FPSC-COMMISSION CLERK

UTILITIES, INC. OF EAGLE RIDGE
DOCKET NO. 080247-SU
AUDIT REPORT RESPONSES

Audit Finding No. 1 – Rate Case Adjustments From Prior Case Not Booked

The Company agrees with Audit Staff's Finding No. 1 in principle. However, the Company believes Audit Staff is incorrect with one of its depreciation rates. Account 1295 – Structures and Improvements – Pump Plant, is actually the Company's lift station account, and should therefore be depreciated at 4.00% annually pursuant to Rule 25-30.140, Florida Administrative Code. Audit Staff had proposed 3.13% as the annual depreciation rate. Additionally, account 1315 – Structures and Improvements – General should actually be classified under 1300 – Structures and Improvements – Treatment. Audit Staff has proposed 3.13% as the annual depreciation rate for this account, which is correct. This also affects amortization of CIAC on CIAC accounts 3500 and 3505 for lift stations and general plant, respectively. The Company has prepared its own workpapers showing the journal entries related to these adjustments, and how the depreciation and amortization were calculated, as well as the simple average needed for the filing. These workpapers are attached hereto as w/p 1 and w/p 1(a).

Effect on filing: Plant should be decreased (credited) for \$106,671. Accumulated depreciation should be decreased (debited) for \$361,128. CIAC should be increased (credited) for \$252,084. Accumulated amortization of CIAC should be decreased (credited) for \$446,422. Depreciation expense should be increased (debited) for \$2,518. Amortization expense for CIAC should be increased (credited) for \$11,087.

Effect on general ledger: Plant should be decreased (credited) for \$106,671. Accumulated depreciation should be decreased (debited) for \$359,870. CIAC should be increased (credited) for \$252,084. Accumulated amortization of CIAC should be decreased (credited) for \$440,870. Depreciation expense should be increased (debited) for \$2,518. Amortization expense for CIAC should be increased (credited) for \$11,187.

Audit Finding No. 2 – Corrections to Prior Rate Case Ordered Adjustments

The Company agrees that additional adjustments are necessary to remedy the prior rate case adjustments ordered in Docket No. 030445-SU, but disagrees with Audit Staff as to what these adjustments are. The Company has proposed several adjustments. First, the Company notes that the \$17,597 originally booked to lagoons should have been booked to treatment plant, as the audit report suggests. While this is only a reclass entry, the Company wanted to ensure that the adjustment was in the correct account. Second, the Company recognizes that the

DOCUMENT NUMBER - DATE

11684 DEC 18 08

FPSC-COMMISSION CLERK

incorrect accumulated depreciation was booked in 2005, as the audit report states. In response to this, the Company has created a workpaper that shows what the accumulated depreciation should be rolled forward through 2007, as well as the associated depreciation expense. The audit report shows that the Company booked the correct UPIS adjustments in Docket No. 030445-SU. These adjustments are shown on Schedule No. 1-B on page 17 of Order No. PSC-04-1107-PAA-SU. The relevant UPIS adjustments booked by the Company (excluding the retirement adjustment) were adjustment 1 for (\$14,583) to organization and adjustment 2 for (\$27,081) to gravity mains and treatment plant. While Audit Staff mentions an adjustment of \$19,120 to treatment plant, it is evident that his adjustment was not ordered by the PSC, and therefore is not included in the Company's workpaper. The Company's workpaper rolls accumulated depreciation on these adjustments forward through 2007. Finally, the Company booked the total retirement entry of (\$306,117) to treatment plant and structures and improvements – reclaimed water distribution. However, as Audit Staff shows, these adjustments should have been booked in 2002, and instead were booked in 2005. Therefore, three years of accrued A/D must be removed. All the adjustments mentioned above are shown in the workpapers attached hereto as w/p 2 and w/p 2(a).

Effect on filing: Accumulated depreciation should be increased (credited) for \$46,571. Depreciation expense should be decreased (credited) for \$18,565.

Effect on general ledger: Accumulated depreciation should be increased (credited) for \$37,289. Depreciation expense should be decreased (credited) for \$18,565.

Audit Finding No. 3 – 2003 CIAC Allocation Adjustment

The Company agrees that a reclassification must be done in order to correctly state the CIAC balances. The Company agrees with Audit Staff's plant reclassification portion of its journal entry, but notes that account 3520 is really 3505 – CIAC – Structures and Improvements - Treatment. Audit Staff is amortizing this account correctly at 3.13%. However, the Company disagrees with the accumulated amortization portion in total because it appears Audit Staff has an incorrect calculation. Audit Staff proposed a rate of 4.41% for amortization of tap fees on page 23 of the audit report. While the Company agrees with this rate, it appears that Audit Staff's calculation is incorrect, as $\$55,438 * 4.41\% = \$2,441$, as opposed to \$2,227 shown on page 23. In addition, the Company notes that it has broken down the journal entry by subdivision for Eagle Ridge and Cross Creek. The Company has also rolled forward the accumulated amortization based on Audit Staff's recalculation of CIAC through 2007 instead of proposing a 2003 journal entry. Rolling the entry forward through 2007 allows for adjustments to the test year to correct accumulated amortization and amortization expense. It also allows for an averaging

calculation for the filing. In addition, by rolling Audit Staff's CIAC calculation forward through 2007 for accumulated amortization and amortization expense, it effectively takes care of Audit Staff's Finding No. 4. All the adjustments mentioned above are shown in the workpapers attached hereto as w/p 3, w/p 3(a), and w/p 3(b).

Effect on filing: Accumulated amortization of CIAC should be increased (debited) by \$54,137. Amortization expense for CIAC should be increased (credited) by \$18,643.

Effect on general ledger: Accumulated amortization of CIAC should be increased (debited) by \$63,458. Amortization expense for CIAC should be increased (credited) by \$18,643.

Audit Finding No. 4 – Adjustment to Accumulated Amortization

The Company's rollforward of accumulated amortization of CIAC through 2007 and adjusting of accumulated amortization of CIAC and amortization expense for CIAC in Audit Staff's Finding No. 3 resolves Audit Staff's Finding No. 4.

Audit Finding No. 5 – Misclassified Easement

The Company agrees that the easement was misclassified. However, the easement was for \$11,411, rather than \$11,415, as mentioned by Audit Staff, and since lift station is collection plant, the reclassified land should be booked as land – collection plant. In addition, the easement was booked in January of 2006, so it began depreciating that month. Therefore, the Company proposes to remove two years of accumulated depreciation rather than the one and a half years proposed by Audit Staff. All the adjustments mentioned above are shown in the workpapers attached hereto as w/p 5 and w/p 5(a).

Effect on filing: Accumulated depreciation should be decreased (debited) by \$685. Depreciation expense should be decreased (credited) by \$456.

Effect on general ledger: Accumulated depreciation should be decreased (debited) by \$913. Depreciation expense should be decreased (credited) by \$456.

Audit Finding No. 6 – Construction Projects Retirements Not Recorded

The Company agrees that generally speaking, a retirement should be recorded for these types of occurrences. However, the original sand filter was installed in 1984, which is 23 years prior to the test year. The Company and Staff should use the Handy-Whitman index to determine the proper retirement for this plant.

Audit Finding No. 7 – Correction to Net Depreciation Expense

The Company's entries in Audit Staff's Finding No. 7 encompass all depreciation expense adjustments and accumulated depreciation rollforward adjustments pertaining to Finding Nos. 7 and 8. All the adjustments and calculations mentioned above are shown in the workpapers attached hereto as w/p 7, w/p 7(a), and w/p 7(b).

Audit Finding No. 8 – Corrections to Accumulated Depreciation

The Company agrees that it has been using incorrect depreciation rates and also believes these rates should be corrected. The Company also agrees with Audit Staff's reclassification of the \$3,348 to sewage treatment plant. The Company has completed a rollforward similar to Audit Staff's, but including plant balances for the years 2003-2006, showing what the depreciation calculations for each year should be. There are some differences between the Company's attached workpaper and Staff's workpapers, but the Company believes that its workpapers are correct, based on the plant balances each year, and the fact that the Company is using the correct depreciation rates in these workpapers. The Company's workpaper is also broken down by subdivision. The Company's rollforward does not include any allocated plant, Commission-ordered adjustments, or any other adjustments to which it has agreed within this audit report. Any Commission-ordered adjustments or proposed adjustments in this audit report have already been accounted for already in Finding Nos. 1 through 7 above. Any additional adjustment made in this audit finding would result in double counting. Finally, the effects on the filing and on the general ledger have been incorporated into the Company's response to Audit Staff's Finding No. 7, so as to properly use the 2006 adjustments calculated in Finding No. 8's workpapers into the simple average calculation in audit finding no. 7.

Effect on filing: Accumulated depreciation should be increased (credited) by \$255,862. Depreciation expense should be increased (debited) by \$39,510.

Effect on general ledger: Accumulated depreciation should be increased (credited) by \$285,384. Depreciation expense should be increased (debited) by \$39,510.

Audit Finding No. 2 - Corrections to Prior Rate Case Ordered Adjustments

Entry #5

Location: Docket No. 080247-SU audit report pg. 15-18

Entry Description: To reclass COA that was booked into lagoons, but should have been booked into treatment plant, and to remove the related COA for A/D in lagoons

Notes: Adjustment for A/D for \$17,597 credit to treatment plant will be made in entry #6

<u>Object A/C</u>	<u>Business Unit</u>	<u>Description</u>	<u>Debit</u>	<u>Credit</u>
1395	249100	Treatment Disposal Equipment - Lagoon	17,597	
?	249100	Balancing Entry	15,884	
1400	249100	Treatment Disposal Equipment - Treatment Plant		17,597
2155	249100	A/D - Treatment Disposal Equipment - Lagoon		15,884

Entry #6

Location: Docket No. 080247-SU audit report pg. 15-18

Entry Description: To correct and rollforward the A/D on the UPIS COA that was made in 2005 (excluding retirement entries)

<u>Object A/C</u>	<u>Business Unit</u>	<u>Description</u>	<u>Debit</u>	<u>Credit</u>
2030	249100	A/D - Organization	724	
2110	249100	A/D - Gravity Mains	1,298	
?	249100	Balancing Entry	72,358	
2160	249100	A/D - Treatment Disposal Equipment - Treatment Plant		72,604
6640	249100	Dep Exp - Organization		362
6715	249100	Dep Exp - Gravity Mains		60
6765	249100	Dep Exp - Treatment Disposal Equipment - Treatment Plant		1,355

Entry #7

Location: Docket No. 080247-SU audit report pg. 15-18

Entry Description: To correct and rollforward the A/D on the UPIS COA retirement entries made in 2005

<u>Object A/C</u>	<u>Business Unit</u>	<u>Description</u>	<u>Debit</u>	<u>Credit</u>
2160	249100	A/D - Treatment Disposal Equipment - Treatment Plant	49,475	
2070	249100	A/D - Structures & Improvements - Reclaimed Distribution		298
?	249100	Balancing Entry		32,388
6670	249100	Dep Exp - Structures & Improvements - Reclaimed Distribution		297
6765	249100	Dep Exp - Treatment Disposal Equipment - Treatment Plant		16,492

Effect on Filing

A/D	should be increased by	(46,571) credit
Dep Expense	should be decreased by	(18,565) credit

Notes:

- (1) After audit staff's redistribution, a reclass entry to move CIAC out of treatment plant and into structures and improvements was made. Since this was after the 2002/2003 redistribution, A/A of CIAC needed to be reclassified as well. In order to calculate the A/A of CIAC reclass, the Company did the following:
- The Company noted that approximately 82.44% of the CIAC balance in treatment plant was moved to structures and improvements in 2005 for Eagle Ridge.
 - The Company removed 82.44% to the ending balance in A/A of CIAC - treatment plant in 2004 and reclassified that amount into A/A of CIAC - structures and improvements - treatment for Eagle Ridge.
 - The Company noted that approximately 66.12% of the CIAC balance in treatment plant was moved to structures and improvements in 2005 for Cross Creek.
 - The Company removed 66.12% to the ending balance in A/A of CIAC - treatment plant in 2004 and reclassified that amount into A/A of CIAC - structures and improvements - treatment for Cross Creek.
- If this entry was not prepared, the A/A of CIAC in treatment plant would have had a great balance than the CIAC for treatment plant.

Audit Finding No. 3

Distribution of Assets Between Eagle Ridge and Cross Creek

	(a) 2002 Eagle Ridge	(b) % Eagle Ridge	(c) 2002 Cross Creek	(d) % Cross Creek	(e) Total

Audit Finding No. 7

Notes:

- (1) The depreciation calculation on plant above does not include plant from allocations or from adjustments from Commission orders. Allocated plant and its corresponding depreciation expense were audited in a separate affiliate audit, and any adjustment to such would have been responded to in that affiliate audit. Depreciation from adjustments to plant from Commission orders has already been addressed in audit finding no. 1, and has been adjusted to the proper 2007 balances. To account for them again in this finding would be double counting.

Notes:

- (1) The depreciation calculation on plant above does not include plant from allocations or from adjustments from Commission orders. Allocated plant and its corresponding depreciation expense were audited in a separate affiliate audit, and any adjustment to such would have been responded to in that affiliate audit. Depreciation from adjustments to plant from Commission orders has already been addressed in audit finding no. 1, and has been adjusted to the proper 2007 balances. To account for them again in this finding would be double counting.
