---

**SECTION 2 - RULES AND REGULATIONS, (CONT'D)****2.9 Obligations of the Customer (Continued)**

2.9.2 With regard to access services provided by the Company, specific Customer responsibilities include, but are not limited to the following:

**A. Design of Customer Services**

The Customer shall be responsible for its own expense for the overall design of its services and for any redesigning or rearrangements of its services which may be required because of changes in facilities, operations or procedures of the Company, minimum protection criteria, or operating or maintenance characteristics of the facilities.

**B. Network Contingency Coordination**

The Customer shall, in cooperation with the Company, coordinate in planning the actions to be taken to maintain maximum network capability following natural or man-made disasters which affect telecommunications service.

**C. Jurisdictional Reports**

**(1) Report Requirements for Access Services**

All charges (i.e. monthly rates, usage rates, and nonrecurring charges) are prorated between interstate and intrastate based on industry practices as set forth in this section.

**(2) Procedure for Determining Call Jurisdiction**

For traffic originated by the Customer and terminated by the Company, the Company shall compare the terminating NPA-NXX of the called Sage local service customer to the Local Routing Number ("LRN") field of the EMI access records, where such LRN field is properly populated. For wireless roaming traffic, the Customer shall, subject to audit by the Company, populate the LRN field of the EMI access records with a Jurisdictional Information Parameter (JIP) value that identifies the location of the cell site used to originate each call established while roaming and the Company shall use properly-populated LRN fields to jurisdictionally rate the usage. Where such LRN field is not properly populated, and for all other traffic, the Company shall compare its local service customer's NPA-NXX to the originating Automatic Number Identification ("ANI") or to the calling NPA-NXX, except that the Company shall use the Percent Interstate Use ("PIU") when the originating ANI is not available or when the jurisdiction of the call cannot otherwise be determined.

---

SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.9 Obligations of the Customer (Continued)

2.9.2 (continued)

D.

Jurisdictional Percentages and Determination of Access Charges

Usage-sensitive and non-usage-sensitive rates and nonrecurring charges, including those associated with optional features, shall be prorated based on the call jurisdiction determined through the procedure set forth in 2.9.2.C.(2), above. When a PIU must be used, it shall be expressed as a whole number between 0 and 100. The sum of the PIU and the intrastate jurisdictional percentage (IJP) must equal 100%. The IJP is determined by subtracting the PIU from 100. When a PIU must be used, the PIU factor and IJP factor serve as the basis for development of interstate and intrastate charges to the Customer pursuant to the procedure identified in 2.9.2.C.(2), above. When a PIU must be used for non-usage sensitive and nonrecurring rates, the quantity of service is multiplied by the PIU and IJP factors and by the applicable price list rate to develop the charge. When a PIU must be used for usage sensitive rates, the quantity of usage-sensitive units is multiplied by the PIU and IJP factors and by the applicable price list rate to develop the charge.

Separate PIU factors, when PIU factors are applicable pursuant to 2.9.2.C.(2) above, are required for originating or terminating usage.

E. Interstate PIU

The PIU will be established by the Company or provided by the Interexchange Carrier (IXC) customer as described following:

(1) Company-Developed PIU

Where the Company can, pursuant to 2.9.2.C.(2), above, adequately determine the jurisdiction of an originating or terminating call from the call detail, the Company will bill according to the jurisdiction of the call as determined from that call detail.

---

**SECTION 2 - RULES AND REGULATIONS, (CONT'D)****2.9 Obligations of the Customer (Continued)****2.9.2 (continued)****F. Interstate PIU (continued)****(2) Customer-Provided PIU**

Where the Company does not possess the capability to adequately determine the jurisdiction of a switched access service, a PIU factor must be reported by the Customer to the Company, as follows:

The Customer will provide a projected interstate usage percentage for originating access minutes for each LATA from which the Customer may originate or terminate traffic. The specified percentage must accurately reflect the jurisdiction of the traffic in accordance with applicable law and will be applied to all end offices to which the Customer may originate or terminate traffic within the LATA.

All PIU factors provided in a report update must be furnished via a letter. PIU factors provided via letter will be kept on file by the Company.

For FGA and FGB, pursuant to Federal Communications Commission Order FCC 85-145 (adopted April 16, 1985), when the Customer does not have sufficient data to determine jurisdiction, the PIU is to be developed as though every call that enters the Customer's network at a point within the same state as that in which the called station is situated (as designated by the called station number) is an intrastate communication. Every call for which the point of entry is in a state other than that where the called station is situated (as designated by the called station number) in an interstate communication.

**G. Intrastate IJP****(1) Company-Developed IJP**

Where the Company can, pursuant to 2.9.2.C.(2), above, adequately determine the jurisdiction of an originating or terminating call from the call detail, the Company will bill according to the jurisdiction of the call as determined from that call detail.

**(2) Customer-Provided IJP**

Where the Company does not possess the capability to adequately determine the jurisdiction of a switched access service, the Company will determine the IJP for the service by subtracting the Customer-provided PIU from 100.

SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.9 Obligations of the Customer (Continued)

2.9.2 (continued)

H. Report Updates

(1) Annual Requirements

The Customer shall provide to the Company by April 15 of each year a written report which provides the methodology utilized by the Customer to develop the PIU factors provided in the quarterly report.

If the Customer does not provide the annual report by April 15 of each year, the Customer will be notified by certified mail that if the annual report is not received within thirty (30) calendar days of the receipt of the notice, the Company will designate its default PIU factor of 50% for each service, with the exception of originating 700 Access Service which is arranged for interstate use. For originating 700 Access Service, the Company will designate a PIU factor of 0%. Such factors will be applied pursuant to 2.9.2.C.(2), above, to the next billing cycle following the thirty (30) day notice period and will be utilized until the Customer provides an annual report. Once the Customer does provide an annual report, the Company will update the Customer's PIU factors within fifteen (15) business days utilizing the most current PIU reported by the Customer.

---

SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.9 Obligations of the Customer (Continued)

2.9.2 (continued)

I. Quarterly Update Requirements

The Customer is required to provide updates to the PIU reports. Upon receipt by the Company, the revised report will serve as the basis for future billing pursuant to 2.9.2.C.(2), above, and will be effective on the next bill date for that service. No prorating or back billing will be done based on the report. The revised report will be used by the Company to apportion usage rates pursuant to 2.9.2.C.(2), above.

- (1) Effective on the first of January, April, July, and October of each year, the Customer will update the PIU reports. The Customer will forward to the Company, to be received no later than fifteen (15) business days after the first of each such month, a revised report showing the interstate and intrastate percentage of use for the past three months ending the last day of December, March, June and September, respectively, for each service arranged for interstate use. SECTION 2 - RULES AND REGULATIONS, (CONT'D)

2.9 Obligations of the Customer (Continued)

2.9.2 (continued)

J. Audit of Jurisdictional Accuracy

- (1) If the Company disputes the reasonableness of the PIU provided by the Customer as set forth in 2.9.2.H., preceding, or the reported PIU varies by more than five percentage points over the preceding PIU, the Company may ask the Customer to provide the data used by the Customer to determine the projected interstate percentage. The Customer shall retain, for a minimum of one year, accurate call detail records from which the percentage of interstate and intrastate use can be derived, and shall make such records available for inspection as reasonably necessary for PIU verification. Such records shall be made available for inspection and audit within fifteen (15) days of the Company's request for verification.

The Company shall limit audits to no more than one per year, except where additional audits may be required to verify allocation changes that represent a five percent shift from the Customer's most recent reported figures, and such change is not the result of seasonal shifts or other identifiable reasons. The Customer may request that verification audits be conducted by an independent auditor. In such cases the associated auditing expenses will be paid by the Customer.

In the event that the Customer fails to provide adequate records to enable the Company or an independent auditor to conduct an audit verifying the Customer's PIU, the Company will bill the usage for all the contested periods using the PIU reported by the Customer for the previous period pursuant to 2.9.2.H., above. This PIU will remain in effect until the Customer provides the call detail records from which the percentage of interstate and intrastate use can be derived. No prorating or back billing will be done based on the newly derived factor.

No such deposit will be required of a Customer that has established satisfactory credit and has no history of late payments to the Company.

**SECTION 3 - SWITCHED ACCESS SERVICE****3.1 General**

- 3.1.1 Switched Access Service, which is available to Customers for their use in furnishing their services to End Users, provides a two-point communications path between a Customer's Premises and an End User's Premises. It provides for the use of common terminating, switching and trunking facilities, and for the use of common subscriber plant of the Company. Switched Access Service provides for the ability to originate calls from an End User's Premises to a Customer's Premises and to terminate calls from a Customer's Premises to an End User's Premises in the LATA where it is provided.
- 3.1.2 When a rate as set forth in this price list is shown to more than two decimal places, the charges will be determined using the rate shown. The resulting amount will then be rounded to the nearest penny (i.e., rounded to two decimal places).
- 3.1.3 In the absence of an ASR as described in Section 3.4, delivery of calls to, or acceptance of calls from, the Customer's End User location(s) via Company-provided switched access services shall constitute a Constructive Order and an agreement by the Customer to purchase the Company's switched access services as described and priced herein.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.2 Manner of Provision

- 3.2.1 Switched Access is furnished for originating and terminating calls by the Customer to its End User.
- 3.2.2 Switched Access is furnished on a per-line or per trunk basis.
- 3.2.3 Originating traffic type represents access capacity within a LATA for carrying traffic from the End User to the Customer; and Terminating traffic type represents access capacity within a LATA for carrying traffic from the Customer to the End User. When ordering capacity for Switched Access, the Customer must at a minimum specify such access capacity in terms of originating traffic type and/or terminating traffic type.
- 3.2.4 Switched Access is provisioned, at minimum, at the DS-1 level and provides line-side or trunk-side access to End Office switches for the Customer's use in originating and terminating communications. Basic Switched Access service will be provided with Multi-Frequency In Band Signaling (SS7 is also available, where capabilities exist).
- 3.2.5 Two types of Switched Access are available:
- A. Tandem Connect Access: This option applies when the Customer has no direct facilities to the End Office. Traffic is routed to and from the End Office via the Access Tandem. Delivery of calls to, or acceptance of calls from, the Customer's End User location(s) via Company-provided Tandem Connect Access services shall constitute a Constructive Order and an agreement by the Customer to purchase the Company's switched access services as described and priced herein.
  - B. Direct Connect Access: This option applies when the Company or another service provider provides dedicated facilities between the Customer's premises and the End Office. This transmission path is dedicated to the use of a single Customer. The Customer is responsible for providing such facilities itself or for negotiating such arrangements with possible suppliers. To the extent that the Company is able to provide such arrangements, the dedicated portion of Direct Connect Access would be provided on an Individual Case Basis as Special Service Arrangements pursuant to Section 6 of this price list.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.3 Switched Access Service

3.3.1 Switched Transport

For traffic that EMI records indicate was tandem switched (for example, when traffic is not routed via a direct end office trunk), switched transport rate elements shall apply. As used in this Section 3.3.1, "switched transport rate elements" include (without limitation) tandem switched termination rate elements, tandem switched facility rate elements, tandem switching rate elements, and common transport multiplexing rate elements.

3.3.2 End Office Switching

The End Office Switching rate category establishes the charges related to the use of end office switching equipment, the terminations in the end office of End User lines, the terminations of calls at Company Intercept Operators or recordings, the Signaling Transfer Point (STP) costs, and the SS7 signaling function has between the end office and the STP.

3.4 Access Ordering

3.4.1 General

- A. Customers may order switched access through a Constructive Order, as defined herein, or through an ASR. The format and terms of the ASR will be as specified in the Industry Access Service Order Guidelines, unless otherwise specified herein.
- B. A Customer may order any number of services of the same type and between the same premises on a single ASR. All details for services for a particular order must be identical.
- C. The Customer shall provide all information necessary for the Company to provide and bill for the requested service. When placing an order for Access Service, the Customer shall provide the following minimum information:
  - (1) Customer name and Premises address(es);
  - (2) Billing name and address (when different from Customer name and address); and
  - (3) Customer contact name(s) and telephone number(s) for the following provisioning activities: order negotiation, order confirmation, interactive design, installation and billing.

- A. Access Service is provided with Standard or Negotiated Intervals.
- B. The Company will specify a firm order confirmation date and Service Commencement Date contingent on the ASR being complete as received. To the extent the Access Service can be made available with reasonable effort, the Company will provide the Access Service in accordance with the Customer's requested interval, subject to the following conditions:
  - (1) For service provided under a Standard Interval: The Standard Interval for Switched Service will be sixty (60) business days from the Application Date. This interval only applies to standard service offerings where there are pre-existing facilities to the Customer Premises. Access Services provided under the Standard Interval will be installed during Company business hours.

---

**SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)****3.4 Access Ordering (Continued)****3.4.2 Access Service Date Intervals (continued)****B. (continued)**

(2) For service provided under a Negotiated Interval: The Company will offer a Service Date based on the type and quantity of Access Services the Customer has requested. The Negotiated Interval may not exceed by more than six (6) months the Standard Interval Service Date, or, when there is no Standard Interval, the Company offered Service Date, except as otherwise agreed by the Company in writing. The Company will negotiate a Service Date interval with the Customer when:

- (a) The Customer requests a Service Date before or beyond the applicable Standard Interval Service Date; or
- (b) There is no existing facility connecting the Customer Premises with the Company; or
- (c) The Customer requests a service that is not considered by the Company to be a standard service offering (for example, if additional engineering or special construction is required to complete the order); or
- (d) The Company determines that Access Service cannot be installed within the Standard Interval.

C. All services for which rates are applied on an Individual Case Basis are provided with a Negotiated Interval.

**3.4.3 Access Service Request Modifications**

The Customer may request a modification of its ASR prior to the Service Commencement Date. All modifications must be in writing using the industry ASR process. The Company, in its sole discretion, may accept a verbal modification from the Customer. The Company will make every effort to accommodate a requested modification when it is able to do so with the normal work force assigned to complete such an order within normal business hours.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.5 Special Construction or Special Service Arrangements

3.5.1 Subject to the agreement of the Company and to all of the regulations contained in this price list, special construction of Company facilities or development of special service arrangements may be undertaken by the Company on a reasonable-efforts basis at the request of the Customer. Such construction or arrangements will be provided pursuant to regulations contained in Section 6 of this price list.

3.6 Obligations of the Company

3.6.1 With regard to access services provided by the Company, specific Company responsibilities include, but are not limited to the following:

A. Network Management

The Company will administer its network to ensure that provision of acceptable service levels to all telecommunications users of the Company's network services. Generally, service levels are considered acceptable only when both End Users and Customers are able to establish connections with minimal delay encountered within the Company network. The Company maintains the right to apply protective controls, i.e., those actions, such as call gapping, which selectively cancel the completion of traffic, over any traffic carried over its network, including that associated with a Customer's Switched Access Service. Generally, such protective measures would only be taken as a result of occurrences such as a failure or overload of Company or Customer facilities, natural disasters, mass calling or national security demands.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.6 Obligations of the Company (Continued)

3.6.1 (continued)

B. Design and Traffic Routing of Switched Access Service

The Company shall design and determine the routing of Switched Access Service, including the selection of the first point of switching and the selection of facilities from the interface to any switching point and to the End Offices. The Company shall also decide if capacity is to be provided by originating only, terminating only, or two-way trunk groups. Finally, the Company will decide whether trunk side access will be provided through the use of two-wire or four-wire trunk terminating equipment.

Selection of facilities and equipment and traffic routing of the service are based on standard engineering methods, available facilities and equipment and the Company's traffic routing plans. If the Customer desires different routing or directionality than that determined by the Company, the Company will work cooperatively with the Customer in determining (1) whether the service is to be routed directly to an end office or through an access tandem switch and (2) the directionality of the service.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.7 Obligations of the Customer

3.7.1 The Customer has certain specific obligations pertaining to the use of Switched Access Service. These obligations are in addition to obligations specified in Section 3.9 of this price list and are as follows:

A. Report Requirements

Customers are responsible for providing the following reports to the Company, when applicable:

Jurisdictional Reports

When a Customer orders Switched Access Service that may be used for both interstate and intrastate traffic, the Customer is responsible for providing reports as set forth in Section 2.9.2, preceding. Charges will be apportioned in accordance with those reports.

B. On and Off-Hook Supervision

The Customer's facilities shall provide the necessary on and off-hook supervision for accurate timing of calls.

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.8 Rate Regulations

3.8.1 General

There are three types of rates and charges that apply to Switched Access Service provided by the Company. These are monthly recurring charges, usage charges, and nonrecurring charges.

3.8.2 Types of Charges

- A. Nonrecurring charges are one-time charges that apply for a specific work activity (e.g., installation or change to an existing service). Non-recurring charges may apply for installation of service, installation of optional features and service rearrangements.
- B. Recurring Charges are flat monthly rates that apply for each month or fraction thereof that a specific rate element is provided. For billing purposes, each month is considered to have thirty (30) days.
- C. Usage Charges are rates that apply only when a specific rate element is used. These are applied on a per-access minute, a per-call or per-query basis. Usage rates are accumulated over a monthly period.

---

**SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)****3.8 Rate Regulations (Continued)****3.8.3 Measurement of Access Minutes**

- A. When recording originating calls over Switched Access Service with multi-frequency address signaling, usage measurement begins when the first wink supervisory signal is forwarded from the Customer's facilities. The measurement of originating call usage over Switched Access Service ends when the originating Switched Access Service entry switch receives disconnect supervision from either the originating End User's End Office (indicating that the originating End User has disconnected), or from the Customer's facilities, whichever is recognized first by the entry switch.
- B. For terminating calls over Switched Access Service with multi-frequency address signaling, the measurement of access minutes begins when a seizure signal is received by the Company from the Interexchange Carrier's trunk group at the Point of Presence within the LATA. The measurement of terminating call usage over Switched Access Service ends when a disconnect signal is received by the Company, indicating that either the originating or terminating user has disconnected.
- C. When recording originating calls over Switched Access Service with SS7 signaling, usage measurement begins with the transmission of the initial address message by the switch for direct trunk groups and with the receipt of an exit message by the switch for tandem trunk groups. The measurement of originating Switched Access Service usage ends when the entry switch receives or sends a release message, whichever occurs first.
- D. For terminating calls over Switched Access Service with SS7 signaling, the measurement of access minutes begins when the terminating recording switch receives the initial address message from the terminating End User. On directly routed trunk groups or on tandem routed trunk groups, the Company switch receives the initial address message and sends the indication to the Customer in the form of an answer message. The measurement of terminating Switched Access Service call usage ends when the entry switch receives or sends a release message, whichever occurs first.
- E. Mileage, where applicable, will be measured in accordance with standard industry practices.

---

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.8 Rate Regulations (Continued)

3.8.3 Measurement of Access Minutes (Continued)

- F. The Company will use the Small Exchange Carrier Access Billing ("SECAB") guidelines, or the Carrier Access Billing System ("CABS") guidelines, or other system that emulates or otherwise produces a reasonable substitute for the output of SECAB or CABS, for billing all charges under this price list. The Company will provide billing using a hardcopy format or upon request, a mechanized medium (e.g., cartridge tape, CD ROM, etc.). Bills will be accurate and contain sufficient supporting details to allow Customers to account for the charges and to verify their accuracy in a reasonable and timely fashion. Requests for additional bill detail will be handled and priced on an Individual Case Basis (ICB).

3.8.4 Moves

- A. A move of services involves a change in the physical location of one of the following:
  - (1) The point of termination at the Customer's Premises, or
  - (2) The Customer's Premises
- B. The charges for the move are dependent on whether the move is to a new location within the same building or to a different building as described below:
  - (1) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring charge for the capacity affected. There will be no change in the minimum period requirements.
  - (2) Moves to a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new service. The Customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

---

SECTION 3 - SWITCHED ACCESS SERVICE, (CONT'D)

3.8 Rate Regulations (Continued)

3.8.5 Installation of Optional Features

- A. If a separate nonrecurring charge applies for the installation of an optional feature available with Switched Access Service, the charge applies whether the feature is installed coincident with the initial installation of service or at any time subsequent to the initial installation of service.
- B. For all other changes, including the addition of, or modifications to, optional features without separate nonrecurring charges, a charge equal to one half the Switched Transport nonrecurring (i.e. installation) charge will apply. When an optional feature is not required on each transmission path, but rather for an entire transmission path group, an end office or an access tandem switch, only one such charge will apply.

3.8.6 Service Rearrangements

- A. Service rearrangements are changes to existing services which do not result in either a change in the minimum period requirements or a change in the physical location of the point of termination at the Customer's premises or the Customer's End User's premises. Changes, which result in the establishment of new minimum period obligations, are treated as disconnects and starts.
- B. The charge to the Customer for the service rearrangement is dependent on whether the change is administrative only in nature or involves an actual physical change to the service.
- C. Administrative changes will be made without charge(s) to the Customer. Such changes require the continued provision and billing of the Access Service to the same entity or change in jurisdiction.
