RE: Qwest Communications Corporation ("Qwest") In re: Flow-through of LEC Switched Access Reductions by IXCs, Pursuant to Section 364.163(2), Florida Statutes and Request for Competitive Classification Pursuant to Florida Public Service Commission Rule 22-006(4). Docket No. 030961-TI; Order No. PSC-04-0456-FOF-TL

In accordance with the Florida Public Service Commission ("Commission") Order No. PSC-04-0456-FOF-TL, Qwest is filing the following tariff changes to comply with the Commission's interexchange carrier ("IXC") flow through order requiring tariff modifications to account for retail Residential and Business switched access saving. The changes reflected in the tariff will be effective on February 1, 2007.

The Commission order requires an IXC's tariff filing specifically include several items.

- (1) *A calculation of the dollar benefit associated with the ILEC's intrastate access rate reduction.*

Qwest determined the dollar benefit associated with Bell South's intrastate access rate reduction in the following manner:

CMP 1
COM _____
CTR _____
ECR _____
GCL 1
OPC _____
RCA _____
SCR _____
SGA _____
SEC _____
OTH _____

- Calculating the actual number of consumer residential and business minutes of use ("MOU") for each ILEC over a period of 12 consecutive months January 2006 – December 2006.
- Annualizing the MOU in originating and terminating ILEC traffic separately for residential and business retail customers.
- Each ILEC residential and business MOU was then multiplied by the access rates for each ILEC both before filing their reductions and the currently filed ILEC access rate reductions.
- The difference between the old rate and new rate annualized is the dollar benefit associated with the ILEC's intrastate access rate reductions.

The underlying data regarding minutes of use were internally generated and then checked against data supplied by the ILECs who chose to generate reports for the IXCs. The total amount of consumer switched access savings anticipated for February 2007 through January 2008 will be [REDACTED]. The data used in calculating the amount is highly confidential and competitively sensitive data, and can be made available if requested under seal of confidentiality.

(2) *Separate demonstrations that residential and business long distance rates have been reduced and the estimated annualized revenue effect, residential and business, including how those estimates were made.*

Qwest's IXC residential and business flow-through reductions are demonstrated in its enclosed tariff filing including changes to its FPSC Tariff No. 1, by the following:

FL2007-001
RECORDED & FILED

CONFIDENTIAL AND PROPRIETARY

Jeffrey P. Wirtzfeld
Regional Director – Public Policy

- Qwest will reduce its in-state access recovery fee for residential customers from [REDACTED] to [REDACTED], or [REDACTED] per pic'd line. This will amount to a savings of [REDACTED].
- Qwest will reduce its Small Business and Mid Markets (business) long distance rates by [REDACTED] per minute for the Qwest ("QBIZ") plan. This reduction will result in a forecasted amount of [REDACTED].
- Qwest will reduce its commercial (business) long distance rates by [REDACTED] per minute for the Qwest Total Advantage ("QTA"), Integrity and Q.Guaranteed plans. This reduction will result in a forecasted amount of [REDACTED].

Qwest has included as Confidential Attachment A to this letter, the anticipated monthly amount of flow through savings to its Florida consumer and business retail intrastate long distance customers.

(3) *A demonstration that all rate reductions have been flowed through.*

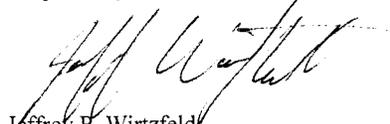

Qwest's total flow through rate reductions for residential customers amount to [REDACTED] and the rate reductions for business customers equal [REDACTED] which together total [REDACTED] in annual reductions. The savings received from the ILEC reductions indicated that Qwest needed to flow through to retail customers [REDACTED]. Therefore, Qwest has reduced long distance rates for residential and business customers at the same level as savings realized on those products with the switched access reductions by Bell South.

The information contained in Confidential Attachment A is proprietary confidential business information pursuant to Florida Statutes Section 366.093 (3) (e) (2005). The disclosure of this information, which contains competitively sensitive market penetration data, would cause harm to Qwest's competitive business operations and affect its ability to compete in the state of Florida.

Qwest respectfully requests that Confidential Attachment A be classified as confidential pursuant to Rule 22-006 (4). *Florida Public Service Commission Rules*. Correspondingly, Qwest respectfully requests that the information contained in Confidential Attachment A be exempted from Florida Statutes Section 119.07 (1), thereby according it stringent procedural safeguards against public disclosure.

Acknowledgment and date of receipt of this transmittal are requested. A duplicate letter and self-addressed, stamped envelope are attached for this purpose. If you have any additional questions regarding this filing, please do not hesitate to contact me directly at 303-896-0032.

Respectfully Submitted,

Jeffrey P. Wirtzfeld
Regional Director – Public Policy
Enclosures

Qwest calculated the proportion of Florida business customers versus residential customers and based its business to residential IXC retail intrastate long distance revenue reductions accordingly. Because Qwest has a higher proportion of business customers in Florida, the primary impact of its switched access savings is on the business portion of its long distance customers.

[REDACTED]

RE: Qwest Communications Corporation ("Qwest") In re: Flow-through of LEC Switched Access Reductions by IXCs, Pursuant to Commission Order No. PSC-04-0456-FOF-TL

Dear Ms. Salak:

Enclosed please find an original and three (3) copies of Qwest Communications Corporation's ("QCC") filing to revise its Tariff FPSC Tariff No. 1. The materials consist of tariff pages as indicated on the following sheets:

Page No.	Revision No.	Page No.	Revision No.
Check Sheet 2	82nd Revised	157.1	3rd Revised
Check Sheet 2.1	63rd Revised	157.2	3rd Revised

4.61 Q.guaranteed (Continued)Q.guaranteed - FramePlus

FramePlus frame relay service is a public, fast-packet data network offering. Customers access FramePlus at Qwest's closest Points of Presence (POPs). Within the POP, Qwest designs and installs Network Node connections on the FramePlus network. A Network Node is comprised of a Port Connection and Permanent Virtual Circuits (PVCs) that define the connections between customers' ports. Qwest dynamically allocates capacity across these logically assigned PVCs, supporting multiple customer data networks.

FramePlus supports a variety of simultaneous data applications over a single integrated facility. It is optimal for applications requiring transmission between multiple locations that need high speed connectivity with low latency or delay.

4.62 Q.bizGeneral Description

Q.biz is a service line consisting of switched outbound, switched inbound and card services. The services have flat rates which are based on term and minimum usage commitments. Q.biz is intended for the small business segment billing a total of \$50 to \$2,500 in telecommunications services monthly. This service works well with both single locations and multiple location businesses.

Billing/Rounding

Intrastate rates are quoted in full minutes. Call rounding is thirty (30) second initial and one (1) second incremental. Call duration is calculated on a per call basis rounding up to the full increment. Call rating is on a bulk basis (all call duration totaled and then rated). Total is rounded to the nearest full cent.

Rates

The per minute usage rates are as follows:

<u>Monthly</u>	<u>Term</u>
\$0.090	\$0.0571 (R)
\$0.0571 (R)	\$0.0521* (R)

WorldCard

The WorldCard is billed in initial thirty (30) seconds and in six (6) second additional increments. The WorldCard rates are as follows:

All time periods	\$0.30
Surcharge, per call	\$0.00

Terms and Agreements

Q.biz is available in month to month, twelve (12) and twenty-four (24) month term plans. There is a minimum monthly usage commitment of \$25 for customers receiving service under both the monthly and term plans. If the customer's invoiced usage charges are less than the required minimum monthly usage commitment, the customer will be billed and required to pay a short fall charge equal to the difference between the monthly commitment and the actual amount billed. This short fall charge will be applied beginning with the customer's first full month's invoice.

- These rates are applicable to all new customers who sign up for Q.biz after October 1, 2000.
