Answer to Question #2

1. The incremental amount presented for Fuel Cost Recovery is due to the increasing cost of underlying commodities and their respective transportation costs, as well as replacement fuel costs for planned outages due to CAIR projects at Crystal River 4
2. The incremental amount presented for Environmental Cost Recovery is due to the CAIR projects at Crystal River 4&5
3. The amount presented for the CR3 Uprate is the residential rate from the May 1 Cost Recovery filing in Docket No. 080009-EI.
4. The amount presented for Levy is based on the residential rate from the nuclear need filing. Please refer to Docket No. 080149-EI for detail.
5. The rates for the capacity, and ecr clauses are preliminary estimates based on the most current projections of 2009 expenses, but these rates are expected to change with the 2009 projection filings which will be made in early August 2008.
