4. The Conservation Cost Recovery Factor was calculated in accordance with the methodology which has been previously approved by the Commission in this docket. The factor is designed to recover the projected conservation program expenses of **SJNG** for the twelve month period ending December 31, 2008 adjusted for the net true-up (which includes the estimated conservation true-up for the Twelve month period ending December 31, 2007), as well as interest calculated in accordance with the methodology established by the Commission.

5. **SJNG** projects total conservation program expenses, net of all programs revenue of \$49,575.00 for the twelve month period ending December 31, 2008. The estimated net true-up for the twelve months ending December 31, 2007 is an under-recovery of \$39,497.00. After increasing the projected conservation expenses by the amount of this underrecovery, a total of \$89,072.00 remains to be collected during the twelve months ending December 31, 2008. Dividing this total by the projected sales for the period of 1,045,485 therms, and expanding for taxes, results in the conservation adjustment factor of \$0.10066 per therm for GS-1, \$0.07825 per therm for GS-2 and \$0.03660 for GS-3 respectively which **SJNG** seeks approval in this petition. The calculation of these factors per therm is contained in the Commission prescribed worksheets filed with this petition.
