COMMISSION CLERK

October 24, 2006  
Florida Power & Light Request

Pursuant to Section 119.07, F.S., documents submitted to this Commission are public records. The only exceptions to this law are specific statutory exemptions and exemptions granted by governmental agencies pursuant to the specific items of a statutory provision. Subsections 366.093(3)(b) and (e), F.S., provide the following exemptions.

Subsection 366.093, F.S., provides; "Proprietary confidential business information means information, regardless of form or characteristics, which is owned or controlled by the person or company, is intended to be and is treated by the person or company as private in that the disclosure of the information would cause harm to the ratepayers or the person's or company's business operations, and has not been disclosed unless disclosed pursuant to a statutory provision, an order of a court or administrative body, or private agreement that provides that the information will not be released to the public. Proprietary confidential business information includes but is not limited to:

....

(b) Internal auditing controls and the reports of internal auditors.

....

(e) Information relating to competitive business interests, the disclosure of which would impair the competitive business of the provider of the information...."

According to Section 366.093, F.S., and Rule 25-22.006, FAC, the utility has the burden of demonstrating that materials qualify for confidential classification. According to Rule 25-22.006, FAC, the utility must meet this burden by demonstrating that the information is proprietary confidential business information, the disclosure of which will cause the utility, the provider of the information or the ratepayer harm.

### **Staff Analysis of the Request**

Reading the FPL filing reveals the sensitive material consists of:

1. Information related to internal auditing reports and associated documents.

Subsection 366.093(b), F.S., provides that the Commission may grant a confidential classification to internal auditing controls and to the reports of internal auditors.

Witness Robert Onsgard, FPL Manager, Internal Auditing, identifies materials associated with FPL's internal audits as reported within staff working papers entitled: "List of Internal Audits." Witness Onsgard indicates the information remains current such that continued confidential treatment for an additional 18 months would be appropriate.

After reading the material identified by witness Onsgard, we agree that release of this material would reveal sensitive internal auditing controls and the reports of internal auditors.

## 2. Customer-specific account information

FPL asserts that customer-specific information should be granted a confidential classification on the basis that customer-specific information would harm competitive business interests. Subsection 366.093(e), F. S., provides that the Commission may grant a confidential classification to sensitive information concerning competitive business interests if release of that information will harm the provider of that information.

FPL witness Korel M. Dubin, FPL Manager, Regulatory Issues, identifies materials associated with customer-specific account information as reported within staff working papers entitled: "Customer Billing." FPL and FPL witness Dubin state FPL treats customer-specific information as confidential to include: customer names, addresses, telephone numbers, account numbers, rates, billing determinants (kW and kWh usage), conservation savings in kW, kWh and bills.

The Commission has allowed customer account information a confidential classification period longer than 18 months (See Commission Order No. PSC-03-1437-CFO-EG, issued December 19, 2003 in docket 030002-EG). After reading the information identified by witness Durbin we found that this information is customer specific and should be held as confidential for an additional 18 months because the information meets the definition of "proprietary confidential business information" set out in Section 366.093, Florida Statutes, in that release of this privately-held sensitive information would cause the provider of that information harm.

### **Information Held as Confidential**

To qualify as proprietary confidential business information, the material must also be held as private and not released to the public. FPL asserts that this information has not been released to the public. FPL witnesses Onsgard and Dubin assert FPL has maintained the confidentiality of those materials they have identified as sensitive.

### **Duration of the Confidential Classification Period**

FPL requests that this material be returned to the utility once the information is no longer needed for the Commission to conduct its business. According to the provisions of Section 366.093(4), F.S., absent good cause shown, confidential classification is limited to 18 months. Without cause shown for a longer period, we recommend that the period of confidential classification be set as 18 months. As deemed necessary, the utility may request an extension of the confidential classification before the period tolls.

**Staff Recommendation**

Based upon reading the filing, and for the reasons presented above, we recommend the utility's request be granted and that the identified material be granted a confidential classification for 18 months.

A detailed recommendation follows:
