CLERK

**BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**

In re: Commission review of numeric conservation goals for JEA.

DOCKET NO. 080413-EG

**FLORIDA SOLAR COALITION'S PREHEARING STATEMENT**

Florida Solar Coalition (FSC), pursuant to Order No. PSC-08-0816-PCO-EG, files its Prehearing Statement and states as follows:

**A. Appearances:**

SUZANNE BROWNLESS, Esq., Suzanne Brownless, PA, 1975 Buford Blvd., Tallahassee, Florida 32308.

**B. Witnesses:**

None.

**C. Exhibits:**

FSC has not prefiled any exhibits. However, FSC reserves the right to introduce exhibits into the record during cross-examination.

**D. Statement of Basic Position:**

JEA is requesting that its conservation goal be set at 0 MW for both energy efficiency and demand side conservation measures. JEA has reached this conclusion based largely on its contention that no measures pass the RIM test. However, JEA has also understated the amount of cost-effective achievable energy efficiency potential in its service area due to several factors: too low market penetration projections, incorrect optimization methodologies and elimination of technologies with a two-year payback period. The transitional goals proposed by Staff witness Spellman correct these errors and bring the proposed goals for JEA in line with those of other states with a *de minimis* rate impact.

Notwithstanding its contention that no renewable energy measures are cost effective under the RIM test, consistent with the requirements of §366.82, Fla. Stat., JEA currently offers several renewable solar hot water and PV incentive energy programs. These are innovative programs that should be replicated by the other FEECA utilities.

**E. Statement of Issues and Positions:**

**ISSUE 1:** Did the Company provide an adequate assessment of the full technical potential of all available demand-side and supply-side conservation and efficiency measures, including demand-side renewable energy systems, pursuant to Section 366.82(3), F.S.?

DOCUMENT NUMBER DATE

07632 JUL 27 8

FPSC-COMMISSION CLERK

POSITION: No.

ISSUE 2: Did the Company provide an adequate assessment of the achievable potential of all available demand-side and supply-side conservation and efficiency measures, including demand-side renewable energy systems?

POSITION: No.

ISSUE 3: Do the Company's proposed goals adequately reflect the costs and benefits to customers participating in the measure, pursuant to Section 366.82(3)(a), F.S.?

POSITION: No.

ISSUE 4: Do the Company's proposed goals adequately reflect the costs and benefits to the general body of ratepayers as a whole, including utility incentives and participant contributions, pursuant to Section 366.82(3)(b), F.S.?

POSITION: No.

ISSUE 5: Do the Company's proposed goals adequately reflect the costs imposed by state and federal regulations on the emission of greenhouse gases, pursuant to Section 366.82(3)(d), F.S.?

POSITION: No position at this time.

ISSUE 6: Should the Commission establish incentives to promote both customer-owned and utility-owned energy efficiency and demand-side renewable energy systems?

POSITION: Yes.

ISSUE 7: What cost-effectiveness test or tests should the Commission use to set goals, pursuant to Section 366.82, F.S.?

POSITION: The Commission should use the Total Resource Cost (TRC) test, adjusted to include the avoided cost of greenhouse gas (GHG) emissions, and the Participant test as proposed in Staff witness Spellman's testimony.

**ISSUE 8:** What residential summer and winter megawatt (MW) and annual Gigawatt-hour (GWh) goals should be established for the period 2010-2019?

PROPOSED RESIDENTIAL CONSERVATION GOALS										
Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Summer MW										
Winter MW										
Annual GWh										

**POSITION:** FSC supports the methodology and transitional goals developed by Richard Spellman on behalf of the PSC Staff as stated in Exhibit RFS-20.

**ISSUE 9:** What commercial/industrial summer and winter megawatt (MW) and annual Gigawatt hour (GWh) goals should be established for the period 2010-2019?

PROPOSED COMMERCIAL CONSERVATION GOALS										
Year	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Summer MW										
Winter MW										
Annual GWh										

**POSITION:** FSC supports the methodology and transitional goals developed by Richard Spellman on behalf of the PSC Staff. as stated in his Exhibit RFS-20.

**ISSUE 10:** In addition to the MW and GWh goals established in Issues 8 and 9, should the Commission establish separate goals for demand-side renewable energy systems?

**POSITION:** As required by §366.82, Fla. Stat., JEA has developed programs to support the installation of solar photovoltaic (PV) and solar water heating systems. JEA should continue to maintain its level of development and implementation of its innovative solar

PV and solar water heating programs.

ISSUE 11: In addition to the MW and GWh goals established in Issues 8 and 9, should the Commission establish additional goals for efficiency improvements in generation, transmission, and distribution?

POSITION: Not at this time. Goals should be established for efficiency improvements in generation, transmission and distribution in a separate proceeding after the FEECA IOUs have had an opportunity to perform a technical potential study of these types of technologies.

ISSUE 12: In addition to the MW and GWh goals established in Issues 8 and 9, should the Commission establish separate goals for residential and commercial/industrial customer participation in utility energy audit programs for the period 2010-2019?

POSITION: No. Section 366.82(11), Fla. Stat., requires that all FEECA IOUs offer energy audits to its residential customers with audit costs recovered through the ECCR. While necessary to inform the public about energy efficiency and demand side savings measures available, the energy audit does not, in and of itself, generate any energy savings. The programs installed as a result of the energy audit produce the energy savings and the energy saved will be credited toward the programs actually installed by the customer.

ISSUE 13: Should this docket be closed?

POSITION: No position at this time.

#### ADDITIONAL ISSUES

ISSUE 14: What action(s), if any should the Commission take in this proceeding to encourage the efficient use of cogeneration? (FIPUG)

POSITION: No position at this time.

ISSUE 15: In setting DSM goals, what consideration should the Commission give to their impact on rates? (OUC)

POSITION: The Commission should consider the rate impact of DSM goals as one of many factors in setting goals. Rate impact should not be the sole controlling factor in setting DSM goals.

ISSUE 16: Since the Commission has no rate setting authority over OUC and JEA, can the Commission establish goals that put upward pressure on their rates? (OUC)

POSITION: Yes. Sections 366.82(1) and (2), Fla. Stat., specifically authorize the Commission to set conservation goals for municipal utilities with annual sales of 2,000 GWh. The cost associated with implementation of DSM goals is just one component in establishing any utility's revenue requirements from which its rates are derived. Thus, there is no direct correlation between DSM goals and rates.

**F. Stipulated Issues:**

None at this time.

**G. Pending Motions**

None at this time.

**H. Pending Confidentiality Requests:**

None at this time.

**I. Objections to Witnesses' Qualifications:**

None at this time.

**J. Requirements that cannot be complied with:**

FSC is not aware of any requirements with which it cannot comply at this time.
