Ms. Parks,

We are in receipts of the e-filing information below, however the filing appears to be missing the attachment. There is a cover letter and a certificate of service, but nothing attached to the letter as the letter indicates. Please resubmit your e-filing with all attachments in order for the item to be considered accepted for filing. Feel free to call if you have any questions.

Mr. Matari,

The attached document you submitted does not meet the Commission's e-filing requirements. Please see e-filing requirements on our website (<http://www.psc.state.fl.us/dockets/e-filings/>), in particular:

Documents shall be signed by typing "s/" followed by the signatory: s/ First M. Last

Though your cover letter was signed, the petition did not include a signature.

Multiple documents may be attached to the same e-mail transmittal. However, **any cover letter or certificate of service must be included in the electronic document to which it relates, and shall not be submitted as a separate attachment to the e-mail.**

The e-mail message to which the document is attached shall include the following information, in the order listed:

- The full name, address, telephone number, and e-mail address of the person responsible for the electronic filing,
- The docket number and title if filed in an existing docket,
- The name of the party on whose behalf the document is filed,
- The total number of pages in each attached document., and
- A brief but complete description of each attached document.

Your document will need to be revised and resubmitted in order to be accepted for filing.

Please feel free to call if you have any questions.

Good afternoon Ms. Kelly,

I was made aware that there was a problem with your e-filings coming through to us this morning. Per Ruth Nettles' request, you re-sent your filing. Shortly after you re-sent the filing, we received 2 filings from you in the e-filings inbox. Therefore, the version received at 12:54 p.m. will be considered the official filing. The version received at 12:58 p.m. (the version you re-sent per our request) will be considered a duplicate and will not be entered in the docket file. If you have any questions, please feel free to contact me. Thank you for your help in this matter.

Subject: Re: FW: Comments regarding Renewable Portfolio Standard

I believe I had complied with all of the requirements as set out below. I had consulted the e-filings FAQ on your website prior to sending. The Renewable Portfolio Standard was the subject of an undocketed staff workshop, and Mark Futrell was identified as the contact for these comments. As there is no docket, there was no docket number. The name of the parties is "Joint Solar Parties" who are further identified in the document. The representative of each entity signed the cover letter in the original filing (cover letter attached) with the s/signatory.

I apogize for any omissions on my part.

9/13/2007

Re: 2006 Consumer Confidence Report

Dear Ms. Bayo:

Pursuant to Rule 62-550.824, Florida Administrative Code, all utility companies regulated by the Florida Public Service Commission shall file the report with FPSC. In accordance, Southlake Utilities, Inc. hereby submits its 2006 CCR.

If you are not the correct party to receive this report, please let me know and I will forward the CCR to them. My e-mail address is kkitchen@cagan.com or the office phone number of 352.394.8898

Sincerely,

Kim Kitchen
Office Manager

Copy: File

Southlake Utilities, Inc. 2006 Annual Drinking Water Quality Report

We're very pleased to provide you with this year's Annual Water Quality Report. We want to keep you informed about the excellent water and services we have delivered to you over the past year. Our goal is and always has been, to provide to you a safe and dependable supply of drinking water. Our water is obtained from groundwater pulled from the Floridan Aquifer and is chlorinated for disinfection purposes.

A source water assessment was performed by the state. A search of the data indicated 2 potential sources of contamination with a susceptibility rating of high. This information is available for your review at this website <http://www.dep.state.fl.us/swapp/>. Use the search by county link on left-hand side to review.

- This report shows our water quality results and what they mean.

If you have any questions about this report or concerning your water utility, please contact our office at (352) 394-8898. We encourage our valued customers to be informed about their water utility. Southlake Utilities Inc. routinely monitors for contaminants in your drinking water according to Federal and State laws, rules, and regulations. Except where indicated otherwise, this report is based on the results of our monitoring for the period of January 1 to December 31, 2006. As authorized and approved by EPA, the State has reduced monitoring requirements for certain contaminants to less often than once per year because the concentrations of these contaminants are not expected to vary significantly from year to year. Some of our data [e.g., for organic contaminants], though representative, is more than one year old.

In the table below, you may find unfamiliar terms and abbreviations. To help you better understand these terms we've provided the following definitions:

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Action Level (AL): The concentration of a contaminant that, if exceeded, triggers treatment or other requirements that a water system must follow.

Picocurie per liter (pCi/L): Measure of the radioactivity in water.

Parts per million (ppm) or Milligrams per liter (mg/l): One part by weight of analyte to 1 million parts by weight of the water sample.

Parts per billion (ppb) or Micrograms per liter (µg/l): One part by weight of analyte to 1 billion parts by weight of the water sample.

"ND" means not detected and indicates that the substance was not found by laboratory analysis.

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activity.

Contaminants that may be present in source water include:

- Microbial contaminants**, such as viruses and bacteria, which may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife.
- Inorganic contaminants**, such as salts and metals, which can be naturally-occurring or result from urban stormwater runoff, industrial or domestic wastewater discharges, oil and gas production, mining, or farming.
- Pesticides and herbicides**, which may come from a variety of sources such as agriculture, urban stormwater runoff, and residential uses.
- Organic chemical contaminants**, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can, also, come from gas stations, urban stormwater runoff, and septic systems.
- Radioactive contaminants**, which can be naturally occurring or be the result of oil and gas production and mining activities.

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791.

In order to ensure that tap water is safe to drink, the EPA prescribes regulations, which limit the amount of certain contaminants in water provided by public water systems. The Food and Drug Administration (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health.

| Contaminant and Unit of Measurement | Dates of sampling (mo./yr.) | MCL Violation Y/N | Level Detected | Range of Results | MCLG | MCL | Likely Source of Contamination |
|-------------------------------------|-----------------------------|-------------------|----------------|------------------|------|-----|--|
| Inorganic Contaminants | | | | | | | |
| Barium (ppm) | 6/2006 | N | 0.023 | N/A | 2 | 2 | Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits |
| Cadmium (ppb) | 6/2006 | N | 0.2 | N/A | 5 | 5 | Corrosion of galvanized pipes; erosion of natural deposits; discharge from metal refineries; runoff from waste batteries and paints |
| Fluoride (ppm) | 6/2006 | N | 0.056 | N/A | 4 | 4.0 | Erosion of natural deposits; discharge from fertilizer and aluminum factories. Water additive which promotes strong teeth when at optimum levels between 0.7 and 1.2 ppm |
| Mercury (inorganic) (ppb) | 6/2006 | N | 0.2 | N/A | 2 | 2 | Erosion of natural deposits; discharge from refineries and factories; runoff from landfills; runoff from cropland |
| Nitrate (as Nitrogen) (ppm) | 6/2006 | N | 0.091 | N/A | 10 | 10 | Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits |
| Sodium (ppm) | 6/2006 | N | 7.31 | N/A | N/A | 160 | Salt water intrusion, leaching from soil |

| Contaminant and Unit of Measurement | Dates of sampling | AL Violation Y/N | 90th Percentile Result | No. of sampling sites exceeding the AL | MCLG | AL (Action Level) | Likely Source of Contamination |
|-------------------------------------|-------------------|------------------|------------------------|--|------|-------------------|--|
| Lead and Copper (Tap Water) | | | | | | | |
| Lead (tap water) (ppb) | 2004 | No | 7 | 0 | 0 | 15 | Corrosion of household plumbing systems, erosion of natural deposits |
| Copper (tap water) (ppm) | 2004 | No | .09 | 0 | 1.3 | 1.3 | Corrosion of household plumbing systems; erosion of natural deposits; leaching from wood preservatives |

TTHMs and Stage 1 Disinfectant/Disinfection By-Product (D/DBP) Parameters

For the following parameters monitored under Stage 1 D/DBP regulations, the level detected is the annual average of the quarterly averages: Bromate, Chloramines, Chlorine, Haloacetic Acids, and/or TTHM (MCL 80 ppb). Range of Results is the range of results (lowest to highest) at the individual sampling sites.

| Contaminant and Unit of Measurement | Dates of sampling (mo./yr.) | MCL Violation Y/N | Level Detected | Range of Results | MCLG or MRDLG | MCL or MRDL | Likely Source of Contamination |
|-------------------------------------|-----------------------------|-------------------|----------------|------------------|---------------|-------------|---|
| Chlorine (ppm) | 1/2006-12/2006 | N | 0.73 | 0.3 to 1.2 | MRDLG = 4 | MRDL = 4.0 | Water additive used to control microbes |
| Haloacetic Acids (five) HAA5 (ppb) | 9/2005 | N | 12.17 | N/A | NA | MCL = 60 | By-product of drinking water disinfection |
| TTHM [Total trihalomethanes] (ppb) | 9/2005 | N | 32.5 | N/A | NA | MCL = 80 | By-product of drinking water disinfection |

Thank you for allowing us to continue providing your family with clean, quality water this year. Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by Cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

We at Southlake Utilities Inc. would like you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to insuring the quality of your water. If you have any questions or concerns about the information provided, please call any of the numbers listed.

Thanks again for all your help. I will be forwarding a commission workshop notice for distribution by your office shortly for an undocketed item. In addition to mailing to the commission workshop MCDs, the notice should also be mailed to all interested persons listed in docket number 060555-EI and the persons on the attached mailing list. The persons on the attached mailing list should also be permanently added to the records. Please give me a call at 413-6195 if you have any questions. Thank you.
