Re: Alltel Communications, Inc.  
Application for ETC Designation in Entirely Served ILEC Study Areas

Dear Ms. Bayo:

Enclosed for filing is an application for designation of Alltel Communications, Inc. (Alltel) as an eligible telecommunications carrier in certain study areas entirely served by Alltel.

Additionally enclosed is Alltel's request for specified confidential classification of Exhibit D to the Application.

I have provided fifteen copies.

Thank you for your assistance with this filing.

Sincerely,

  
Stephen B. Rowell

FPSC-COMMISSION CLERK

**Before The  
FLORIDA PUBLIC SERVICE COMMISSION**

In the Matter of )  
 )  
Application of Alltel Communications, )  
Inc. for Designation as an Eligible )  
Telecommunications Carrier in Certain )  
Rural Telephone Company Study Areas )  
Located Entirely in Alltel's Licensed Area )  
Pursuant to Section 214(e)(2) of the )  
Communications Act of 1934 )

Docket No. 060582-TL

**APPLICATION OF ALLTEL COMMUNICATIONS, INC.  
FOR DESIGNATION AS AN ELIGIBLE TELECOMMUNICATIONS CARRIER  
IN THE STATE OF FLORIDA**

Alltel Communications, Inc., on behalf of itself and its wholly-owned and controlled licensee affiliates ("Alltel"), and pursuant to Section 214(e)(2) of the Communications Act of 1934, as amended (the "Act"), hereby petitions the Florida Public Service Commission ("Commission") for designation as an Eligible Telecommunications Carrier ("ETC") in the rural telephone company service areas that are located entirely within Alltel's licensed service area in the State of Florida. As demonstrated below, Alltel meets all the statutory and regulatory prerequisites for ETC designation in the rural telephone company areas, and Alltel's designation will serve the public interest.

**I. Alltel's Universal Service Offering.**

Alltel is the licensee authorized to provide cellular mobile radio telephone service in the following Cellular Market Areas in Florida: 43, 47, 61, 71, 149, 166, 218, 258, 280, 566, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578 and 579. Alltel intends to obtain high cost support in the rural telephone company areas to expand its coverage to include unserved or

DOCUMENT NUMBER-DATE  
07961 AUG 30 98  
FPSC-COMMISSION CLERK

underserved areas, to increase the service quality and reliability of its network, and to speed the delivery of advanced wireless services to the citizens of Florida. As an ETC, Alltel will also offer a universal service package to subscribers who are eligible for Lifeline support. Alltel's service offering will be competitive with those of the incumbent local exchange carriers ("LECs").

## **II. Alltel Satisfies All the Statutory and Regulatory Prerequisites for Designation as an ETC.**

As a CMRS carrier, Alltel is entitled to seek designation as an ETC.<sup>1</sup> Section 254(e) of the Act provides that "only an eligible telecommunications carrier designated under section 214(e) shall be eligible to receive specific federal universal service support." 47 U.S.C. § 214(e)(2) of the Act authorizes state commissions such as the Florida Public Service Commission to designate ETC status for federal universal service purposes and authorizes this Commission to designate wireless ETCs. The FCC's March 17, 2005 Federal-State Joint Board on Universal Service Report and Order goes even further when it notes that 47 U.S.C. § 214(e)(2) of the Act "provides state commissions with the *primary* responsibility for designating ETCs" (footnote 2, emphasis added).

### **A. The Florida Public Service Commission Has Jurisdiction to Designate Wireless ETCs**

On September 23<sup>rd</sup> 2003, the Commission issued Order No. PS03-1063-DS-TP. The Order found that the Commission did not have jurisdiction over CMRS providers, and therefore, lacked jurisdiction to designate CMRS providers as eligible telecommunications providers under 47 U.S.C § 214(e). However, the Florida Legislature subsequently enacted Section 364.011<sup>2</sup>, F.S. Although Section 364.011, F.S. exempts wireless telecommunications, including CMRS

---

<sup>1</sup> See *Federal-State Joint Board on Universal Service, First Report and Order*, 12 FCC Rcd 8776, 8858-59, ¶145 (1997) ("*First Report and Order*").

<sup>2</sup> Exhibit B

providers, from the Commission's jurisdiction, Section 364.011 F.S. sets forth an exception, which allows the Commission oversight to the extent "specifically authorized by federal law." Federal law, specifically § 214(e)(2) of the Act, authorizes state commissions like the Florida Public Service Commission to designate eligible telecommunications status on CMRS providers. Therefore, in light of the above referenced change in Florida law, the Commission now has the authority under Section 364.011 F.S. to act under Section 214(e)(2) of the Communications Act of 1934 and grant Alltel's request for designation as an eligible telecommunications carrier in the rural telephone company areas within its cellular service area in the state of Florida.

**A. Alltel Offers All of the Services Supported By the Federal High-Cost Universal Service Program.**

In order to be designated as an ETC, a carrier must be a common carrier and both offer and advertise the supported services throughout the designated service area.<sup>3</sup> The FCC has identified the following services and functionalities as the core services to be offered by an ETC and supported by federal universal service support mechanisms:<sup>4</sup>

1. Voice-grade access to the public switched telephone network;
2. Local Usage;
3. Dual-tone, multi-frequency ("DTMF") signaling, or its functional equivalent;
4. Single-party service or its functional equivalent;
5. Access to emergency services;
6. Access to operator services;
7. Access to interexchange service;
8. Access to directory assistance; and
9. Toll limitation for qualifying low-income consumers.

---

3. 47 U.S.C. §214(e)(1)

4 See 47 C.F.R. § 54.101(a)

The FCC *Section 214(e)(6) Public Notice* requires a carrier to certify that it provides each of the supported services, or where appropriate, functionally equivalent services.<sup>5</sup> As shown below and in the Declaration attached as Exhibit A hereto, Alltel currently provides, or will provide upon designation, each of the required services.

1. Voice-grade access to the public switched telephone network:

The FCC concluded that voice-grade access means the ability to make and receive phone calls, within a specified bandwidth.<sup>6</sup> Alltel meets this requirement by providing voice-grade access to the public switched telephone network. Through its interconnection arrangements with LECs, each of Alltel's customers is able to make and receive calls on the public switched telephone network within the specified bandwidth.

2. Local Usage:

Section 54.202(A)(4) of the FCC rules require an ETC Applicant to "demonstrate that it offers a local usage plan comparable to the one offered by the incumbent LEC in the service areas for which it seeks designation." The FCC has explained that an ETC applicant's local usage plans should be reviewed on a case-by-case basis to ensure that each ETC provides a local usage component in its universal service offering that is comparable to the plan offered by the incumbent LEC in the area<sup>7</sup>. The FCC has declined to adopt a specific local usage threshold<sup>8</sup>. Alltel commits to provide rate plans that include a substantial local calling area with a corresponding level of included local usage that provides an outstanding consumer value. A description of Alltel's current rate plans that are generally available in the areas for which Alltel

---

<sup>5</sup> *Section 214(e)(6) Public Notice*, 12 FCC Rcd at 22948.

<sup>6</sup> *First Report and Order*, 12 FCC Rcd at 8810-11.

<sup>7</sup> *Federal-State Joint Board on Universal Service*, CC Docket No. 96-45, Report and Order, 20 FCC Rcd 6371 (2005) ("*ETC Criteria Order*").

<sup>8</sup> *ETC Criteria Order* at ¶ 32.

seeks ETC designation is attached as Exhibit C hereto. Exhibit C confirms that Alltel includes local usage in each rate plan and that Alltel offers local calling areas that are substantially larger than those offered by the incumbent LECs. Further, since Alltel offers multiple universal service rate plans, customers have the opportunity to select a rate plan that best meets their needs based on the local calling areas and the amount of local calling included in each plan. Lastly, because competitive ETCs receive universal service support only for those customers that are served, a competitive ETC provider must deliver a competitive service package in order to receive funds.

3. Dual-tone, multi-frequency (“DTMF”) signaling, or its functional equivalent:

DTMF is a method of signaling that facilitates the transportation of call set-up and call detail information. Consistent with the principles of competitive and technological neutrality, the FCC permits carriers to provide signaling that is functionally equivalent to DTMF in satisfaction of this service requirement.<sup>9</sup> Alltel currently uses out-of-band digital signaling, and Alltel therefore meets this requirement.

4. Single-party service or its functional equivalent:

“Single-party service” means that only one party will be served by a subscriber loop or access line in contrast to a multi-party line.<sup>10</sup> The FCC concluded that a wireless provider offers the equivalent of single-party service when it offers a dedicated message path for the length of a user’s particular transmission.<sup>11</sup> Alltel meets the requirement of single-party service in this manner.

5. Access to emergency services:

The ability to reach a public emergency service provider by dialing 911 is a required service in any universal service offering. Alltel currently provides its customers with access to

---

<sup>9</sup> 47 C.F.R. §54.101(a)(3).

<sup>10</sup> *First Report and Order*, 12 FCC Rcd at 8810.

emergency services by dialing 911 in accord with this requirement through-out the geographic area where it is seeking ETC designation. Further, Alltel provides both automatic numbering information (“ANI”) and automatic location information (“ALI”) to public emergency service providers capable of both receiving and utilizing the data and has made arrangements with Alltel for the delivery of the data.

6. Access to operator services:

Access to operator services is defined as any automatic or live assistance provided to a consumer to arrange for the billing or completion, or both, of a telephone call.<sup>12</sup> Alltel meets this requirement by providing all of its customers with access to operator services provided by either the Company or other entities (e.g. LECs, IXC, etc.)

7. Access to interexchange service:

A universal service provider must offer consumers access to interexchange service to make and receive toll or interexchange calls. Alltel presently meets this requirement by providing all of its customers with the ability to make and receive interexchange or toll calls through direct interconnection arrangements between the Company and several IXCs. On most of the Company’s rate plans, interexchange calls can be made for no additional charge (i.e., all outgoing minutes are treated the same). Additionally, customers are able to reach other IXCs by dialing the appropriate access code or dial-around number.

8. Access to directory assistance:

---

<sup>11</sup> *Id.*

<sup>12</sup> *Id.* at 8817-18.

The ability to place a call to directory assistance is a required service offering.<sup>13</sup> Alltel meets this requirement by providing all of its customers with access to directory assistance by dialing either “411” or “Area Code + 555-1212”.

9. Toll limitation for qualifying low-income consumers:

An ETC must offer either “toll control” or “toll blocking” services to qualifying Lifeline customers at no charge. The FCC no longer requires an ETC to provide both services as part of the toll limitation service required.<sup>14</sup> In particular, all ETCs must provide toll blocking, which allows customers to block the completion of outgoing toll calls.<sup>15</sup> Once designated, as an ETC in the areas identified in this Application, Alltel will participate in Lifeline in these additional areas as required, and will provide toll blocking capability in satisfaction of the FCC’s requirement. Alltel currently has the capability to provide toll blocking and will provide this service at no charge to its Lifeline customers.

**B. Alltel Meets the Additional Eligibility Criteria Adopted by the FCC in the ETC Criteria Order.**

The FCC’s March 17, 2005 Report and Order established additional criteria that all ETC applicants must satisfy in order to be designated ETC status. The FCC found that an ETC applicant must demonstrate: (1) a commitment and ability to provide the supported services throughout the designated area; (2) the ability to remain functional in emergency situations; (3) that it will satisfy consumer protection and service quality standards; (4) that it offers local usage comparable to that offered by the incumbent LEC; and (5) an understanding that it may be

---

<sup>13</sup> *Id.* at 8821.

<sup>14</sup> 47 C.F.R. § 54.101 (a)(9). *See Federal-State Joint Board Universal Service, Fourth Order on Reconsideration*, 13 FCC Rcd 5318, 5388 (1997).

<sup>15</sup> *First Report and Order*, 12 FCC Rcd at 8821-22.

required by the FCC to provide equal access if all other ETCs in the designated service area relinquish their designations pursuant to Section 214(e)(4) of the Act.<sup>16</sup>

1. Commitment and Ability to Provide the Supported Services:

§54.202(a)(1) of FCC rules require an ETC applicant to demonstrate its commitment and ability to provide the supported services throughout the designated service area by: (A) committing to provide service throughout its proposed ETC designated service area to all potential customers making a reasonable request for service; and (B) submitting a five-year plan demonstrating how high cost universal service support will be used to improve its coverage, service quality and capacity throughout the service area for which it seeks ETC designation.

A. Commitment to Serve All Customers Making a Reasonable Request for Service:

Alltel certifies that: (1) it will provide service throughout the proposed ETC area using its standard customer equipment and service offerings where available; or (2) if a request within Alltel's licensed service area but outside its existing network coverage is received from a potential customer, Alltel will follow the steps described in Section 54.202(a)(1)(a) of the FCC rules. If, after following the steps specified therein, Alltel still cannot provide service, it will notify the requesting party and report the unfulfilled request to the Commission within 30-days after making such a determination. Furthermore, consistent with the requirement in Section 54.209(a)(3) of the FCC rules, Alltel will annually report the number of requests from potential customers that were unfulfilled during the pervious year. Alltel submits the above described service provisioning commitments will ensure that Alltel is responsive to consumers'

---

<sup>16</sup> See *Recommended Decision*, 19 FCC Rcd at 4259, para. 5.

needs in the ETC Service Areas, while acting as a proper steward of available high-cost support funds.

B. Five Year Service Improvement Plan:

Alltel submits its proposed five-year service improvement plan ("Plan"), attached hereto as Exhibit D, in accordance with FCC rule §54.202(a)(1)(b). Alltel's Plan contains highly confidential information, therefore, will be submitted separately in accordance with Rule 25-22.006 of the Florida Administrative Code and Section 364.183 of the Florida Statutes. The Plan describes projected improvements in both the previously approved non-rural telephone company areas<sup>17</sup> and the rural telephone company areas in which Alltel seeks ETC designation in this Application. The capital expenditures in the Plan represent substantially greater levels of financial commitment than Alltel would commit in the absence of high-cost support. As represented in the Plan, Alltel will also incur expenses associated with upgrading and maintaining its existing network in the ETC designated areas which are equally appropriate uses of high cost funds. Alltel submits that these plans must be flexible and are subject to change in response to general consumer demand, changes in technology and other appropriate factors. The priority under which each cell site is to be constructed is subject to change depending upon requests for service and other market factors. Alltel also commits to annually provide the Commission a progress report consistent with §54.209(a)(1) of the FCC rules. Alltel believes the five-year plan attached hereto as Exhibit D satisfies the requirements of an ETC Applicant and constitutes a good faith estimate of the universal service benefits – due to expanded coverage and improved signal and service quality - that customers in the state of Florida will enjoy if the Commission designates Alltel as an ETC in the requested areas.

---

<sup>17</sup> By Order released September 24, 2004 in CC Docket No. 96-45, the FCC designated Alltel as an ETC in the non-rural telephone commune areas in the state of Florida.

2. Ability to Remain Functional in Emergency Situations:

Alltel is able to remain functional in emergency situations. Alltel's network is designed to remain functional in emergency situations. Alltel has adequate amounts of back-up power to ensure functionality without an external power source, is able to reroute traffic around damaged facilities, and is capable of managing traffic spikes resulting from emergency situations.<sup>18</sup>

Alltel has deployed fixed and portable back up power generators at various locations throughout its network that can be deployed in emergency situations. These back up power generators are capable of keeping a cell site up and running until power is restored to the cell site, until system changes are made to reroute traffic or until a cell site on wheels (COW) is deployed. Alltel tests its back-up power generators regularly to ensure functionality. Alltel is capable of and will reroute traffic around damaged or out of service facilities by changing call routing translations as needed. Alltel is also able to deploy COWs as temporary cell sites when existing facilities are damaged or out of service for longer periods of time. Further, by changing call routing translations or deploying cell sites on wheels Alltel is able to manage traffic spikes throughout its network. As a long-term solution for managing increased traffic levels and traffic spikes, Alltel increases capacity at its cell sites, switches and transport facilities.

Finally, in accordance with FCC rule Section 54.209(a)(6) Alltel will annually certify that it is able to function in emergency situations. Alltel will also fulfill the annual outage reporting requirement described in §54.209(a)(2) of the FCC rules. §54.209(a)(2) of the FCC rules requires an ETC applicant to submit detailed information on any outage of at least 30 minutes in duration that potentially affect (a) at least ten percent of the end users served in a designated service area; or (b) a 911 special facility. Specifically, such a report must include

---

<sup>18</sup> 47 C.F.R. § 54.202(a)(2).

information detailing: (a) the date and time of onset of the outage; (b) a brief description of the outage and its resolution; (c) the particular services affected; (d) the geographic areas affected by the outage; (e) steps taken to prevent a similar situation in the future; and (f) the number of customers affected<sup>19</sup>.

3. Consumer Protection:

FCC rule §54.202(a)(3) states an ETC applicant must “demonstrate that it will satisfy applicable consumer protection and service quality standards. The FCC has determined that a commitment by wireless applicants to comply with the Cellular Telecommunications and Internet Association’s Consumer Code for Wireless Service (“CTIA Consumer Code”) satisfies this requirement. Other commitments will be considered on a case-by-case basis. Alltel has already committed to abide by the CTIA Consumer Code, for its entire wireless operations across the country, not simply those states in which it seeks ETC status. Although its commitment to this code goes well beyond a simple inducement to the Commission for the grant of ETC status, Alltel specifically commits that, as an ETC, Alltel will abide by the CTIA Consumer Code with respect to its ETC service areas.

In addition to its commitment to the CTIA Consumer Code, Alltel has taken several steps, on its own initiative, to further protect its customers and enhance service quality. For example, Alltel offers its customers an automatic one-minute credit for all dropped calls on its network. Alltel does not require a customer to call and report such instances. Instead, Alltel monitors its network for dropped calls and automatically credits customers’ accounts for dropped calls. In another initiative, in recognition of the fact that changing circumstances and needs may require customers to opt for a different rate plan, Alltel offers its customers the ability to change rate plans at anytime without extending their/current service contracts. These are two initiatives

---

<sup>19</sup> 47 C.F.R. § 54.209 (a)(2).

taken by Alltel to further protect its customers. Finally, if designated as an ETC, Alltel will satisfy the requirements in Sections 54.209(a)(5) and 54.209(a)(4) of the FCC rules by annually certifying its compliance with the CTIA Consumer Code and annually reporting the number of customer complaints per thousand handsets.

4. Local Usage:

As described in Section II (B)(2) of this Application and demonstrated in Exhibit C hereto, Alltel is committed to offering local usage plans comparable to those offered by the incumbent LEC in the service areas for which it seeks designation. Each of Alltel's service plans described in Exhibit C are within the scope of "comparability" as defined by the FCC in its March 17, 2005 Report and Order.<sup>20</sup> Further, Alltel will annually certify that it offers local usage plans that are comparable to those offered by the incumbent LEC in the relevant areas in accordance with Section 54.209(a)(7) of the FCC rules.

5. Equal Access:

In accordance with Section 54.202 (a)(5) of the FCC rules, Alltel acknowledges that the FCC may require it to provide equal access to long distance carriers in the event that no other ETC is providing equal access within the designated ETC area.<sup>21</sup> Further, pursuant to Section 54.209(a)(8) of the FCC rules, Alltel will file an annual certification acknowledging the fact that it may be required by the FCC to provide equal access to long distance carriers in the event that no other eligible telecommunications carrier is providing equal access within the service area.

---

<sup>20</sup> *ETC Criteria Order* at ¶ 33.

<sup>21</sup> 47 C.F.R. § 54.202(a)(5).

**C. Alltel Will Offer Supported Services Using a Combination of its Own Facilities and Resale of Another Carrier's Services.**

The FCC's *Section 214(e)(6) Public Notice* established that a carrier requesting designation must certify that it offers the supported services "either using its own facilities or a combination of its own facilities and resale of another carrier's services."<sup>22</sup> Alltel will provide the supported services using its own network infrastructure, consisting of antennas, cell-sites, towers, trunkings, mobile switching, and interconnection facilities. Alltel may, on a limited basis, provide service through resale of another carrier's service in areas lacking adequate coverage. *See also* Exhibit A.

**D. Alltel Will Advertise its Universal Service Offerings.**

Alltel will advertise the availability of the supported services and the corresponding charges in a manner that fully informs the general public within the designated service area of both the available services and the associated rates.<sup>23</sup> Alltel currently advertises its services through a variety of advertising media including newspapers, television, radio, public exhibits and displays and the Company website. Alltel will utilize the same media to advertise the universal service offerings throughout the ETC designated areas. Further, Alltel commits to advertise the availability of Lifeline and Link-Up discounts throughout the ETC designated areas.

**III. Alltel Requests ETC Designation in the Rural Telephone Company Service Areas That Are Located Entirely Within its Licensed Service Area in the State of Florida.**

Alltel, in its capacity as a provider of cellular services, is not a "rural telephone company" as that term is defined by 47 U.S.C. Section 153(37). Accordingly, Alltel is required

---

<sup>22</sup> *Section 214 Public(e)(6) Public Notice*, 12 FCC Rcd at 22949.

<sup>23</sup> *Id.*

to describe the geographic area in which it requests designation.<sup>24</sup> In this Application, Alltel requests ETC designation in the “rural” study areas, depicted on the maps attached hereto as Exhibits F-1, F-2 and listed in Exhibit E.

Pursuant to Section 54.207 of the FCC’s rules, a “service area” is a “geographic area established by a state commission for the purpose of determining universal service obligations and support mechanisms.”<sup>25</sup> In an area served by a rural telephone company, the FCC’s rules define “service area” to mean the LEC study area unless a different definition of service area is established for such a company.<sup>26</sup> The rural LEC study areas that Alltel serves in their entirety are set forth in Exhibit E attached hereto. The maps attached hereto as Exhibits F-1 and F-2 confirms that the rural study areas identified in Exhibit E are entirely within Alltel's licensed area. Therefore, the Commission may designate Alltel as an ETC in those areas upon a finding that such designation is in the public interest (see Section IV below).<sup>27</sup>

#### **IV. Granting This Application Will Serve the Public Interest.**

Prior to designating an eligible telecommunications carrier, the Commission must determine that such a designation is in the public interest.<sup>28</sup> The FCC, in the *ETC Criteria Order*, codified a fact-specific public interest analysis it had developed in prior orders as the appropriate process for determining that an ETC designation is in the public interest. The FCC determined that, in the case of an applicant seeking designation in an area served by a rural

---

<sup>24</sup> *Id.*

<sup>25</sup> 47 C.F.R. § 54.207(a).

<sup>26</sup> See 47 C.F.R. § 54.207(b); see also *Multi-Association Group (MAG) Plan for Regulation of Interstate Services of Non-Price Cap Incumbent Local Exchange Carriers and Interexchange Carriers*, Fourteenth Report and Order, Twenty-Second Order on Reconsideration, and Further Notice of Proposed Rulemaking, 16 FCC Rcd 11244 (2001) (“*MAG Fourteenth Report and Order*”).

<sup>27</sup> 47 U.S.C. § 214(e)(2).

<sup>28</sup> 47 U.S.C. § 214(e)(6); 47 C.F.R. § 54.202(c).

telephone company, it will consider the benefits of increased consumer choice, and the unique advantages and disadvantages of the applicant's service offering, as well as creamskimming issues when redefinition is requested. As demonstrated below, the Commission should find that designating Alltel as an ETC will serve the public interest.

**A. Benefits of Increased Consumer Choice.**

The FCC has recognized that designation of wireless ETCs promotes competition and benefits consumers in rural, high cost areas by increasing consumer choice, availability of innovative services and deployment of new technologies. Designating Alltel as an ETC in these rural areas will bring to rural customers the benefits described above that are otherwise available mostly to urban customers. Availability of universal service funds will enable Alltel to improve service quality and coverage in areas that it currently serves, and expand its services into areas that would not be economically feasible to serve absent universal service funding.

Universal service funding will enable Alltel to continue to operate and maintain a higher number of cell sites in high cost, low-density areas. Upon ETC designation, Alltel will offer qualifying customers a choice in their Lifeline/Link-Up provider. The mobility of wireless service will offer qualifying Lifeline/Link-Up customers an alternative means of communications that they do not currently enjoy. Further, improving and expanding the choices available to consumers will not only strengthen inter-modal wireless/wireline competition but also increase intra-modal wireless competition to the benefit of telecommunications customers throughout Florida. Finally, increased competition in the rural areas provides incentives to incumbent service providers to achieve new operating efficiencies and introduce additional choices, higher quality and better value to their customers.

**B. Unique Advantages and Disadvantages of Alltel's Service Offering.**

Designating Alltel as an ETC will also bring customers the unique advantages of mobility. The FCC recognized the unique advantages of mobility when it stated that:

[T]he mobility of telecommunications assists consumers in rural areas who often must drive significant distances to places of employment, stores, schools, and other critical community locations. In addition, the availability of a wireless universal service offering provides access to emergency services that can mitigate the unique risks of geographic isolation associated with living in rural communities.<sup>29</sup>

Further, because Alltel's local calling areas are significantly larger than those of the incumbent LEC, Alltel's customers will be subject to fewer toll charges and be able to communicate across greater distances more frequently. Alltel will make available several offerings to its customers with varying amounts of local calling and different local calling areas, allowing customers to choose a universal service offering that best suits their particular calling needs.

The FCC has acknowledged that the disadvantages of wireless service may include dropped calls and poor coverage.<sup>30</sup> However, the FCC found that Virginia Cellular's assurances to build new towers to improve coverage, its commitments to comply with the CTIA Code for Wireless Service and annually report the number of complaints per 1,000 handsets adequately addressed any concerns about the quality of Virginia Cellular's service.<sup>31</sup> Alltel understands that its business is built on customer satisfaction as evidenced by its recent initiative to voluntarily credit customers' accounts for dropped calls. Further, Alltel is a signatory to the CTIA Code for Wireless Carriers for its entire operations not only its ETC designated areas.

In addition, Alltel commits to maintain and construct cell sites in order to improve coverage, service quality and capacity. Attached as Exhibit D is Alltel's five-year plan estimates

---

<sup>29</sup> *Virginia Cellular* at ¶ 29.

<sup>30</sup> *Virginia Cellular* at ¶ 30.

<sup>31</sup> *Virginia Cellular* at ¶ 30.

how high cost universal service support will be used to improve its network. Finally, as described in Section II(C)(1) of this application Alltel has committed to respond to reasonable requests for service from potential customers that are within the ETC designated area, as required by Section 54.202(a)(1)(A) of the FCC rules. In instances where a request for service is received from a potential customer within the ETC area but outside Alltel's existing network coverage, Alltel has committed to take the steps required by the rules to respond to such request. Alltel's commitments to a network improvement plan and to respond to reasonable requests for service within the designated area mitigate any concerns that may exist regarding Alltel's network quality. Thus, grant of this petition will serve the public interest.

### **C. Creamskimming.**

Alltel is not requesting the Commission to redefine the study area requirement in this Application because the rural telephone company service areas identified in Exhibit E are located entirely within Alltel's licensed area. Therefore, designating Alltel as an ETC is in the public interest and the Commission should expeditiously proceed to grant this Petition.

### **VI. High Cost Certification.**

Under Sections 54.313 and 54.314 of the FCC's rules, carriers wishing to obtain high-cost support must either be certified by the appropriate state commission or, where the state commission does not exercise jurisdiction, must self-certify with the FCC and the Universal Service Administration Corporation ("USAC") their compliance with Section 254(e) of the Act. Alltel commits to use available federal high cost support for its intended purposes – the provision, maintenance and upgrading of facilities serving the areas for which support is intended.

Therefore, Alltel respectfully requests that the Commission issue a finding that Alltel has met the high-cost certification requirement and that Alltel is, therefore, entitled to begin

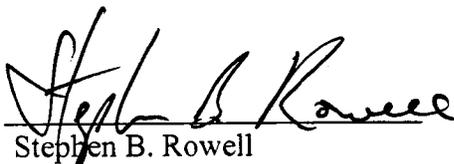

receiving high-cost support as of the date it receives a grant of ETC status in order that funding will not be delayed.<sup>32</sup>

### VIII. Conclusion.

Alltel respectfully request the Commission to designate it as an ETC on an expedited basis.

Respectfully submitted,

Alltel Communications, Inc.

**EXHIBIT A**

**DECLARATION**

## AFFIDAVIT

I, Gene Dejordy, do hereby declare under penalty of perjury as follows:

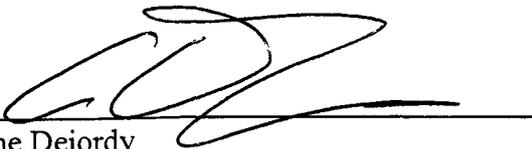

1. I am the authorized representative of Alltel Communications, Inc. ("Alltel") in charge of Alltel's Petition for Designation as an Eligible Telecommunications Carrier ("ETC") in the State of Florida. This affidavit is submitted in support of that Petition.
2. Alltel is authorized to provide cellular radiotelephone service in the State of Florida and is authorized to provide service in the requested ETC area described in its Application.
3. Alltel meets the criteria for ETC designation as explained herein.
4. Alltel is a "common carrier" for purposes of obtaining ETC designation pursuant to 47 U.S.C. § 214(e)(1). A "common carrier" is generally defined in 47 U.S.C. § 153(10) as a person engaged as a common carrier on a for-hire basis in interstate communications by wire or radio. Section 20.9(1)7 of the Commission's Rules provides that cellular service is a common carrier service. *See* 47 C.F.R. § 20.9(a)(7).
5. Alltel currently offers and is able to provide the services and functionalities identified in 47 C.F.R. § 54.101(a). Each of these services and functionalities is discussed more fully below.
  - a. Voice-grade access to the public switched telephone network. The FCC concluded that voice-grade access means the ability to make and receive phone calls, within a bandwidth of approximately 2700 Hertz frequency range. *See Federal-State Joint Board on Universal Service, CC Docket No. 96-45, First Report and Order, 12 FCC Rcd 8776, 8810-11 (1997) ("Universal Service Order")*. Alltel meets this requirement by providing voice-grade access to the public switched telephone network. Through its interconnection arrangements with local telephone companies, all customers of Alltel are able to make and receive calls on the public switched telephone network within the specified bandwidth.
  - b. Local Usage. Beyond providing access to the public switched network, an ETC must include local usage as part of a universal service offering. Although the FCC had previously deferred a determination on the amount of local usage carriers would be required to provide as part of its universal service offering, it recently declined to adopt a specific local usage threshold. *See Federal-State Joint Board on Universal Service, CC Docket No. 96-45, FCC 05-46, Report and Order ¶32*. The FCC concluded that a competitive ETC offer a local usage plan comparable to the one offered by the incumbent Local Exchange Carrier (LEC) in the service areas for which it seeks ETC designation. Alltel will meet such a requirement by offering rate plans that include a predetermined level of local usage within a substantially larger local calling area than the incumbent LEC. Alltel meets the

FCC's local usage requirement by offering customers (a) local usage plans which include a predetermined level of local usage; and (b) a universal service offering that provides a comparable value to the one offered by the incumbent LEC.

- c. Dual-tone, multi-frequency ("DTMF") signaling, or its functional equivalent. DTMF is a method of signaling that facilitates the transportation of call set-up and call detail information. Consistent with the principles of competitive and technological neutrality, the FCC permits carriers to provide signaling that is functionally equivalent to DTMF in satisfaction of this service requirement. 47 C.F.R. § 54.101(a)(3). Alltel currently uses out-of-band digital signaling and in-band multi-frequency ("MF") signaling that is functionally equivalent to DTMF signaling. Alltel therefore meets the requirement to provide DTMF signaling or its functional equivalent.
- d. Single-party service or its functional equivalent. "Single-party service" means that only one party will be served by a subscriber loop or access line in contrast to a multi-party line. *Universal Service Order* at 8810. The FCC concluded that a wireless provider offers the equivalent of single-party service when it offers a dedicated message path for the length of a user's particular transmission. *Universal Service Order* at 8810. Alltel meets the requirement of single-party service by providing a dedicated message path for the length of all customer calls.
- e. Access to emergency services. The ability to reach a public emergency service provider by dialing 911 is a required service in any universal service offering. Phase I E-911, which includes the capability of providing both automatic numbering information ("ANI") and automatic location information ("ALI"), is only required if a public emergency service provider makes arrangements with the local provider for the delivery of such information. Alltel currently provides all of its customers with access to emergency service by dialing 911 in satisfaction of the basic 911 requirement, and either provides, or will provide subscribers with Phase I and Phase II E-911 services in accordance with the deployment schedules agreed to by Alltel and local emergency service provider.
- f. Access to operator services. Access to operator services is defined as any automatic or live assistance provided to a consumer to arrange for the billing or completion, or both, of a telephone call. *Universal Service Order*, 8817-18. Alltel meets this requirement by providing all of its customers with access to operator services provided by either the Company or other entities (e.g., LECs, IXC, etc.).
- g. Access to interexchange services. A universal service provider must offer consumers access to interexchange service to make and receive toll or interexchange calls. Equal access, however, is not required. "The FCC do[es] not include equal access to interexchange service among the services supported by universal service mechanisms." *Universal Service Order* at 8819. Alltel presently meets this requirement by providing all of its customers with the ability

to make and receive interexchange or toll calls through direct interconnection arrangements the Company has with IXCs.

- h. Access to directory assistance. The ability to place a call to directory assistance is a required service offering. *Universal Service Order* at 8821. Alltel meets this requirement by providing all of its customers with access to directory assistance by dialing “411” or “XXX-555-1212”.
  - i. Toll limitation for qualifying low-income consumers. An ETC must offer either “toll control” or “toll blocking” services to qualifying Lifeline customers at no charge. The FCC no longer requires an ETC to provide both services as part of the toll limitation service required under 47 C.F.R. § 54.101(a)(9). *See Universal Service Fourth Order on Reconsideration*, FCC 97-420 (Dec. 30, 1997). In particular, all ETCs must provide toll blocking, which allows customers to block the completion of outgoing toll calls. *Universal Service Order*, at 8821-22. Alltel currently has no Lifeline customers because only carriers designated as an ETC can participate in Lifeline. *See* 47 C.F.R. § 54.400-415. Once designated as an ETC, Alltel will participate in Lifeline as required, and will provide toll blocking capability in satisfaction of the FCC’s requirement. Alltel currently has the technology to provide toll blocking and will use this technology to provide the service to its Lifeline customers, at no charge, as part of its universal service offerings.
6. I declare under penalty of perjury that the foregoing is true and correct. Executed on August 25, 2005.

Gene Dejordy  
Vice President – Wireless Regulatory  
Alltel Communications, Inc.  
Its Authorized Representative

TITLE 47 > CHAPTER 5 > SUBCHAPTER II > Part I > § 214

[Prev](#) | [Next](#)

## § 214. Extension of lines or discontinuance of service; certificate of public convenience and necessity

*How Current is This?*

### (a) Exceptions; temporary or emergency service or discontinuance of service; changes in plant, operation or equipment

No carrier shall undertake the construction of a new line or of an extension of any line, or shall acquire or operate any line, or extension thereof, or shall engage in transmission over or by means of such additional or extended line, unless and until there shall first have been obtained from the Commission a certificate that the present or future public convenience and necessity require or will require the construction, or operation, or construction and operation, of such additional or extended line: Provided, That no such certificate shall be required under this section for the construction, acquisition, or operation of

(1) a line within a single State unless such line constitutes part of an interstate line,

(2) local, branch, or terminal lines not exceeding ten miles in length, or

(3) any line acquired under section 221 of this title: Provided further, That the Commission may, upon appropriate request being made, authorize temporary or emergency service, or the supplementing of existing facilities, without regard to the provisions of this section. No carrier shall discontinue, reduce, or impair service to a community, or part of a community, unless and until there shall first have been obtained from the Commission a certificate that neither the present nor future public convenience and necessity will be adversely affected thereby; except that the Commission may, upon appropriate request being made, authorize temporary or emergency discontinuance, reduction, or impairment of service, or partial discontinuance, reduction, or impairment of service, without regard to the provisions of this section. As used in this section the term "line" means any channel of communication established by the use of appropriate equipment, other than a channel of communication established by the interconnection of two or more existing channels: Provided, however, That nothing in this section shall be construed to require a certificate or other authorization from the Commission for any installation, replacement, or other changes in plant, operation, or equipment, other than new construction, which will not impair the adequacy or quality of service provided.

### (b) Notification of Secretary of Defense, Secretary of State, and State Governor

Upon receipt of an application for any such certificate, the Commission shall cause notice thereof to be given to, and shall cause a copy of such application to be filed with, the Secretary of Defense, the Secretary of State (with respect to such applications involving service to foreign points), and the Governor of each State in which such line is proposed to be constructed, extended, acquired, or operated, or in which such discontinuance, reduction, or impairment of service is proposed, with the right to those notified to be heard; and the Commission may require such published notice as it shall determine.

### (c) Approval or disapproval; injunction

The Commission shall have power to issue such certificate as applied for, or to refuse to issue it, or to issue it for a portion or portions of a line, or extension thereof, or discontinuance, reduction, or impairment of service, described in the application, or for the partial exercise only of such right or privilege, and may attach to the issuance of the certificate such terms and conditions as in its judgment the public convenience and necessity may require. After issuance of such certificate, and not before, the carrier may, without securing approval other than such certificate, comply with the terms and conditions contained in or attached to the issuance of such certificate and proceed with the construction, extension, acquisition, operation, or discontinuance, reduction, or impairment of service covered thereby. Any construction,

Your comments

extension, acquisition, operation, discontinuance, reduction, or impairment of service contrary to the provisions of this section may be enjoined by any court of competent jurisdiction at the suit of the United States, the Commission, the State commission, any State affected, or any party in interest.

**(d) Order of Commission; hearing; penalty**

The Commission may, after full opportunity for hearing, in a proceeding upon complaint or upon its own initiative without complaint, authorize or require by order any carrier, party to such proceeding, to provide itself with adequate facilities for the expeditious and efficient performance of its service as a common carrier and to extend its line or to establish a public office; but no such authorization or order shall be made unless the Commission finds, as to such provision of facilities, as to such establishment of public offices, or as to such extension, that it is reasonably required in the interest of public convenience and necessity, or as to such extension or facilities that the expense involved therein will not impair the ability of the carrier to perform its duty to the public. Any carrier which refuses or neglects to comply with any order of the Commission made in pursuance of this subsection shall forfeit to the United States \$1,200 for each day during which such refusal or neglect continues.

**(e) Provision of universal service**

**(1) Eligible telecommunications carriers**

A common carrier designated as an eligible telecommunications carrier under paragraph (2), (3), or (6) shall be eligible to receive universal service support in accordance with section 254 of this title and shall, throughout the service area for which the designation is received—

**(A)** offer the services that are supported by Federal universal service support mechanisms under section 254 (c) of this title, either using its own facilities or a combination of its own facilities and resale of another carrier's services (including the services offered by another eligible telecommunications carrier); and

**(B)** advertise the availability of such services and the charges therefor using media of general distribution.

**(2) Designation of eligible telecommunications carriers**

A State commission shall upon its own motion or upon request designate a common carrier that meets the requirements of paragraph (1) as an eligible telecommunications carrier for a service area designated by the State commission. Upon request and consistent with the public interest, convenience, and necessity, the State commission may, in the case of an area served by a rural telephone company, and shall, in the case of all other areas, designate more than one common carrier as an eligible telecommunications carrier for a service area designated by the State commission, so long as each additional requesting carrier meets the requirements of paragraph (1). Before designating an additional eligible telecommunications carrier for an area served by a rural telephone company, the State commission shall find that the designation is in the public interest.

**(3) Designation of eligible telecommunications carriers for unserved areas**

If no common carrier will provide the services that are supported by Federal universal service support mechanisms under section 254 (c) of this title to an unserved community or any portion thereof that requests such service, the Commission, with respect to interstate services or an area served by a common carrier to which paragraph (6) applies, or a State commission, with respect to intrastate services, shall determine which common carrier or carriers are best able to provide such service to the requesting unserved community or portion thereof and shall order such carrier or carriers to provide such service for that unserved community or portion thereof. Any carrier or carriers ordered to provide such service under this paragraph shall meet the requirements of paragraph (1) and shall be designated as an eligible telecommunications carrier for that community or portion thereof.

**(4) Relinquishment of universal service**

A State commission (or the Commission in the case of a common carrier designated under paragraph (6)) shall permit an eligible telecommunications carrier to relinquish its designation as such a carrier in any area served by more than one eligible telecommunications carrier. An eligible telecommunications carrier that seeks to relinquish its eligible telecommunications carrier designation for an area served by more

than one eligible telecommunications carrier shall give advance notice to the State commission (or the Commission in the case of a common carrier designated under paragraph (6)) of such relinquishment. Prior to permitting a telecommunications carrier designated as an eligible telecommunications carrier to cease providing universal service in an area served by more than one eligible telecommunications carrier, the State commission (or the Commission in the case of a common carrier designated under paragraph (6)) shall require the remaining eligible telecommunications carrier or carriers to ensure that all customers served by the relinquishing carrier will continue to be served, and shall require sufficient notice to permit the purchase or construction of adequate facilities by any remaining eligible telecommunications carrier. The State commission (or the Commission in the case of a common carrier designated under paragraph (6)) shall establish a time, not to exceed one year after the State commission (or the Commission in the case of a common carrier designated under paragraph (6)) approves such relinquishment under this paragraph, within which such purchase or construction shall be completed.

**(5) "Service area" defined**

The term "service area" means a geographic area established by a State commission (or the Commission under paragraph (6)) for the purpose of determining universal service obligations and support mechanisms. In the case of an area served by a rural telephone company, "service area" means such company's "study area" unless and until the Commission and the States, after taking into account recommendations of a Federal-State Joint Board instituted under section 410 (c) of this title, establish a different definition of service area for such company.

**(6) Common carriers not subject to State commission jurisdiction**

In the case of a common carrier providing telephone exchange service and exchange access that is not subject to the jurisdiction of a State commission, the Commission shall upon request designate such a common carrier that meets the requirements of paragraph (1) as an eligible telecommunications carrier for a service area designated by the Commission consistent with applicable Federal and State law. Upon request and consistent with the public interest, convenience and necessity, the Commission may, with respect to an area served by a rural telephone company, and shall, in the case of all other areas, designate more than one common carrier as an eligible telecommunications carrier for a service area designated under this paragraph, so long as each additional requesting carrier meets the requirements of paragraph (1). Before designating an additional eligible telecommunications carrier for an area served by a rural telephone company, the Commission shall find that the designation is in the public interest.

change your rate plan whenever you  
need without extending your contract

**It's all about flexibility.**

Think you should be able to change plans when you need to? We couldn't agree more.

We understand that sometimes you just need to make a change. You're using more minutes than you thought would. You've gotten married. You've changed jobs. Whatever the reason, you won't have to extend your contract. Just let us know. It's that easy. We just want what's best for you.

Does not apply to certain business accounts. Plan changes may not become effective until beginning of your next billing cycle.

**Largest Network Claim:** Based upon analysis by an independent research company in July 2006, which compared marketed coverage patterns at the time their creation of each wireless carrier without allowance for variations due to electrical interference, customer equipment, topography & each carrier's translation & defined preferences of their own internal engineering data. **Stay Connected:** An automatic one-minute credit will be provided for any dropped voice call on the Alltel network. Not available on prepaid plans. No action is required by the customer to receive the credit. Total dropped calls will be reflected on the current month's billing statement. Dropped calls will not be credited when outside the Alltel network. Program may be discontinued at the discretion of Alltel. **My Circle:** Available to new and existing customers on current select rate plans \$59.99/mo & higher. My Circle applies to ten numbers per account, which must be shared among all lines on account. Not available on prepaid plans. Customer may not designate own wireless or voice mail number, Direct Assistance or 900 numbers as any of the ten available numbers. Calls must begin & end in your plan's calling area. Designated numbers must be within the U.S. Program may be discontinued at the discretion of Alltel. **Anytime Plan Changes:** Does not apply to certain business accounts. Plan changes may not become effective until beginning of your next billing cycle.

## stuff U should know

- **All U plans include free:** Nationwide Long Distance on calls originating from the Alltel Wireless Network, Voice Mail, Caller ID, Call Waiting and Three-Way Calling. You have the ability to call Mexico, Canada and Puerto Rico (per-minute rate varies).
- For voice mail instructions, visit [alltel.com](http://alltel.com)
- To check your account balance, dial \*36 a free call from your wireless phone.
- There are no roaming fees for calls made within the Alltel coverage network. If you roam off the Alltel network, your roaming rate is 59¢/minute.
- Directory Assistance is \$1.25 per call.

she brenzalized her wireless.

# E911 Service

Enhanced 911 (E911) service allows 911 dispatchers to receive a wireless caller's phone number and location when calling for help. Where available, this service helps improve response times during an emergency.\*

In order for 911 operators to see your location, a caller must have adequate signal and battery strength, as well as a GPS-equipped phone.

Helping to ensure the safety of our customers is important to us. That's why Alltel now only activates GPS-equipped phones.

To determine if your phone is GPS-equipped:

- Refer to your owner's manual.
- Visit [alltelstepbystep.com](http://alltelstepbystep.com).
- Ask an Alltel representative for assistance.

If your phone isn't GPS-equipped, ask an Alltel representative for more information.

\*Wireless E911 service that provides location capability may not be available in all areas. To find out if it is available in your county, visit the National Emergency Number Association's Web site at [www.nena.org](http://www.nena.org). Click on Wireless, then Wireless Deployment Profile.

## E-911

Your wireless phone is great to have in an emergency. However, calling 9-1-1 from your wireless phone is dependent upon adequate signal and battery strength in order to operate properly. If you are in an area where you can't receive a signal or if the battery is low, you won't be able to make any calls, including 9-1-1. However, with adequate signal strength, a wireless phone can dial 9-1-1 even if you have disconnected your service.

Another difference when using a wireless phone is that, depending on the public safety services available in your area, 9-1-1 operators may or may not be able to view your call back number or know your location. The ability of public safety entities to collect this information from your call is known as Enhanced 9-1-1 (E9-1-1) and is separated into two phases.

**Wireless E9-1-1: Phase I (Call Back) vs. Phase II (Location)** When Phase 1 service is implemented by a public safety entity, your wireless phone number is displayed to 9-1-1 operators when the call is connected as well as the address of the tower serving your call. Should the call be disconnected, the operator would still have your call back number.

Phase II service generally provides upgraded emergency call centers with your location when you make a call. This phase is a joint venture between the public safety entity and the wireless carrier. Both play a role in providing the service, and it is up to the public safety entity in the area to initiate the request. On Alltel's network, callers must have a GPS-capable phone in order for 9-1-1 operators to locate them.

Do you have a GPS-capable phone? To determine if your phone is GPS capable, look in your owner's manual or on your phone screen. In many cases, an icon such as a compass is displayed. If you do not have your owner's manual, most are available online at [alltel.com](http://alltel.com)-just click on "Step by Step Instructions." You may also bring your phone to an Alltel store or Authorized Agent for a free phone checkup to assess whether it is GPS capable and to learn more about upgrading your phone if it does not have this capability.

To comply with FCC mandates, Alltel only activates GPS-capable phones on our network and only sells phones that are GPS-capable.

It is important to note that a GPS-capable phone is only one part of the ability to locate a caller. The public safety entity in your area also must request and deploy Phase II technology with your wireless carrier. This life-saving technology is not yet available everywhere, although additional efforts are ongoing.

Want more E9-1-1 information? To find out more about all E9-1-1 deployment by county, simply go to the National Emergency Number Association's Web site at [www.nena.org](http://www.nena.org)-click on "Wireless" then "Wireless Deployment Profile." This information is not specific to one wireless carrier. For more information about our latest selection of phones, please visit an Alltel location or Authorized Agent.

## Customer Number & Call Record Privacy

Alltel strictly maintains customers' wireless phone number and call record privacy. It is company policy not to sell or release wireless phone numbers and/or call records to outside parties. Some customers may have recently seen news reports suggesting some wireless carriers sell or release their customers' wireless phone numbers or call records. This is generating customer questions about Alltel's policies.

Again, Alltel's company policy maintains customers' privacy and does not sell or release wireless phone numbers or call records. Alltel has a long history of protecting customer privacy and the company has many security measures in place to protect customers' records. Customer privacy is paramount and Alltel will make sure that it secures private customer information and does not share it with outside parties

## Wireless Safety on the Road

With so many people on the roads today, wireless phone safety is essential. In fact, it can save lives. Help make our roads safer by following these safe-driving tips from the Wireless Foundation.

### 1. Use speed dial and redial.

Carefully read your phone's instruction manual to learn to use quick-dial features such as automatic redial and memory. Plus, if you memorize your phone's keypad, you'll be able to use the speed dial function without taking your eyes off the road.

### 2. Use a hands-free device.

A number of hands-free wireless phone accessories are available today, including headsets, mounted devices and speakerphone accessories.

### 3. Keep your wireless phone within reach.

Be sure to place your wireless phone close enough so that you can grab it without removing your eyes from the road. If your phone rings at an inconvenient time, let your voice mail pick up the call.

### 4. Don't use your phone during hazardous driving conditions or situations.

Let the person you're speaking with know you're driving so you can suspend the call in hazardous situations. Rain, sleet, snow and ice can be dangerous, but so can heavy traffic. As a driver, your first responsibility is to pay attention to the road.

### 5. Don't take notes or look up phone numbers while driving.

Don't get caught in a dangerous situation just because you're not paying attention to the road. If you're reading an address book or business card, or writing a to-do list while driving a car, you're not watching where you're going.

### 6. Dial sensibly and assess the traffic.

If possible, place calls when you're not moving or before pulling into traffic. Try to plan your calls before you begin your trip or make them when you're stopped. If you need to dial while driving, dial a few numbers, check the road and your mirrors, then continue dialing.

### 7. Don't engage in stressful or emotional conversations.

Stressful or emotional conversations are distracting and even dangerous when you're behind the wheel of a car. Let those you're talking with know you're driving and, if necessary, suspend conversations that could potentially divert your attention from the road.

### 8. Use your wireless phone to call for help.

Your wireless phone can help you protect yourself and your family in dangerous situations. With your phone at your side, help is only three free numbers away. Dial 9-1-1 or another local emergency number in the case of fire, accident, road hazard or medical emergency.

### 9. Use your wireless phone to help others in emergencies.

Your wireless phone affords you the perfect opportunity to be a "Good Samaritan" in your community. If you see an auto accident, a crime in progress or a serious emergency, call 9-1-1 or another local emergency number.

### 10. Call roadside assistance or a wireless non-emergency number.

Certain driving situations require attention, but aren't urgent enough to merit a call for emergency services. In these cases, you can still use your wireless phone to lend a hand. Just call roadside assistance or another special non-emergency number.
