Re: Docket No. 060246-WS - Application for an increase in water and wastewater rates in Polk County by Gold Coast Utility Corp.

Dear Mr. Friedman:

We have reviewed the minimum filing requirements (MFRs) submitted on August 21, 2006, on behalf of Gold Coast Utility Corp. (Gold Coast or utility). After reviewing this information, we find the MFRs to be deficient. The specific deficiencies are identified below:

Rule 25-30.440, FAC, requires that each utility applying for a rate increase shall provide two copies of the following engineering information to the Commission, with the exception of item (1) of which only one copy is required

- CMP _____
- COM _____
- CTR _____
- ECR _____
- GCL _____
- OPC _____
- RCA _____
- SCR _____
- SGA _____
- SEC I
- OTH _____

1. Rule 25-30.440(1), FAC, requires the utility to provide a detailed map, (a) showing the location and size of the applicant's distribution and collection lines as well as its plant sites; (b) and the location and respective classification of the applicant's customers. The map submitted by the utility is not detailed and did not have the size(s) of water and wastewater lines. In addition, the map does not show the location and respective classification of the applicant's customers.
2. Rule 25-30.440(2), FAC, requires the utility to provide a list of chemicals used for water and wastewater treatment, by type, showing the dollar amount and quantity purchased, the unit prices paid and the dosage rates utilized; the utility did not provide a schedule showing, by month, dollar amount and quantity purchased.
3. Rule 25-30.440(3), FAC, requires the utility to submit its most recent chemical analyses for each water system conducted by a certified laboratory covering the inorganic, organic turbidity, microbiological, radionuclide, secondary and

unregulated contaminants specified in Chapter 17-550, F.A.C. The chemical analyses provided by the utility is incomplete.

4. Rule 25-30.431(3), FAC, requires the utility to submit its most recent wastewater capacity analysis report. The utility failed to provide this document.

If any above corrections require a corresponding change to any MFR schedules, those corrected schedules must also be submitted. Your petition will not be deemed filed until the deficiencies identified in this letter have been corrected. These corrections should be submitted no later than October 9, 2006.

Sincerely,

Timothy Devlin
Director
