24 **25-4.0175 Depreciation for Rate-of-Return Regulated Local Exchange Companies.**

25 (1) ~~For the purposes of Part II, the following definitions shall apply to small local~~

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions from existing law.

1 ~~exchange companies remaining under rate of return regulation:~~

2 (a) ~~Category or Category of Depreciable Plant~~—A grouping of plant for which a
3 ~~depreciation rate is prescribed. At a minimum it should include each plant account prescribed~~
4 ~~in Rule 25 4.017, F.A.C.~~

6 ~~average, can be expected to prudently and economically serve the public.~~

7 (c) ~~Embedded Vintage~~—A vintage of plant in service as of the date of study or
8 ~~implementation of proposed rates.~~

9 (d) ~~Mortality Data~~—Historical data by study category showing plant balances,
10 ~~additions, adjustments and retirements, used in analyses for life indications or for calculations~~
11 ~~of realized life. Preferably, this is aged data in accord with the following:~~

12 1. ~~The number of plant items or equivalent units (usually expressed in dollars) added~~
13 ~~each calendar year.~~

14 2. ~~The number of plant items retired (usually expressed in dollars) each year and the~~
15 ~~distribution by years of placing of such retirements.~~

16 3. ~~The net increase or decrease resulting from purchases, sales, or adjustments, and the~~
17 ~~distribution by years of placing of such amounts.~~

18 4. ~~The number that remains in service (usually expressed in dollars) at the end of each~~
19 ~~year and the distribution by years of placing of such amounts.~~

20 (e) ~~Remaining Life Method~~—The method of calculating a depreciation rate based on
21 ~~the unrecovered plant balance, less average future net salvage and the average remaining life.~~

22 ~~The formula for calculating a Remaining Life Rate (RLR) is:~~

23 ~~$$\text{RLR} = \frac{100\% - \text{Reserve \%} - \text{Average Future Net Salvage \%}}{\text{Average Remaining Life}}$$~~

7 ~~with that reserve historically accrued. The latter figure may be available from the company's~~
8 ~~records or may require retrospective calculation.~~

9 (h) Reserve Surplus—~~An excess in the reserve of a category as evidenced by a~~
10 ~~comparison of that reserve indicated as necessary under current projections of life and salvage~~
11 ~~with that reserve historically accrued. The latter figure may be available from the company's~~
12 ~~records or may require retrospective calculation.~~

20 ~~study.~~

21 (l) Whole Life Method—~~The method of calculating a depreciation rate based on the~~
22 ~~Whole Life (Average Service Life) and the Average Net Salvage. Both life and salvage~~
23 ~~components are the estimated or calculated composite of realized experience and expected~~
24 ~~activity. The formula is:~~

2 Underground conduit 50-52 (5)-0

3 Aerial wire — Expense all future additions and amortize embedded portion over 3 years.

4 (b) A company shall not petition the Commission to change any existing depreciation

5 rate more than once a year.

6 (c) A company may not reallocate accumulated depreciation reserves among any

7 primary accounts and subaccounts without prior Commission approval.

8 (3)(a) Each company shall maintain depreciation rates and accumulated depreciation

9 reserves in accounts or subaccounts as prescribed by Rule 25-4.0174, F.A.C., and as set forth

10 in paragraph (2)(a) of this rule. Companies may maintain further sub-categorization.

11 (b) Upon establishing a new account or subaccount classification, each company shall

12 request Commission approval of a depreciation rate for the new plant category.

13 (c) A company's current average service life is that which has been approved by the

14 Commission and in effect as of the effective date of this rule. To determine if a company's

15 current average service life is within an established range, current average service lives not

16 reflected as a whole number shall be rounded using traditional rounding methodology. (For

17 example, 1.1-1.4 rounds to 1.0; 1.5-1.9 rounds to 2.0.)

18 (4) If the company's proposed and current average service lives for a given account are

19 within the ranges established in paragraph (2)(a), no additional support for those values shall

20 be required. If the company's proposed and current net salvage values for a given account are

21 within the ranges established in paragraph (2)(a), no additional support for those values shall

22 be required. The company shall submit to the Office of Commission Clerk the original, five

23 hard copies, and a diskette of the information required by subsection (8) of this rule.

24 (5) A company proposing basic life or salvage values outside of the ranges established

25 in paragraph (2)(a) of this rule shall submit to the Office of Commission Clerk the original and

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions from existing law.

1 five hard copies, and a diskette of the information required by subsection (10) of this rule.

2 (6) After filing a petition for a change in depreciation rates, the company may reflect
3 on its books and records the preliminary implementation of the proposed rates as of the
4 proposed effective date. These rates are subject to Commission approval.

5 (7) Any party protesting a Commission approved depreciation life or salvage value,
6 shall carry the burden of proof in demonstrating that each protested value is unsupported by
7 the operations and planning of each company.

8 (8) A depreciation filing shall include:

9 (a) A comparison of current and proposed depreciation rates and components for each
10 category of depreciable plant. Current rates shall be identified as to the effective date and
11 proposed rates as to the proposed effective date.

12 (b) A comparison of annual depreciation expense, as of the proposed effective date,
13 resulting from current rates with the expense produced by the proposed rates for each category
14 of depreciable plant. The plant balances may involve estimates. Submitted data including plant
15 and reserve balances or company planning involving estimates shall be brought to the
16 effective date of the proposed rates.

17 (c) Each recovery and amortization schedule currently in effect should be included
18 with any new filing showing total amount amortized, effective date, length of schedule, annual
19 amount amortized, and reason for the schedule.

20 (d) A general narrative describing the service environment of the applicant company
21 and the factors, e.g., growth, technology, and physical conditions necessitating a revision in
22 rates.

23 (9) If a company's current average service life or salvage value for any given category
24 of depreciable plant is not within the established range, the company must file the information
25 in subsection (10) to justify its move into the range.

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions
from existing law.

1 ~~(10) For each account that the Company proposed life or salvage value is not within~~
2 ~~the established range, the depreciation filing shall include the information in subsection (8) as~~
3 ~~well as the following:~~

4 ~~(a) An explanation and justification for each study category of depreciable plant~~
5 ~~defining the specific factors that justify the life or salvage components and rates being~~
6 ~~proposed. Each explanation and justification shall include substantiating factors utilized by the~~
7 ~~company in the design of the depreciation rates for the specific category, e.g., company~~
8 ~~planning, growth, technology, physical conditions, and trends. The explanation and~~
9 ~~justification shall state any statistical or mathematical methods of analysis or calculation used~~
10 ~~in the design of the category rate.~~

11 ~~(b) The mortality and salvage data used by the company in the depreciation rate design~~
12 ~~must agree with activity booked by the utility. Unusual transactions not included in life or~~
13 ~~salvage studies, e.g., sales or extraordinary retirements must be specifically enumerated and~~
14 ~~explained.~~

15 ~~(c) The filing shall contain all calculations, analysis and numerical basic data used in~~
16 ~~the design of the depreciation rate for each category of depreciable plant. To the degree~~
17 ~~possible, data involving retirements should be aged.~~

18 ~~(11)(a) Companies shall provide calculations of depreciation rates using either the~~
19 ~~whole life method or the remaining life method. The use of one of these methods is required~~
20 ~~for all depreciable categories.~~

21 ~~(b) Companies shall file an election to remain with the remaining life methodology or~~
22 ~~move to whole life methodology within 90 days of the effective date of this rule. Failure to file~~
23 ~~an election shall result in the company's use of remaining life methodology. Only one election~~
24 ~~regarding depreciation methodology will be permitted.~~

25 ~~(12) When a company elects whole life methodology, no recovery of reserve~~

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions
from existing law.

1 imbalances will be considered for depreciation purposes. This methodology is not reserve
2 sensitive.

3 ~~(13) When a company elects remaining life methodology, the following apply:~~

4 ~~(a) A company requiring the Commission staff's assistance in determining a remaining~~
5 ~~life based on its average service life selection, shall notify the Director of the Division of~~
6 ~~Economic Regulation, by letter, three months prior to the company's filing date.~~

7 ~~(b) The possibility of corrective reserve transfers shall be investigated by the~~
8 ~~Commission prior to changing depreciation rates.~~

9 ~~(c) It shall be a rebuttable presumption that in determining the average remaining life,~~
10 ~~the mortality curve shapes shall be those used by the Commission the last time it prescribed~~
11 ~~rates.~~

12 ~~(14)(a) A company proposing an effective date of the beginning of its fiscal year shall~~
13 ~~submit its petition for a change in depreciation rates no later than the mid-point of that fiscal~~
14 ~~year.~~

15 ~~(b) A company proposing an effective date coinciding with the expected date of~~
16 ~~additional revenues initiated through a rate case proceeding shall submit its petition for a~~
17 ~~change in depreciation rates no later than the filing date of its Minimum Filing Requirements.~~

18 ~~(15) Included as part of the annual report filed pursuant to Rule 25-4.135, F.A.C., each~~
19 ~~company shall provide Schedule B-3, Analysis of Plant In Service, and Schedule B-4,~~
20 ~~Analysis of Accumulated Depreciation. Schedule B-3 shall include booked plant activity~~
21 ~~(plant balance at the beginning of the year, additions, adjustments, transfers, reclassifications,~~
22 ~~retirements, and plant balance at year end). Schedule B-4 shall include reserve activity~~
23 ~~(reserve balance at the beginning of the year, retirements, accruals, salvage, cost of removal,~~
24 ~~adjustments, transfers, reclassifications, and reserve balance at year end) for each category of~~
25 ~~investment for which a depreciation rate, amortization schedule, or capital recovery schedule~~

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions from existing law.

1 has been approved.

2 ~~(16)(a) Prior to the date of retirement, the Commission may approve capital recovery~~
3 ~~schedules to correct calculated deficiencies where a utility demonstrates that replacement of~~
4 ~~an installation or group of installations is prudent, and the associated investment will not be~~
5 ~~recovered by the time of retirement through the existing depreciation rate.~~

6 ~~(b) The Commission may approve a special capital recovery schedule when an~~
7 ~~installation is designed for a specific purpose or for a limited duration.~~

8 ~~(c) Associated plant and reserve activity, balances, and the annual capital recovery~~
9 ~~schedule expense must be maintained as subsidiary records.~~

13 **25-4.0178 Retirement Units for Rate-of-Return Regulated Local Exchange Companies.**

14 ~~(1) This rule is intended to establish uniform retirement units for telephone companies~~
15 ~~and does not relieve any company from maintaining its accounts and records in conformity~~
16 ~~with the Uniform System and Classification of Accounts (USOA) as prescribed by the Federal~~
17 ~~Communications Commission (FCC) in Title 47, Code of Federal Regulations, Part 32, as~~
18 ~~adopted on December 2, 1986 and revised as of December 1, 1987, except to the extent that~~
19 ~~this rule requires different treatment as stated below.~~

20 ~~—— (2) For the purposes of this rule the following definitions apply:~~

21 ~~—— (a) “Book Cost” means the amount at which a retirement unit is included in a~~
22 ~~telephone plant account, including the costs of all labor and installation. This cost is to be~~
23 ~~determined from the company’s records, but if it cannot be, it is to be estimated.~~

24 ~~—— (b) “Cost or in plant cost” means original purchase price plus all labor and installation~~
25 ~~costs.~~

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions from existing law.

1 ~~—— (c) “Cost of Removal” means the cost of demolishing, dismantling, removing, tearing~~
2 ~~down or otherwise disposing of a retirement unit, including the cost of transportation and~~
3 ~~handling.~~

4 ~~—— (d) “Cradle To Grave Accounting” means an accounting method which treats a unit of~~
5 ~~plant as being in service from the time it is first purchased until it is finally junked or is~~
6 ~~otherwise finally disposed. Periods of in shop for refurbishing or in stock/inventory awaiting~~
7 ~~reinstallation are treated as being in service.~~

8 ~~—— (e) “Gross Salvage” means the amount received from selling or trading in a retirement~~
9 ~~unit; or, if retained for reuse, the original, or estimated if not known, material cost of the unit.~~

10 ~~—— (f) “Item” means a single identifiable unit of plant. Where a dollar threshold is~~
11 ~~imposed, that threshold applies to the single item and not to the total of a group of such items~~
12 ~~purchased in one order.~~

13 ~~—— (g) “Minor Item” means any part or element of plant which is not designated as a~~
14 ~~retirement unit, but may be a component of or adjunct to a retirement unit.~~

15 ~~—— (h) “Plant Retired” means a retirement unit not subject to cradle to grave accounting,~~
16 ~~or an unreplaced minor item which has been removed, sold, abandoned, destroyed or~~
17 ~~otherwise removed from service.~~

18 ~~—— (i) “Retirement Unit” means an item of telephone plant designated as a retirement unit~~
19 ~~which when placed in service is to be capitalized if the cost of the unit meets the criteria in the~~
20 ~~“List of Retirement Units”, and when removed from service, without a replacement or with a~~
21 ~~replacement that meets the criteria in the “List of Retirement Units”, is to be credited to the~~
22 ~~plant account in which it is included and debited to the associated account reserve.~~

23 ~~—— (3) All depreciable plant is considered as consisting of retirement units or minor items~~
24 ~~of plant. Each company is to use this list of retirement units on a prospective basis. A~~
25 ~~company may add retirement units to this list. In the case of such addition, the company shall~~

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions from existing law.

1 notify the Director of the Division of Economic Regulation within thirty days as to the nature
2 and justification of the addition. However, the combination of any retirement units or the
3 increase in size of any unit will not be permitted without Commission prior approval.

4 ~~Additions to or revisions to this list will be issued, when necessary, by this Commission.~~

5 ~~—— (4) The addition and retirement of retirement units are to be accounted for as follows:~~

6 ~~(a) When a retirement unit other than one designated for Company Communications
7 Equipment, Account 2132.2, or Public Telephone Equipment, Account 2351, is placed in
8 service for the first time at a location, the cost of the unit, if it meets the criteria in the “Lists of
9 Retirement Units”, should be added to the appropriate plant account along with associated
10 labor and installation costs.~~

11 ~~—— (b) When a retirement unit for Company Communications Equipment, Account
12 2123.2, or Public Telephone Equipment, Account 2351, is placed in service for the first time
13 at a location, only the materials cost of the unit, if it meets the criteria in the “List of
14 Retirement Units”, shall be added to the appropriate plant account. Associated labor and minor
15 materials costs of installing such equipment shall be charged to the appropriate expense
16 account.~~

17 ~~—— (c) When a retirement unit is replaced, the cost of the replacement should be accounted
18 for in the same manner as in subsection (a) if the cost meets the criteria set forth in the “List of
19 Retirement Units” referred to in subsection (6). Otherwise, the charge should be made to the
20 appropriate expense account.~~

21 ~~—— (d) When a retirement unit is retired, with a replacement that meets the criteria in the
22 “List of Retirement Units” referred to in subsection (6), or is retired without replacement, the
23 book cost of the retiring unit is to be credited to the plant account in which it is included and
24 likewise debited to the associated account reserve. Any cost of removal and gross salvage
25 associated with the retirement should be debited and credited, respectively, to the account~~

CODING: Words underlined are additions; words in ~~struck through~~ type are deletions from existing law.

1 reserve. Cost of the retiring unit, removal and gross salvage are to be recorded within one
2 month of the retirement date. Such costs may be estimated with corrective adjustment entries
3 made when the transactions are finalized.

4 ~~—— (5) The addition and retirement of minor items of depreciable property other than
5 Company Communications Equipment, Account 2123.2, and Public Telephone Equipment
6 Account 2351, are to be accounted for as follows:~~

7 ~~—— (a) When a minor item which did not previously exist as a part of a retirement unit at a
8 given location is added, the cost is to be accounted for in the same manner as the addition of a
9 retirement unit.~~

10 ~~—— (b) When a minor item is retired and not replaced, the book cost along with any
11 associated cost of removal and gross salvage is to be accounted for in the same manner as the
12 retirement of a retirement unit. If, however, the book cost of such a minor item has been
13 accounted for by its inclusion in the retirement unit of which it is a part, no separate credit to
14 the property account or debit to the associated account reserve is to be made.~~

15 ~~—— (c) When a minor item is replaced independently of the retirement unit of which it is a
16 part, the cost of replacement is to be charged to the appropriate maintenance account for that
17 item. If, however, the replacement causes a substantial betterment, the primary aim of which is
18 to make the property affected more useful, more efficient, of greater durability, or of greater
19 capacity, the excess cost of the replacement over the estimated cost at current prices of the
20 replacement without betterment should be charged to the appropriate plant account.~~

21 ~~—— (6) The Florida Public Service Commission document "List of Retirement Units
22 (Telephone Utilities)" dated January 1, 1988, is hereby incorporated by reference. A copy of
23 this document may be obtained from the Director, Division of Economic Regulation, Florida

9 ~~companies.~~

10 ~~(2) Adjustments under Section 364.037(1), F.S. (2002), for customer growth and~~
11 ~~Consumer Price Index shall be calculated in accordance with paragraph (2)(a), producing a~~

DETAILED DESCRIPTION OF THE PROPOSED RULE REPEALS

1. Why are the rule repeals being proposed?

The rule repeals would eliminate the Rate-of-Return Regulated Local Exchange Companies' (LECs) requirements because all the LECs have elected to become price cap regulated.

2. What do the rules do and how do they accomplish the goal?

The rule gives the requirements for Regulated LECs when they were Rate-of-Return regulated. The requirements listed by the rules include accounting rules, reporting, and Minimum Filing Requirements for rate increases.
