REQUEST: Please provide the following concerning the replacement of 75 spans of cable as discussed on Page 9 of Kathy Blake's testimony.

- 1) Provide supporting documentation, construction work orders, invoices, continuing property records, etc., for the cost of the old damaged 75 spans of cable.
- 2) Provide supporting documentation, construction work orders, invoices, continuing property records, etc., for the cost of the new 75 spans of cable.
- 3) Provide a description of the new 75 spans of cable.
- 4) Did the new spans of cable include any upgrades? If so, provide what the upgrades were in detail and the additional cost.
- 5) Where is the cost for the cable replacement included on SP Exhibit 1 in your petition?
- 6) How much additional capacity did BellSouth achieve with the new 75 spans of cable?
- 7) Provide an exact location of where the new 75 spans of cable are located.

RESPONSE:

See spreadsheet and source document attached hereto as Attachment 1. 75 spans of cable were repaired, with 5 of the spans requiring replacement. These 5 cable spans were originally placed in 1981 and 1984 and information regarding the jobs placing this cable no longer exists. The sections of plant involved are shown on the work prints attached hereto as Attachment 2. The 5 new cable spans were included in job authorization D8932. See Attachment 2.

One of the new cable sections consists of 105' of self supporting 50 pair cables crossing Duval Street that is spliced to an existing piece of cable that feeds a small building terminal. The other section consists of 4 spans of 50 pair self supporting cable along Amelia Street along with four 25 pair distribution terminals. See Attachment 2.

CONFIDENTIAL

10-10.2

The 5 new cable spans replaced cables of the same size resulting in no additional capacity. Although the (4) 16 pair terminals were replaced with (4) 25 pair terminals, this was done solely for supply reasons rather than for increased capacity. In any event, the 5 new cable spans and new aerial terminals were charged to capital and are not included in BellSouth's request to recover its intrastate, incremental expenses set forth in the Petition.

cu
10/06

- REQUEST: 1. For Wilma, Feb 06, why was the following projection used for Contractual Services when the storm occurred much later in the year. Why the projection for Feb 06 was not used.

July Projection (using Jan-Jun Act) 4,697,000

2. For Katrina Sep 05, why was the following projection used for Contractual Services. Why the projection for Sep 05 was not used.

July Projection (using Jan-Jun Act) 4,768,000

RESPONSE:

For questions 1 and 2 above, there may be confusion over BellSouth's view terminology. The Commitment View is for all twelve months and is done in December. The Tracking views are simply the Commitment View overlaid with transfers between budgets. The subsequent Projection Views are named according to the month done and include actuals for all previous months and the best calculated projection (forecast) for future months, but each future month is projected individually. None of the views (commitment, tracking, or projection) have storm forecasted expense in any of the future months.

2005 Commitment View

Completed in December 2004

January - December 2005 months are all forecasts

July 2005 Projection View

Completed in July 2005

January - June 2005 months are actuals

July - December 2005 months are forecasts (but contain no storm impacts)

2006 Commitment View

Completed in December 2005

January-December 2006 are all forecasts

RESPONSE: (Cont.)

1. Objection, the subject question is ambiguous, unclear and contains improper predicate. Notwithstanding and without waiving said objections, the projection used for Wilma Feb 06 to determine the incremental impact was the 2006 Commitment View created in December 2005, which did not include any hurricane restoration expense and was the best and latest view BellSouth had at that time.

The Commitment View for Feb mo 2006 Contract Services Expense was
actuals were

2. Objection, the subject question is ambiguous and unclear. Notwithstanding and without waiving said objections, the projection used for Katrina Sep 05 to determine the incremental impact was the July Projection View for Sep 05 created in July 2005 which did not include any hurricane expense. In September 2005 the July 05 Projection view was the best and latest view at that time.
