RE: Docket No. 080248-SU; Tierra Verde Utilities, Inc.'s Application for an Increase in Wastewater Rates Increase in Pinellas County, Florida  
Our File No.: 30057.156

Dear Ms. Cole:

Enclosed for filing in the above-referenced docket is the Utility's revised response to Item No. 1 and Item No. 2 in Staff's First Data Request dated December 8, 2008. The PSC Staff discovered an inadvertent error in the Utility's response. As such, the attached narrative response should replace the previously submitted responses for Item No. 1 and Item No. 2.

Should you or the Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

  
CHRISTIAN W. MARCELLI  
Of Counsel

**TIERRA VERDE UTILITIES, INC.  
DOCKET NO. 080248-SU  
STAFF'S FIRST DATA REQUEST**

**REVISED RESPONSES TO ITEM NO. 1 AND ITEM NO. 2:**

1. Please provide all support documentation, including but not limited to, workpapers, bases, and/or assumptions for the pro forma expense adjustments reflected on MFR Schedule B-3, Page 1 of 2, Lines 30 through 42.

**RESPONSE:**

The first adjustment is a \$50,727 increase to salaries. For this adjustment, please see the attached document titled "2007 TY Florida Rate Cases". The \$50,727 is the total of the \$30,685 increase to operators' salaries, the \$27,604 increase to office salaries, and the (\$7,562) increase to captime shown on the lead sheet. The support behind the salary and captime amounts are shown on "2007 TY Florida Rate Cases" and w/p b. Each corporate and Florida employee's current salary and overtime are summed, and then a cost of living adjustment of 3.5% of the total salary is added to arrive at the employee's total pro forma salary. This pro forma salary is then applied to Tierra Verde based on a percentage. The percentage is derived by taking Tierra Verde's ERC divided by the total ERC basis for each employee. The ERCs and percentages for Florida employees are found on w/p c-2 and w/p c-3, and the ERCs and percentages for corporate employees are found on w/p c-1. The Company has already provided the workpaper support for each employee's current salary. For the employees who were recently hired and no salary information existed, the Company performed an average of the salaries for that person's position, and applied that average as the current salary.

The remaining adjustment is to purchased sewage treatment for a rate increase authorized for the City of St. Petersburg. Please see the enclosed document titled "B-3 Page 1 of 2, Lines 39-42" for support.

2. On MFR Schedule B-8, Lines 1 through 3, the Utility reflects an increase of \$30,001 or 60.11 percent for Salaries & Wages - Employees and \$8,983 or 77.50 percent for Employee Pensions & Benefits. Tierra Verde asserts that the reason for these increases is due to "annualization, cost of living increases, and the need for additional employees." On MFR Schedule B-8, the Utility reflects an adjusted test year amount of \$17,046 for Contractual Services - Other, which represents an increase \$14,536 or 579.11 percent. Tierra Verde stated that the reason for this increase was due to

“[t]emporary employment has increased the cost of other contractual services.”

- a. Given the fact that the Utility included pro forma salary and pensions & benefits adjustments totaling \$30,001 and \$8,983, respectively, for “annualization, cost of living increases, and the need for additional employees.” (emphasis added), please explain why Tierra Verde did not make a corresponding adjustment to decrease Contractual Services - Other for the “temporary employment” during the test year.
- b. Identify each temporary position employed during the test year and provide a detail of the duties performed and the associated cost. Please be sure the total cost equals the \$14,536 shown on MFR Schedule B-8.
- c. State whether the additional personnel will eliminate the need for temporary employment.

**RESPONSE:**

- (2a) The Company notes that \$10,573 of the difference between the prior test year and the current test year is from the allocation adjustment required in order to allocate on an ERC basis and not a customer equivalent basis. The remaining \$6,473 is what was actually booked to the general ledger during the current test year, which is actually a 157.89% increase over the prior test year. While the Company believes there could be a slight decrease to this account, there have been additional WSC and Florida employees hired since the preparation of the MFR. If Staff recommends a reduction to contractual services - other, an additional increase to salaries, payroll taxes, and pension and benefits must be considered.
- (2b) The Company believes Staff wants it to tie to the total GL balance of \$17,046 rather than the \$14,536 difference between the previous test year and the current test year. Given this, the Company notes that only \$2,046 (\$1,242 booked plus the debit adjustment of \$804 from the allocation adjustment) of the \$17,046 is related to temporary employment. Please see the attached general ledger showing the total of \$6,472.70 from the per books numbers and \$10,573.18 from the allocation adjustment. The Company is providing the entire contractual services - other general ledger and the invoices from WSC and from the regional office related to temporary employment that was allocated, as requested in Staff's

First Data Request, and the corresponding allocation calculations. It is also providing the allocation workpaper from which the \$10,573.18 is derived. The Company will provide any additional invoices for contractual services - other upon request. Please note that the regional allocation booked was incorrect for the test year, so the quarterly regional GLs provided will not tie to what was allocated. The allocable balance was never updated each quarter, and reflects the regional office balance of the first quarter in each allocation quarter. This was one of the items remedied in the allocation revision workpaper, and the revisions to this are included in the \$10,573.18 amounts.

- (2c) Additional employees will likely never eliminate the need for some type of temporary employment at any given point in time.

w/p a

Gallons of Wastewater Treated  
In Thousands of Gallons

Florida Public Service Commission

Company: Tierra Verde Utilities, Inc.  
Docket No.: 080248-SU  
Test Year Ended: December 31, 2007

Schedule F-2  
Page 1 of 1  
Preparer: F. Seidman

Explanation: Provide a schedule of gallons of wastewater treated by individual plant for each month of the historical test year. Flow data should match the monthly operating reports sent to DEP.

Month/ Year	(1)	(2)	(3)	(4)	(5)	(6)

Mr. Patrick Flynn  
Tierra Verde Utilities, Inc.  
200 Weathersfield Avenue  
Altamont Springs, FL 32714

Dear Mr. Flynn:

RE: Preliminary FY2009 Wholesale Water and Wastewater Utility Rates

Please be advised that our rate consultant, Burton & Associates, has provided results of the FY09 Wholesale Water and Wastewater rate calculations. At this time, it is estimated that the FY09 wholesale wastewater rate is proposed to be increased to \$2,310 per million gallons from the current rate of \$2,146 per million gallons. This represents a 7.7% increase.

The rate consultants, led by Andrew Burnham, will be available on Wednesday, August 21, 2008 at 9:00 a.m. to present these results. The meeting will be held in Conference Room A of the Water Resources Department complex, located at 1635 Third Avenue North.

Additionally, the proposed rates will be considered by the City of St. Petersburg City Council at a First Reading on Thursday, September 4, 2008 at 8:30 a.m. and at a Public Hearing on Thursday, September 18, 2008 at 6:00 p.m.

Please contact me if you have any questions at 727-893-7297. Please let me know if you are unable to attend this meeting.

Sincerely,

Evelyn A. Rosetti  
Manager, Special Projects

St. Petersburg, Florida 33713

Re: FY 2009 Wholesale Water and Sewer Rate Calculations

Dear Ms. Rosetti:

This letter is intended to provide the results of the FY 2009 wholesale water and wholesale sewer rate calculations.

## **Brief Methodology Overview**

The methodology utilized in this analysis began by allocating the Utility's FY 2009 Budget costs between the water, sewer, and reclaimed water systems. In addition, the costs of providing customer services such as meter reading, billing, collection, etc. were isolated and placed into a separate functional component (Customer Costs). Since the cost incurred to provide reclaimed water service cannot be fully recovered through the charges to reclaimed water customers, the residual costs in excess of total reclaimed water revenues were split evenly between the water and sewer systems and allocated solely to the retail customers of those systems.

Once all of the costs (including residual reclaimed water costs) were allocated to the water and sewer systems, they were then allocated to retail-specific, wholesale specific, and joint cost categories. These allocations were performed separately for the Utility's capital costs (debt service and annual transfer to the Water Resources Capital Projects Fund) and operating costs. The annual capital costs were allocated to these cost categories based upon an allocation of the Utility's capital investment to these categories.

The costs allocated to each of the cost categories were then allocated to the users in proportion to their use of that system function. Thus, all retail-specific costs were allocated to retail users, and wholesale specific costs were allocated to wholesale users. Joint costs were allocated to both wholesale and retail customers in proportion to their share of total system water consumption or sewer flows as appropriate.

## Results

The following table identifies the wholesale rates calculated for FY 2009.

<b>CITY OF ST. PETERSBURG, FLORIDA</b>				
<b>Cost of Service Allocation Summary</b>				
<b><u>Summary of Current &amp; Proposed Wholesale Rates</u></b>				
<u>Wholesale Customer Type</u>	<u>Current Rate</u>	<u>Proposed Rate</u>	<u>Variance</u>	<u>% Change</u>
WATER	\$3,663	\$3,728	\$65	1.8%
WASTEWATER (excl. St. Pete Beach)	\$2,146	\$2,310	\$164	7.7%
ST. PETE BEACH				
Capital Charge (Monthly)	\$46,891	\$32,020	(\$14,871)	-31.7%
O&M Rate	\$1,765	\$1,828	\$63	3.6%
Note: All rates and variances are per million gallons of demand/flow unless stated otherwise.				

The following sub-sections describe the specific factors causing the identified changes from the FY 2008 to the FY 2009 rates.

### Water Wholesale Rate Calculation

The largest contributing factor to the FY 2009 rate increase is the allocation of additional debt service expense resulting from the upcoming Series 2008 Revenue Bond to be issued (proceeds of \$40 million). The additional debt service is responsible for approximately 1.3% of the total 1.8% rate increase, while the remaining portion of the increase (approximately 0.5%) is attributable to small increases in various operating and maintenance costs and minor reductions in estimated annual water consumption.

### Sewer Wholesale Rate Calculation

Similarly, the FY 2009 sewer wholesale rate increase is also affected by the allocation of additional debt service expenses resulting from the upcoming Series 2008 Revenue Bond. The additional debt service allocation is responsible for approximately 2.6% of the total 7.7% rate increase.

The remaining portion of the increase (approximately 5.1%) is primarily a result of a decrease in estimated sewer flow, but is also affected by modest increases in operating and maintenance expenses at the City's water reclamation facilities.

Relative to sewer flow, since a large portion of the City's costs are considered joint costs, flow estimates are an important part of determining the allocation of costs between wholesale and retail users. The City has been estimating flow based upon a rolling three-year average of historical flow in order to minimize substantial fluctuations in cost

*Burton & Associates*

200 Business Park Circle, Suite 101 • St. Augustine, Florida 32095 • Phone (904) 247-0787 • Fax (904) 241-7708  
E-mail: [aburnham@burtonandassociates.com](mailto:aburnham@burtonandassociates.com)

allocations and subsequent rate calculations that would otherwise occur due to significant increases or decreases in flow from one year to the next. Nevertheless, as a result of recent dry years with very minimal storm activity and continued collection system improvements, the average annual amount of inflow & infiltration (I&I) in retail sewer flows over the past three years has decreased, as has billable wholesale sewer flow. However, the current three-year average (FY 2005 – FY 2007) for retail sewer flow is over 8% lower than the prior three-year average (FY 2004 – FY 2006), while wholesale sewer flow is only about 2% lower than the prior three-year average. The greater level of reduction in retail flow results in a smaller retail allocation of joint costs that are allocated between wholesale and retail users based upon flow ratios.

Finally, it is also important to note that the City has consolidated some of its departments, including the various operating and maintenance departments for each water reclamation facility into a single department. For FY 2009, the historical allocation of each water reclamation facility's operations and maintenance expenses to sewer and reclaimed water has been preserved. However, next year, the City intends to review the allocation of the costs of these facilities between the sewer and reclaimed water functions, the results of which will be reflected in the FY 2010 cost of service allocation and wholesale rate calculations.

#### St. Pete Beach Wholesale Rate Calculation

As you will recall, in 2001, the City of St. Petersburg (City) entered into a wholesale wastewater service agreement with the City of St. Pete Beach (St. Pete Beach) that contains a methodology for determining the annual rates to be applied to St. Pete Beach to recover the cost of providing wholesale wastewater service to St. Pete Beach. The agreement identifies two cost components to the wholesale Wastewater Service Charges applicable to St. Pete Beach; an operations and maintenance (O&M Charge) component and a capital (Capital Charge) component.

The O&M Charge recovers the cost of operating and maintaining the City's wastewater system, which is allocable to St. Pete Beach in accordance with specific cost allocation factors/criteria identified within the agreement. The O&M Charge is based upon St. Pete Beach's metered wastewater flow during the billing period multiplied by the rate per million gallons of wastewater flow.

The Capital Charge recovers an allocation of capital investment and corresponding finance charges, if any, associated with the funding of renewals, replacements, improvements, upgrades and extensions of 1) the Northwest Water Reclamation Facility (NWWRF), 2) certain shared facilities as defined in the agreement, and 3) the Pasadena transmission line and lift station. The annual Capital Charge is billed in twelve equal monthly installments.

Relative to the O&M Charge, the same general cost inflation and flow reductions causing the increases to the rates of the other sewer wholesale customers are also responsible for

the increase to the O&M Charge in FY 2009, as wholesale sewer O&M rates are calculated the same for all customers, including St. Pete Beach.

Meanwhile, the annual Capital Charge decreases in FY 2009 due to the change in the amortization schedule for allocated capital project costs incurred prior to April 2001 as identified in the settlement agreement.

To the extent you have questions regarding the results of the FY 2009 wholesale water and sewer rate calculations, or if you would like additional information, please contact me at (904) 247-0787 at your convenience.

Very truly yours,

Andrew J. Burnham  
Senior Vice President
