415 FPL's Response to SFHHA Interrogatories 94 and 95	1406	

P R O C E E D I N G S

1
2 (Transcript continues in sequence from Volume
3 11.)

4 **CHAIRMAN CARTER:** We're back on the record.
5 And before we begin, the list in terms of the proposed
6 list of witnesses by the parties has changed a little
7 bit, so I've asked staff to get with Mr. McGlothlin and
8 redo the list and get it retyped and get it to all of us
9 so we'll all be on the same page. That shouldn't take
10 that long, should it?

11 **MS. BENNETT:** Mr. Willis just talked with the
12 OPC, and my understanding is that they're going to have
13 to get with all the parties and FPL to make sure that
14 they have the list correct.

15 **CHAIRMAN CARTER:** Okay. Mr. McGlothlin?

16 **MR. MCGLOTHLIN:** We could do that during the
17 first break today, if that's all right with you, Mr.
18 Chairman.

19 **CHAIRMAN CARTER:** Okay. All right. We'll do
20 it during the first break then.

21 **MR. MCGLOTHLIN:** I would like to mention --

22 **CHAIRMAN CARTER:** Yes, sir.

23 **MR. MCGLOTHLIN:** -- that yesterday, because
24 counsel for AFFIRM was not in the room, you'll recall
25 that you excused her for the part of the hearing that

1 she's not involved in, the parties contemplated but did
2 not mention to the Commissioners that AFFIRM's witnesses
3 would be among those that, Intervenor witnesses that
4 would be taken up next week as opposed to today.

5 **COMMISSIONER SKOP:** I can't hear him.

6 **CHAIRMAN CARTER:** Okay. Turn, turn his volume
7 up.

8 Would you go through that again,
9 Mr. McGlothlin?

10 **MR. MCGLOTHLIN:** Yes. AFFIRM is an Intervenor
11 and is sponsoring a witness. Because AFFIRM was not in
12 the room yesterday when we had this attempt to work out
13 the scheduling among us, the parties contemplated that
14 AFFIRM's witness would be among the Intervenor witnesses
15 to be taken up next week. We omitted that when I was
16 describing or summarizing it to you, and I just wanted
17 to make sure that we've covered that base.

18 **CHAIRMAN CARTER:** Okay. And also some of the
19 Intervenor only have certain witnesses, so as you guys
20 get together, make sure you contact them and let them
21 know what's going on so everyone will be abreast of it.

22 **MR. MCGLOTHLIN:** Yes, sir.

23 **CHAIRMAN CARTER:** Okay. Any further
24 preliminary matters before we begin?

25 Ms. Bradley, good morning.

1 **MS. BRADLEY:** Good morning. Mr. Chairman,
2 since we're on the subject of lists, can we ask when
3 we're going to get the complete list of the executive
4 salaries? Because we discovered last night that it was
5 only a partial list.

6 **CHAIRMAN CARTER:** That's what we're about,
7 that's what we're about to dive into.

8 **MS. BRADLEY:** Okay. Thank you. I appreciate
9 it.

10 **CHAIRMAN CARTER:** Yes, ma'am. We're just
11 about to dive into this, the deep end on this one. But
12 hold that for one second.

13 Any further preliminary matters from any of
14 the parties? Staff, any further preliminary matters?

15 **MS. BENNETT:** No, sir.

16 **CHAIRMAN CARTER:** Okay. Now, Ms. Bradley, I
17 recognize you for your question on the list.

18 **MS. BRADLEY:** I just had a question about when
19 we're going to be getting the complete list, because as
20 of last night we discovered that the list that's
21 purported to be everybody making above 165,000 was not
22 really everyone making above 165,000, and there was an
23 additional list or some other information somewhere.

24 **CHAIRMAN CARTER:** Okay. Staff? Because I
25 think that's where we left last night.

1 **MS. BRADLEY:** Yes, sir.

2 **MS. BENNETT:** We have the red folders.

3 **CHAIRMAN CARTER:** You have the red folders?

4 **MS. BENNETT:** We'll be glad to pass them out
5 if you're --

6 **CHAIRMAN CARTER:** How about let's do that now.
7 At least we can get going on that.

8 **COMMISSIONER ARGENZIANO:** Mr. Chair?

9 **CHAIRMAN CARTER:** Commissioner Argenziano,
10 good morning.

11 **COMMISSIONER ARGENZIANO:** Good morning. I
12 would like to -- after we adjourned yesterday, my staff
13 and staff got together and I guess -- there's no other
14 way of saying this. Staff, not my staff, my staff got
15 to me promptly what I had asked for weeks ago.

16 First, I want to say the company to my
17 knowledge complied with everything that we asked them
18 to, and staff just failed to give me that one sheet that
19 it seems other Commissioners got August 20th. And I'm
20 not happy with that at all. It's not the first time.
21 And I just don't know what else to think about it.

22 The fact that I didn't have it yesterday and
23 the fact that I have, that's been an issue that's been
24 for me that I've really wanted to look at, I felt it was
25 something that I really wanted to delve into and it's

1 been known for weeks, that I just didn't have that one
2 sheet -- there's nothing else to say but staff failed to
3 give me that sheet while others had that sheet.

4 And I want to make sure that the people know,
5 anybody that's listening, that the company complied
6 fully and gave everything that we asked them to. And
7 it's a shame that I didn't have that yesterday.

8 And obviously you see I'm watching things and
9 looking at things, and I just want people to understand
10 that I just was not given that particular sheet and that
11 the company had complied. And later on I'll be talking
12 to staff and finding out why I was the only one that
13 really didn't get that sheet.

14 **CHAIRMAN CARTER:** I don't think you're in the
15 tunnel by yourself, Commissioner, because I didn't get a
16 copy of it, and I think Commissioner McMurrian didn't
17 get a copy of it. And Commissioner Edgar said she
18 didn't get -- Commissioner Skop, did you get a copy?

19 **COMMISSIONER ARGENZIANO:** Well, you know, the
20 funny thing is I guess the Commissioners who asked for
21 it, one got it and one didn't, and it's been an issue
22 for me for weeks. And it's not the first time this has
23 happened, and I just find it very odd that I didn't get
24 that particular sheet and then yesterday had to, had to
25 make it look like the company didn't comply, when they

1 did. And that's a failure on the PSC's part. So I want
2 to apologize to the company and make it clear that the
3 company gave everything that we had asked for. Thank
4 you.

5 **CHAIRMAN CARTER:** Thank you, Commissioner. On
6 the -- let me just ask this. On the one page that, that
7 we're talking about, do we have it?

8 **MS. BENNETT:** It is included now in the
9 confidential document. And I do want to personally
10 apologize to Ms. -- Commissioner Argenziano. It was an
11 oversight in not getting that to her.

12 **CHAIRMAN CARTER:** What about to the rest of us
13 that didn't get it? You're not going to apologize to
14 us?

15 **MS. BENNETT:** I apologize to you all too. We
16 are handing them out to you today as part of our hearing
17 exhibit.

18 **CHAIRMAN CARTER:** Okay. All right. But --

19 **MS. BRADLEY:** Mr. Chairman?

20 **CHAIRMAN CARTER:** Let me ask this. Is
21 Commissioner Argenziano able to ask her question? Does
22 she have the information?

23 **COMMISSIONER ARGENZIANO:** Mr. Chair, I don't
24 need that information now because it is there. But the
25 problem was that as I was going, as we were going

1 through witnesses and I was looking on the sheet, the
2 name didn't reconcile. It wasn't there. So obviously
3 it wasn't the company's fault. They gave us what we had
4 asked for. And the question -- I don't need to ask a
5 question now since there is some sheet and my staff is
6 attempting to get that to me.

7 **CHAIRMAN CARTER:** Okay. Well, they're
8 passing, they have the red folders now. They're getting
9 ready to pass those out.

10 **COMMISSIONER ARGENZIANO:** I'd just suggest
11 that I'd have some time to look through the entire
12 folder to make sure that I have everything that I need
13 to have.

14 **CHAIRMAN CARTER:** Absolutely. And if we, if
15 we need to, we'll bring this witness back.

16 But we also have -- who's the other witness on
17 the salaries, Mr. Butler?

18 **MR. BUTLER:** That would be Ms. Slattery.

19 **CHAIRMAN CARTER:** Ms. Slattery.

20 **MR. BUTLER:** And I would note that Mr. Barrett
21 does have rebuttal testimony, so he'll be back in any
22 event.

23 **CHAIRMAN CARTER:** Okay, Commissioners.
24 Ms. Slattery has -- we're going to be available for the,
25 this matter as well as Mr. Barrett will be back for

1 rebuttal --

2 **MR. MOYLE:** Have you got something?

3 **CHAIRMAN CARTER:** -- on that.

4 Ms. Bradley?

5 **MS. BRADLEY:** Mr. Chairman, I just want to
6 clarify one thing. I didn't get my red file from staff.
7 I got it from the company. So anything missing from
8 that I don't think can be blamed on staff.

9 **CHAIRMAN CARTER:** Okay. All right. Okay.
10 Before -- they're passing out the red folders.

11 Before I go further, Commissioner Argenziano,
12 did you have any questions? Are you comfortable with
13 what you received?

14 **COMMISSIONER ARGENZIANO:** Well, what my staff
15 has at the moment, because they haven't gotten it to me
16 yet, tells me that it has the, it has the information
17 that I was looking for, just to make sure that the
18 individual is on the list and he was. So I'm very happy
19 with what we got and have no questions.

20 **CHAIRMAN CARTER:** Okay. Thank you very much.

21 **COMMISSIONER ARGENZIANO:** Thank you.

22 **CHAIRMAN CARTER:** Okay. What we'll, what
23 we'll do, just so everybody is, we're all on the same
24 page, is that when we left last night, Mr. Moyle was
25 doing his cross-examination. These red folders have

1 just been passed out.

2 Do you guys need a minute or so to look over
3 them? We're not going to break. We're just going to
4 let you guys look over them.

5 If you've got questions now for this,
6 Mr. Moyle, and if you need some time to prep for that.

7 **MR. MOYLE:** Maybe just a minute.

8 **CHAIRMAN CARTER:** Okay. Commissioners, we'll
9 stand in recess for about five minutes.

10 Would that be sufficient, Mr. Moyle?

11 **MR. MOYLE:** Yes, sir.

12 **CHAIRMAN CARTER:** Okay. We're in recess for
13 five minutes.

14 (Recess taken.)

15 **COMMISSIONER EDGAR:** If we could gather back,
16 we'll get started here in just a moment.

17 Okay. We're going to see if we can move along
18 and see if we can make some progress this morning. My
19 understanding is that when we concluded yesterday that
20 we had Witness Barrett on the stand, and I believe,
21 Mr. Moyle, we were working our way through your
22 cross-examination.

23 **MR. MOYLE:** Actually, I had, I had finished,
24 but I believe the question came up with respect to some
25 of the salaries, and I think I was going to be afforded

1 a brief opportunity to inquire related to those.

2 **COMMISSIONER EDGAR:** Okay. And to FPL, is
3 that your understanding as well?

4 **MR. BUTLER:** I thought he had finished. I
5 don't recall what it is that he had held back that he
6 needed to follow up on further, frankly. I mean, if
7 it's, if it's --

8 **COMMISSIONER EDGAR:** Well, it was late and we
9 were all tired. I know that.

10 So, Mr. Moyle, again, what you have just
11 represented is that you have just a very brief couple of
12 questions to, to, to really finish?

13 **MR. MOYLE:** Yes, ma'am. Yes, ma'am. Yes.
14 And I thought it might be helpful, because I'm not sure
15 of the breadth or scope of this witness's knowledge
16 about the what we'll call collectively the confidential
17 salary exhibits, but there seems to have been a great
18 deal of confusion over what exhibits contained what
19 information.

20 And I was under the impression that the
21 exhibit that we've been asking the witness questions
22 about, I think I identified it as a FIPUG exhibit
23 previously, that that was an exhibit that had everyone
24 at 165 and above and was inclusive of officers. But
25 apparently that, that's not the case that that exhibit

1 -- I mean, what I guess I was suggesting was it might be
2 helpful if, for the record, so that it's clear that FPL
3 make a representation as to --

4 **COMMISSIONER EDGAR:** Well, let's just, let's
5 just, let's just see where it goes. And of course to
6 the witness, if you can answer the question, you're
7 required to do so. And if you can't, say that you
8 can't.

9 Mr. Moyle, go right ahead.

10 **MR. MOYLE:** Okay.

11 **CONTINUED CROSS EXAMINATION**

12 **BY MR. MOYLE:**

13 Q. Are you an officer of the corporation?

14 A. I am.

15 Q. Okay. And what is your, what is your title?

16 A. Vice President, Finance.

17 Q. Are you also the Chief Financial Officer?

18 A. I am not.

19 Q. So if, if we were trying to match up where you
20 would be on exhibits, we would look solely for someone
21 listed as the Vice President of Finance; is that
22 correct?

23 **MR. BUTLER:** Madam Chairman?

24 **BY MR. MOYLE:**

25 Q. Based on your title?

1 **COMMISSIONER EDGAR:** Mr. Butler.

2 **MR. BUTLER:** It may be more helpful for me to
3 try to explain, and then if Mr. Moyle has questions that
4 he wants to ask to Mr. Barrett.

5 But the problem here is that Mr. Barrett is
6 not personally familiar with the exhibit that Mr. Moyle
7 is examining him about, and we have very limited
8 distribution of that, so it's hard for him to respond to
9 the questions.

10 I think the answer to the specific question,
11 and something I know that had been confusing to
12 Commissioner Argenziano yesterday, is that there is a
13 reference, I believe it's Line 12, to a position that
14 says "Vice President Finance." It also says "and CFO."
15 That is inaccurate. It should not have the CFO
16 reference in there because Mr. Barrett is not the CFO.
17 As his testimony indicates, he's the Vice President of
18 Finance.

19 But unfortunately the limited distribution of
20 the document means that Ms. Slattery is far and away the
21 person best situated to answer questions on the details
22 of the compensation information.

23 **COMMISSIONER EDGAR:** Mr. Moyle.

24 **MR. MOYLE:** I think, I think just maybe just a
25 couple more, if I could, Madam Chair.

1 **COMMISSIONER EDGAR:** Yes, sir.

2 **BY MR. MOYLE:**

3 **Q.** Sir, you have not, you have not seen the
4 confidential exhibit that was just handed out, have you?

5 **A.** I have not.

6 **Q.** If I were to take this exhibit and fold it,
7 fold it over so that you couldn't see job titles or
8 names or anything, do you think you might be able to,
9 you know, to pick out your level of compensation on this
10 exhibit?

11 I tell you what. That's all right. I'll skip
12 on that.

13 **MR. MOYLE:** I guess what we're trying to do is
14 verify the data on this. Ms. Slattery is probably the
15 more appropriate witness, so I'll withdraw my question.

16 **COMMISSIONER EDGAR:** That is my understanding.

17 **MR. MOYLE:** Yeah. I have nothing further.

18 **COMMISSIONER EDGAR:** Okay. Thank you.

19 Where are we next? Ms. Bradley.

20 **MS. BRADLEY:** Thank you.

21 **CROSS EXAMINATION**

22 **BY MS. BRADLEY:**

23 **Q.** I just have a couple of questions. You're in
24 charge of financial forecasting and budgeting, and I
25 think it was called analysis of financial results.

1 **A.** Basically, yes. Financial forecasting,
2 budgeting, financial analysis. Yes.

3 **Q.** What is analysis of financial results? What
4 does that refer to?

5 **A.** Financial analysis basically looks at economic
6 decisions that the company may be faced with in
7 comparing the cost and benefits of a specific investment
8 decision potentially.

9 **Q.** I'm sorry. Were you finished?

10 **A.** Yeah.

11 **Q.** So it doesn't look at, backward to see how
12 successful your forecasts were?

13 **A.** No.

14 **Q.** Okay. If you get, after you've made your
15 financial forecast and you've used that in whatever
16 endeavor it's intended for, if you get actual data that
17 shows that it wasn't as accurate as it should be, is
18 that something you just ignore, or do you try to go back
19 and readjust your forecast?

20 **A.** Well, when we get actual information that we
21 compare to the forecast, we obviously are looking at
22 variances and trying to discover reasons for the
23 variances to determine if there needs to be any
24 readjustments going forward for a typical forecast.

25 **Q.** Okay. I believe you indicated yesterday that

1 you didn't go to any of the customer service hearings?

2 A. That's correct.

3 Q. Did you have any of your staff attend those?

4 A. No, ma'am.

5 Q. Did you have any briefing on those?

6 A. No.

7 Q. Did you have any discussions with Ms. Santos
8 or others about the results of those meetings?

9 A. No.

10 Q. Would you agree with Dr. Morley that if there
11 is an increase in the cost of electricity, there's
12 probably going to be fewer sales?

13 A. I believe generally the modeling comparison
14 she was referring to is the real price of electricity is
15 correlated to our electric sales. So if there is an
16 increase in the price of electricity, there would tend
17 to be a decrease in sales.

18 Q. And conversely to that, if there's a decrease
19 in the cost of electricity, there's generally a increase
20 in sales; correct?

21 A. Again, it would be dependent upon a lot of
22 factors. But all else being equal, that is the
23 relationship, yes.

24 Q. Okay. Now you indicated yesterday that you
25 serve on the budget committee?

1 **A.** The budget review committee. Yes.

2 **Q.** And do you all look at setting salaries in
3 determining how much everybody is going to make next
4 year?

5 **A.** No, ma'am.

6 **Q.** Okay. What does that committee do?

7 **A.** What does the budget review committee do?

8 **Q.** Yes.

9 **A.** Essentially looks at the composite of all of
10 the business unit budgets, and in looking at the
11 activities that are going to be performed over the next
12 year, rolls it all together and looks at the total
13 composite company performance under those budget views.

14 **Q.** And so you're not involved at all in salaries?

15 **A.** Not specifically. We do have budget
16 guidelines for kind of overall aggregate average
17 assumptions for salary increases.

18 **Q.** As part of the budget committee would you be
19 willing to recommend that your executive salaries are
20 not increased so that your customers that testified at
21 the hearing that they're really struggling and having a
22 tough time might be better able to pay for your
23 electricity?

24 **A.** No, ma'am. I believe our salary program as
25 defined by our compensation folks that, and Kathleen

1 Slattery will be on to testify to that, is based on
2 competitive benchmarking for the jobs that are performed
3 in our company. And the recommendations that come out
4 of that competitive benchmarking process have given us
5 what we believe is an accurate view of what those
6 salaries ought to be.

7 Q. And you realize that your top executives are
8 making millions of dollars; correct?

9 A. I realize what the top proxy officers who were
10 disclosed make, yes, ma'am.

11 Q. And those are in the millions; correct?

12 A. I believe so. Yes.

13 MS. BRADLEY: Okay. No further questions.

14 COMMISSIONER EDGAR: Mr. Wright. I'm having a
15 hard time keeping track of the order, but I hope that's
16 because it's changed a little bit.

17 MR. WRIGHT: So am I.

18 COMMISSIONER EDGAR: Okay. Thank you.

19 Ms. Bradley?

20 MS. BRADLEY: Can I ask one more question of
21 this witness?

22 COMMISSIONER EDGAR: You may.

23 MS. BRADLEY: Thank you. Let me see if I
24 can -- I'm not sure if it's appropriate who to ask about
25 this, but I want to ask him a question about a figure.

1 And I guess I need for the record to have someone verify
2 that this is -- I want to ask him if this is his total
3 compensation and, but I need somebody that can verify
4 that this is in fact what the sheet shows that we were
5 given, and I don't know whether that would be more
6 appropriate for Mr. Butler or for staff or for --

7 **COMMISSIONER EDGAR:** Nor do I, so let's work
8 our way through it.

9 Mr. Butler?

10 **MR. BUTLER:** We, we can certainly make that
11 confirmation for Ms. Bradley.

12 **MS. BRADLEY:** If I may approach the witness.

13 **COMMISSIONER EDGAR:** You may.

14 **MS. BRADLEY:** Mr. Barrett, let me just ask --

15 **COMMISSIONER EDGAR:** Ms. Bradley, let's make
16 sure that the court reporter can get you as well.

17 **MS. BRADLEY:** I'm sorry. Thank you.

18 **BY MS. BRADLEY:**

19 **Q.** Mr. Barrett, is that an accurate listing of
20 your total compensation for 2008?

21 **MR. BUTLER:** I'm going to object to this
22 question, asserting Mr. Barrett's right of privacy. And
23 right of privacy is I think about to be interfered with
24 if he is being asked to, you know, disclose to some
25 third party the specifics of his compensation. And it's

1 one of the things we've gone through this process trying
2 very carefully to avoid is tying particular individuals
3 to their particular compensation.

4 **COMMISSIONER EDGAR:** Ms. Bradley.

5 **MS. BRADLEY:** It's not being revealed to
6 anyone. The only ones that will have knowledge of it
7 and should already have knowledge of it as far as the
8 listing we were provided are all sworn to
9 confidentiality. So I, I mean, I think the Commission
10 has already ruled on this issue.

11 **COMMISSIONER EDGAR:** My understanding is that
12 Ms. Bradley is sworn to confidentiality under, at this
13 point in time with where we are in this proceeding. Is
14 that correct, Ms. Bradley?

15 **MS. BRADLEY:** Yes, it is. And that's why I
16 wrote it down on a piece of paper and had them confirm.

17 **MR. BUTLER:** And I'm sorry. The intent is not
18 to have that piece of paper then be identified as an
19 exhibit in the record?

20 **MS. BRADLEY:** I don't plan to. You all have
21 confirmed that this is what is on the list, and I will
22 ask him if this is his total compensation.

23 **MR. BUTLER:** That's fine.

24 **COMMISSIONER EDGAR:** Okay. So let the record
25 reflect that Ms. Bradley wrote a number on a piece of

1 paper and has put it in front of the witness. And if
2 you would please reask your question.

3 **MS. BRADLEY:** I will do so. And I just want
4 to note for the record that Florida Power & Light did
5 confirm that is what's on the list that we were
6 provided.

7 **BY MS. BRADLEY:**

8 **Q.** Mr. Barrett, can you tell me if that's an
9 accurate reflection of your total compensation package
10 for 2008?

11 **A.** Honestly I don't know because I have not seen
12 the list. If I could confer with counsel and they would
13 confirm that that is what's compiled for me, then I will
14 affirm that that's the number. But I didn't calculate
15 the number, so I can't say for sure.

16 **Q.** You don't have any knowledge of what you made
17 in 2008?

18 **A.** There are various pieces as I understand to
19 that schedule, so you've given me a very precise number.

20 **COMMISSIONER EDGAR:** Ms. Bradley, hold for
21 just a moment, if you would.

22 Yes, Mr. Butler.

23 **MR. BUTLER:** Yes. Madam Chairman, we have
24 identified specifically the line on the form. That was
25 the colloquy a moment ago with Mr. Leon (sic.) and

1 Ms. Bradley. And I believe what she's done is to write
2 the line, you know, the total comp from the line down on
3 a piece of paper.

4 Mr. Barrett, again, he hasn't seen the
5 exhibit. It's sort of presented at a level of
6 specificity that he may not have all of the pieces added
7 up in the same way that the exhibit is compiled.

8 I mean, we have confirmed to her and are
9 representing to her that what we have identified as the
10 line on the exhibit is indeed for Mr. Barrett and that
11 the compensation, the elements and the total that are
12 shown are --

13 **COMMISSIONER EDGAR:** Okay. Let's try, let's
14 try it this way, if, if we may.

15 **MS. BRADLEY:** At this point they've already --

16 **COMMISSIONER EDGAR:** Ms. Bradley, let's try it
17 this way.

18 As I said earlier, and I know that the witness
19 is well aware of this, if you can answer the question,
20 answer it. If you can't, say that you can't. We do
21 have other witnesses. So ask your question, and if the
22 witness can answer it, he will answer it, realizing that
23 we, our understanding of where we are is to not disclose
24 the specific numbers.

25 Try again, Ms. Bradley, please.

1 **MS. BRADLEY:** He has already indicated that he
2 doesn't know what he made, and it doesn't help for them
3 to tell him yes, that's the correct answer, because then
4 it becomes somebody else's testimony. So I'll end it at
5 that point.

6 **COMMISSIONER EDGAR:** Okay. Okay. So,
7 Ms. Bradley, that concludes your cross?

8 **MS. BRADLEY:** Yes, ma'am.

9 **COMMISSIONER EDGAR:** Thank you.

10 And, Mr. Wright, I believe that brings us to
11 you.

12 **MR. WRIGHT:** Thank you, Madam Chairman. And
13 just before I go I just want to say we appreciate your
14 and the Commission's and all the parties' indulgence in
15 letting us shuffle our order occasionally to accommodate
16 the various vicissitudes with which we are dealing.
17 Thank you.

18 **CROSS EXAMINATION**

19 **BY MR. WRIGHT:**

20 **Q.** Good morning, Mr. Barrett.

21 **A.** Good morning.

22 **Q.** My name is, my name is Schef Wright and I
23 represent the Florida Retail Federation in this case. I
24 have a number of questions for you, but I think not a
25 whole lot.

1 First, this is a predicate question to
2 something I'm going to pursue later, but it's a simple
3 financial question, and I think as VP of Finance you can
4 probably answer it.

5 Would I be correct that FPL Group has
6 approximately 410 million shares outstanding of common
7 equity stock?

8 **A.** You said 410 million?

9 **Q.** Yes, sir.

10 **A.** I believe that's about right.

11 **Q.** Thank you. I'd just like to clear up
12 something that came out in Mr. Moyle's cross yesterday.
13 He handed you, I believe, two of the components of what
14 the staff intend to introduce as part of Exhibit 35.
15 Specifically they were the answers to staff's
16 Interrogatories Number 49 and Number 51. Do you still
17 have those handy?

18 **A.** I still have those, yes.

19 **Q.** If I could ask you to look at the, at the
20 response, particularly at the table attached to the
21 response to Number 51, I'd appreciate that.

22 I promise these are not trick questions. I am
23 just trying to understand what is the difference between
24 major and minor here. It appears to me from the fact
25 that there are values in the minor projects, part of the

1 table that are greater than the major, some of the
2 values in the major projects part of the table that it's
3 not dollars. Can you explain what's major and what's
4 minor?

5 **A.** Yes. The -- actually it is dollars. The
6 major and minor is really a budget distinction. But
7 what you see in the minor category down below
8 essentially are things that are grouped together
9 basically by plant site. So there would be a collection
10 of small projects that, like, for instance, if you
11 looked at Lauderdale, other production, the \$20 million,
12 that is all of the projects that would be at the
13 Lauderdale site.

14 So it's not one project, it's a collection of
15 projects. And each of these projects are discrete,
16 they're important to the operations of those plants.
17 And actually I think you're going to be talking with
18 Witness Hardy, who I think could address both of these
19 interrogatory responses in terms of the actual projects.

20 **Q.** There was one other point regarding a
21 statement you made in response to Mr. Moyle that I
22 wanted to pursue.

23 Your answer implied that a project can be both
24 minor and critical, and I wonder if you could explain
25 that.

1 **A.** Well, minor is, again, as I just mentioned, is
2 more of a budget distinction in terms of the dollar
3 amount. Many of the minor projects may include things
4 like purchase of capital components, capital spares,
5 things like that, that would be then used in outage
6 work. And so it is very critical to the success of the
7 plant operations.

8 But discrete projects may be, you know,
9 purchased in individual components or different points
10 in time. So, again, I think Mr. Hardy would be able to
11 get you into the details of how those are used in the
12 power plant operations.

13 **Q.** So major and minor relates to dollars,
14 critical relates to some engineering concern or
15 engineering characterization; is that a fair, fair thing
16 to say?

17 **A.** I think it's fair to say that the importance
18 of a project, the criticality of the project really
19 relates to its importance in the operations of the
20 plant.

21 **Q.** Thank you. Okay. I'd like to ask you a
22 couple of questions about your Exhibit REB-17, which is
23 the drivers exhibit.

24 **A.** Yes. The one that's on the chart behind me, I
25 believe.

1 **Q.** Sure. What is the \$177 million value that is
2 shown for regulatory commitment? What does that
3 represent?

4 **A.** That represents a number of expenditures that
5 would be, that would arise as a result of a commitment
6 to a regulatory or a governmental agency. Probably the
7 largest category that's in that number is, are
8 investment and expenditures in storm hardening and storm
9 secure activities. That represented about 90 million of
10 the 177. There are specific NRC compliance projects. I
11 think you heard Mr. Stall talk about some of the project
12 work that we did to relieve some of the Alloy 600
13 concerns. There were expenditures made there. Or
14 another piece of that, in general compliance, increasing
15 fees for compliance-related activities. So those are
16 typically what's in there.

17 **Q.** Thank you. That's an adequate answer for my
18 purposes. Thank you.

19 Would it be fair to say that once new rates go
20 into effect, the actual impact of these various drivers
21 may vary?

22 **A.** Well, these are the impacts of these drivers,
23 as I've explained in my testimony, from 2006 to 2010.
24 So as you move forward from 2010 once rates are set, it
25 would depend upon the expenditures that would be

1 represented by these types of activities.

2 Q. For 2010 the, parts of this are, are
3 projected; correct?

4 A. Correct.

5 Q. And they, would it be true that they may or
6 may not be exactly what's shown here?

7 A. They are projected to be what are shown here.
8 But to the extent actuals were to be different, then,
9 yes, they could be different.

10 Q. And if, for example, the company incurred less
11 expense for storm hardening than is represented in here,
12 all other things equal, the company's earnings would be
13 greater; correct?

14 A. All other things being equal, yes. However, I
15 would say that the nature of these regulatory
16 commitments are typically that these are pretty much
17 commitments that we've made or obligations that we have.
18 So I think it's unlikely that the, for instance, the
19 storm hardening, unless this Commission were to decide
20 to direct us to do something different, it's unlikely
21 that they would be a different number than this.

22 Q. As a general proposition, if rates are set
23 based on certain projected expenses and if then
24 projected expenses are less than projected, the
25 company's earnings will be greater than otherwise, other

1 things equal?

2 **A.** Yes. However, as you know, there's a lot of
3 components to that equation, including sales, and I
4 think you've heard Dr. Morley suggest that there's
5 probably more downside risk on sales than anything. So
6 that goes the other direction as well.

7 **COMMISSIONER EDGAR:** Mr. Wright, my apologies,
8 and to everyone, we are going to try to keep things
9 moving, but I need a five-minute break. And so we're
10 going to take a five-minute break, and I do mean five
11 minutes. So everybody take a brief stretch but do not
12 go far. And we are on recess.

13 (Recess taken.)

14 Okay, folks, if we could gather together.
15 Okay. We are back on the record from a very short
16 break. Thank you.

17 Mr. Wright, go right ahead.

18 **MR. WRIGHT:** Thank you, Madam Chairman.

19 **BY MR. WRIGHT:**

20 **Q.** Mr. Barrett, just looking across the drivers,
21 would it be correct that there are employee or labor
22 costs embedded in many of these?

23 **A.** Yes.

24 **Q.** Okay. Not in depreciation, not in storm
25 reserve accrual, but in a number of the others; correct?

1 **A.** Correct.

2 **Q.** Thank you. If FPL's rates in this case were
3 set on the basis of a certain number of positions,
4 whether it's 11,100 or any other number, but the actual
5 number of employees were less than that in 2010, you
6 would expect the company's O&M expenses for labor during
7 2010 to be less than projected, would you not?

8 **A.** I'm not certain that that would be the case.
9 I mean, the, if there were a different headcount, the
10 mix of employees would have an implication for the
11 overall dollars. The use of third-party contractors to
12 do the work necessary that may have been done, been done
13 by those employees would need to be considered. So it's
14 not just as simple as saying that one dimension changing
15 would change the whole thing.

16 **Q.** And that there might also be an offset for
17 additional overtime worked by remaining employees; would
18 that be accurate?

19 **A.** That's possible. Again, we would look at the
20 work that needed to be done and determine the optimal
21 staffing level to do that work, a mixture of, you know,
22 full-time employees, overtime, part-time employees,
23 contractors, as deemed appropriate by the business unit
24 performing the work.

25 **Q.** Holding those other factors equal, contract,

1 overtime, mix, holding those other factors equal, if the
2 number of employees is less, your O&M expense would be
3 less; correct?

4 **A.** Not necessarily. First of all, I know y'all
5 like to hold everything else equal, and it's never
6 always equal. But, again, as I mentioned earlier, it's
7 the mix of employees that may change. So headcount
8 alone doesn't tell you much other than headcount.

9 **Q.** Well, I'll loop back to a previous question on
10 this specific subject. If y'all's labor costs are less
11 in 2010 than the amount included in rates, your earnings
12 will be greater than otherwise; correct?

13 **A.** If the labor costs were lower than what was
14 included in rates, again, your premise of all else being
15 equal, then, yes.

16 **Q.** Thank you. This is a follow-up question to
17 something that Mr. Moyle asked you yesterday, to which I
18 recall you giving a somewhat general answer, and I'm
19 going to try to get a specific answer.

20 I'll just ask the question. Did you make any
21 specific assumption about what the outcome of this rate
22 case would be in terms of any rate increase or decrease
23 awarded by the Commission or granted by the Commission
24 in preparing your financial forecasts?

25 **A.** We basically had two financial forecasts, the

1 one prepared for this rate case, which assumed no rate
2 relief to show the deterioration in the financial
3 condition of the company, and then obviously we would,
4 we would look at the inclusion of the full rate request
5 that we've asked for and the impact of that.

6 Q. And did I understand -- would it then be the
7 case that those were the two financial forecasts you
8 prepared?

9 A. Yes. Those are the scenarios that we've
10 looked at.

11 Q. Okay. Just so I'm clear, one scenario was no
12 rate increase and the other scenario was full requested
13 rate increase.

14 A. Yes.

15 Q. Are you familiar with the consumers'
16 witnesses' positions in this case as they affect the
17 proposed revenue requirements?

18 A. If you could mention specific names, that
19 would help.

20 MR. WRIGHT: May I have just a moment?

21 COMMISSIONER EDGAR: Yes, sir.

22 MR. WRIGHT: Thank you.

23 (Pause.)

24 THE WITNESS: Is this something I can show my
25 attorney or -- I don't know what it's here for.

1 **MR. WRIGHT:** Thank you very much, Madam
2 Chairman. I apologize for the interruption. There's a
3 lot of paper. I couldn't find something.

4 I have just --

5 **MR. BUTLER:** Schef, can you identify what this
6 is?

7 **MR. WRIGHT:** Yes. I was just about to.

8 **MR. BUTLER:** All right.

9 **MR. WRIGHT:** I have just handed the witness a
10 paper copy of the information that Mr. McGlothlin
11 presented in his opening statement, and it was presented
12 to the full hearing. And it summarizes the, in large
13 part it summarizes the, at least it summarizes OPC's
14 case on the revenue requirements issues.

15 **MR. BUTLER:** Am I correct that this is not an
16 exhibit in the proceeding?

17 **MR. WRIGHT:** It is not an exhibit per se.
18 It's simply demonstrative and is ultimately supported,
19 as I understand it, by the testimony of OPC's witnesses.
20 But for these purposes, I'm really going to ask
21 Mr. Barrett a hopefully short line of questions along
22 the lines of questions that I asked Mr. Olivera, some of
23 which I believe he suggested Mr. Barrett might be the
24 better answerer.

25 **MR. BUTLER:** I have no problem with the

1 procedure. I just would note for the record that FPL
2 certainly does not adopt or endorse the information
3 that's provided on the handout, and I don't think at
4 this point it has been authenticated in the record.

5 **COMMISSIONER EDGAR:** So noted.

6 Go right ahead, Mr. Wright.

7 **MR. WRIGHT:** Thank you.

8 **BY MR. WRIGHT:**

9 Q. Were you here at the outset of the hearing,
10 Mr. Barrett?

11 A. No, I was not.

12 Q. Okay. Well, perhaps it would be best if I
13 just asked you then to, to assume some things, or to ask
14 you -- I'll ask it this way. Is it your understanding
15 that the Public Counsel's witnesses are advocating an
16 overall rate reduction for FPL in this case?

17 A. Yes.

18 Q. And is it your further understanding that a
19 good chunk, like about \$500 million, of their reduction
20 from FPL's request is based on a reduced rate of return
21 on equity and a capital structure investment?

22 A. Yes.

23 Q. And is it further your understanding that
24 about \$554 million of the total proposed reduction by
25 the Citizens, by Public Counsel's witnesses, is for

1 depreciation adjustments?

2 **A.** I don't know that specific number.

3 **Q.** Okay. Are you further aware that the
4 citizens, Public Counsel and all the consumers, are
5 advocating that the company not be allowed to increase
6 its storm reserve accrual?

7 **A.** Yes.

8 **Q.** Okay. And that would have the effect of
9 reducing FPL's requested increase by roughly
10 \$150 million a year; correct?

11 **A.** Correct.

12 **Q.** Okay. Now are you, are you aware that the
13 Public Counsel's proposed adjustments to O&M type costs
14 is somewhere in the range of 80 or \$90 million?

15 **A.** I don't remember the exact number.

16 **Q.** Okay. I think if you'll look at the last
17 sheet of that, you'll see that it's right about there.

18 **MR. BUTLER:** I'm sorry. I've got to object to
19 this, Madam Chairman. The sheet doesn't mean that the
20 numbers are right. The sheet was simply something that
21 was handed out as an illustration for the opening
22 statement of OPC. It may be more useful if Mr. Wright
23 simply asks the witness to assume the figures rather
24 than trying to get his agreement to the numbers that are
25 on this handout that was used for the opening statement.

1 **COMMISSIONER McMURRIAN:** Mr. Wright?

2 **MR. WRIGHT:** I'm happy to do it that way. I
3 waffled as between asking him to assume and asking him
4 to accept that this is what the citizens' positions are.
5 But we get to the same point.

6 **BY MR. WRIGHT:**

7 **Q.** Are you willing to take as an assumption for
8 purposes of this brief, brief conversation that the
9 citizens' witnesses are recommending O&M reductions of
10 something in the range of 80 to \$90 million?

11 **A.** Yes.

12 **Q.** Okay. Again, with the understanding that FPL
13 and the consumers' side of this have very different
14 views on what these amounts would be, will you agree,
15 subject to the assumptions that we're talking about,
16 that the citizens' witnesses' proposals would cut FPL's
17 O&M expenses by something like 80 to \$90 million?

18 **MR. BUTLER:** I'm sorry. I'm going to object
19 again, Madam Chairman. We just talked about, I think
20 while you were briefly out, that I had objected to use
21 of this handout from the opening statements as if it is
22 evidence. I would think it more appropriate for Mr.
23 Wright simply to ask the witness to assume. But he's
24 now asking him to agree with the assumption. I don't
25 think that Mr. Barrett has a basis to agree or not agree

1 with the assumption. Just let him pose it as an
2 assumption and I think we'll get to the end of the line
3 of questions pretty quickly.

4 **MR. WRIGHT:** I'll rephrase. Thank you.

5 **COMMISSIONER EDGAR:** Thank you.

6 **BY MR. WRIGHT:**

7 **Q.** Assume that the citizens' positions are as
8 reflected on the sheets. With those assumptions, you'd
9 agree that something in the range of 90 percent of the
10 proposed reductions by the Citizens' witnesses are for
11 ROE, capital structure, depreciation and storm reserve.

12 **A.** Could we go through those numbers again?

13 **Q.** Sure. I think the citizens' total proposed
14 reductions sum to something in the range of
15 \$1.3 billion, 509, 554, 150 and 86.

16 **A.** I'm sorry. Go through those one more time.

17 **Q.** I'm sorry. I think the capital-related
18 number, which we're only assuming for purposes of our
19 questioning and answering, is about \$509 million.

20 **A.** Okay.

21 **Q.** The depreciation adjustments are about
22 554 million.

23 **A.** Okay.

24 **Q.** Storm is 149 million.

25 **A.** Okay.

1 Q. And O&M I think is 86 or 83 million.

2 A. Which would you like me to assume, 86?

3 Q. Whatever the sum of the two numbers on the
4 last sheet, yes. I think it's 40 plus 43, but I may
5 be --

6 A. Okay. The last sheet doesn't have any numbers
7 on it.

8 Q. Look at the next to the last sheet.

9 A. I don't see 86 or 83.

10 Q. Do you see 40 plus 43?

11 A. I see 42 and 44. 86.

12 Q. Okay. That's 86.

13 A. Now what do you want me to do with those
14 numbers?

15 Q. Agree that they sum to something in the range
16 of \$1.3 billion for this purpose.

17 A. I would agree.

18 Q. Thank you. And you'd also agree, again
19 subject to the assumptions to which we have agreed, that
20 the majority of those proposed reductions are for
21 capital-related ROE, cap structure, depreciation and
22 storm reserve?

23 A. The 509, the 554 and 149?

24 Q. Yes, sir.

25 A. I would agree that's the majority of the

1 1.3 billion.

2 Q. Okay. And so my, my question -- and this is
3 the question, I believe, that Mr. Olivera suggested I
4 might be able to explore with you in more detail, and it
5 also relates to questions posed from the bench, is this.
6 If you, if FPL were not granted its entire rate
7 increase, what would you cut?

8 MR. BUTLER: Mr. Wright, I'm sorry. For
9 clarification, do you mean that FPL is granted zero or
10 FPL is granted some amount less than that?

11 BY MR. WRIGHT:

12 Q. I'll, I'll ask zero. If FPL were granted no
13 rate increase, what would, what would you cut from your
14 proposed spending?

15 A. I don't know sitting here today what we would
16 cut from our proposed spending. Some would depend upon
17 the Commission's ruling and what they saw as the reasons
18 for the cuts. Some would depend upon just looking at
19 the available resources and the task that we have before
20 us of the obligation to serve our customers with
21 reliable electric service. So it would have to be a
22 concerted effort to look at the resources available and
23 determine how we can best meet that obligation to our
24 customers.

25 Q. More specifically, if the PSC were to reject

1 the company's request for \$150-million-a-year storm
2 reserve accrual, wouldn't that have the effect of
3 reducing the company's expenses by \$150 million or so?

4 **A.** A reduction of revenues associated with the
5 storm accrual and a decision not to approve a storm
6 accrual would obviously reduce our expenses by the
7 \$150 million.

8 **Q.** And it would reduce your revenues
9 correspondingly?

10 **A.** Correct.

11 **Q.** And would it also be correct that those two
12 reductions would have no effect on the company's
13 earnings?

14 **A.** It might be true that it would have no effect
15 on our earnings in that year. But I think that it would
16 be a, a signal that we are potentially pursuing a course
17 that would leave customers maybe a little, not having
18 the benefit of that storm accrual and having it built up
19 over time or used for current storms. So it's not
20 inconsequential that it were to be denied. But the
21 specific question regarding its effect on book earnings
22 in that year is that it would be to have no effect on
23 book earnings in that year.

24 **Q.** I wasn't going to ask these questions, but
25 your response prompts me to do so.

1 You agree that FPL's customers -- you'd agree
2 first that FPL presently has a storm reserve somewhere
3 in the range of 180 to \$190 million?

4 **A.** The storm fund, yes.

5 **Q.** Okay. And you'd agree that FPL's customers
6 since 2007 have been paying off the bonds that were
7 issued through the securitization process to provide
8 that, would you not?

9 **A.** Yes, I believe that's correct.

10 **Q.** Okay. And you don't -- does -- do you have an
11 opinion on the Florida Public Service Commission's
12 record of providing for FPL's recovery of its reasonable
13 and prudent storm costs following storms?

14 **A.** No, I don't.

15 **Q.** Okay. I mean, has the Commission, to -- let
16 me ask you this. In your opinion, has the Commission
17 adequately provided for FPL's recovery of its reasonable
18 and prudent storm costs, say, in this decade?

19 **A.** I've not reviewed the case before the, the
20 Commission -- or the cases before the Commission to
21 determine. I know that we've had the opportunity to
22 come in following those storm restoration activities of
23 '04 and '05 and present the cost of those restoration
24 activities and make our case before the Commission as to
25 what we felt were reasonable and prudent charges, and

1 the Commission has determined what was recoverable.

2 Q. Following along my questions about storm
3 reserve, if the Commission were to grant the accrual,
4 would that, would it be true that that would also have
5 no effect on the company's book earnings, i.e., revenues
6 would be higher by \$150 million and expenses would be
7 higher by \$150 million?

8 A. Yes.

9 Q. Would it improve the company's cash earnings
10 situation?

11 A. No.

12 Q. Okay. You sit on the budget committee;
13 correct?

14 A. Yes.

15 Q. And again I think this is a question that
16 Mr. Olivera suggested I might better pursue with you.
17 But if the Commission -- and you -- in your capacity as
18 a member of the budget committee, are you familiar with
19 the company's planned major capital expenditures?

20 A. Yes.

21 Q. For example, you're familiar with the
22 company's planned expenditures to complete West County
23 1 and 2, yes?

24 A. Yes.

25 Q. To build West County 3?

1 **A.** Yes.

2 **Q.** To complete the nuclear uprate projects?

3 **A.** Correct.

4 **Q.** To go forward in whatever way the company is
5 going to go forward with the Turkey Point 6 and 7
6 nuclear plants?

7 **A.** Yes.

8 **Q.** And build transmission lines as identified in
9 the company's Ten-Year Site Plan and elsewhere?

10 **A.** Generally familiar with it, yes.

11 **Q.** Okay. The question I wanted to ask is if the
12 Commission gives the company no rate increase in this
13 case, how, if at all, would that affect the company's
14 capital spending plan?

15 **MR. BUTLER:** I would object to this as asked
16 and answered. It's simply repackaging a question he
17 asked Mr. Barrett about five minutes ago, you know --
18 what happens if FPL gets a zero rate increase?

19 **COMMISSIONER EDGAR:** Mr. Wright.

20 **MR. WRIGHT:** Madam Chairman, it's far more
21 specific than the question I asked before. The question
22 I asked before I will admit was --

23 **COMMISSIONER EDGAR:** I'm going to allow. Go
24 ahead.

25 **MR. WRIGHT:** Thank you.

1 **BY MR. WRIGHT:**

2 **Q.** I'll ask it more specifically. If the
3 Commission gives you no rate increase, are you still
4 going to build West County 3?

5 **A.** I believe Mr. Olivera answered that question,
6 that we're pretty far along on that project and there
7 are certain consequences to terminating that project.
8 We would have to seriously look at the implications. I
9 understand that's a project that's already been
10 preapproved by -- or not preapproved, but it's been
11 approved by this Commission for a need determination as
12 being in the benefit of customers. So it, it seems to
13 me that if the Commission has determined that this is a
14 project that is beneficial to customers, that I would
15 expect that the revenues to go along with that would be
16 approved. So if that were not to be the case, we would
17 have to seriously look at the situation and determine
18 what do we do next. I don't have an answer for you
19 right here today on the stand. That's not our
20 expectation.

21 **Q.** Would the company proceed with constructing
22 the nuclear uprates at St. Lucie 1 and 2 and Turkey
23 Point 3 and 4, if granted no rate increase?

24 **A.** It's my understanding that those projects are
25 covered under the nuclear cost recovery rule and are not

1 really affected by the decision here in this case.

2 Q. So is the answer to my question yes, subject
3 to the clarification that it's not part of this case?

4 A. It's not binary like that, Counselor, yes or
5 no. I think that the implications of receiving no rate
6 increase in this case are profound and it would affect
7 everything we as a company would be looking at doing,
8 even those things that may have specific cost recovery
9 because of the posture that it puts our company in.
10 Granting no rate increase whatsoever is, would be a
11 tremendous effect on our company. So I'm not going to
12 sit up here today and say unequivocally we would or
13 would not do any specific thing. It would be something
14 we would have to really seriously sit down as a
15 management team and decide how do we go forward from
16 here.

17 Q. If the Commission disallows the company's
18 requested increase in depreciation expense, wouldn't,
19 wouldn't that have the effect of spreading out over a
20 longer period of time the depreciation of a company's
21 assets?

22 A. I'm not sure I completely follow your
23 question.

24 Q. Well, the company has asked for a certain
25 amount of depreciation expense.

1 **A.** Yes.

2 **Q.** Okay. The citizens' witness recommends a
3 lower allowance.

4 **A.** Okay.

5 **Q.** Have you reviewed Mr. Pous' testimony?

6 **A.** No, I've not. I'm not the depreciation
7 witness for the company.

8 **Q.** I understand. I'm not trying to get into the
9 weeds on the depreciation rate for transformers.

10 Depreciation is an accounting entry for the
11 return of capital, is it not?

12 **A.** It is.

13 **Q.** So if the Commission granted no increase and
14 as part of this case said we recognize less depreciation
15 expense than that requested by the company, that would
16 at least have the effect of increasing the company's
17 book earnings; correct?

18 **A.** Not if revenues were lowered as well.

19 **Q.** Holding revenues constant less depreciation
20 expense would result in greater book earnings, would it
21 not?

22 **A.** As I testified yesterday, it's, we're asking
23 for depreciation rates at the same time we're asking for
24 base revenues. So I don't see a scenario where they're
25 disconnected in this case.

1 **Q.** And I'm sure we agree that they are connected.
2 If the Commission says that your request for
3 depreciation expense is \$300 million too high and
4 disallows that, then for any given level of rates isn't
5 it true that the company's book earnings will be higher?

6 **A.** I guess the way I would answer that is no.
7 The, if the, if the Commission were to lower the
8 approved level of depreciation expense, it's my
9 understanding that the revenue requirement in this case
10 would be lowered as well and there would be no impact on
11 our book earnings from the book basis. I mean,
12 obviously there would be less cash earnings, because
13 revenues are cash and depreciation is not, so there's a
14 quality of earnings issue. But I don't see a scenario
15 where revenues stay the same and depreciation goes down.

16 **Q.** I wasn't quite asking that question, but I
17 think your answer is, is okay.

18 If the Commission reduces depreciation expense
19 in this case and correspondingly reduces revenues, that
20 would have no effect on the company's book earnings;
21 correct?

22 **A.** It would have no effect on book earnings,
23 although, as I've mentioned, it would have an effect on
24 our cash position, because the revenues coming down
25 would be less cash. Depreciation coming down is not

1 cash. So it, it, it does have an effect on the
2 company's position.

3 And I might also add that if that were the
4 case, then it also, a lowering of depreciation expense
5 slows the rate of which rate base is declining, and it
6 actually, if it were to be a depreciation credit, for
7 instance, adds to rate base and adds to customer rates
8 in the future.

9 Q. Pursuing two aspects of your response, you
10 said that it affects the company's cash position,
11 affects the company's cash earnings; correct?

12 A. Correct.

13 Q. Isn't it true that that's why, among other
14 factors that the Commission considers in these
15 proceedings, it analyzes financial integrity tests for
16 the company?

17 A. I believe that's the case, yes.

18 Q. Now regarding the second part of your answer
19 in which you said that relative to the depreciation
20 credit by amortization of the company's depreciation
21 surplus, you mentioned that that would increase rate
22 base at some future time; correct?

23 A. In each period that you have a credit it adds
24 basically to rate base.

25 Q. And then didn't you go on to say that it

1 would, would increase rates?

2 **A.** At some future point as you're growing rate
3 base. And, in fact, if we go back to the driver
4 analysis that's on the chart behind me, of that
5 \$266 million of depreciation change, a little more than
6 50 million of that is in fact because we've done the
7 125 million over the last four years. So we are already
8 seeing kind of the result of doing these depreciation
9 credits. It's causing an increase to customers.

10 **Q.** Well, and by that you mean rates will be
11 higher than they would otherwise be absent depreciation
12 credit; correct?

13 **A.** Yes.

14 **Q.** Okay. Now Mr. Olivera testified that the
15 company does not plan or intend to have either a
16 depreciation surplus or a depreciation deficit. Do you
17 agree with that?

18 **A.** I believe that's my understanding, but I'm
19 going to defer to the depreciation witnesses on how that
20 all comes together.

21 **Q.** Again, you're the Vice President of Finance.
22 Let me ask you this question. If there were -- by -- if
23 there were the case that there were neither a
24 depreciation surplus nor a deficit, wouldn't it follow
25 that the amounts paid in for depreciation up to that

1 point in time would accurately reflect the calculated
2 depreciation of the assets in plant-in-service at that
3 point in time?

4 **MR. BUTLER:** I'm going to object to this
5 continued line of questioning on depreciation. We have
6 three witnesses addressing depreciation, and other than
7 a sort of simple box on the revenue requirements
8 components calculation that Mr. Barrett performed, he's
9 not one of those witnesses. I think this has really
10 gone beyond the scope of what he testifies to on
11 depreciation.

12 **COMMISSIONER EDGAR:** Mr. Wright, he may have a
13 point.

14 **MR. WRIGHT:** Well, Madam Chairman, in a
15 previous answer he talked about its impacts on rate base
16 and he talks about, he talked specifically about its
17 future impacts on customers, and that's what I was
18 pursuing.

19 **COMMISSIONER EDGAR:** How much more do you have
20 along this line?

21 **MR. WRIGHT:** Very little along this line.

22 **COMMISSIONER EDGAR:** All right. Then you may
23 proceed, but let's do try to move along, and let's
24 recognize that we do have other witnesses. Thank you.

25 **BY MR. WRIGHT:**

1 **Q.** My question was, we got to a point and there
2 were no depreciation surplus and no depreciation
3 deficit, wouldn't it be true that the amount of
4 depreciation paid in up to that point in time would be
5 equal to the actual depreciation realized on the assets
6 in the plant-in-service accounts?

7 **A.** I'm going to ask you to clarify that because I
8 didn't really quite follow how you finished that
9 question. If you could just rephrase it for me.

10 **Q.** If we found ourselves at a point in time where
11 the depreciation surplus was zero, there was no surplus,
12 there was no deficit, wouldn't it follow that the
13 amounts paid through rates and booked to depreciation by
14 customers up to that point in time would accurately
15 reflect the actual estimated depreciation of the
16 company's assets?

17 **MR. BUTLER:** I'm sorry. Actual estimated? I
18 don't understand the question.

19 **BY MR. WRIGHT:**

20 **Q.** I'll just drop the word "actual." The
21 estimated depreciation, because is -- let me ask a
22 prefatory question. Isn't it true that the depreciation
23 is all calculated and thus estimated?

24 **MR. BUTLER:** Mr. Wright, are you referring to
25 the depreciation to be taken in the future or the

1 depreciation that's already been taken?

2 **MR. WRIGHT:** I think both.

3 **COMMISSIONER EDGAR:** I'm not sure I understood
4 the question, so -- and I'm not being asked to answer
5 it, so that's a good thing. But let's, can you try
6 again for my benefit?

7 **MR. WRIGHT:** Certainly.

8 **BY MR. WRIGHT:**

9 **Q.** If we have a case where we've done a
10 depreciation study and there's no surplus and no deficit
11 --

12 **A.** Okay.

13 **Q.** -- are you okay with that assumption?
14 Wouldn't it be true that the depreciation actually
15 booked by the company would be equal to the estimated
16 depreciation of the assets in the study?

17 **A.** I don't know how the study is put together, so
18 I can't say that's yes or no.

19 **Q.** Okay. The company's witnesses have testified
20 that you expect to make something like \$16 billion of
21 capital investments over the next five years. Is that
22 your understanding?

23 **A.** Yes.

24 **Q.** How much of that is in investment in nuclear
25 plant?

1 **A.** I'm sorry. Was that --

2 **Q.** How much, how much of that 16 billion is
3 projected to be investment in nuclear plant?

4 **A.** All nuclear capital expenditures, or are you
5 specifically referring to new nuclear?

6 **Q.** All.

7 **A.** Hold on one second. I believe it's a little
8 over \$2 billion.

9 **Q.** Thank you. In response to a question in your
10 deposition, my copy indicates that you made the
11 statement that, to this effect, in FPL's view, having
12 the generation base rate adjustment mechanism minimizes
13 the likelihood of having to file a rate case. Is that
14 true?

15 **MR. BUTLER:** I'm sorry. Mr. Wright, would you
16 please identify the page and line number?

17 **MR. WRIGHT:** Sure. It's a question -- Madam
18 Chairman, I apologize for interrupting Mr. Butler.

19 **MR. BUTLER:** I was just about done.

20 **BY MR. WRIGHT:**

21 **Q.** At Page 55, beginning at Page 55, Line 17,
22 and -- I'm sorry. I'm sorry. No. That -- I have two
23 sides and it's the wrong side. Beginning at Page 56,
24 Line 25, and continuing on to Line 5 of Page 57.

25 **A.** I'm there.

1 Q. Okay.

2 A. What was the question?

3 Q. Would you agree that in FPL's view that the
4 GBRA would minimize the likelihood of FPL filing a rate
5 case?

6 A. Yes.

7 Q. Okay. Yesterday in response to some questions
8 I believe by Mr. Moyle, I think you said that you
9 believe that GBRA, the generation base rate adjustment
10 mechanism, is good for all parties. Do you recall
11 making that statement?

12 A. I do.

13 Q. I'm going to ask you a couple of questions
14 about compared to what. Isn't it true that it's better
15 for FPL if the return on equity at, at a point in time,
16 if the return on equity authorized under the GBRA was,
17 is greater than the current market return on equity?

18 A. I'm sorry. Could you --

19 Q. I'll make it more specific.

20 A. Yeah, please.

21 Q. Sure. Suppose you put a new power plant into
22 service. It costs a billion dollars. If there's a GBRA
23 and the capital return component of that has embedded in
24 it, let's say, an 11.75 percent ROE, which is what's in
25 the current stipulation; right?

1 **A.** It's in the stipulation, yes.

2 **Q.** Okay. If in the then current GBRA the ROE is
3 11.75 but the then current real, as might be determined
4 by the Commission, appropriate ROE is 10.75, then having
5 the GBRA in place is better for FPL than having a rate
6 case; correct?

7 **A.** Well, I would suggest, first of all, that the
8 GBRA is an interim measure until you get to the next
9 base rate case where everything gets reset, and the ROE
10 might need to be higher than what was in the GBRA or it
11 could be determined by the Commission that it needed to
12 be lower. So really it's an interim measure that
13 reflects in near time to when the decision was made as
14 to what the appropriate ROE was.

15 **Q.** I understand that and I understand that to be
16 the case, but that wasn't my question. You just
17 testified that having the GBRA will minimize the
18 likelihood of FPL having a rate case. So this really
19 goes to what happens in the interim. And thus in the
20 interim my question is if the ROE embedded in the
21 capital return piece of the GBRA is greater than what
22 the current market conditions would otherwise indicate,
23 isn't it true that having the GBRA is better for FPL?

24 **A.** I guess I would, I would not unequivocally say
25 that. I would say that it, again, it's an interim

1 measure to get you to the next base rate adjustment and
2 it could go either direction, up or down. So to say
3 that it's better for FPL -- I think it's balanced for
4 both customers and the company, and it's a reasonable
5 estimate of what the cost of equity is at the time the
6 decision is made. Again, the need determination process
7 is, is usually just a year or two, couple of years, you
8 know, from the time the unit is going into service. So
9 we're not talking great lengths of time here.

10 Q. The point is we're not talking about great
11 lengths of time between approval and in service. We're
12 talking about potentially great lengths of time, like 25
13 years between rate cases. Now you've testified, and so
14 it really goes back to my question about isn't it better
15 for FPL in the interim if the ROE embedded in the GBRA
16 revenue requirement determination is greater than then
17 current ROEs as indicated by the capital markets?

18 MR. BUTLER: I'm going to object that that's
19 been asked and answered.

20 MR. WRIGHT: Madam Chairman, I have not heard
21 a yes or no to that question. I think it's a simple
22 question that requires a yes answer.

23 COMMISSIONER EDGAR: Why don't you pose the
24 question again and we'll go from there.

25 BY MR. WRIGHT:

1 **Q.** Isn't it true that in the interim, if the
2 capital, i.e., until the next rate case, the ROE
3 embedded in the capital return component of the GBRA is
4 greater than then current market, capital market
5 conditions would otherwise indicate, having the GBRA is
6 better for FPL than having a rate case at that time?

7 **MR. BUTLER:** Same objection.

8 **MR. WRIGHT:** Same answer. I still haven't
9 heard him say --

10 **COMMISSIONER EDGAR:** Overruled.

11 **THE WITNESS:** In your simple example I would
12 say yes. However, it's just as likely that the ROE were
13 to be insufficient if the capital markets were to move
14 in the other direction.

15 And I would further add that the Commission
16 has at its disposal the monthly surveillance process
17 whereby they review our earnings, and such that if it
18 were to cause a situation where the Commission deemed it
19 was appropriate to bring us in for one of those base
20 rate cases that you've alluded to, that certainly is
21 open to the Commission to do that.

22 Again, the GBRA is intended to be an interim
23 measure to get you to that next step.

24 **BY MR. WRIGHT:**

25 **Q.** What was the interim period between FPL's last

1 rate case and this one?

2 **A.** The last time that FPL filed a full set of
3 MFRs was 2005 with a 2006 test year.

4 **Q.** And when was the last time the Commission
5 decided rates for FPL pursuant to a general rate
6 proceeding?

7 **A.** As I understand it, the last fully litigated
8 case was in the mid '80s. However, the Commission
9 approved the keeping of rates flat in 2005, and actually
10 reductions to rates in prior settlements in 2002 and
11 '99.

12 **MR. WRIGHT:** Just a moment, Madam Chairman.
13 Thank you.

14 **COMMISSIONER EDGAR:** Yes, sir.

15 **MR. WRIGHT:** I have one more question.

16 **COMMISSIONER EDGAR:** Okay.

17 **MR. WRIGHT:** It is similar to but different
18 from the last question I asked.

19 **BY MR. WRIGHT:**

20 **Q.** If, considering all appropriate factors in
21 setting a utility's rates, a current time rate case
22 would produce lower rates for FPL but the GBRA enables
23 FPL to avoid a rate case, isn't that better for FPL?

24 **A.** I'm going to need to walk through that
25 question.

1 **Q.** Sure.

2 **A.** If you could start that one over.

3 **Q.** At a point in time --

4 **A.** Okay.

5 **Q.** -- say sometime after West County 3 goes into
6 service, 2013, if, all things considered, a general
7 fully litigated rate case would produce lower rates than
8 would otherwise be in effect if the company were able to
9 use the GBRA, then having the GBRA would be better for
10 FPL; correct?

11 **A.** Bear with me. So we're out in 2015, West
12 County is already in service, we have a rate case,
13 and --

14 **Q.** The scenario I'm posing is rate case versus
15 GBRA. You testified that having the GBRA available
16 minimizes the likelihood of having a rate case. So my
17 question goes to, goes to the potential benefit to FPL
18 of using the GBRA as opposed to having a general rate
19 case.

20 **A.** And I guess what I'm saying is that the
21 benefit of the GBRA is it recognizes for the company the
22 revenue requirements of an asset that's going to provide
23 fuel benefits for the customer. So, you know, it's
24 going to be again recognizing the necessary return on
25 investment and return of investment of an asset that's

1 providing benefits to customers. So I think it benefits
2 both.

3 Q. But the fuel benefits are going to be what
4 they are, aren't they?

5 A. Well, the fuel benefits are going to be
6 enhanced because we're building more efficient
7 generation.

8 Q. If the -- sorry. If the plant comes online,
9 the fuel, the company's fuel costs are going to be what
10 they are with the plant online; right?

11 A. Yes.

12 Q. And the company will recover its reasonable
13 and prudent fuel costs through the fuel cost recovery
14 clause; right?

15 A. Correct.

16 Q. Okay. Again, if, all things considered, i.e.,
17 if the PSC were presented with a full rate case -- and
18 this is an assumption.

19 A. Okay.

20 Q. But if, all things considered, the totality of
21 FPL's rates would be less following my hypothetical
22 fully litigated rate case than if the company simply
23 implements a rate increase pursuant to a GBRA and avoids
24 a rate increase, that's better for FPL, isn't it?

25 A. I think the only answer I can give you to that

1 hypothetical is in that hypothetical scenario the
2 Commission would be looking at a situation where
3 presumably we would need to have rates lowered, and that
4 would be despite having a GBRA. I mean, that wouldn't
5 change that situation. I mean, if rates needed to be
6 lowered, the Commission would probably call us in to
7 lower rates. GBRA doesn't change that.

8 Q. When was the last time the Commission,
9 Commission called FPL in to lower your rates?

10 A. I don't believe we've been in an overearnings
11 situation that I can remember.

12 Q. I'll aver to you that something like 40 years
13 ago there were some rate cases in Florida that involved
14 Commission-initiated rate reductions, but I can, I can
15 show that through orders.

16 MR. BUTLER: I will object to the comments
17 made by Mr. Wright. Apparently he has forgotten Docket
18 001148 that was initiated by the Commission to review
19 FPL's rates in the year 2000.

20 COMMISSIONER EDGAR: Mr. Wright, you're coming
21 awfully close to testifying.

22 MR. WRIGHT: Thank you.

23 BY MR. WRIGHT:

24 Q. One more question. I believe Mr. Olivera told
25 me that you could tell me what the company's requested

1 rate case expense in this case is.

2 A. I believe we've filed \$3.7 million.

3 MR. WRIGHT: Thank you. That's all I have.

4 Thank you.

5 COMMISSIONER EDGAR: Okay. Are there --
6 Mr. McGlothlin, have you done cross for this witness?

7 MR. MCGLOTHLIN: We changed our order to deal
8 with some logistics, so I have not crossed yet.

9 COMMISSIONER EDGAR: You have not? Okay. Let
10 me just ask this before we do that.

11 I think you've been sitting there for
12 approximately two hours. How are you doing? Do you
13 need a break or would you like to continue?

14 THE WITNESS: Well, not knowing when the next
15 break might come, it might be a good time.

16 COMMISSIONER EDGAR: Okay. Why don't we give
17 the witness and the rest of us a short stretch, and we
18 will come back in ten minutes by the clock on the wall.

19 (Recess taken.)

20 Okay. We are back on the record. And,
21 Mr. McGlothlin, I believe that you are up for cross.

22 MR. MCGLOTHLIN: Thank you.

23 CROSS EXAMINATION

24 BY MR. MCGLOTHLIN:

25 Q. Mr. Barrett, I'm Joe McGlothlin with the

1 Office of Public Counsel. Good afternoon.

2 A. Good afternoon.

3 Q. At Page 7 of your prefiled testimony you
4 acknowledge that the generation base rate adjustment had
5 its origins in a settlement that was approved by the
6 Commission in 2005. Do you see that question and
7 answer?

8 A. Yes.

9 Q. And you're aware that the settlement was a
10 settlement of parties to a revenue requirements case
11 that was reached by the parties and presented to and
12 approved by the Commission at the time; is that right?

13 A. Yes.

14 Q. During the break my colleague distributed
15 copies of the order of the Commission that approved that
16 settlement. We don't need an exhibit number because it
17 is an order. I'll ask the Commission to take official
18 recognition of Order Number 050188-EI. I'm sorry.
19 PSC-05-0902-S-EI, in Docket Numbers 050045 and 050188
20 issued September 14th, 2005. Do you have that available
21 to you, Mr. Barrett?

22 A. Yes.

23 **MR. BUTLER:** I'd just note for the record that
24 it is not a complete copy of the order, but that's
25 probably not a concern. I just want to be sure that

1 everybody is aware.

2 **COMMISSIONER EDGAR:** So noted.

3 **MR. McGLOTHLIN:** I'll be happy, if counsel
4 prefers, to have the full copy provided. But I think
5 for purposes of my limited question this will serve your
6 purposes and mine.

7 **MR. BUTLER:** I expect that's right. Let's
8 just see how it goes, but it probably won't be a
9 difficulty.

10 **BY MR. McGLOTHLIN:**

11 **Q.** Please turn to Page 2 of the order,
12 Mr. Barrett. You'll see Roman numeral II, Stipulation
13 and Settlement, the section in which the Commission
14 summarized the principal provisions of the settlement
15 agreement. And if you'll follow me, I'm going to simply
16 in shorthand fashion identify the principal provisions
17 that are listed here.

18 The first bullet point reflects that the
19 stipulation and settlement is effective for a term of
20 four years; correct?

21 **A.** For a minimum of four years. Yes.

22 **Q.** The second bullet point provides that, with
23 limited exceptions, the settlement was for FPL's then
24 existing base rates to continue in effect without
25 change; correct?

1 **A.** Correct.

2 **Q.** The third bullet point provides that no party
3 to the settlement would request a change in the base
4 rates except as for the limited exceptions; correct?

5 **A.** I believe so, yes.

6 **Q.** Now with respect to the limited exceptions to
7 that provision, turn to the next page. The exceptions
8 are these. First, there was the provision that if FPL's
9 earnings fell below a 10 percent return on equity, at
10 that trigger point FPL could request a base rate
11 proceeding; correct?

12 **MR. BUTLER:** I'm sorry, Mr. McGlothlin.
13 You're referring to Page 3, a particular bullet?

14 **MR. MCGLOTHLIN:** The top one, yes.

15 **THE WITNESS:** Yes.

16 **BY MR. MCGLOTHLIN:**

17 **Q.** And the other exception, if you'll look at the
18 bottom of that page, was the provision that we now call
19 the generation base rate adjustment, correct, which
20 provided the ability of the company to recover the costs
21 of power plants that went through the determination of
22 need process and began commercial operation within the
23 four-year period of the settlement?

24 **MR. BUTLER:** Mr. McGlothlin, are you asking
25 him to confirm that those are the only two exceptions or

1 that that is another exception?

2 **MR. McGLOTHLIN:** Well, if you see another
3 exception to the base rate limitations, I think those
4 are the major ones for the purpose of my questions.

5 **MR. BUTLER:** Do you want him to review the
6 order? At that point it probably is going to be
7 necessary for you to provide us with the entire order if
8 what you're getting him to do is to agree that those are
9 the only exceptions referred to in the stipulation.

10 **MR. McGLOTHLIN:** That's right.

11 **THE WITNESS:** I'm sorry. Could you repeat the
12 question?

13 **BY MR. McGLOTHLIN:**

14 **Q.** Would you agree that the provisions I've
15 identified to you constitute the exceptions to the
16 otherwise applicable freeze on rates as they exist at
17 the time of the settlement?

18 **MR. BUTLER:** I'm going to object to this
19 question as -- first of all, I think Mr. Barrett is
20 going to need to review very carefully the settlement
21 agreement. I think it comes pretty close to asking for
22 a legal conclusion. And what he's basically asking him
23 to do is look at the interaction of all of the
24 provisions in the settlement and be sure that he is
25 answering correctly that the two particular bullets

1 Mr. McGlothlin had referred to are the only exceptions
2 to the freeze on base rates that was referred to in the
3 prior bullet he described.

4 **MR. MCGLOTHLIN:** Well, I think we can deal
5 with it. I'll rephrase.

6 **BY MR. MCGLOTHLIN:**

7 **Q.** Mr. Barrett, would you agree that the bullet
8 point at the bottom of Page 3 and continuing to the top
9 of Page 4 is the summary, the Commission summary of what
10 we call now the generation base rate adjustment?

11 **A.** Those words are not used there, but it's my
12 understanding that that's what it's describing.

13 **Q.** And that is the ability of the company during
14 the four-year term of its stipulation to recover the
15 revenue requirements associated with power plants that
16 had received a determination of need and went into
17 commercial service in that time frame?

18 **A.** Yes.

19 **Q.** With those provisions in mind, I would like to
20 compare the context in which the generation base rate
21 adjustment first appeared, when it originated in the
22 2002 settlement agreement on the one hand, and the
23 manner in which it is being proposed in this case on the
24 other hand.

25 With respect to 2002, the settlement agreement

1 reached by the parties and approved by the Commission
2 froze existing rates for four years, provided the
3 parties could not seek a change with the exceptions that
4 FPL had the 10 percent ROE trigger and also had the
5 ability to invoke the generation base rate adjustment
6 mechanism; correct?

7 **A.** I believe you said the 2002 settlement. Is
8 that what you intended?

9 **Q.** If I did, I misspoke. I meant to say 2005.

10 **A.** Again, with the same understanding that I
11 don't believe those are all the provisions of the
12 agreement, those provisions are in the agreement.

13 **Q.** And now in this case FPL wants to increase
14 base rates by a billion dollars in 2010, increase them
15 again by \$240 million in 2011, increase them again
16 \$180 million per year through the generation base rate
17 adjustment mechanism also in 2011, in the context in
18 which there will be no limitation on the company's
19 ability to seek base rates, and the generation base rate
20 adjustment would be effective not for four years but, if
21 the company as proposed, accepted for all time. Did I
22 say that accurately?

23 **A.** There was a lot in that, so let me just back
24 up.

25 **Q.** Let's take them one point at a time. In this

1 case does FPL ask the Commission to allow, to increase
2 base rates by about a billion dollars effective
3 January 1st, 2010?

4 **A.** Yes.

5 **Q.** Does FPL ask in this case for approval to
6 increase base rates again by \$240 million per year
7 effective January 1st, 2011?

8 **A.** Yes.

9 **Q.** In this case does FPL ask for approval of a
10 generation base rate adjustment mechanism and ask also
11 that it be applied to West County 3 in 2011?

12 **A.** Yes. That's correct.

13 **Q.** And would that add an additional \$180 million
14 annually to base rates?

15 **A.** Yes, it would.

16 **Q.** And is it correct that, as proposed by the
17 company in this case, FPL was not -- is not limited in
18 any way by, by its opportunity to seek increases in base
19 rates in the future?

20 **A.** Could you rephrase that? I'm sorry.

21 **Q.** Yes. As part of its proposal in this case,
22 FPL is not offering to limit its opportunity to seek
23 changes in base rates now or in the future; correct?

24 **A.** This base rate proceeding is not a proposal
25 per se like a settlement agreement. It is a proceeding

1 where we're asking the Commission to rule on the
2 appropriateness of the revenue requirements. We're
3 asking for 2010, 2011, and the ongoing use of the GBRA
4 mechanism for West County 3. That is all that's
5 intended in this filing.

6 **Q.** I believe your answer is yes, but let me make
7 sure.

8 If the company's petition is granted and the
9 order approves everything you've asked for, FPL would
10 not be limited in any way by a limitation on its ability
11 to seek additional base rate changes; correct?

12 **A.** That is correct.

13 **Q.** And as you propose it, the generation base
14 rate mechanism is not limited in terms of duration or
15 time. It would be applicable from this point forward
16 without limitation; correct?

17 **A.** That's correct. Our proposal is that the, the
18 GBRA mechanism that has been effectively used for Turkey
19 Point Unit 5 in 2007 and West County Units 1 and 2 this
20 year and West County 3 in 2011 is an effective mechanism
21 to allow the company to recover the first year revenue
22 requirements of the, of the unit going into service
23 while the customer is getting the benefit of the fuel
24 savings that come along with that investment, and that
25 it's limited in that regard.

1 **MR. McGLOTHLIN:** Commissioners, I move to
2 strike that last response. My, my question simply asked
3 him to confirm that as proposed by the company the
4 generation base rate mechanism is not limited in its
5 duration, and the response went far beyond anything
6 necessary to explain his yes to that answer.

7 **COMMISSIONER EDGAR:** Mr. Butler?

8 **MR. BUTLER:** I think that it was responsive
9 and it explained the context in which the company views
10 its proposal, the GBRA mechanism, and I think it
11 provided appropriate context for responding to
12 specifically the question that Mr. McGlothlin had
13 raised.

14 **COMMISSIONER EDGAR:** Overruled.

15 **MR. McGLOTHLIN:** During the break we handed
16 out another document, Mr. Barrett, and I will ask that
17 an exhibit number be assigned to this one.

18 **COMMISSIONER EDGAR:** Okay. I think we are on
19 415, but let me ask staff to verify. They are nodding,
20 so we will mark 415.

21 And which document, Mr. McGlothlin, are, are
22 we going to take up?

23 **MR. McGLOTHLIN:** We're going to take them both
24 at the same time through, through a short series of
25 questions.

1 **COMMISSIONER EDGAR:** Okay.

2 **MR. McGLOTHLIN:** There is attached to 415
3 answers to two interrogatories. And you'll see the
4 cover page, the description is FPL's Response to SFHHA
5 Interrogatories 94 and 95.

6 **COMMISSIONER EDGAR:** Okay. I have that. I
7 see it. Does the witness have it?

8 **THE WITNESS:** I do.

9 **COMMISSIONER EDGAR:** Okay. And,
10 Commissioners, we're good? Okay. So we will mark this
11 as 415 as noted by Mr. McGlothlin with the description
12 on the cover page and use that as our title. Go right
13 ahead.

14 (Exhibit 415 marked for identification.)

15 **BY MR. McGLOTHLIN:**

16 **Q.** Take a moment, Mr. Barrett, and become
17 familiar with the questions and answers here.

18 **A.** For both?

19 **Q.** Yes. You'll note that attached to these
20 documents is an affidavit that you've signed. Do you
21 recognize these as answers that you provided to certain
22 interrogatories from SFHHA?

23 **A.** Yes.

24 **Q.** I want to direct you to the first sentence in
25 each of the two answers beginning with Interrogatory

1 Number 94. You state, "FPL is requesting in this
2 proceeding a continuation of the current GBRA mechanism
3 as set forth in the 2005 settlement agreement."

4 And if you'll turn to the other interrogatory
5 and response, you say, "Yes. FPL is requesting in this
6 proceeding a continuation of the current GBRA mechanism
7 as set forth in the 2005 settlement agreement."

8 Those were your answers; correct?

9 **A.** Correct.

10 **Q.** I want to ask you a couple of questions about
11 your choice of words there. First of all, "a
12 continuation as set forth in the agreement." You
13 acknowledge, do you not, that the GBRA as agreed to by
14 the parties was limited in its duration to the four
15 years of the settlement agreement itself?

16 **A.** Yes, I do. And what was intended by this
17 response was essentially a continuation of the
18 mechanism.

19 **Q.** All right.

20 **A.** As described in the agreement.

21 **Q.** I want to focus now on that portion of the
22 sentence that says you're seeking a continuation of the
23 GBRA mechanism as set forth in the 2005 settlement
24 agreement. If you'll turn back to the order and turn to
25 Page 13, the paragraph numbered 18. Would you read --

1 **MR. BUTLER:** I'm sorry. Mr. McGlothlin, the
2 page number you're referring to is the page number at
3 the bottom of page or the top of the page?

4 **MR. MCGLOTHLIN:** Bottom of the page.

5 **MR. BUTLER:** Okay. It's page 20 of the order,
6 but then Page 13 of the stipulation?

7 **MR. MCGLOTHLIN:** That's correct.

8 **MR. BUTLER:** Okay.

9 **MR. MCGLOTHLIN:** And to triangulate the
10 matter, the paragraph numbered 18.

11 **MR. BUTLER:** Okay. Thank you.

12 **BY MR. MCGLOTHLIN:**

13 **Q.** If you'll read that first sentence in
14 paragraph 18, Mr. Barrett?

15 **A.** "This stipulation and settlement is contingent
16 on approval in its entirety by the FPSC."

17 **Q.** Do you understand the words "in its entirety"
18 to mean that the GBRA would become effective only if all
19 the other provisions of the settlement agreement became
20 effective?

21 **A.** I mean, it's my understanding that -- yes, the
22 entirety of this agreement would mean all the provisions
23 of the agreement.

24 **Q.** Would it follow that if you want to continue
25 as set forth in the settlement agreement, you'd have to

1 continue the agreement to abide by existing base rates
2 and limit one's ability to seek increases in the future?

3 **MR. BUTLER:** I'm going to object to that as
4 calling for a legal conclusion.

5 **COMMISSIONER EDGAR:** Mr. McGlothlin, will you
6 rephrase?

7 **BY MR. MCGLOTHLIN:**

8 **Q.** Would you agree, Mr. Barrett, that essentially
9 by its proposal in this case FPL has taken one component
10 of a negotiated agreement, that component being
11 something that it received in a negotiation, has removed
12 from that component all the things that it gave to
13 receive it and has added that to its petition for a base
14 rate request in this case?

15 **A.** I would agree that the GBRA mechanism was a
16 component of the settlement agreement, and we believe
17 it's an effective mechanism that we're proposing that
18 the Commission continue to use as an effective
19 mechanism.

20 **MR. MCGLOTHLIN:** I move to strike as
21 nonresponsive.

22 **COMMISSIONER EDGAR:** Mr. Butler?

23 **MR. BUTLER:** I think it was completely
24 responsive. He has indicated that, in response directly
25 to Mr. McGlothlin's question, this is a component of the

1 settlement agreement. We're not looking to have all of
2 the settlement agreement continued. And then he went on
3 to explain why continuing that particular component
4 would be an appropriate step for the Commission to take.

5 **BY MR. McGLOTHLIN:**

6 Q. Would you agree that the GBRA mechanism is
7 something that you received during the negotiations that
8 led to the settlement agreement?

9 A. I would agree that it was a negotiated part of
10 the settlement agreement.

11 Q. And would you agree that you have identified
12 that component of the negotiated agreement and have not
13 included any of the components that you gave in the give
14 and take to, to accomplish that end?

15 A. Yes. And then I would explain that, you know,
16 that was a settlement agreement that was reached four
17 years ago. We are here today looking at our situation
18 with the company today. We still believe it's an
19 effective mechanism to deal with these kinds of
20 situations going forward. All of the other issues that
21 were part of that settlement are addressed, you know,
22 appropriately in a different context. The focus here
23 was the GBRA is an effective mechanism. This Commission
24 felt it was an effective mechanism. All parties at the
25 time felt it was effective as part of the settlement.

1 We're just merely saying as you move forward from here
2 we continue to believe it's an effective mechanism.

3 Q. Yesterday you said that you believe the GBRA
4 was effective and efficient, and you also said that the
5 GBRA offers some cost protection for customers. Do you
6 remember that statement?

7 A. I do.

8 Q. And do you believe then that it's important to
9 be careful to ensure customers don't pay too much?

10 A. I believe it's important that the customers
11 pay the right amount and that the GBRA mechanism
12 provides that through its true-up provision.

13 Q. That true-up provision being the mechanism to
14 ensure that the rates collect only the costs identified
15 as associated with the power plant; correct?

16 A. Yes. The actual in-service cost, the capital
17 cost of the plant.

18 Q. You would agree though that the generation
19 base rate adjustment looks only at the power plant and
20 at no other circumstances that affect the company's
21 financial condition?

22 A. Correct.

23 Q. Would you agree that whether customers are
24 paying too much on an overall basis without isolating a
25 single power plant is measured in the absence of a

1 stipulation by whether the company is earning a rate of
2 return that is within the range deemed fair and
3 reasonable by the Commission?

4 **A.** Yes. And I think the GBRA works very well in
5 that regard in that if there were no GBRA mechanism,
6 obviously the company would not earn any revenues and it
7 would have a pretty serious impact on the company's
8 financial position; whereas, using the GBRA moves the
9 return on the whole company by a very modest amount up
10 or down.

11 **Q.** Whether an impact is modest or not depends on
12 circumstances, does it not?

13 **A.** It does.

14 **Q.** Okay. Now the company's earned rate of return
15 is a function of the revenues received through the
16 application of base rates compared with the operating
17 revenues that are designated as related to those base
18 rates; correct?

19 **A.** Please rephrase that.

20 **Q.** All right. I'll rephrase.

21 The company's base rates generate revenues
22 which are then compared with its operating expenses to
23 quantify its net income; correct?

24 **A.** Yes. Our operating revenues and our operating
25 expenses combine to provide net operating income, which

1 is then compared to our investment to determine our rate
2 of return.

3 Q. Right. And the -- excuse me. The net
4 operating income --

5 MR. McGLOTHLIN: May I take a moment?

6 COMMISSIONER EDGAR: Take a moment. We have
7 water if you need it.

8 BY MR. McGLOTHLIN:

9 Q. Let's see how this goes. The net operating
10 income is affected by a multitude of various cost
11 components and revenues; correct?

12 A. Correct.

13 Q. And the net operating income and thus the, and
14 thus the earned rate of return can fluctuate over time;
15 correct?

16 A. Yes.

17 Q. Now I want to take a hypothetical scenario
18 that is somewhat different than the one Mr. Wright posed
19 to you, and I'm going to keep it very simple.

20 A. Thank you.

21 Q. Let's assume that in a given situation, let's
22 assume it's this coming, let's assume it's the summer of
23 2011 when West County is expected to enter service, and
24 the company has identified the revenue requirements
25 associated with that power plant as \$180 million in

1 round numbers; correct?

2 **A.** Correct.

3 **Q.** Now at any point in time would you agree with
4 me that if the company is earning somewhere within this
5 range approved as fair and reasonable, there may be the
6 ability of existing base rates to absorb some
7 incremental cost and still remain within the range?

8 **A.** Yes. There is always going to be some,
9 some -- things can move up or down and it will determine
10 where you are in the range.

11 **Q.** For purposes of my question assume that at
12 that point in time the company is earning within its
13 authorized range of return and the circumstances are
14 such that base rates, existing base rates can absorb
15 \$90 million of additional costs and stay within the
16 range. All right?

17 Now let's take two scenarios. One scenario,
18 there is a GBRA, the other is that there's no GBRA, and
19 that the absence -- in the absence of the GBRA the
20 company files a request for a base rate increase.
21 Bearing in mind that the assumption is that existing
22 earnings can absorb \$90 million and making the
23 simplistic assumption that the only thing that affects
24 that situation is the addition of the power plant, would
25 you agree with me that the end result would be an

1 increase in base rates of \$90 million?

2 **MR. BUTLER:** I'm sorry, Mr. McGlothlin. In
3 your hypothetical is the ability to absorb \$90 million,
4 would that take the company down to the bottom of its
5 previously authorized range of return?

6 **MR. MCGLOTHLIN:** I didn't specify, but we can,
7 we can say the midpoint or the bottom. Let's just use
8 the bottom at this point.

9 **THE WITNESS:** That being the case, then I
10 would, I would suggest that -- well, first of all, the
11 costs are going to go up by the \$180 million. And so
12 the introduction of a base rate case, that would be a
13 whole new situation where we would determine what is the
14 right range of return and what's the right midpoint, the
15 upper and lower bounds, et cetera. So it's kind of hard
16 to sit here with a hypothetical and say how it would be
17 in that, in that time frame.

18 **BY MR. MCGLOTHLIN:**

19 **Q.** Well, please accept for my hypothetical, which
20 is purposely simplistic, and the hypothetical is -- and
21 we'll use the midpoint of the range. The hypothetical
22 is that the existing base rates can absorb an additional
23 \$90 million and stay at the midpoint of the range.
24 That's the hypothetical.

25 **A.** Okay.

1 **Q.** And the only, the only variant is that there
2 is a base rate proceeding and \$180 million of revenue
3 requirements are added. Would you agree with me that in
4 that instance under my assumptions the resulting base
5 rate increase would be \$90 million?

6 **A.** I think in your hypothetical that would be the
7 case. But I don't know what the introduction of the
8 \$180 million into your hypothetical actually would do to
9 our earned return, whether it would push it outside of
10 any range. So it's kind of hard to deal with the
11 hypothetical.

12 **Q.** Well, but my assumption was that the
13 \$90 million would be to absorb down to the midpoint, and
14 that the addition of the power plant and base rate
15 proceeding designed to take that into account would
16 result in FPL still at the midpoint, but the customers
17 would see an increase of \$90 million annually; correct?

18 **A.** That would be correct in the hypothetical.
19 And it's important to point out though when you kind of
20 step out of the hypothetical, which is kind of the world
21 that we're living in, that isn't the case in our
22 projections.

23 **Q.** Well, your projections are for a particular
24 2011 year; correct?

25 **A.** Which year?

1 **Q.** 2011.

2 **A.** 2011. Correct. And despite the GBRA, we
3 estimate we need \$240 million of additional revenue
4 requirements. So I think the hypothetical is kind of
5 real far afield from reality.

6 **Q.** Well, the hypothetical is an all-purpose
7 hypothetical to make a simple point.

8 **A.** I understand.

9 **Q.** Now the other scenario would be where the
10 generation base rate adjustment is in effect, so you
11 have a situation where existing rates could absorb
12 \$90 million without an increase. But because the GBRA
13 is in effect, the company implements that and the
14 customers' rates go up by \$180 million instead of the
15 \$90 million; correct?

16 **A.** The revenue requirement would be \$180 million,
17 correct. And that probably wouldn't move the return
18 very much if we were at the midpoint at that point
19 because the GBRA is set at the midpoint.

20 **Q.** So at any point in time, and assuming the
21 Commission were to grant the GBRA in the form you
22 request from this point forward for possibly decades,
23 there could be a circumstance in which existing base
24 rates would be adequate to absorb all or some of the
25 cost of the new power plant, with the result that the

1 Commission, that the company would continue to earn
2 within its range. And notwithstanding that situation,
3 the, the effect of the generation base rate adjustment
4 would be to add the entire increment of revenue
5 requirements associated with the power plant to
6 customers' bills; correct?

7 **A.** I believe the right way to think of that is
8 that the GBRA would allow the revenues to go into effect
9 and keep us within an authorized rate of return, or if
10 it were to push us above, through its surveillance
11 process the Commission would certainly be able to pull
12 us into review rates. It's only intended to be an
13 interim step until the next time full base rates are
14 reviewed.

15 So, you know, I think that's the correct way
16 to look at the GBRA. It's an interim measure. If the
17 inclusion of those revenues were to cause a situation
18 where we were to earn above our return, we have full
19 expectation that the Commission would want to review our
20 rates. It's probably more likely in our view that it
21 would help keep us within the range and prevent a
22 further deterioration in earnings.

23 **Q.** But that again would be a function of
24 circumstances at the time, would it not?

25 **A.** It would.

1 **Q.** And with the generation base rate adjustment
2 in effect, the impact of the GBRA would be to increase
3 base rates without consideration of the entire financial
4 picture of the company at the time; correct?

5 **A.** Well, again, the consideration of the entire
6 financial position of the company is done every month
7 through looking at surveillance reports. The only thing
8 we know with certainty is that without the GBRA the
9 company would be having to absorb in the West County
10 case the whole \$180 million.

11 **Q.** And if that were the case, were there no GBRA,
12 the company would have the ability and the opportunity
13 to fashion a base rate request to coincide with the
14 in-service date of the unit, would it not?

15 **A.** Absolutely. And that's why it's a balanced
16 approach. Because to the extent we were to need to come
17 in, we could. If we were overearning, the Commission
18 could bring us in. So the GBRA doesn't really change
19 that balance.

20 **Q.** Well, my question assumed that there is no
21 GBRA. In that situation the company could, if it
22 believed the circumstances warranted, could file a base
23 rate request and time it to coincide with the in-service
24 date of the unit, would it not?

25 **A.** In the absence of a GBRA, that would be the

1 company's only alternative.

2 Q. And in that circumstance the, assuming that
3 the in-service date of the unit warranted a base rate
4 increase, the company would see the simultaneous impact
5 of the fuel savings and the recognition of the cost of
6 the unit; correct?

7 A. I'm sorry. Repeat that.

8 Q. Where the base rate proceeding is structured
9 in time to end at the same time the in-service date,
10 there would be an identity of points in time during
11 which, at which the company recognized the revenue
12 requirements, recognized the costs associated with
13 owning that unit, and the customers began to receive the
14 fuel benefits. It is possible to structure that in the
15 absence of a GBRA.

16 A. I think it's possible. But one thing that we
17 know for certain is the GBRA exactly coincides the
18 timing of the unit going into service, the step up in
19 base rates, the fuel savings that would become
20 immediately apparent to, to customers. We don't have
21 any certainty around when we'd be able to get that base
22 rate recovery in the absence of a GBRA. So the nice
23 thing about the GBRA is not only does it provide for the
24 instantaneous, you know, symmetrical treatment of base
25 and fuel, but it also, as we've said before, gives the

1 protection to the customer of -- if we were able to
2 bring the unit in for a cheaper price than we had
3 identified in the need determination, clearly the
4 customer deserves those savings and they get those
5 savings. So it's, it's kind of elegant in its
6 simplicity, if you will, in that it times it exactly
7 right.

8 Q. I believe you said you began your tenure with
9 Florida Power & Light Company in 2007; is that correct?

10 A. Actually that's, I began with the company back
11 in 1982 as a child, and most recently I joined FPL in
12 2007 after having served a brief stint at FPL Energy at
13 the time, NextEra Energy now.

14 Q. Well, then you may be familiar with the fact
15 that since the last full-blown revenue requirements
16 case, over time FPL has added power plants to its system
17 without seeking a change in base rates and without
18 having something like the GBRA in effect; are you aware
19 of that?

20 MR. BUTLER: Object to the form of the
21 question. Assumes facts not in evidence.

22 MR. McGLOTHLIN: As a matter of fact, our
23 witness Sheree Brown testifies that over time FPL has
24 added power plants to its system, reflected them in its
25 rate base, and has not sought a base rate increase

1 associated with those power plants.

2 **MR. BUTLER:** Let her testify, let her testify
3 to that then. That's certainly not a fact in evidence
4 at the moment.

5 **MR. MCGLOTHLIN:** Well, it's, it will be
6 testified to, and I'm asking the witness to assume for
7 the purposes of the question that that's the case.

8 **COMMISSIONER EDGAR:** Ms. Helton?

9 **MS. HELTON:** Madam Chairman, I have to confess
10 I heard the discussion between the two counsel but I did
11 not hear the question. I was looking at something else.

12 **COMMISSIONER EDGAR:** Mr. McGlothlin, could you
13 restate the question?

14 **MR. MCGLOTHLIN:** Well, let me try it this way.

15 **BY MR. MCGLOTHLIN:**

16 **Q.** If you know, Mr. Barrett, over time has FPL
17 added power plants to its system, incurred those costs
18 without seeking an adjustment in base rates at the time?

19 **A.** I don't know the specifics of each of our rate
20 requests and what, what they assumed or didn't assume
21 about the addition of power plants.

22 **Q.** Do you know whether Florida Power & Light
23 Company has added power plants to its system since the
24 last fully litigated base rate request?

25 **A.** Yes.

1 **Q.** I want to ask you several questions in the
2 area of depreciation.

3 **MR. BUTLER:** Madam Chairman, I would --

4 **COMMISSIONER EDGAR:** Yes, Mr. Butler.

5 **MR. BUTLER:** We've had this discussion before
6 regarding Mr. Wright's questions. If it's something
7 that goes to the level and topics regarding depreciation
8 that Mr. Barrett covers in his testimony, I have no
9 objection to it. But the earlier questioning got pretty
10 far afield of that, and we have three witnesses who all
11 cover the subject in a lot more detail than Mr. Barrett.
12 So I just as a prefatory matter ask that we try to keep
13 those questions limited to the aspects of it that
14 Mr. Barrett addresses.

15 **COMMISSIONER EDGAR:** Okay. And,
16 Mr. McGlothlin, just as I said to Mr. Wright, and would
17 ask that you keep in mind that we do have other
18 witnesses that I believe have been put forth on the
19 issue of depreciation, more specifics, and keep that in
20 mind and let's see where it takes us.

21 **MR. MCGLOTHLIN:** Let me just comment that
22 Mr. Barrett discusses at some length what he calls the
23 depreciation changes driver beginning at Page 23, and
24 breaks down the \$266 million into his component parts,
25 and with respect to the direct testimony is one of the

1 principal witnesses on the subject. So certainly I
2 intend to keep my questions within what he's capable of
3 answering. But he's the Vice President of Finance, he's
4 talking about depreciation as it relates to the rate
5 case, and I would hope that if he knows the answer to
6 the question, he would say so.

7 **COMMISSIONER EDGAR:** Let's ask the questions.

8 **MR. McGLOTHLIN:** Okay.

9 **BY MR. McGLOTHLIN:**

10 **Q.** Please turn to Page 23 of your prefiled
11 testimony, Mr. Barrett.

12 **A.** I'm there.

13 **Q.** You begin discussing what you call the
14 depreciation changes driver, which is listed above the,
15 at Line 11 as \$266 million. And with respect to the
16 component parts at Page 24, you say, "\$52 million
17 represents the revenue requirement in 2010 associated
18 with the cumulative effect on the net plant-in-service
19 balance of the depreciation credits taken in 2006
20 through 2009." Correct?

21 **A.** Correct.

22 **Q.** And then you say, "Lastly, \$89 million
23 reflects the revenue requirement of changes to
24 depreciation expense, including the impact on rate base
25 that results in new rates and other changes delineated

1 in the comprehensive depreciation study."

2 My first question to you is this. In the
3 \$266 million have you included the items that are
4 designated as capital recovery amounts in the
5 depreciation study?

6 A. I don't believe so.

7 Q. Are you familiar with the fact that in the
8 depreciation study being sponsored in this case the
9 analyst identifies some \$314 million of undepreciated
10 costs of such items as meters being retired, components
11 of nuclear uprate projects being retired and components
12 of the Riviera and Cape Canaveral power plant being
13 retired in conjunction with the improvements going on
14 there?

15 A. I've not reviewed the study. No.

16 Q. You're not familiar with the recommendation
17 that some \$78 million annually be approved to represent
18 the collection of undepreciated amounts associated with
19 those early retirements?

20 A. I'm not familiar with the exact numbers. I'm
21 familiar with the concept, but not the numbers.

22 Q. Okay. So the \$266 million, to your knowledge,
23 does not include the amounts incorporated in that
24 capital recovery schedule?

25 A. To my knowledge, if it, if it may help, let me

1 explain the \$89 million.

2 Q. All right.

3 A. I think that's the subject that you're
4 speaking of. And, again, I'd want to, as I said
5 yesterday, I forget who I was addressing at the time,
6 but I wanted to put in context this driver analysis is
7 really intended to illustrate a kind of decomposition of
8 the billion-dollar rate request into some major
9 categories of drivers. And so some of this is more
10 indicative of the impacts of these items than the
11 precise calculations that are contained in other
12 testimony, for instance.

13 But the \$89 million essentially looks at the
14 2010 plant-in-service balances and the impact of the new
15 rates that we are proposing as part of the study versus
16 the current rates that are in existence right now. So
17 when you take the plant-in-service balances and the
18 different rates, calculate it all out, you get
19 \$89 million of revenue requirements. It's the change.

20 Q. I think you've given me the clarification I
21 was looking for. And if you're unfamiliar with the
22 capital recovery aspects, I'll defer those questions to
23 another witness.

24 Let's focus on the \$125 million of annual
25 credits to depreciation that the company has taken in

1 the four-year term of the settlement agreement. As I
2 understand it, one consequence of the \$125 million
3 credit depreciation is that it lowers the company's
4 overall expenses, therefore increasing its earned rate
5 of return; correct?

6 A. During the settlement period that is the case,
7 yes.

8 Q. That's my question.

9 A. Yes.

10 Q. Another consequence of implementing the
11 \$125 million annual credit to depreciation is that it
12 also lowers the provision for accumulated depreciation,
13 thereby increasing overall rate base; correct?

14 A. That is correct.

15 Q. And I think you indicated that the \$52 million
16 component of the 266 represents the revenue requirements
17 associated from having implemented that credit for the
18 four years; correct?

19 A. Correct. It's --

20 Q. 125 a year times four is \$500 million that was
21 added to rate base as a consequence of implementing the
22 provision.

23 A. That's correct.

24 Q. Now you're aware in general terms that the
25 company's analyst has identified a reserve surplus of

1 \$1.25 billion in his depreciation study; correct?

2 **A.** I'm not sure who you mean by the company
3 analyst.

4 **Q.** I'm talking about Mr. Clarke, your witness who
5 sponsors a depreciation study.

6 **A.** Okay. Yes. I'm familiar with that.

7 **Q.** And probably if you've been in the hearing
8 room, you're also familiar with the fact that OPC's
9 witness disputes the 1.25 billion and asserts that it's
10 more like \$2.7 billion.

11 **A.** I'm not familiar with that number.

12 **Q.** All right. Well, in any event, the company's
13 witness identifies a surplus of \$1.25 billion; correct?

14 **A.** Yes.

15 **Q.** And that's after the company has taken four
16 years of credits at \$125 million each; correct?

17 **A.** I'm not going to be able to go very far on
18 this, but as I understand it, that is the -- well, I
19 don't know at what point in time that 1.25 billion
20 represents.

21 **Q.** All right. But would you agree that but for
22 the decision of the company to implement those credits
23 for four years, the surplus would have been larger than
24 calculated by that \$500 million?

25 **A.** I don't know what all goes into the

1 theoretical surplus calculation.

2 Q. All right. I want to ask you a few questions
3 about the subsequent test year. Are you familiar with
4 the fact that in the past some Commissions have used
5 historic test years as the basis for setting new rates?

6 MR. BUTLER: I'm going to object to the form
7 of the question again, assuming facts not in evidence.
8 If he's got particular cases in mind or jurisdictions,
9 it would probably be more useful and perhaps provide
10 orders addressing those test years.

11 MR. McGLOTHLIN: My, my question is a general
12 one, and it asks whether he's aware of the fact that of
13 the test years that are available for use as a
14 ratemaking tool, among them is the use of historic
15 information.

16 BY MR. McGLOTHLIN:

17 Q. Are you aware of that, sir?

18 COMMISSIONER EDGAR: I'll allow.

19 THE WITNESS: I'm not aware of what goes on in
20 other jurisdictions, if that's your question.

21 BY MR. McGLOTHLIN:

22 Q. You don't know whether in ratemaking sometimes
23 regulators look to historic information to fashion a
24 test year?

25 MR. BUTLER: I'm sorry. Again, without any

1 indication of what regulators, where and when, I think
2 the question is extremely open-ended.

3 **COMMISSIONER EDGAR:** Mr. McGlothlin, a little
4 more specificity.

5 **BY MR. MCGLOTHLIN:**

6 **Q.** In the past has the Florida Commission used
7 historic information, to your knowledge?

8 **A.** I don't know.

9 **Q.** Okay. Would you agree that one criticism of
10 ratemaking in general has been the existence of what has
11 been called regulatory lag as it relates to the
12 disparity between the information used in setting rates
13 and the time period those rates are going to be
14 effective?

15 **MR. BUTLER:** I'm going to object again. There
16 is criticism? By whom and in what context?

17 **BY MR. MCGLOTHLIN:**

18 **Q.** Are you familiar with the term "regulatory
19 lag"?

20 **A.** I've heard the term.

21 **Q.** What do you understand it to be?

22 **A.** I understand it to be the time required to get
23 an increase in rates, the time it takes to implement an
24 increase in rates relative to when you actually need to
25 have those revenues. So it's the lag, meaning the time

1 from when you file for an increase to when you actually
2 receive an increase.

3 Q. Okay. Now in this case the company proposes
4 to have rates take effect on January 1st, 2010; correct?

5 A. That's correct.

6 Q. And the company is proposing to use the
7 projected period of January 1st through December 31st,
8 2010, for the purposes of establishing the data that
9 should be reviewed when fashioning those rates; correct?

10 A. That's correct.

11 Q. So would you agree that with the fully
12 projected test year of 2010 the Commission will have
13 eliminated regulatory lag as it relates to the point of
14 time when the rates will take effect?

15 A. I would agree that if rates go into effect
16 January 1 of 2010 based upon the test year of 2010, then
17 that would have eliminated the regulatory lag.

18 **MR. McGLOTHLIN:** Those are all my questions.

19 **COMMISSIONER EDGAR:** Thank you.

20 Are there other Intervenors who have not asked
21 questions on cross of this witness who intend to? And
22 I'm seeing, not hearing a response, so I'm going to take
23 that as a no.

24 Let me ask this of staff. Are there questions
25 on cross for this witness?

1 **MS. WILLIAMS:** Yes, we have some.

2 **COMMISSIONER EDGAR:** Okay. Approximately,
3 roughly how many or how long?

4 **MS. WILLIAMS:** Probably would go past 1:00, I
5 think.

6 **COMMISSIONER EDGAR:** All right. Then in that
7 case, let's go ahead and -- I was going to try to get
8 you off before lunch, but we're going to ask you to come
9 back.

10 And, Commissioners, staff and parties, I think
11 this is about time for a lunch break. I see it's
12 approximately 12:30ish. Commissioners, does 1:30,
13 1:45 -- 1:45 I think I'm seeing. So we are going to go
14 on lunch break. We will come back at 1:45 and pick up
15 with questions, questions on -- and I'm not done --
16 questions on cross for this witness from our staff.

17 Also on the lunch break, my understanding from
18 this morning is that there was going to be some more
19 discussion between all of the parties and our staff
20 about order of witnesses. If there are any other
21 questions that are still pending in anybody's mind,
22 please all get together at lunch and we will try to
23 address that when we come back.

24 Ms. Bennett?

25 **MS. BENNETT:** We need to collect the

1 confidential folders.

2 **COMMISSIONER EDGAR:** Yes, ma'am. Please come
3 get mine and all of the others too. And of course those
4 can be redistributed this afternoon should the need
5 arise.

6 Mr. Butler?

7 **MR. BUTLER:** Yes, Madam Chairman. We are
8 distributing at the moment, and we can certainly come
9 back and talk about it after the lunch break, but we do
10 have the schedule proposal sort of nailed down by
11 witness as you had requested earlier and are passing out
12 copies. I'd be happy to give the Commissioners copies.

13 **COMMISSIONER EDGAR:** Okay. You can go ahead
14 and pass those out. Please make sure that, I'm sure you
15 have, but get with our staff and we will take that up as
16 the first matter before the questions on cross when we
17 come back.

18 And we are on lunch break.

19 **MR. BUTLER:** Thank you.

20 (Recess taken.)

21 (Transcript continues in sequence with Volume
22 13.)

1 STATE OF FLORIDA)
 2 : CERTIFICATE OF REPORTER
 3 COUNTY OF LEON)

4 I, LINDA BOLES, RPR, CRR, Official Commission
 5 Reporter, do hereby certify that the foregoing
 6 proceeding was heard at the time and place herein
 7 stated.

8 IT IS FURTHER CERTIFIED that I
 9 stenographically reported the said proceedings; that the
 10 same has been transcribed under my direct supervision;
 11 and that this transcript constitutes a true
 12 transcription of my notes of said proceedings.

13 I FURTHER CERTIFY that I am not a relative,
 14 employee, attorney or counsel of any of the parties, nor
 15 am I a relative or employee of any of the parties'
 16 attorneys or counsel connected with the action, nor am I
 17 financially interested in the action.

18 DATED THIS 1st day of September,
 19 2009.
