Timeliness (+1 day)	·	
	Speed of Average Answer Time in the - Ordering Centers	· · ·	
	(+ 5 seconds)		
	Trunk Group Performance (- 0.5%)		
	In addition, there are two measurements that use retail results		
	'plus' (2 seconds for OSS response time; 0.5% for Trunk		
	Blocking); resulting in a benchmark standard. These measurements are: OSS Average Response Time & Response		
i	Interval (Pre-Ordering) and Trunk Group Performance.		
C.2	Invoice Accuracy = $[(a-b)/a] \times 100$		
(Invoice Accuracy			
Example)	a = Absolute Value of Total Billed Revenues during current month		
	b = Absolute Value of Total Billing Related		
	Adjustments during current month		
	A numerical example of the penalty remedy calculation is given		

	BellSouth Proposed SEEM Changes	CLEC's Proposed SEEM Changes	
	(7/28/04)	(7/28/04)	Staff Comments
	below:		
	Example:	·	
:	CLEC DATA		
]	Bill Adjustments \$14,660.00 30,288.00 Total Billed Revenue \$336,529.00		
	1 lotal Billed Revenue \$330,329.00		
	BellSouth DATA		
	Bill Adjustments \$6,018,969.26 Total Billed Revenue \$484,691,922.40		
,	GLDGY : 4 P. : 1/22/6 520.00		
	CLEC Invoice Accuracy Ratio = [(3 <u>3</u> 66,529.00- 44,660.0030,288.00)/ 3 <u>3</u> 66,529.00] x 100 =		
	<del>96.00</del> <u>91.00%</u>		
	BST Invoice Accuracy Ratio ==		
	[(484,691,922.40-6,018,969.26)/ 484,691,922.40] x		
	100 = 98.75 <u>%</u>		
	Apply a variability factor of -5% to the BST Invoice		
	Accuracy Ratio: (98.75%-5%=93.75%)		
	Thus, the calculated values are:		
	CLEC Result = 96 <u>91</u> %		
	BellSouth Result = <u>98.7593.75</u> %		
	In Florida once it is determined that the BST percent is higher,		
	BellSouth pays the CLEC according to the Florida Fee Schedule.		
	The calculation would be $2\%$ of the adjustment = \$14,660 x .02 =		
	\$293.20 the difference in the CLEC Invoice Accuracy Ratio and		
	the BST Invoice Accuracy Ratio; multiplied by the total Bill Adjustments. Then multiply the results by 2% (Appendix A: Fee		
	Schedule).		
	For example:		
	<u>93.75% - 91% = 2.75%</u>		
	2.75% x \$30.288 = \$832.92		
Annaudiv F DCT	\$832.92 x 2% = \$16.66 SEEM Remedy Calculation Procedures

<b>\</b>	See Section E.3.1 for example.		
	See Section B.5.1 for example.		
E.4	Revised steps and examples for Tier-1 Calculation For		
(E.4.1)	Benchmarks as follows:		
	For each CLEC with five or more observations calculate		
	monthly performance results for the State.		
	2. CLECs having observations (sample sizes) between 5 and 30		
	will use small sample size table above.		
	3. Calculate the interval distribution based on the same data set		
	used in step 1.		
	4. If the 'percent within' (or equivalent percentage for small		
	samples) meets the benchmark standard, no remedies are		
	required. Otherwise, go to step 5.		
	5. Determine the <u>Total Volume Proportion (TVP)</u> by taking the		
	difference between benchmark and the actual performance		
	result. There will be two volume proportions calculated. If		
	the Total Volume Proportion is greater than 5 %, "Volume	•	
	Proportion 1"(VP1) will be 5% and "Volume Proportion 2"		
	(VP2) will be the difference between the Total Volume		
	Proportion and "Volume Proportion 1". If the Total Volume		
	Proportion is less than or equal to 5%, VP1 is equal to the		
	Total Volume Proportion and VP2 is equal to zero.		
	6. Calculate the Total affected volume (TAV) by multiplying the		
	Total Volume Proportion from step 5 by the Total CLEC1		
	Volume. The Total Affected Volume that deviates from the		
	benchmark by less than or equal to 5% ("Total Affected		
	Volume1," "TAV1") is obtained by multiplying Total		
	Impacted Volume by the VP1 from step 5. The Total		
	Affected Volume that deviates from the benchmark by greater		
	than 5% ("Total Affected Volume 2", "TAV2") is obtained		
	by multiplying the Total Impacted Volume by the "Volume		
	Proportion 2" from Step 5.		
	7. Calculate the payment to CLEC1 by multiplying the result of		
	step 6 by the appropriate dollar amount from the fee schedule.		
	CLEC1 payment = Affected VolumeCLEC1 * \$\$ from Fee		·
Ì	Schedule * multiplier. (Total Affected Volume   * \$\$from		
	Fee schedule * Fee Multiplier) + ( Total Affected Volume 2 *		
	\$\$ from Fee Schedule * Fee Multiplier). For the example		
	that follows, assume CLEC fee amounts are based on an		
	aggregate failure.

	been in another product disaggregation. Further, assume that the		
İ	number of records erroneously included is 110 records out of a		
	total of 86,000. In this example, the numerator and denominator		
	would both be reduced by 110 records and the z-score would be		
	recalculated. If the amount of the change was sufficient to meet		
	criteria 2, 4 or 5 above, the Reposting policy will be invoked.		
Force Majuere		CLECs maintain that BellSouth should be required to pay	
		remedies for SEEM performance measures with retail analogs	
		during a Force Majeure event (FME). There is no provision in the	
		Act, the FCC rules or in the state commissions' enabling statutes or	
		rules that exempts BellSouth from providing parity service before,	
		during or after an FME. Indeed, BellSouth itself has acknowledged	•
		that it must provide nondiscriminatory service despite an FME.	
		Discrimination in an FME is as harmful, if not more harmful, to	
		CLECs than discrimination in the absence of an FME. Therefore,	
	*	SEEMs should apply so BellSouth is properly incented to perform.	
		As the Florida PSC staff has already concluded, "[W]ithout	
		protection of the SEEM plan, CLECs are put at greater risk of not	
		receiving parity treatment."	
		If BellSouth is indeed providing parity service as required	
	•	in an FME, it should have no concerns regarding the application of	
		SEEM. Nonetheless, BellSouth objects. BellSouth claims	
		restoration after an FME was not contemplated in the formulation	
1		of the Performance Plans and restoration may involve activities	
<u> </u>		inherently and incidentally discriminatory, though beneficial to the	
		greatest number of customers based on existing conditions. The	
İ		CLECs disagree, and note that force majeure has always been an	
		issue in performance metrics proceedings, and that earlier versions	
		of SEEM in Georgia and Louisiana required BellSouth to petition	
		for and prove the need for force majeure relief.	
		Regarding the inherently discriminatory issue, BellSouth	
		has provided no evidence that its "greater good" restoration	
		scenario is in reality an issue affecting performance results.	
		Importantly, in the wake of the hurricanes in the 2005 season,	İ
		several CLECs experienced incidents they believed illustrated	ļ
		discriminatory treatment, and the Florida PSC staff concluded that	
		several of the examples presented legitimate cases of	
		discrimination – none of those were related to "restoration," but,	į
		rather, were straightforward order-and-provisioning issues.	
		CLECs also maintain that even if an FME serves to relieve	

BellSouth of its SEEMs obligations for all or certain metrics, an FME should not trigger "reveart" of the court in metrics with violation ("CMV") factor in the SEEMs calculation. Rather, with metrics excluded from SEEMs for an FNE, the CAV should simply remain in effect during the FME and then continue as before after the FME adhest, as though the FME and then continue as before after the FME adhest, as though the FME and then continue as before after the FME adhest, as though the FME and then continue as PME. CLECk believe that after priory vears that strength of the prior of the FME and the prior of the FME and the prior of the FME and FME. CLECk believe the after priory vears the after priory vears the after priory vears. The prior of the FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME and FME an	### ##################################	CLEC's Reproped SDEMIChanges State Companies State Companies	<b>X</b> 5
violation ("CMV") factor in the SEEMs calculation. Rather, with metrics excluded from SEEMs for a from SEEMs for all whold simply remain in effect during the FME and then continue as before after the FME abates, as thought of the FME never occurred. To do otherwise rewards BellSouth for its continuing poor performance when interrupted by the rehapenstance of any FME. CLECs believe that after prior years' hurricases, the CMV factor has not been, and should not have been, cleanes, the CMV factor has not been, and should not have been, cleanes, the CMV factor has not been, and should not have been, cleanes, the CMV factor has not been, and should not have been performance Plan. For those measures that remain subject to Force Majoure, CLECs recommend that BellSouth shave the burden of demonstrating that the performance standard was not met due to causes beyond BellSouth's control before being relieved of its obligation to pay remedies.  BST Response BellSouth agrees that it is obligated to continue providing nondiscriminatory service during force majoure events and is willing to discuss appropriate ways to address concerns that arise during soch events. However, SEEM is not a viable mental of a significant of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continuity of the continu			
metrics excluded from SEEMs for an FME, the CMV should simply remain in effect during the Fam and then continue as before after the FME abates, as though the FME never occurred. To do otherwise rewards BellStouth is continuing poor performance when interrupted by the mere happenstance of an FME. CLEC's believe that after prior years, "burricanse, the CMV factor has not been, and should not have been, restrated. CLEC's now seek to have this principle confirmed in the Performance Flan.  For those measures that remain subject to Force Majeure, CLEC's recommend that BellStouth shave the burden of demonstrating that the performance standard was not not due to cause by our Bellstouth's control before being rolleved of its obligation to pay remedies.  BST Raponse  BellSouth squees that it is obligated to continue providing nondiscriminatory service during force majeure events and is willing to discuss appropriate ways to address concerns that arise during such events. However, SEEM is not a viable method to address this concern. By definition, force majeure means that an event is prohibiting BellSouth from princing under normal circumstances, i.e., that the event significantly impairs BellSouth's ability to control is own processes. So the surface of the same principle assumption that BellSouth for propriets assumption that BellSouth for propriets and propriets assumption that BellSouth for propriets and propriets assumption that BellSouth for propriets assumption that BellSouth for propriets and propriets assumption that BellSouth for propriets and propriets assumption that BellSouth for provide service to CLEC's as an indication of discrimination.  There is no vehicle, nor known practical method, to comehow modify SEEM to compensate for those events that are beyond BellSouth's outperformance shorted to implement SEEM was also given the assumption that performance shorted to implement SEEM was insufficient to indicate whether discrimination occurred, SEEM has insufficient to indicate whether discrimination courted, S			
simply remain in effect during the FME and the continue as before after the FME abates, as though the FME never occurred. To do otherwise rewards BellSouth for its continuing poor performance when interrupted by mere happenstance of an FME. CLECs believe that after prior years' hurricanes, the CMV factor has not been, and should not been, rastrandt of CLECs now seck to have this principle confirmed in the Performance Plan.  For those measures that remain subject to Force Majeure, CLECs recommend that BellSouth shall have the burden of demonstrating that the performance standard was not met due to causes beyond BellSouth's control before being relieved of its obligation to pay remedies.  BST Response  BellSouth agrees that it is obligated to continue providing nondiscriminatory service during force majeure events and is willing to discuss appropriate ways to address concerns that arise during such events. However, Scient. However, Scient. However, Scient. However, Scient. However, Scient and address this concern. By definition, force majeure means that an event is prohibiting BellSouth from and access that the concern. By definition, force majeure means that an event is prohibiting BellSouth from forming under normal containing and event is prohibiting BellSouth from forming under normal containing and containing and force in the subject is assumption that BellSouth is no contained to the event singuificantly impair Bellsouth's assumption that BellSouth's is noticed of the events and conditions affecting its ability to provide service. Consequently, SEEM treats any measured shortfall in service to CLECs as an indication of discrimination.  There is no vehicle, nor known practical method, to somehow modify SEEM to compensate for those events that are beyond BellSouth's control. Much of this inability derives from the fact that SEEM was addigated to be a visit on some situations. 		majeure exemptions, which define instances where results from SEEM do not indicate discrimination. To now apply this mechanism in situations where by design it was recognized that it should not apply would be clearly inappropriate. The reasonable action is to develop a process that permits proper assessment of whether discrimination occurs during force majeure events.	
		As an example, Suppose that there are two neighborhoods. They are both adjacent to each other. Neighborhood A, a mix of CLECs and BellSouth customers, was not damaged severely by the storm a couple of downed lines, but after one day, everything is back up and normal. Neighborhood B is a heavy CLEC neighborhood where there is some cable that is exposed, trees are down all over the place, there is no power and BellSouth cannot even get into the properties to reestablish service for several days, maybe a couple of weeks as experienced with Wilma.	
		In that situation, those repair and install orders for neighborhood B would be used against BellSouth to calculate BellSouth's performance for repair and install intervals through no fault of BellSouth. In both Neighborhoods A and B, BellSouth could be providing nondiscriminatory service. Even if BellSouth is providing installations and repairs in the same way for any customer regardless of whether it is a CLEC or BellSouth customer in those neighborhoods where it has access, the SEEM results would indicate discrimination.	
		As to the question of treatment of Fail Month count post-force majeure, BellSouth does not reset the Fail Month count after a force majeure application is lifted. The Fail Month count is incremented based on the count before the FM application. Thus, if the Fail Month for a submetric was "2" before the force majeure exclusion applied and for the month after the force majeure exclusion is lifted, the same submetric is failed, the Fail Month count becomes "3".	
Date: 8	3-16-2006	Finally, the CLECs' suggestion that BellSouth should have the burden of demonstrating that performance was not met due to causes beyond its control before being relieved of SEEM obligation is both unreasonable and impractical. Every force majeure event is unique and disruptive. Thus, it is unreasonable to require BellSouth to attempt to document the massive level of detail	

**************************************	RellSouth Proposed SEFM Changes (7/28/04)	CLEC's Proposed SPEM Changes in (7/28/04)	Staft Comments
		necessary to address the issue of what is in and out of BellSouth control during a natural disaster. The existence of such an event should be presumptive evidence, in and of itself, that matters outside of BellSouth's control have impacted performance. The CLECs' suggestion is impractical because what the CLECs' are effectively suggesting is that BellSouth should have the burden of proving that it is not discriminating. The nature of a force majeure event is that it overwhelms the control that BellSouth would have under normal circumstances and replaces it with the need for emergency mode procedures.	
		BellSouth recognizes the CLECs' and Staff's desire to address the potential for discrimination to occur during force majeure events and is willing to work with CLECs and Staff to attempt to develop appropriate means to assess that occurrence. However, BellSouth remains of the position that simply applying SEEM during a FME is not a valid indicator (and thus not an appropriate means) of assessing whether discrimination exists during a FME.	
Commingling		The TRO defines commingling as "the connecting, attaching, or otherwise linking of an unbundled network element, or a combination of unbundled network elements, to one ore more facilities or services that a requesting telecommunications carrier has obtained at wholesale from an ILEC	
		It is the understanding of the CLECs that these products are not being measured and enforced through remedies.  As these products have begun and will continue to be used to provide local service, it is imperative that BellSouth's performance be subject to metrics and enforcement mechanisms. (Details of the CLECs' proposed metric are included in SQM red-line document.)	
		BST Response BellSouth does not agree with the CLECs' suggestion that commingled products are not being measured or subject to remedies. Because commingled circuits have a UNE component, the UNE portion of the is captured in the PMAP data for the SQM measurements. These products are also subject to remedies under the SEEM plan where applicable. The special access portion of these products are captured in the special access measurements.	

	BellSouth Proposed SEEM Changes (7/28/04)	CLEC's Proposed SEEM Changes *** (7/28/04)	Staff Comments
Special Access Measures		Add to SEEM. Like commingled products, special access is increasingly being used to provision local service, and BellSouth's performance should be incented by the same enforcement mechanisms which support other forms of local service provisioning.	
		BST Response BellSouth strongly disagrees for at least three reasons. As an initial matter, special access circuits should not be subject to SEEM remedies because the SEEM plan was developed in the context of section 271 proceedings, to protect against BellSouth backsliding in continuing to comply with its section 251 obligations (e.g., UNE, Resale, and Interconnection obligations) after receiving long distance approval. BellSouth has no section 251 obligation to provide special access circuits. Instead, special access service is a competitive market-driven service. Moreover, when CLECs order special access service from the FCC tariff, the FCC, not the state, has jurisdiction. Indeed, no state commission in BellSouth's territory has undertaken to impose remedies on special access measures.	
		Again, there are alternatives for CLECs other than BellSouth to provide these types of circuits. Therefore, there is competition in this market and the imposition of SEEM remedies, rather than allowing the marketplace to determine such matters, is unnecessary and counterproductive.	
		Additionally, in response to competitive demands in the provision of special access services, BellSouth's special access tariffs offer customers performance guarantees for the installation and reliability of certain BellSouth special access services. These guarantees include: (1) a Service Assurance Warranty ("SAW"), see FCC Tariff No. 1 § 2.4.9, and (2) a Service Installation Guarantee ("SIG"), see FCC Tariff No. 1, § 2.4.4. BellSouth also offers service level commitment in certain contract tariffs, which typically are negotiated to reflect the customer's individual needs.	
	16 2006	Moreover, the FCC is engaged in rulemaking that may lead to the adoption of federal performance measures and standards, including special access metrics.  In short, not only is it inappropriate to attempt to impose SEEM	

	BellSouth Proposed SEEM Changes (7/28/04)	CLEC's Proposed SEEM Changes 29 25	Staff Comments
		remedies on special access services, but also unnecessary and counterproductive.	
ATT/BST Merger		After the merger is completed, remove AT&T's performance results from the CLEC aggregate results used to calculate SQM and SEEM results.** However, pursuant to Section 4.7 of the SEEM plan, BellSouth shall provide monthly performance results for each metric for each BellSouth CLEC affiliate.	
		As BellSouth may well provide better service to its parent company, the inclusion of performance results for AT&T in the CLEC data is likely to skew performance results, masking discriminatory performance and adversely affecting the remedy payment amounts to which CLECs would otherwise be entitled.	
	·	In Order No. PSC-01-1019-FOF-TP, page 199, the Commission recognized that affiliate results, if in significant volume, could skew overall performance results, warranting their exclusion from calculation of CLEC aggregate results.	
		**Alternatively, before the next review, Staff could require that BellSouth calculate the remedies both ways to determine if this is a problem. If the better performance results for AT&T have skewed the Tier 1 remedies, the remedies that would have been due to CLECs should be paid in a lump sum and AT&T removed from the plan as the CLECs initially requested.	
		Increase penalties in fee schedules in proportion to the increase in revenues resulting from the merged companies.	
		The merger of BellSouth and AT&T will result in a more powerful and wealthy company. The current level of remedy payments will have substantially less impact on the financials of the company, and therefore on its incentive to provide non-discriminatory service and thus avoid payment of those remedies. Increasing the fee schedule proportionately will at least attempt to "keep whole" the financial incentive for BellSouth to maintain its current level of performance.	

456	BellSouth Proposed SEFM Changes (2) 22 (7/28/04)	CLEC's Proposed SEFM Changes (7/28/04)	Staff Comments
		BST Response With respect to the CLECs' first issue, BellSouth's CLEC affiliate data is not currently included in the CLEC Aggregate reports. This same approach will be taken upon completion of the merger between BellSouth and AT&T. However, BellSouth does not agree with the CLECs' suggestion that SEEM remedies should be increased in proportion to the revenues of the combined company after the AT&T and BellSouth merger.	
		As an initial matter, in each of the section 271 applications of ILECs, including BellSouth, before the FCC, the question of significant financial incentives to prevent backsliding was considered. As part of that consideration, the FCC looked at ILEC net revenues, but did so in reviewing what the cap on liabilities should be. In most cases, the FCC found that 36% of an ILEC's net revenue was significant enough of a financial threat to deter backsliding. BellSouth is subject to a cap on financial liabilities in each of its states, which is already tied to the amount of net revenues. The dollar value of this liability would increase if net revenues increase after the merger. Further, in no instance did the FCC express the need to apply some multiplier times the fee schedules based on company revenues. To have done so would run counter to its findings that these ILECs were providing CLECs with nondiscriminatory service.	
		Moreover, this request has nothing to do with an actual expectation by the CLECs of discriminatory service after the merger, but is instead simply an increase in the amount paid to CLECs for no valid reason. Under the current plan, a CLEC has no obligation to show that it experienced any measurable harm. Rather, BellSouth is required to make payments automatically under a bare presumption that discrimination has occurred. BellSouth has however agreed to pay remedies according to the current plan based on negotiations that took place between BellSouth and the CLECs as an outgrowth of last six-month review.	
		Thus, the CLECs are suggesting that, without any showing of need, the Commission should arbitrarily increase remedies based on the unsubstantiated speculation or remote possibility that once the merger is complete, performance will decline. This ignores the fact that even if their arbitrary proposal is rejected, the level of remedies will increase since this is a transaction-based plan. Again, the

BellSouth Proposed SEEM Changes (7/28/04)		Staff Comments
	CLECs are looking to conveniently dramatically increase SEEM	
	payments that it receives from BellSouth without the need for any	
	showing of harm or discrimination. Instead, the CLECs offer the	
	mere conjecture that the merger of AT&T and BellSouth somehow	
	equals the onset of discriminatory service.	
	.,,,	
	Proposing an increase in the fee schedule in proportion to the	
	purported increase in revenues resulting from the merged	
	companies is a uniformly misguided, impractical and arbitrary	
	notion.	
	First, each state that BellSouth serves and each state that AT&T	
	serves has an enforcement plan already in place. After the merger,	
	each state will still have an enforcement plan in place. The	
	CLECs' suggestion to increase the fee schedule for individual	
	states in proportion to revenues of the combined companies ignores	
	the fact that the merger does not eliminate any state from being	
	subject to individual state-established enforcement plans.	
	Second, the telecommunications marketplace, in Florida as	
	elsewhere, is highly competitive and evolving rapidly. Arbitrarily	
	increasing remedies in such an environment carries with it the risk	
	that the combined company will be forced to operate inefficiently	
	and sacrifice services to its own customers to avoid excessive	
	remedies.	
	Further, continuing to focus on remedies associated with resale and	
	UNE products does not incent CLECs and other market	
	participants to seriously pursue the introduction of new products,	
	and new technologies, which is the best means to deliver benefits to	
	consumers.	· ·
	"""	
	Thus, the CLECs suggestion to arbitrarily increase SEEM remedies	
	should be squarely rejected.

(7/28/04)	(4/28/04)) The Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salating Salati	Staff Comments
	involved, is inadequate. It creates incremental, continual and	
	disjointed change, and thus prevents CLECs' ability to understand	
	the cumulative and overall impacts on the metrics. CLECs believe	
	that accumulating and discussing these proposed changes	
	periodically in a workshop setting will permit the true impact of the	
	changes to be reviewed, discussed, and understood. It is likely to	
	improve the ability of auditors to review and evaluate the changes	
·	as well. Exceptions could be permitted (with the concurrence of	
	CLECs and Staff), should BellSouth encounter a problem that is	
	having significant impact on reported results.)	
	BST Response	
	BellSouth is willing to discuss possible solutions to the CLECs'	
	concerns, but there is one very important consideration that must	
	remain in focus. The changes included in the monthly data	
	notifications are required to make sure that the PMAP reports are	
	compliant with the SQM Plan that is in effect. Thus, the monthly	
	notification process is not the forum in which proposals are made	
	to change the plan. Rather, the requirements of the plan are set and	
	BellSouth is implementing code changes to ensure compliance with	
	the plan. The data notification process that is currently in place is a	
	process that the CLECs requested in Georgia and BellSouth agreed	
	to implement. The bottom-line is that BellSouth is obligated to	
	make sure that when it finds instances where the PMAP code is not	
	in compliance with the SQM, that it makes the necessary changes	
	to implement compliant code. What would not be acceptable is for	
	BellSouth to be aware of errors in the code and not be allowed to	
	make corrections in a timely fashion.
