Re: Docket No. 060254-SU, Application for increase in wastewater rates in Pinellas County by Mid-County Services, Inc.

Dear Mr. Eberius:

This letter is to follow-up your phone conversation with me and confirm our reservation of the William E. Hale Activity Center-Ballroom for Wednesday, October 18, 2006, from 2:00 pm to 10:00 pm. We are planning to hold afternoon meetings from 2:00 pm to 4:00 pm, followed by a general customer meeting beginning at 6:00 pm. We may finish the general customer meeting before 10:00 pm depending on the number of attendees and the number of comments received.

I am attaching a seating arrangement which we normally use for these public meetings. If you have any questions, please contact me at (850) 413-6934. Thank You.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Rendell".

Troy Rendell
Public Utilities Supervisor

TR/jr
Enclosure

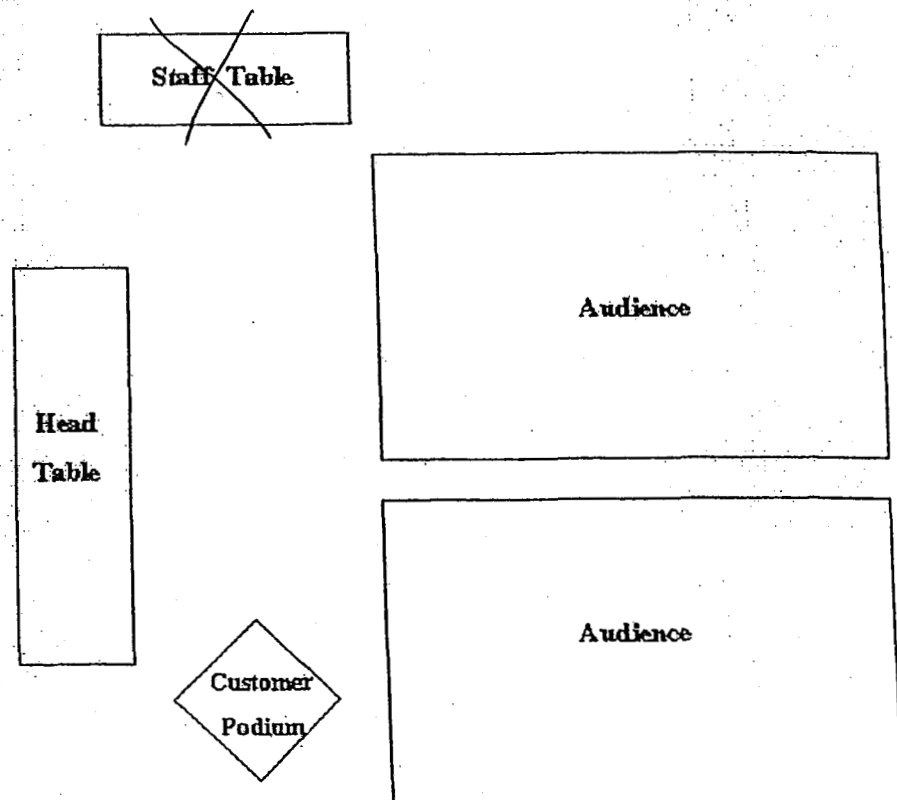

cc: Division of Economic Regulation (Rendell, Massoudi, Revell)
Office of General Counsel Services (Gervasi)
Division of Commission Clerk and Administrative Services

MEETING ROOM SETUPSeating

If at all possible, the head table should be on an elevated platform in front of the audience. A raised bench such as we have at the Commission is best. A table may only be used if the front and sides are covered with a modesty skirt. Folding tables with an open front are appropriate only when using a modesty skirt.

A separate podium or table to one side of and facing the head table (away from the audience) is required for customers. ~~A second table or bench on the opposite side of the head table from the customer podium is for staff. Another table may be necessary if a court reporter is required.~~

The meeting set up should appear as shown below:

Public Address System

A minimum of two microphones (three are preferred); one for the head table and one for the customer podium, is required. The public address system should be sufficient to ensure that the audience can hear what is being said in normal speaking voices.

RE: Docket No. 060254-SU, Mid-County Services Inc.

To Whom It May Concern:

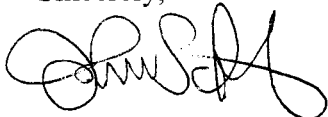

I am writing to voice concern over the proposed increase in wastewater rates for Mid-County Services. The letter I received states that although the company netted a profit, they had to raise rates due to "inadequate earnings." I feel the Commission would be inappropriate in granting their proposed increases in wastewater rates. Florida residents and homeowners are already being pushed to budget limits with staggering increases in taxes and property insurance.

In our subdivision, Highland Woods, there are three phases to the neighborhood. In Phase I, the residents utilize reclaimed water to irrigate their lawns and landscape. In Phases II and III, residents must utilize potable water to irrigate the lawn and landscaping. In a time where water conservation is a major concern, Mid-County Services, Inc. refused to install reclaimed pipe lines into the rest of the neighborhood, as indicated in the enclosed letter from the city of Dunedin. This results in each household wasting potable water supply on a daily basis. Although my residence only consists of myself and my wife our bi-monthly water usage is 3 times that of the average customer in Pinellas County. This is due to the thousands of gallons of water it takes to run the irrigation sprinklers, even at one time a week.

If these proposed increases are granted, the end result to homeowners will be excessive due to the large amounts of water the residents need to use to sustain our properties. I would suggest that the proposed increases by Mid-County Services Inc. be denied. Perhaps they should examine ways to improve their efficiency and effectiveness of wastewater production. In addition, this company should be strongly encouraged to place reclaimed water into these homes. The homeowners would more than likely share some of those costs to save money and water in the future.

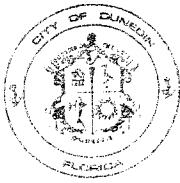

Thank you for your consideration into this matter.

Sincerely,

John W. Scherpf

Re: Reclaimed Water Service

Dear Mr. Scherpf:

Thank you for your letter received May 18, 2006 concerning water conservation and reclaimed water service to Highland Woods Phase II. We are fully in agreement with you on the importance of water conservation. I also find it perplexing that the developer used multiple municipal and private utilities to provide service to Highland Woods.

The City of Dunedin potable well field is located within the City limits. The City does not utilize the regional water resources provided through Tampa Bay Water and the Pinellas County Utilities. Basically, the City is self reliant for drinking water.

In 1992, a reclaimed water system was initiated to decrease the well field pumping rate. The system was designed to service 4,000 customers. In 2000, when there were less than 3,000 customers, pressure issues began and on Memorial Day the system ran out of reclaimed water as a result of the very high customer irrigation demand. The City Commission established a moratorium for new connections until new sources of reclaimed water became available or other initiatives developed to ensure customer service. Since that time, the City initiated a number of reclaimed water conservation programs to assist customers in the efficient use of the reclaimed water. The City obtained a permit from the Southwest Florida Water Management District (SWFWMD) allowing the use of groundwater as augmentation to the reclaimed water system. This permit included limitations on daily and annual groundwater pumping for augment. To use this augmentation permit, the City was obligated to connect additional customers for reclaimed water service. These new customers would use reclaimed water for irrigation during the entire year, which leads to a decrease in the Dunedin well field pumping. We are anticipating a 5% decrease in pumping with a customer base of 4,000.

As you noted in your letter, Pinellas County Utilities provides potable water service to Highland Woods. The County's water is supplied by Tampa Bay Water which uses groundwater and surface water from counties and cities around Tampa Bay. Although City of Dunedin reclaimed water would replace those potable sources provided by

"The City of Dunedin does not discriminate on the basis of race, color, national origin, sex, religion, age, and disabled status in employment or the provision of services"

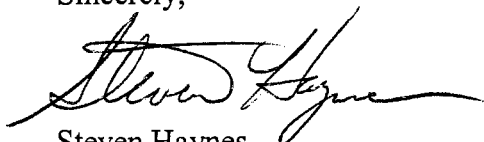

Pinellas County Utilities, it would not help the SWFWMD permit requirement to decrease the Dunedin well field pumping.

Historically, we contacted the private wastewater utility serving Highland Woods to receive their treated effluent as another reclaimed water source. Unfortunately, the utility declined that opportunity. This was very discouraging because the City already committed to provide reclaimed water to Highland Woods Phase I. Since there was no benefit to the City for well field pumping reduction and no benefit in obtaining additional reclaimed water from Highland Woods, additional services to Highland Woods Phase II will not occur. I suggest that you contact the private utility providing sewer services. At one time they were called Mid-County Utilities. If there is adequate interest among Highland Woods residents, Mid-County Utilities might consider establishing their own reclaimed water system.

From a pure business aspect, it is not cost effective for Dunedin to invest in an expanded reclaimed water system for Highland Woods Phase II. The City's reclaimed water system is limited to approximately 330 uncommitted connections for new customers. These connections will be filled by customers located along existing reclaimed water mains and whose reclaimed water use will lead to a reduction in Dunedin well field pumping. The 330 new connections carry no additional costs to the City.

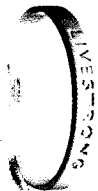

It is truly regrettable that Dunedin cannot provide reclaimed water to Highland Woods Phase II. I am available to meet with you to discuss this further. Please contact me or Irvin Kety, Division Director of Water, at 298-3100.

Sincerely,

Steven Haynes

Customer Meeting Set for Mid-County Services, Inc.

TALLAHASSEE — The staff of the Florida Public Service Commission (PSC) will conduct a customer meeting on Wednesday, October 18, 2006, for customers of Mid-County Services, Inc. (Mid-County). Mid-County is a wastewater utility serving approximately 2,144 customers in Pinellas County and has applied for an increase in rates. The utility's last rate case was in February 2004.

The purpose of the meeting is to provide customers an opportunity to comment on the proposed rate increases and any quality-of-service issues relevant to the utility. Customers are invited to attend the meeting at the following time and location:

Wednesday, October 18, 2006

6:00 p.m.

William E. Hale Activity Center – Ballroom
330 Douglas Avenue
Dunedin, Florida

Dear Mr. Scherpf:

Thank you for your letter received on October 17, 2006, regarding reuse policies of Mid-County Services, Inc. Your letter will be placed in the correspondence side of the docket file in this case, where your concerns will be available for review by Commissioners and Commission staff.

We have asked the utility to respond to your questions concerning its reuse policy. After we have reviewed the utility's response, we will determine an appropriate course of action in this docket.

If you have any additional questions or require further assistance regarding this matter, please call me at (850) 413-6934.

Sincerely,

A handwritten signature in black ink, appearing to read "Troy Rendell".

Good morning, Asha. I'm following up on this electronic filing that we received on Tuesday. It was followed by apparently a duplicate hard copy, hand-delivered to us just before 5:00 yesterday.

If you file electronically, we do not require a follow-up hard copy. It creates duplication in the docket if we receive both electronically and on paper. Please refer to our e-filing requirements (under Dockets & Filings on PSC website) for any further questions.

Thanks for e-filing!

Joint Reuse Project
Reference No. K681

Dear Mr. Andrade:

This letter is in reference to our phone discussion concerning the joint reuse project between Mid-County Services and the City of Dunedin. This project will supplement the reclaimed water for the City of Dunedin and allow for the expansion of their reuse system.

As we discussed, Mid-County Services is willing to change our request to 50% funding from the Water Management District. In addition, Mid-County Services will be working with the City of Dunedin to prepare and execute a Joint Reuse Agreement.

Please contact me directly at (407) 869-1919, ext. 228 if you have any questions.

Sincerely,

Donald Rasmussen

PUBLIC WORKS ADMINISTRATION

TO: John Lawrence, City Manager *JRL*
FROM: Robert H. Brotherton, P.E., Director *RHB*
Public Works and Utilities
DATE: June 12, 2001
SUBJECT: Proposed Agreement with Utilities Inc. of Florida

Received
JUN 12 2001
Engineering

In September of last year, I was contacted by Mr. Donald Rasmussen, Vice President of Utilities, Inc. of Florida concerning the potential for the City of Dunedin to use their treated Reclaimed Water in our Reclaimed Water System. This utility currently provides sewer service to the Pinellas County unincorporated area north of SR 580, south of Curlew Road, east of Belcher Road and west of HWY 19. While this area is generally in the planning area of the City of Dunedin and is also in the Fire Service Area, this area is not in the water service area. Pinellas County currently provides potable water service and this private wastewater utility provides wastewater service through a sewer collection system and treatment plant. The treatment plant currently discharges to Curlew Creek. The plant meets DEP requirements for water quality, which are the same as the standards for the Dunedin Wastewater Treatment Plant.

This private utility company operates numerous small facilities across the State of Florida. They have successfully connected to other reclaimed water systems in the past. Their concern is that the State of Florida may make discharge to this creek more difficult through the permitting process in future years. If a mutually beneficial agreement can be reached now, this future problem will be averted for them and Dunedin will have access to additional Reclaimed Water Resources for our customers. Pinellas County does not have a Reclaimed Water program near Utilities Inc. facilities for connection.

I suggested that I would help Utilities Inc. obtain grant funds for the connection if Utilities Inc. would commit to provide the Reclaimed Water to the City of Dunedin at no charge. This private utility company had no history of the grant funding process through the water management district. The attached letter is Utilities Inc.'s commitment to provide the water to the City of Dunedin at no cost.

3/12/01

City staff completed the grant forms and other documents for signature by Utilities, Inc. These documents were reviewed by the Southwest Florida Water Management District. We were successful in getting 50/50 funding for this project by SWFWMD this year. This project was ranked quite high. Before design work is started by Utilities Inc.'s consultant, the City of Dunedin and Utilities Inc. need to enter into an Agreement concerning this connection of the two systems. A sample agreement between Utilities Inc. and Altamonte Springs, Florida for a similar connection has been provided as a starting guideline for discussions.

The advantage of moving forward with such an arrangement is of course the provision of approximately 25% more water available (approximately 1,000,000 gallons per day) for unlimited irrigation for Dunedin residents as well as reduced nutrient loading to Curlew Creek that flows through Dunedin. The advantage for Utilities Inc. is relief from the permit issues that may face this utility in the future.

I propose that staff prepare an agreement for the subject connection and have this agreement approved by our City Attorney. This agreement will then be brought before the City Commission for approval. It is important that we resolve the agreement before this utility expends design funds. The connection point with the Dunedin system is the new ground storage tank on Belcher Road that is now under construction. Provision for connection to this tank has already been accomplished.

Dunedin, Florida 34697-1348

Re: Proposed Joint Reuse Project

Dear Mr. Brotherton:

This letter is a follow-up to my letter of December 1, 2000, addressing several concerns with the proposed joint reuse project between the City of Dunedin and our Mid-County Services (MCS) wastewater treatment plant.

It is MCS's intention to install, own, and operate the transmission mains from the MCS plant to the Dunedin storage tank. MCS is not contemplating any rate which would be charged to the City of Dunedin for the transfer of reclaimed water. It must be acknowledged, however, that the final decision with respect to rates rest with the Florida Public Service Commission. MCS would have to apply to the Public Service Commission for a reuse project plan. MCS would be required to maintain water quality standards set forth by the State of Florida, meet any wet weather discharge conditions, and maintain our plant operating permit. These conditions would all be set forth in a Reuse Water Agreement between MCS and the City of Dunedin. Please contact me if you have any further questions or concerns.

Sincerely,

Donald Rasmussen
Vice President

FY2002 revised page
2.doc

Debbie Kroeger

3. PROJECT DESCRIPTION:

- A general location map and a detailed location map is attached.
- The project includes the installation of approximately 6,100 linear feet of 12" reclaimed water transmission mains and construction of a pump station to convey the reclaimed water to the Dunedin reclaimed water system.
- The user type to be offset is residential and commercial.
- There is a General Water Use Permit Number 202980.03 issued to the City by the Southwest Florida Water Management District for 7.0 mgd average and 12.0 mgd maximum.
- The Mid-County Wastewater Treatment Facility is a 0.9 mgd capacity wastewater treatment plant, with average daily flows of 0.8 mgd.
- This project fits into the Basin Board Plan by responding to two of the Basin's continuing and initiative priorities (water supply and water quality) and to intergovernmental coordination.

4. DEMONSTRATION OF NEED:

- The project will optimize the management of water and water-related resources by providing a supply of irrigation water to offset potable water use. Furthermore, the project will permit further reductions of treated effluent into Curlew Creek and ultimately to St. Joseph Sound.
- The project will meet the Basin Board's priorities in reducing the demand on the local aquifer, reducing the draw down on the local water table.
- District resources will be utilized by assisting the local community in installing the lines and appurtenances necessary to transmit reclaimed water for resource protection of the Dunedin Water System.

5. MEASURABLE BENEFITS:

- The additional reclaimed water to be supplied to the City of Dunedin's system is approximately 800,000 gallons per day. Using an average size irrigatable area of 7,500 square feet, this quantity of reclaimed water would allow the connection of approximately 1,400 additional users. Potable water to be offset by this project equals approximately 624,000 gallons per day. The estimated cost/benefit ratio for

Re: Pinellas-Anclote River Basin Board FY 2002 Cooperative Funding Proposal

Dear Mr. Baldwin:

Enclosed please find four (4) copies of the Revised Utilities, Inc. of Florida's application for the above referenced grant funds.

We appreciate the District's efforts in reviewing and processing this application. Should you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

Donald Rasmussen
Vice President

EXHIBIT B, SCOPE OF WORK

APPLICANT: Mid-County Services, Inc.

PROJECT: Reclaimed Water Transmission Main and Pump Station

NARRATIVE: This project is for design and construction of 6,100 feet of 12" reclaimed water transmission main and a pump station. The transmission main and pump station will serve to convey the final effluent from the Mid-County Wastewater Treatment Plant to the Belcher Road reclaimed water storage tank in Dunedin. The reclaimed water will then be pumped into the City of Dunedin's reclaimed water distribution system.

PROJECT INFORMATION

1. TYPE OF PROJECT:

The project is a supplemental reclaimed water project that will provide reclaimed water to the City of Dunedin and allow the expansion of the customer base by 1,400 customers.

2. PROJECT OBJECTIVE:

The project, when completed, will serve the following objectives:

- To provide an alternative source of irrigation water to residences and commercial areas.
- To assist the City of Dunedin and Mid-County Services, Inc. in providing an outlet for treated effluent that uses the effluent for a beneficial purpose.
- To reduce the amount of fresh water being drawn from underground or other sources.
- Eliminate a major point source discharge of wastewater into a small creek (Curlew Creek).

Cooperative Funding Proposal Mid-County Services, Inc.

3. PROJECT DESCRIPTION:

- A general location map and a detailed location map is attached.
- The project includes the installation of approximately 6,100 linear feet of 12" reclaimed water transmission mains and construction of a pump station to convey the reclaimed water to the Dunedin reclaimed water system.
- The user type to be offset is residential and commercial.
- There is a General Water Use Permit Number 202980.03 issued to the City by the Southwest Florida Water Management District for 7.0 mgd average and 12.0 mgd maximum.
- The Mid-County Wastewater Treatment Facility is a 0.9 mgd capacity wastewater treatment plant, with average daily flows of 0.8 mgd.
- This project fits into the Basin Board Plan by responding to two of the Basin's continuing and initiative priorities (water supply and water quality) and to intergovernmental coordination.

4. DEMONSTRATION OF NEED:

- The project will optimize the management of water and water-related resources by providing a supply of irrigation water to offset potable water use. Furthermore, the project will permit further reductions of treated effluent into Curlew Creek and ultimately to St. Joseph Sound.
- The project will meet the Basin Board's priorities in reducing the demand on the local aquifer, reducing the draw down on the local water table.
- District resources will be utilized by assisting the local community in installing the lines and appurtenances necessary to transmit reclaimed water for resource protection of the Dunedin Water System.

5. MEASURABLE BENEFITS:

- The additional reclaimed water to be supplied to the City of Dunedin's system is approximately 800,000 gallons per day. Using an average size irrigatable area of 7,500 square feet, this quantity of reclaimed water would allow the connection of approximately 1,400 additional users. Potable water to be offset by this project equals approximately 624,000 gallons per day. The estimated cost/benefit ratio for

Cooperative Funding Proposal Mid-County Services, Inc.

the eligible portion of the project calculated at an 8% annual interest rate over 30 years is \$0.23/1,000 gallons or \$0.17/1,000 gallons for the District's share of the project. The cost/benefit ratio includes the project cost of \$590,000 and no additional proration since this is only a supplementary reclaimed water project.

- The project is consistent with the Northern Tampa Bay WUCA Management Plan.
- The long term benefits that can be derived from this project include:
 - a. A reduction in groundwater withdrawn by the City of Dunedin;
 - b. A reduction in surface water point discharged to Curlew Creek;
 - c. Irrigation water will be available to more residents providing for increased vegetation and a better environment;
 - d. The reduction of total wasteload to Curlew Creek and St. Joseph Sound.

6. DELIVERABLES:

The project deliverables include 6,100 linear feet of 12" reclaimed water transmission main and a pump station and appurtenances.

7. PROJECT COST:

Total project cost is estimated to be \$590,810.

The SWFWMD eligible portion is \$295,405 or 50% of \$590,810.

Mid-County Services, Inc.'s share of this project is \$295,405, and will be paid from user fees paid to Mid-County Services, Inc..

8. PROJECT BUDGET:

	Mid-County Services, Inc.	District	Total
Transmission	\$200,405.00	\$200,405.00	\$400,810.00
Pump Station	\$75,000.00	\$75,000.00	\$150,000.00
Controls & Telemetry	\$20,000	\$20,000	\$40,000.00
Total	\$295,405.00	\$295,405.00	\$590,810.00

9. COMPLETION SCHEDULE:

Begin Design:	January 1, 2002
Complete Design:	June 1, 2002
Commence Construction:	February 1, 2002
Complete Construction:	April 30 2003

Cooperative Funding Proposal Mid-County Services, Inc.

10. IMPLEMENTATION:

The City of Dunedin has a contract with All American Concrete, Inc., who will be given notice to proceed with design as soon as possible after execution of an agreement between the District and Mid-County Services, Inc. This long-term bid allows the City to better cost-estimate and quickly move on construction projects. Mid-County Services, Inc. intends to utilize the City of Dunedin contractor per current bid prices thru a formal Agreement. The pump station and controls will be bid separately.

11. KEY PERSONNEL:

Mid-County Services, Inc. contact with District Staff and Project Manager will be:

Patrick Flynn
200 Weathersfield Avenue
Altamonte Springs, FL 32714
(407) 869-1919

12. ADDITIONAL INFORMATION:

- Reclaimed water is metered to control usage.
- The City has established user fees for all users.
- The City has developed a public education and information program. The objectives of the program are to inform the citizens of the value of reclaimed water in terms of conservation of potable supplies, and to encourage property owners within the City to accept reclaimed water service for irrigation on their properties. The City's program has the following elements:

For the General Public:

- A logo and slogan for reclaimed water has been developed;
- In-house training of City staff who are not directly involved with the reclaimed water system, so they may inform citizens and promote the system when asked;
- Presentations on the monthly "Focus On Dunedin" show (on the Local Government Access Cable Channel) which features the Mayor and City Commission members and staff in an informal discussion of issues that affect the City.

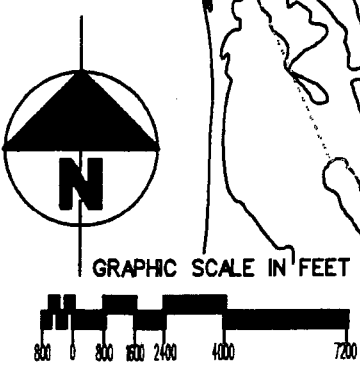

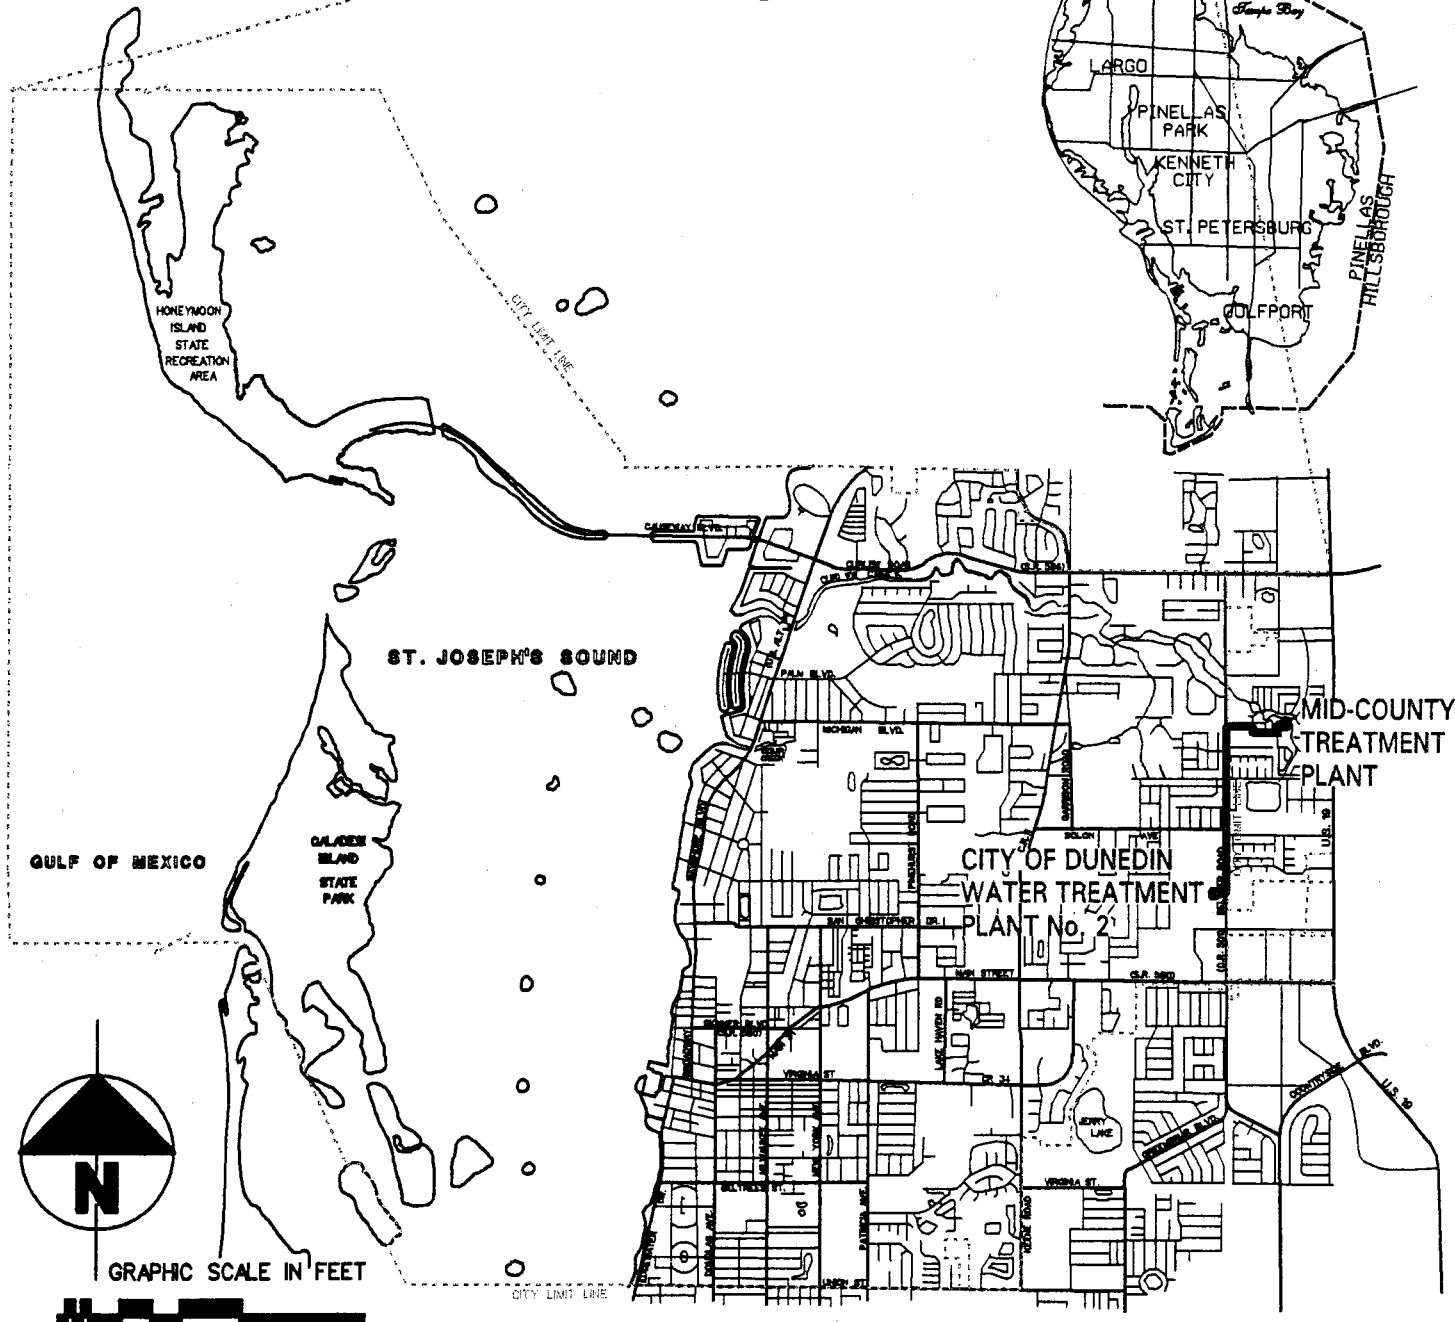

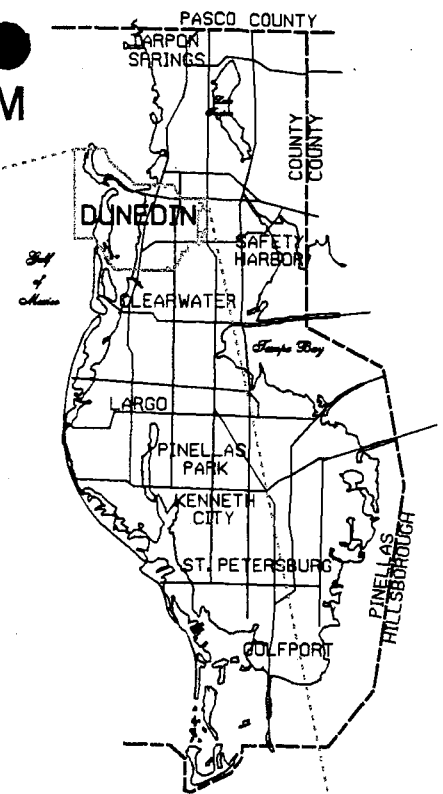

Cooperative Funding Proposal Mid-County Services, Inc.

For the Potential Customers:

- Customer contact at pre-inspection and final inspection
- Distribution of Reclaimed Water Notice to property owners
- Development of a City of Dunedin Reclaimed Water brochure for distribution to existing and potential customers
- Development of a City of Dunedin Water Conservation brochure.
- Neighborhood meetings with presentations by City staff on the reclaimed water program;
- Reclaimed water educational program;
- Individual visits to secure commitments for service.

Subject: "K681 Mid-County services, Inc., Reclaimed Water Transmission Main and Pump Station." Cancellation by Cooperator.

Dear Mr. Flynn:

The Water Management District and the City of Dunedin had been looking forward to the cooperation of Mid-County to move forward with the above-referenced project since you proposed it for funding consideration in December. This important project was expected to offset approximately 624,000 gallons per day (gpd) of valuable potable and ground water pumped from an area so vulnerable to salt water intrusion. In addition, if the project had been realized, the discharge of effluent into Curlew Creek and St. Joseph Sound would have been significantly reduced or eliminated, thereby having a positive impact on water quality. The estimated benefits, together with the cost/benefit ratio for the eligible portion of the project calculated at \$0.23 per 1,000 gallons saved, resulted in the August Board approval of funds for the project.

It is disappointing that Mid-County Utilities has chosen to cancel the project, and it is truly unfortunate that notice of the cancellation was provided so late. The District expected that Mid-County Services was secure with funding since the question was first asked of you in May, and all indications at that time were that Mid-County Services would carry through with the project. Since you indicated that Mid-County Services could not provide such documentation in writing due to corporate procedures, Staff recommended the project for funding based on verbal indications that Mid-County Services was committed to the project. Cancelling the project at this late date has deprived other worthy projects of District funding. It should be determined that cooperators have adequate funding in place, before requests are made. In the future, documentation of projects in the cooperator's budget will be required with the proposal in order for the proposal to be considered.

Your recent correspondence referred to unattractive cost-benefits as the reason for withdrawal. Although the above calculation does not support this conclusion, your project will be removed from the Pinellas-Anclote River Basin Board's FY 2002 Budget, as you have requested.

Sincerely,

John Thompson, Project Manager
Resource Conservation and Development Department

RE: PROPOSED JOINT REUSE PROJECT

Dear Mr. Flynn:

On February 24, 2003, I sent you a letter indicating willingness on the part of the City of Dunedin to continue dialog on a joint, effluent reuse water project. This letter was in response to your fax of February 19, 2003 addressing our earlier telephone conversations. I also understand that there was dialog between your organization and former Public Works Director Robert Brotherton last year regarding this same business opportunity.

Unfortunately, I have not received a response to my letter of February 24th and am inquiring as to whether or not Utilities Inc. or its affiliate, Mid-County Services, Inc. are still interested in continued discussions.

It is important that we fully understand your position and business timing as we move forward with our program to deliver reclaimed water to our community. Any participation on your part in that program requires immediate attention.

You can telephone me at 727-298-3175, email at dhutchens@dunedinfl.net or write to the address above.

Sincerely,

Douglas Hutchens, Acting Director
Public Works & Utilities

Re: Proposed Joint Reuse Project

Dear Mr. Hutchens:

As we had discussed on the phone, you requested that Mid-County Services (MCS) provide a statement of our position regarding the possibility of making the effluent produced at our Mid-County WWTP available to the city under mutually agreeable terms and conditions. In 2000, Bob Brotherton and Don Rasmussen had discussed in general terms the concept of our plant being modified to produce reclaimed water, then delivered through a new force main to the city's facilities on Belcher Road.

For a variety of reasons, the project stalled in 2001 and has been dormant ever since. It is our position, however, that further discussion is warranted, especially because significant benefits could accrue for the good of both parties. Some of the issues that must be addressed in order for the project to move forward include:

- The unit price of reclaimed water
- The volume of reclaimed water available initially and at buildout
- Seasonal fluctuations in supply and demand
- Engineering design and permitting of the pump station and force main
- Degree of financial participation by the city, SWFWMD, and MCS in the project
- Telemetry and instrumentation requirements
- Wet weather discharge protocol
- Necessary modifications to the Mid-County WWTP operating permit
- Water quality parameters and surface discharge issues
- The PSC approval process and possible impact on the existing tariff

In summary, it seems to me that none of the aforementioned issues is such an insurmountable obstacle that it should preclude further discussion. I hope that the city will keep the concept alive, at least for the short term. It may be advantageous to meet in the near future so as to identify our positions in greater detail.

I look forward to meeting with you. If you need clarification or have any questions, please contact Don Rasmussen or myself at 407.869.1919. My extension is 242.

Sincerely,
MID-COUNTY SERVICES, INC.

Tom,
Here is the project information that I was able to find. This was going to be a FY2002 project. Upon Anthony's return, I will see what else I can find for you.

Project: Dunedin Reuse Interconnect
Project #: K681 Basin: 016,
Phase: 00 Project Status: Cancelled
Cooperator:
Coop. Contact:
Project Manager: Thompson, John
Task Manager:
Project Type: Coop

DESCRIPTION: This project is for design and construction of 6,100 feet of reclaimed water transmission main and a pump station. The transmission main and pump station will serve to convey the final effluent from the Mid-County Wastewater Treatment Plant to the Belcher Road reclaimed water storage tank in Dunedin. The reclaimed water will be pumped into the City of Dunedin's reclaimed water distribution system". The additional reclaimed water to be supplied to the City of Dunedin's system is approximately 800,000 gallons per day. This would have offset 624,000 gallons per day. The cost benefit ratio calculated at an 8% annual interest rate over 30 years is \$0.23/1,000 gallons.

RECOMMENDATION: Mid-County Services cancelled the project at the last minute after they had committed funding. They were not able to commit to funding the proposed reuse project, K681, at this time. They will continue to discharge wastewater into Curlew Creek that empties into St. Joseph Sound. The City of Dunedin was not pleased over this event since they were running out of reclaimed water.
