Re: Notice of Intent to Request Confidential Classification Docket No. 07007-EI

Dear Ms Cole:

Enclosed for filing with the Commission are the original and seven copies of Gulf Power Company's Notice of Intent to Request Confidential Classification in Docket No. 07007-EI. Also enclosed in a separate envelope labeled "CONFIDENTIAL" is a CD containing CONFIDENTIAL portions of Gulf response to Staff's July 27, 2007 Data Request to Gulf Power Company in Docket No. 07007-EI. Copies of this letter without the CONFIDENTIAL CD are being served upon counsel of the parties of record. If you have any questions regarding this filing, please contact me at (850) 222-2300.

Respectfully,

Charles A. Guyton

Charles A. Guyton Squire, Sanders & Dempsey L.L.P.

Attorney for Gulf Power Company

This docketed notice of intent was filed with Confidential Document No. 06534-07 The document has been placed in confidential storage pending timely receipt of a request for confidentiality.

Data Requests to Gulf Power on CAIR/CAMR/CAVR Compliance

7/27/06

1. Please provide the data, assumptions, and analysis that supports the calculations of Net Contributions for each generating unit in Table 4.3-2 of Exhibit A of Gulf's March 29, 2007 Supplemental Petition for Environmental Compliance Program.
2. Please provide the calculations of Net Contributions for each generating unit in Table 4.3-2 of Exhibit A of Gulf's March 29, 2007 Supplemental Petition assuming replacement of each unit by an equivalent amount of combined cycle capacity. In addition to this analysis based on a mid-range natural gas price forecast, provide sensitivities based on low and high natural gas price forecasts.
3. Provide a reasonable range of the Net Contribution for each generating unit in Gulf Power's compliance program, assuming the inclusion of carbon capture technology (carbon dioxide and other greenhouse gases) to reduce such emissions to 2000 levels by 2017 and to 1990 levels by 2025. In addition, provide all assumptions, analyses, technologies used, and calculations. Comment on the technical feasibility given the site specific characteristics of Plant Crist.
4. Please identify all aspects of Gulf Power's compliance plan for which the Company issued Requests for Proposals (RFPs) on a project by project and unit by unit basis. Include a list of such RFP solicitations, copies of the solicitations, the entities who received the solicitations, the method of evaluating the bids received, the timeframes of the solicitation, and the results of each RFP bid evaluation.
5. For compliance projects/services for which RFP's were not issued but for which a vendor/supplier has been identified by the Company, please explain in detail how Gulf Power ensured that it has or will obtain the best market price for each project/service.
6. Provide a detailed cost comparison of Chiyoda jet bubbling reactor and Advatech spray tower technologies as may be implemented for Crist Units 4-7.
7. Identify any other technologies that were considered for Flue Gas Desulfurization for each unit for which Gulf proposes scrubbing (other than Smith units) and why they were rejected.
8. Provide all contracts or agreements in excess of \$1 million which Gulf Power has entered into related to Gulf's Environmental Compliance Program, including but not limited to any contract or agreement contract with Southern Power Services.
9. Identify the milestones for each project which has been completed and those milestones that are scheduled for future completion, and the costs which have been incurred to date for each project.

10. If Gulf evaluated a second-best compliance option (such as a mixture of retrofit, fuel mix, retirement, and/or allowance purchases), please provide the details of that option and the related cost comparison to the selected option.
11. What actions, if any, are currently underway by Gulf in revising its strategic planning for environmental compliance in light of state (Florida) and federal actions pertaining to carbon capture legislation, rules, and orders?
12. Is Gulf Power's arrangement for engineering, procurement, and construction of the various compliance projects based on an open-ended "time and materials" contract structure or a firm, lump sum price? Explain how and why the choice was made for the option used.
