PROCEEDINGS: HEARING

COMMISSIONERS PARTICIPATING: CHAIRMAN MATTHEW M. CARTER, II
COMMISSIONER LISA POLAK EDGAR
COMMISSIONER KATRINA J. McMURRIAN
COMMISSIONER NANCY ARGENZIANO
COMMISSIONER NATHAN A. SKOP

DATE: Tuesday, October 1, 2009

TIME: Commenced at 11:06 a.m.
Concluded at 3:12 p.m.

DOCUMENT NUMBER-DATE

10318 OCT 6 2009

FPSC-COMMISSION CLERK

1 PLACE: Betty Easley Conference Center

P R O C E E D I N G S

(Transcript follows in sequence from
Volume 28.)

Whereupon,

WILLIAM C. SLUSSER

was called as a witness on behalf of Progress Energy
Florida and, having been duly sworn, was examined and
testified as follows:

CONTINUED CROSS EXAMINATION

BY MR. SAYLER:

Q Okay. So also -- would it also -- would the
company also need something like identifying customers,
knowing which customers might be eligible for that new
commercial time of use rate, need to do the load
research data to make billing determinants and figure
out the impact on the customers? I may have used the
wrong terminology, but the company would need
information like that; is that correct?

A Yes. All that information would be required,
yes.

Q Okay. And does Progress currently have that
information necessary to develop a commercial -- a new
commercial time of use rate?

A It's my opinion that more research needs to be
done, more load research needs to be done.

1 Q But you don't have that right now, is that
2 correct?

3 A That's correct.

4 Q If you'll turn to page 17 of your rebuttal
5 testimony -- and these are my last three questions. On
6 line 6 through line 8, you state that "The determination
7 of credit amounts and payment structures is a matter
8 that should be addressed in the conservation docket."
9 Is that correct?

10 A Yes.

11 Q All right. And the term "conservation
12 docket," were you referring to the DSM numeric
13 conservation goals dockets?

14 A I'm not absolutely certain of the form. I
15 know annually the company is involved in a conservation
16 filing where it has to present its costs and establish a
17 cost recovery, and in that proceeding it makes sense
18 that, since credits are a cost, that they be reviewed
19 and established in that proceeding. If that's the goals
20 proceeding, if they're one and the same, I would say
21 yes.

22 Q Okay. But your testimony is you're not sure
23 exactly which docket this needs to go into, is that
24 correct?

25 A No, I'm not that familiar with the other

1 forums.

2 Q Okay. Why do you think that it is appropriate
3 to address the credits in something other than a base
4 rate case proceeding?

5 A Because the interruptible and curtailable rate
6 schedules are a demand-side management program. Just
7 like residential load management and other
8 general-service load management programs that the
9 company has, all those should be analyzed since the
10 credits are recovered in the conservation cost recovery
11 clause.

12 MR. SAYLER: Thank you very much. That is it
13 for staff's questions.

14 CHAIRMAN CARTER: Thank you. Commissioner
15 Skop.

16 COMMISSIONER SKOP: Thank you, Mr. Chairman.
17 Good morning, Mr. Slusser.

18 THE WITNESS: Good morning, Commissioner Skop.

19 COMMISSIONER SKOP: Just two brief followup
20 questions. If I could turn your attention back to what
21 I believe has been marked as Exhibit 317, and I think
22 it's the exhibit that Ms. Kaufman handed out.

23 THE WITNESS: Yes, I have it.

24 COMMISSIONER SKOP: And if I could ask you to
25 turn to page 1 of 4, please.

1 THE WITNESS: I have it.

2 COMMISSIONER SKOP: And the -- just to make
3 sure we're on the same page, the header for that
4 spreadsheet, if you will, is entitled "Progress Energy
5 Florida Proposed Class Revenue Allocation." Is that
6 correct?

7 THE WITNESS: Yes.

8 COMMISSIONER SKOP: Okay. Does this page
9 reflect the impact of implementing the 12 CP 50 AD
10 method on each of the respective rate classes?

11 THE WITNESS: Yes.

12 COMMISSIONER SKOP: Okay. So, just to be
13 clear, that is the 12 CP 50 AD and not another method?

14 THE WITNESS: Yes.

15 COMMISSIONER SKOP: All right. Thank you.

16 And just one followup question with respect to
17 what staff had just asked on time of use rates. If
18 Progress were to make subsequent modifications to the
19 time of use rates, in your opinion would it be
20 appropriate to benchmark on best practices, say perhaps
21 on Pacific Gas & Electric with respect to policies that
22 might encourage customers to transition to that but also
23 provide some protection in terms of rate shock?

24 THE WITNESS: I would think so; yes, sir.

25 COMMISSIONER SKOP: All right. Thank you.

1 CHAIRMAN CARTER: Anything further from the
2 bench? Redirect?

3 REDIRECT EXAMINATION

4 BY MR. MELSON:

5 Q Just a couple, Mr. Chairman.

6 Mr. Slusser, could you turn back to your
7 exhibit WCS-7 for just a moment.

8 A I have it.

9 Q Mr. Brew asked you a couple of questions about
10 Florida energy policy. Let me ask you this: Does your
11 exhibit WCS-7 suggest that the company in fact should
12 build peaking units to meet all demand?

13 A Absolutely not.

14 Q And we walked -- after Mr. Brew's cross -- I
15 understand the mathematics of this exhibit, but I think
16 we saw the trees instead of the forest. Could you tell
17 me what this exhibit is intended to show?

18 A Yes, sir. The exhibit is intended to show
19 that the support for the 12 CP and 50 percent AD method
20 is that, if the emphasis was strictly on the need for
21 capacity, then the company's capacity would effectively
22 be nothing more than the least-cost type of capacity,
23 and that being a peaker, a combustion turbine, and, of
24 course, if the company did have to serve the energy from
25 a combustion turbine, it would be very expensive, and

1 that's what's shown on line 9 of the exhibit.

2 Because the company does recognize energy in
3 its facility plans and especially all the off-peak
4 energy, the company has built something other than an
5 all CT system. It's built a lot of baseload capacity,
6 and as a result of what it's built, the fuel cost is
7 considerably less. It averages only \$53 a megawatt hour
8 as opposed to incurring the cost of peaking capacity at
9 \$152 a megawatt hour.

10 So simply by the additional cost that the
11 company is incurring for its baseload units and that
12 additional cost is being allocated in the company's
13 cost-to-service study on an energy basis and is being
14 compared with a theoretical savings by the fuel that the
15 baseload units that have constructed have realized on
16 the -- on the Progress Energy electric system, there are
17 substantial savings by the company actually building its
18 fleet of more efficient generation. And this shows that
19 the benefit-to-cost ratio ends up actually being a very
20 high number, a 9.9 to 1 benefit-to-cost ratio. So the
21 exhibit is intended to show that it's been a --
22 obviously a very good economic decision to build much
23 more expensive capacity for the benefits of realizing
24 fuel savings on the system. The customers benefit from
25 the fuel savings on an energy basis. So to match up

1 with the way it's benefitted, the costs should be
2 allocated on an energy basis, and that's all I'm trying
3 to do with this exhibit.

4 MR. SAYLER: That's all we have.

5 CHAIRMAN CARTER: Okay. Exhibits?

6 MR. MELSON: Move Exhibits 250 through 254.

7 CHAIRMAN CARTER: Are there any objections?

8 Without objection, show it done, Exhibits 250
9 through 254.

10 (Exhibit Nos. 250, 251, 253 and 254 entered
11 into the record.)

12 CHAIRMAN CARTER: Let's go to the back pages.
13 Ms. Kaufman your recognized for 317.

14 MS. KAUFMAN: I would move 317.

15 CHAIRMAN CARTER: Are there any objections?
16 Without objection, show it done.

17 (Exhibit No. 317 entered into the record.)

18 CHAIRMAN CARTER: Staff, you're recognized for
19 Exhibit 318.

20 MR. SAYLER: We move 318.

21 CHAIRMAN CARTER: Are there any objections?

22 MR. BREW: No objection.

23 CHAIRMAN CARTER: And, Mr. Brew, I did check
24 in there and they did have those parts crossed out that
25 you mentioned.

1 MR. BREW: Yes, thank you, and I appreciate
2 the cooperation from staff in revising the proposed
3 exhibit.

4 CHAIRMAN CARTER: Thank you. So, show it
5 entered.

6 (Exhibit No. 318 entered into the record.)

7 CHAIRMAN CARTER: Okay. Anything further for
8 this witness?

9 MR. SAYLER: No, Mr. Chairman.

10 CHAIRMAN CARTER: Mr. Slusser, you may be
11 excused.

12 Mr. Brew, you're recognized. I think this was
13 your last witness; is that right? You're recognized,
14 sir.

15 MR. BREW: I don't have anything to add. It's
16 just -- it's been a fun three weeks.

17 CHAIRMAN CARTER: Okay. Well, we want to say
18 thank you very much for coming, and also you have
19 conducted yourself with impeccable professionalism and
20 high honor and integrity. It's been an honor and
21 privilege to have you with us at the Florida Public
22 Service Commission.

23 MR. BREW: Thank you, sir. That's high
24 praise. I appreciate it.

25 MR. MELSON: And, Mr. Chairman, let the record

1 reflect, we've only been a week and a half.

2 CHAIRMAN CARTER: Commissioners, we need to
3 give Chris an opportunity to get the electronics fixed,
4 and we'll take a -- we're going to give Chris ten
5 minutes, so we'll come back at :25 after. We're in
6 recess.

7 (Recess.)

8 CHAIRMAN CARTER: We are back on the record,
9 and when we last left, we had finished with Witness
10 Slusser.

11 Mr. Walls, you're recognized.

12 MR. WALLS: Progress Energy calls Tom Sullivan
13 on rebuttal. He was here on direct, so he's still under
14 oath.

15 CHAIRMAN CARTER: Okay.

16 Whereupon,

17 THOMAS R. SULLIVAN
18 was called as a witness on behalf of Progress Energy
19 Florida and, having been duly sworn, was examined and
20 testified as follows:

21 DIRECT EXAMINATION

22 BY MR. WALLS:

23 Q Mr. Sullivan, have you filed prefiled rebuttal
24 testimony and exhibits in this proceeding?

25 A Yes, I have.

1 Q Do you have your prefiled rebuttal testimony
2 and exhibits with you?

3 A Yes, I do.

4 Q Do you have any changes to make to your
5 prefiled rebuttal testimony?

6 A I have one correction to the testimony. It is
7 on an MFR schedule. It's located on page 24, line 21,
8 the schedule referred to as D-2, and that should be D-3.

9 With that correction, that is all that I have.

10 Q With that correction, if I asked you the same
11 questions in your prefiled rebuttal testimony today,
12 would you give the same answers?

13 A Yes, I would.

14 MR. WALLS: We request that Mr. Sullivan's
15 prefiled rebuttal testimony be entered into the record
16 as if it was read here today.

17 CHAIRMAN CARTER: The prefiled testimony of
18 the witness will be inserted into the record as though
19 read.

20

21

22

23

24

25

REBUTTAL TESTIMONY OF
THOMAS R. SULLIVAN

1 **I. Introduction and Purpose of Rebuttal Testimony.**

2 **Q. Mr. Sullivan, did you file direct testimony in this proceeding?**

3 **A.** Yes, I did.

4
5 **Q. What was the purpose of your direct testimony?**

6 **A.** The purpose of my direct testimony was to address Progress Energy Florida, Inc.'s
7 ("PEF's" or the "Company's") capital structure and its requirements to ensure that it
8 maintains continuous access to capital markets to obtain capital at a reasonable cost
9 when that capital is needed to meet our customers' energy needs.

10
11 **Q. Have any of the intervenor witnesses addressed PEF's capital structure or other**
12 **issues that would impact the Company's ability to maintain continuous access to**
13 **the capital markets at reasonable costs?**

14 **A.** Yes, they have. Dr. Woolridge, Mr. Lawton and Mr. Schultz, on behalf of the Office
15 of Public Counsel ("OPC"), and Mr. Pollack, on behalf of the Florida Industrial
16 Power Users Group ("FIPUG"), have all filed testimony related to either capital
17 structure or other issues, such as return on equity or cost of debt, that impact the
18 Company's financial position and its ability to maintain access to the capital markets
19 at reasonable costs.

20

1 **Q. Have you read their testimony?**

2 A. Yes, I have.

3

4 **Q. What is your understanding of the intervenors' recommendations regarding**
5 **PEF's capital structure and cost of capital, as well as their assessment of the**
6 **impact of those recommendations on the Company's credit rating and financial**
7 **health?**

8 A. Dr. Woolridge and Mr. Pollack disagree with the Company's capital structure,
9 recommending a common equity ratio of 50%. Dr. Woolridge also recommends a
10 cost of equity of 9.75%, a short-term debt cost rate of 3.06% and a long-term debt
11 cost rate of 6.05%. All of the intervenors believe that their recommendations,
12 including the pre-tax cash flow impact of the \$149 million adjustment to the
13 depreciation reserve and the total \$35 million reduction in base rates, would not
14 negatively impact the Company's credit rating or its ability to access the capital
15 markets at reasonable costs.

16

17 **Q. Did any intervenors question the positions in your direct testimony regarding**
18 **the importance of the Company strengthening its financial profile or achieving a**
19 **consistent target credit rating of mid-single A?**

20 A. No, they did not.

21

1 **Q. Do you agree with the intervenors' recommended adjustments to PEF's**
2 **proposed return on equity, capital structure and cost of debt, and the associated**
3 **impact of those adjustments on PEF's credit rating and financial health?**

4 A. No, I do not. In the testimony that follows, I will describe why I disagree with the
5 intervenors' recommended adjustments to PEF's cash flow, return on equity
6 ("ROE"), capital structure and cost of debt. Most importantly, I will discuss how the
7 adjustments would negatively impact the Company's ability to maintain and improve
8 its financial strength. This, in turn, would limit the Company's ability to access
9 capital in order to provide reliable energy for its customers at a reasonable cost. The
10 intervenors' recommended changes would represent a material change from the
11 historically constructive regulatory environment in Florida, and would be viewed
12 negatively by the financial markets. It is critical for PEF to maintain a strong
13 financial position while meeting the growing needs of its customer base and increased
14 environmental compliance, including the reduction of carbon emissions with the
15 planned construction of nuclear generation. I believe the successful implementation
16 of PEF's plans to achieve these goals will require the return on equity and cost of debt
17 capital we originally requested, along with a strong capital structure. Without these,
18 both the Company and its customers will be adversely impacted.

19
20 **Q. How is your testimony organized?**

21 A, First, I will address the cost of equity recommendation of Dr. Woolridge and its
22 potential impact on the Company if adopted. I will then address the overall
23 implications of the intervenors' combined recommendations on cash flow, and how

1 they would hurt the financial position of the Company and negatively impact
2 customers. I will then address the intervenors' recommendations regarding capital
3 structure, their assertions regarding PPAs, and their recommendations for the cost of
4 short-term and long-term debt.

5
6 **Q. Do you have any exhibits to your rebuttal testimony?**

7 **A.** Yes. I have the following exhibits to my rebuttal testimony:

- 8 • Exhibit No. __ (TRS-13), Moody's Report "Industry Outlook: U.S. Investor-
9 Owned Electric Utilities," January 2009;
- 10 • Exhibit No. __ (TRS-14), Fitch's Report "U.S. Utilities, Power and Gas 2009
11 Outlook," December 2008;
- 12 • Exhibit No. __ (TRS-15), Moody's Report "Rating Methodology: Regulated
13 Electric and Gas Utilities," August 2009;
- 14 • Exhibit No. __ (TRS-16), Fitch's Report "EEI 2008 Wrap-Up: Cost of Capital
15 Rising," November 2008;
- 16 • Exhibit No. __ (TRS-17), Standard & Poor's ("S&P") Report "Credit FAQ:
17 Top 10 Investor Questions for the U.S. Electric Utility Sector in 2009,"
18 January 2009;
- 19 • Exhibit No. __ (TRS-18), Moody's Credit Opinion: Progress Energy Florida,
20 Inc., June 2009;
- 21 • Exhibit No. __ (TRS-19), PEF 2010 Adjusted Credit Metrics Chart;
- 22 • Exhibit No. __ (TRS-20), "The A Rating," by Steven M. Fetter, Electric
23 Perspectives, May/June 2009;

- 1 • Exhibit No. __ (TRS-21), Moody's Report "Special Comment: New Nuclear
- 2 Generation: Ratings Pressure Increasing," June 2009;
- 3 • Exhibit No. __ (TRS-22), Fitch's Report "U.S. Electric and Gas Financial Peer
- 4 Study," June 2009;
- 5 • Exhibit No. __ (TRS-23), S&P's Report "Request for Comments: Imputing
- 6 Debt To Purchased Power Obligations," November 2006;
- 7 • Exhibit No. __ (TRS-24), S&P Ratings Direct – Florida Power Corp. d/b/a
- 8 Progress Energy Florida, Inc. credit report, June 2009;
- 9 • Exhibit No. __ (TRS-25), S&P Ratings Direct – Florida Power Corp. d/b/a
- 10 Progress Energy Florida, Inc. credit report, May 2008; and
- 11 • Exhibit No. __ (TRS-26), Composite Exhibit of Forward 3-month London
- 12 Interbank Offered Rate ("LIBOR") and 10-year and 30-year Treasury Note
- 13 and Bond Forecasts.

14 These exhibits were either prepared by me or at my direction or they are industry
15 information that I regularly obtain and review as part of my responsibilities as the
16 Treasurer for PEF. They are true and correct.

17
18 **II. Cost of Equity.**

19 **Q. Do you believe Dr. Woolridge's recommended ROE of 9.75% is appropriate for**
20 **PEF?**

21 A. No, I do not. The Company hired a well regarded witness, Dr. James A. Vander
22 Weide, to recommend the appropriate return on equity for PEF. I have read and
23 support Dr. Vander Weide's recommendation of a 12.54% ROE and believe it should

1 be adopted by the Commission. Dr. Vander Weide will address the more technical
2 aspects of Dr. Woolridge's recommendation, but I will address the overall
3 reasonableness of the recommendation and its potential impact on the Company.
4

5 **Q. Is Dr. Woolridge's recommended ROE consistent with other utilities in the**
6 **southeast?**

7 A. No, it is not. Tampa Electric was recently awarded a return on equity of 11.25% in
8 2009 by the Commission. When compared to Tampa Electric, PEF has additional
9 risk factors including a much larger generating fleet that includes nuclear operating
10 risk with our Crystal River Unit 3 ("CR3") nuclear power plant. In addition, PEF is
11 moving forward with the construction of new nuclear power plants, and other large
12 capital expenditure projects which significantly increase PEF's risk profile over
13 Tampa Electric's and nearly every other electric utility's risk profile within the state.
14 These additional risk factors translate into a higher cost of capital, which supports
15 PEF's request for a higher return on equity than that awarded to Tampa Electric. In
16 their June 2009 credit opinion for PEF, Moody's stated that the FPSC's decision in
17 Tampa Electric's rate case "affirmed Moody's view that the regulatory environment
18 for electric utilities in Florida has remained relatively supportive" (Exhibit No.
19 __ (TRS-18) to my rebuttal testimony). Providing PEF a lower return on equity than
20 that awarded to Tampa Electric would be viewed as inconsistent and negative by the
21 rating agencies and financial community and begin to raise doubts as to the regulatory
22 climate in the state of Florida.

1 Dr. Woolridge's recommended ROE is also below other authorized ROEs for
2 utilities in the southeastern United States, including Alabama Power (13.75%),
3 Georgia Power (11.25%), Gulf Power (12.0%) and Progress Energy Carolinas, Inc.
4 (12.75%). In addition, the Commission issued an order last year recognizing a 11%
5 ROE for Florida Public Utility Company, which is a distribution only utility. These
6 are all companies that compete with PEF for investor dollars needed to provide
7 reliable electric service and fund capital expenditure plans at reasonable costs.
8

9 **Q. What would be the implications to PEF if Dr. Woolridge's recommended ROE**
10 **of 9.75% were adopted?**

11 A. The ROE recommended by Dr. Woolridge would be a significant change from the
12 historically supportive regulatory environment in Florida. The financial markets view
13 this supportive regulatory environment as a critical element of the relationship
14 between utilities, regulators and customers. In their January 2009 report titled
15 "Industry Outlook: U.S. Investor-Owned Electric Utilities," Moody's states the
16 following:

17 "We continue to incorporate a view that individual state regulatory authorities
18 will provide reasonably timely recovery of prudently incurred costs and
19 investments. Moreover, we continue to believe that regulators prefer to
20 otherwise regulate financially healthy companies. This relationship often
21 creates a virtuous cycle, where financially healthy utilities have the balance
22 sheet strength and liquidity to assure investment, maintain high levels of

1 reliability and attract economic development. In turn, this tends to facilitate
2 contentment among consumers, legislators and regulators.”

3 See Exhibit No. ___ (TRS-13) to my rebuttal testimony. Dr. Woolridge’s proposed
4 cost of equity would put PEF at a significant disadvantage in its competition for
5 capital with other companies with similar risk profiles and would not be adequate to
6 maintain access to capital markets at reasonable prices. When competing for capital
7 with the southeastern utilities with higher allowed ROEs referenced above, PEF
8 would be viewed as a less attractive investment. Investors would not invest in a
9 company earning a lower ROE when they could invest in other companies of similar
10 risk and earn a higher ROE.

11 PEF’s operating cash flow would also be reduced, hurting investor confidence
12 and likely resulting in a credit rating downgrade. The Company’s ability to raise the
13 capital necessary to meet customer needs would be hurt, and the cost of that capital
14 would be higher. This position was summarized by Fitch in their December 2008
15 report titled “U.S. Utilities, Power and Gas 2009 Outlook” (Exhibit No. ___(TRS-14)
16 to my rebuttal testimony):

17 “All else equal, utilities operating in more balanced regulatory jurisdictions
18 providing high-quality customer service are more likely to earn reasonable
19 returns on investment and achieve higher creditworthiness. Conversely,
20 utilities with suboptimal regulatory outcomes are more likely to experience
21 lower relative returns, higher financing costs and relatively anemic credit
22 profiles.”

1 Lower credit ratings would also jeopardize the Company's ability to reduce
2 fuel cost volatility through hedging, as the Company might not meet minimum credit
3 standards required by counterparties. Access to capital required for immediate
4 service restoration following storms could also be impacted by lower credit ratings.
5 All of these negative ramifications from adopting the recommended ROE would
6 severely impact the Company's ability to serve its customers effectively and would
7 ultimately result in higher rates.

8
9 **Q. Why do you believe the adoption of Dr. Woolridge's recommended ROE would**
10 **likely result in lower credit ratings?**

11 A. The regulatory framework and financial performance of a company are critical to the
12 assessment of a utility's credit quality by the rating agencies. In their ratings
13 assessment process, Moody's, for example, focuses on four key rating factors that are
14 central to the assignment of ratings for companies in the regulated electric and gas
15 utilities sector: (1) regulatory framework; (2) ability to recover costs and earn
16 returns; (3) diversification; and (4) financial strength, liquidity and key financial
17 metrics. The process is outlined in the Moody's report "Rating Methodology:
18 Regulated Electric and Gas Utilities" issued in August 2009. See Exhibit No.
19 ____ (TRS-15) to my rebuttal testimony. The adoption of Dr. Woolridge's
20 recommended ROE would hurt PEF's position in the first, second and fourth criteria
21 listed above.

22 Fitch also places emphasis on the regulatory framework in determining credit
23 quality. In their November 2008 report titled "EEI 2008 Wrap-Up: Cost of Capital

1 Rising” (Exhibit No. ____ (TRS-16) to my rebuttal testimony), Fitch states the
2 following:

3 “Jurisdictional regulatory practices promise to be a key element in
4 determining the ultimate impact on issuer creditworthiness given the sharp
5 increase in the cost of capital as a result of the ongoing financial crisis.
6 Utilities in states that have authorized reasonable returns on equity and
7 adopted balanced regulatory mechanisms, including forward test years and
8 automatic fuel and other tariff adjustment mechanisms are more likely to
9 come through this period of stress without undue deterioration to current
10 creditworthiness.”

11 Fitch further emphasized this position in their December 2008 report titled “U.S.
12 Utilities, Power and Gas 2009 Outlook” (Exhibit No. ____ (TRS-14) to my rebuttal
13 testimony), stating:

14 “Average authorized returns on equity (ROE) for the regulated utility sector
15 are currently in the 10.25% to 10.5% range, with some jurisdictions
16 approaching 9%. Fitch is concerned that absent a meaningful up-tick in
17 authorized ROE, the industry may have difficulty attracting adequate capital
18 to fund new reliability, infrastructure and renewable energy projects in light of
19 the significant change in capital market conditions and investor
20 expectations...[The] ratings of utilities operating in states with relatively low
21 authorized ROEs and significant regulatory lag are more likely to suffer credit
22 deterioration.”

1 While each rating agency uses a different methodology, they would all view the
2 adoption of Dr. Woolridge's recommended ROE as very unsupportive to the overall
3 financial health of PEF and would likely result in a rating downgrade.

4
5 **III. Importance of Cash Flow to PEF's Financial Health.**

6 **Q. Mr. Lawton identifies the net impact from his adjustment to the depreciation**
7 **reserve as a reduction of the Company's pre-tax cash flow of about \$149 million**
8 **per year for four years. He maintains that PEF will maintain its "financial**
9 **integrity" after correcting for the excess depreciation reserve. Do you agree**
10 **with his assertion?**

11 A. No, I do not. Mr. Lawton clearly states that his adjustment will result in lower cash
12 from operations for the Company, a key component of the credit rating evaluation
13 process. Cash flow is emphasized by S&P in their January 2009 report titled "Top 10
14 Investor Questions For The U.S. Electric Utilities Sector In 2009" (Exhibit No.
15 ___(TRS-17) to my rebuttal testimony), where they state that "[those] companies that
16 fare poorly in the regulatory arena and experience significant deterioration in cash
17 flow metrics and creeping debt leverage are most vulnerable to downward actions."
18 Mr. Lawton then goes on to state that "the Company's cash flow ratios decline
19 slightly, but remain well above industry averages," and that PEF "maintains financial
20 integrity after correcting for the excess depreciation." (Lawton Test., p. 19).

21 I have several concerns with Mr. Lawton's conclusions. First, Mr. Lawton
22 references the financial ratio medians by bond rating category in his Exhibit DJL-5, p.
23 2 of 2. Since no source is provided for this data, I cannot be sure if the financial

1 ratios are provided on an unadjusted basis, or if they include adjustments made by the
2 credit rating agencies. In any event, a comparison to industry medians is not the best
3 comparison, as the rating agencies give specific guidance and target metric ranges
4 that will more directly determine PEF's credit rating.

5 Mr. Lawton then references the ratios calculated in Exhibit DJL-5, p. 1 of 2,
6 as evidence of PEF maintaining financial integrity after correcting for the excess
7 depreciation. I have several issues with the ratios he calculates in this exhibit. First,
8 the ratios are calculated based on the capital structure supplied by the Company on
9 MFR Schedule D-1a, p. 1 of 3. This capital structure is the jurisdictional capital
10 structure used for ratemaking purposes. The credit rating agencies calculate their
11 metrics starting with the book capital structure for the entire company. Second, he
12 includes only long-term debt in the metrics, while the rating agencies look at total
13 debt (long-term and short-term). Third, the calculations are not made using the
14 methodology or adjustments of the credit rating agencies for items such as capital
15 leases, operating leases, PPAs, and pension liabilities. As such, the metrics are not
16 comparable to the target ranges shown in his column C. Finally, Mr. Lawton states
17 that financial ratios such as "debt ratio" are unaffected by the correction of the excess
18 reserve. This is not possible, as his recommended correction to the excess reserve
19 would result in lower cash from operations and thus higher financing needs. Finally,
20 the interest expense of \$189 million used in Mr. Lawton's calculation is grossly
21 understated. S&P used adjusted interest expense of \$295.7 million in its PEF credit
22 metric calculations for 2008, and interest expense will be higher in 2010.

1 In addition to these calculation errors, Mr. Lawton states on page 20 that his
2 “analysis focuses solely on the excess depreciation reserve impact and demonstrates
3 that the cash flow reduction allows Progress to maintain solid financial metrics.”

4 This analysis is incorrect, as one must look at the *total of all the adjustments* proposed
5 by the intervenors and those adjustments’ impact on cash flow metrics, not individual
6 adjustments in isolation. In short, neither the metric calculations nor comparisons
7 referenced by Mr. Lawton allow any conclusions to be drawn regarding the financial
8 integrity of PEF.

9
10 **Q. The testimony of Mr. Schultz indicates that rates should be reduced by at least**
11 **\$35.038 million. This rate reduction, as calculated on Schedule A-1 of his**
12 **testimony, uses the capital structure, return on equity and cost of debt**
13 **recommended by Dr. Woolridge. Does Mr. Lawton capture all of the**
14 **consequences the adoption of the proposed rate reduction would bring about?**

15 **A. No, he does not. His calculations incorrectly assume that there would be no negative**
16 consequences to the cost of capital for the Company if the rate decrease were
17 adopted. As discussed above, Moody’s specifically focuses on four key rating factors
18 that are central to the assignment of ratings for utilities in their credit assessment
19 process: (1) regulatory framework; (2) ability to recover costs and earn returns; (3)
20 diversification; and (4) financial strength, liquidity and key financial metrics. The
21 process is outlined in the Moody’s report “Rating Methodology: Regulated Electric
22 and Gas Utilities” issued in August 2009 (Exhibit No. __ (TRS-15) to my rebuttal

1 testimony). The primary financial metrics utilized by Moody's, along with guidelines
 2 for an "A" rating, are as follows:

<u>Financial Metric</u>	<u>Guidelines for "A" Rating</u>
(CFO ⁽¹⁾ pre-WC ⁽²⁾ + Interest) / Interest	4.5x – 6.0x
CFO pre-WC / Debt	22% – 30%
(CFO pre-WC – Dividends) / Debt	17% – 25%
Debt / Capitalization	35% – 45%

3 ⁽¹⁾ CFO = Cash from Operations

4 ⁽²⁾ WC = Working Capital

5 The credit metric guidelines for our target credit rating reflect all of the standard
 6 adjustments normally incorporated by Moody's when analyzing financial statements.

7 In their June 2009 credit opinion for PEF, Moody's said the following
 8 regarding what could cause a credit rating downgrade for PEF:

9 "A downgrade could be considered if there is an adverse change in the
 10 regulatory environment in Florida which could limit full and timely recovery
 11 of costs, especially the cost of new nuclear generation; a continued increase in
 12 leverage; new, unanticipated capital expenditure requirements; if financial
 13 metrics do not recover from 2008 levels and CFO before working capital plus
 14 interest to interest remains below 4.0x; and CFO before working capital to
 15 debt remains below 20% for a sustained period."

16 See Exhibit No. __ (TRS-18) to my rebuttal testimony. Exhibit No. __ (TRS-19) to
 17 my rebuttal testimony shows the key 2010 cash flow credit metrics for PEF calculated

1 using both S&P's and Moody's methodologies. The metrics are provided based on
2 PEF's proposed rate increase and Mr. Schultz's proposed rate decrease. The
3 calculations clearly show that PEF does not meet the standards specifically set forth
4 by Moody's in their credit opinion for the Company if Mr. Schultz's
5 recommendations were adopted. Thus, my conclusion is that PEF's credit rating
6 would likely be downgraded. The metrics based on PEF's proposed rate increase are
7 in line with the ranges for an A rating. As discussed above, no intervenor questioned
8 the importance of PEF strengthening its financial profile or achieving a consistent
9 target credit rating of mid-single A, and yet their recommendations would likely
10 result in a credit rating downgrade. This would result in a higher cost of capital,
11 which would ultimately increase rates for customers.

12 The importance of a strong credit rating was summarized by Steve Fetter,
13 president of Regulation Un-Fettered, former chairman of the Michigan PSC, and
14 former head of the global power group at Fitch Ratings in his May/June 2009 article
15 titled "The A Rating" (Exhibit No. __ (TRS-20) to my rebuttal testimony):

16 "Perhaps we have returned to a time when it would be in the interest of both
17 companies and regulators to work in concert to support credit profiles for
18 regulated electric utilities (optimally in the A category), for the good of both
19 consumers and investors...The bottom line is that electric utilities must collect
20 sufficient cash flow through rates to maintain strong credit ratings. This is
21 especially true for companies needing to proceed with major generation
22 construction, notwithstanding the negative economic environment. S&P has
23 highlighted cash flow as the single most critical aspect of all credit rating

1 decisions. And liquidity is the lifeblood of day-to-day utility management
2 flexibility.”

3 The intervenors’ rate reduction proposal would accomplish just the opposite: reduced
4 cash flows, weaker credit ratings, and a weaker balance sheet; all during one of the
5 strictest capital markets and at a time when the Company is embarking upon one of
6 the largest capital programs in its history and needs access to the lowest possible cost
7 of capital.

8
9 **Q. Do you believe the overall recommendation of the \$35 million rate decrease,**
10 **which includes the adoption of Dr. Woolridge’s recommended ROE, could**
11 **impact PEF’s plans to construct new nuclear plants?**

12 A. Yes, I do. In their June 2009 report titled “New Nuclear Generation: Ratings
13 Pressure Increasing,” Moody’s states the following:

14 “From a credit perspective, companies that pursue new nuclear generation will
15 take on a higher business and operating risk profile, pressuring credit ratings
16 over the intermediate- to long-term. Even so, we also believe companies will
17 ultimately revise their corporate-finance policies to begin materially
18 strengthening balance sheets and bolstering available liquidity capacity at the
19 start of the construction cycle.....In general, we believe a company should
20 prepare for the higher risk associated with construction by maintaining, if not
21 strengthening, its balance sheet, and by maintaining robust levels of liquidity
22 capacity.”

1 See Exhibit No. __ (TRS-21) to my rebuttal testimony. Clearly, the recommendation
2 of a \$35 million rate reduction does not help PEF strengthen its financial position.
3 Given that the rating agencies and the financial community require sound financial
4 management and a strong financial position before entering the construction cycle for
5 new nuclear plants, our plans could certainly be in jeopardy if the recommendation is
6 adopted.

7
8 **IV. Capital Structure.**

9 **Q. Dr. Woolridge asserts that the Company's capital structure with a common
10 equity ratio of 53.9% is high relative to (1) the Company's actual historic capital
11 structure and (2) the capital structures of other electric utilities (page 5). Do you
12 agree with these assertions?**

13 **A.** No, I do not. Dr. Woolridge's comparisons are not correct, as he is comparing an
14 adjusted equity ratio to book equity ratios. In addition, PEF's 2008 book equity ratio
15 was low due to timing differences associated with fuel cost recovery and fuel
16 hedging, leading to higher debt at PEF before those costs are recovered from
17 customers. In the comparison to the capital structure of other utilities, Dr. Woolridge
18 chose a peer group of other electric utilities that represents both operating companies
19 and parent companies, leading to unfair comparisons. The June 2009 Fitch report
20 entitled "U.S. Electric and Gas Financial Peer Study" stated that "the business risk
21 profiles of utility parent companies remain widely disparate, which often accounts for
22 the rating discrepancy among companies with similar ratios" (Exhibit No. _____

1 (TRS-22) to my rebuttal testimony). Neither comparison made by Dr. Woolridge
2 supports his assertion that PEF's requested capital structure is high.

3
4 **Q. On page 18 of his direct testimony, Dr. Woolridge references the capitalization**
5 **ratios for Progress Energy over the past three years and states that "these ratios**
6 **also show that Progress Energy finances its other businesses and operations with**
7 **more debt than PEF." Do you agree with this conclusion?**

8 A. No, I do not. Progress Energy has divested of all of its material non-regulated
9 operations, leaving Progress Energy Carolinas (PEC) and Progress Energy, Inc. (the
10 holding company) as the key remaining entities other than PEF. PEC ended 2008
11 with a book common equity ratio (GAAP) of over 54% and has thus been funded
12 with less debt than PEF. As described above, the primary reason for Progress
13 Energy's common equity ratio being lower than PEF's is the debt at the parent
14 (Progress Energy, Inc.) that remains from the acquisition of Florida Progress
15 Corporation.

16
17 **Q. Do you agree with Dr. Woolridge's recommended capital structure, with a**
18 **common equity ratio of 50%?**

19 A. No, I do not. PEF's credit ratings are determined based a capital structure with
20 imputed debt, which Dr. Woolridge ignores. A strong balance sheet is critical for
21 PEF. S&P stated the importance of balance sheet strength in its January 2009 report
22 "Credit FAQ: Top 10 Investor Questions For The U.S. Electric Utility Sector in
23 2009," saying:

1 "The electric utility industry is asset-intensive and relies heavily on debt.
2 Balance-sheet strength is a distinguishing factor when Standard & Poor's
3 assesses financial risk and determines credit quality. Our analysis attempts to
4 portray the economic reality of the financial conditions and considers several
5 items, including purchase power obligations, capital leases, hybrid equity
6 instruments, pension liabilities, and regulatory assets."

7 See Exhibit No. __ (TRS-17) to my rebuttal testimony. As this quote demonstrates,
8 looking at PEF's capital structure on an adjusted basis is critical.

9 To correct one point, on page 21 of his testimony, Dr. Woolridge states that
10 PEF's "real" recommended common equity ratio, on a jurisdictional basis, is 47.51%
11 based on investor provided capital. His calculation of this "real" recommended
12 common equity ratio does not properly account for the 75.95% jurisdictional factor of
13 the equity adjustment for PPAs. The correct ratio should be 49.2% on a jurisdictional
14 basis, not 47.51%.

15
16 **Q. Do you agree with Mr. Pollack's assertion that a 50% common equity ratio is**
17 **sufficient to maintain PEF's current bond rating?**

18 A. No, I do not. In order to determine the impact on PEF's bond rating, the adjustments
19 made by the credit rating agencies (such as imputed debt for PPAs) are a financial
20 reality for PEF and must be considered. In addition, a number of factors are used to
21 determine PEF's credit rating, not just its capital structure. As described above, all of
22 the intervenors' recommendations should be considered together to determine the
23 impact on PEF's credit rating. In this case, the recommendations do not allow PEF to

1 maintain sufficient credit metrics to support its current rating and would likely result
2 in a credit rating downgrade.

3
4 **V. Financial Impact of PPAs.**

5 **Q. How do the rating agencies treat long-term power supply contracts and what is**
6 **the impact of their treatment of the PPAs on the Company?**

7 A. As I explained in my direct testimony, while there are differences in methods, each
8 rating agency views PPAs, with their long-term obligations, as essentially debt-like in
9 nature. The main effect of the impact of this treatment of PPAs on PEF's financial
10 structure is that the Company is considered to have more leverage than if you
11 calculated its leverage ratio based only on the debt recorded on its balance sheet.

12
13 **Q. Dr. Woolridge identified S&P's lack of guidance on the risk factor (page 60) as a**
14 **flaw in the PPA equity adjustment. Similarly, Mr. Pollack states that S&P does**
15 **not provide an objective standard for determining the appropriate risk factor**
16 **for PPAs. Should there be any question regarding the risk factor S&P applies to**
17 **PEF's PPAs?**

18 A. No, there should be no question regarding the risk factor S&P applies to PEF's PPAs.
19 In their November 2006 article entitled "Request For Comments: Imputing Debt To
20 Purchased Power Obligations" (Exhibit No. ___ (TRS-23) to my rebuttal testimony),
21 S&P states the following:

22 "In those instances where recovery of PPA-related capacity costs is
23 guaranteed by a legislative mechanism, the level of the risk factor will be

1 determined by the timeliness provided by the legislative true-up mechanism.

2 The strength of the mechanism can result in risk factors as low as 0% because
3 legislatively prescribed recovery mechanisms are viewed as providing utilities
4 with a greater level of protection than that provided by regulatory orders.”

5 PEF’s recovery of PPAs is not prescribed by legislation. Therefore, S&P does not
6 use a 0% risk factor when imputing debt for PEF’s PPAs. S&P’s report goes on to
7 say:

8 “To date, where PPA capacity costs were recovered through a fuel adjustment
9 clause (FAC), as compared with base rate recovery, a risk factor of 30% has
10 generally been used...Based on the effectiveness of FAC mechanisms, we
11 will adjust modestly the risk factor of 30% down to 25%.”

12 Based on our discussions with S&P, a 25% risk factor is used for PEF’s PPA
13 adjustment.

14 Table 3 on Page 6 of the S&P credit opinion for PEF dated June 15, 2009
15 shows that PEF’s book debt for 2008 was increased by \$696.3 million for PPAs. See
16 Exhibit No. __ (TRS-24) to my rebuttal testimony. Similarly, for 2007, S&P made a
17 debt adjustment of \$780.3 million for PPAs. See Exhibit No. __ (TRS-25) to my
18 rebuttal testimony. The 2007 and 2008 adjustments are in line with the \$711 million
19 adjustment shown by the Company for 2010. Dr. Woolridge and Mr. Pollack
20 reference general guidance published by S&P, but it cannot be disputed that S&P
21 makes a significant debt adjustment at PEF for PPAs.
22

1 **Q. Dr. Woolridge also points out that S&P's adjustments for PPAs are not GAAP**
2 **accounting, and that PPA payments are unlike debt from a regulatory**
3 **perspective (page 61). Do you agree with these points, and should they impact**
4 **the imputed equity adjustment you have requested?**

5 A. While I agree that S&P's adjustments for PPAs are not GAAP accounting, I do not
6 agree that this impacts the Company's request for the imputed equity adjustment.
7 The treatment of PPAs as debt by the rating agencies has a material impact on PEF's
8 credit profile and potentially its cost of capital. For 2008, S&P increased PEF's book
9 debt by \$696.3 million and interest expense by \$40.0 million for the effect of PPAs.
10 The effect of off-balance sheet obligations like PPAs on a utility's capital structure
11 has also been recognized by the Florida Public Service Commission, as outlined on
12 pages 20 and 21 of my direct testimony. The points raised by Dr. Woolridge should
13 have no impact on the imputed equity adjustment.

14
15 **Q. Mr. Pollack states that "it seems unlikely that the debt [associated with PPAs]**
16 **will be imputed [by Moody's] to PEF based on the cost recovery mechanisms**
17 **applicable to purchased power capacity costs." Is this true?**

18 A. No, this is not true. While Moody's does not make an explicit adjustment for PPAs
19 like S&P, they do make adjustments for capital and operating leases. Many PPAs are
20 classified as capital or operating leases under GAAP. Thus, Moody's does impute
21 debt for PEF's PPAs that are classified as capital or operating leases. For example, in
22 2008 Moody's did not make a direct PPA adjustment, but did adjust 2008 book debt
23 by \$245 million for operating leases. Likewise, S&P made an operating lease

1 adjustment of \$28.7 million for PEF in 2008. This was in addition to the \$696.3
2 million adjustment for PPAs. The higher operating lease adjustment by Moody's
3 compared to S&P was driven by PPAs treated as operating leases by the Company.
4 The operating lease adjustment by S&P specifically excludes PPAs treated as
5 operating leases, as the debt is imputed through the PPA adjustment. Thus, both
6 rating agencies adjusted PEF's book debt for PPAs, although their methodologies are
7 different.

8
9 **Q. Do you agree that the PPA adjustment should be removed?**

10 A. No, I do not. All three rating agencies consider off-balance sheet obligations when
11 assessing a company's credit quality. While each has different methodologies for the
12 treatment of PPAs, each rating agency looks at PPAs when assessing PEF's credit
13 quality. It is important for PEF to obtain a consistent target credit rating from all
14 three rating agencies. As such, we focus on the most restrictive methodology for PPA
15 treatment, which is S&P's.

16
17 **VI. Cost of Debt.**

18 **Q. Has your view in interest rates changed since you prepared the forecast**
19 **supporting PEF's rate request?**

20 A. The financial markets and interest rates continue to be extremely volatile. While
21 government intervention has led to recent historically low rates, the general consensus
22 is that the cost of capital will increase in the future. S&P stated in its January 2009
23 report "Credit FAQ: Top 10 Investor Questions For The U.S. Electric Utility Sector

1 In 2009,” that “regulators’ willingness to recognize the higher cost of capital through
2 overall returns is important for credit quality.” See Exhibit No. __ (TRS-17) to my
3 rebuttal testimony.

4 Our methodology for forecasting interest rates is based on observing market
5 forward curves for LIBOR and U.S. Treasuries and expected credit spreads. While
6 the mix of these elements has changed over the past year, we believe that the rates
7 included in our rate request are still reasonable for 2010.

8
9 **Q. Do you agree with Dr. Woolridge’s recommended short-term debt cost rate of
10 3.06%?**

11 **A.** No, I do not. Dr. Woolridge bases his short-term debt cost rate on spreads above the
12 average three-month LIBOR rate for 2009 of 1.0%. Although this average is more
13 than double the current three-month LIBOR rate, it does not properly capture future
14 expectations for increases in three-month LIBOR. As shown in Exhibit No. __ (TRS-
15 26) to my rebuttal testimony, three-month LIBOR is expected to be approximately
16 1.25% by the middle of 2010 and over 2.0% in December of 2010.

17 In addition, Dr. Woolridge’s recommended short-term debt cost rate of 3.06%
18 includes 0.21% for fees associated with the Company’s credit facility. These fees are
19 fixed for 2010 as long as PEF’s senior unsecured credit rating is not downgraded.
20 The 0.21% fee used by Dr. Woolridge is incorrectly based on 2009 amounts, as
21 reflected on page 2 of MFR Schedule D-2. For the 2010 test year, the correct fee
22 adjustment is 0.75%, as reflected on page 1 of MFR Schedule D-2. Thus, Dr.
23 Woolridge’s recommended short-term debt cost rate is understated by 0.54% for the

1 credit facility cost, as well as the understatement based on market expectations for
2 increases in three-month LIBOR in 2010.

3
4 **Q. Do you agree with Dr. Woolridge's recommended long-term debt cost rate of**
5 **6.05%?**

6 A. No, I do not. The relevant long-term debt cost rate for this discussion is the long-term
7 debt cost rate for 2010, the test year. Dr. Woolridge has chosen to use the overall
8 embedded long-term debt cost rate for 2009 as the long-term debt cost rate for 2010,
9 which does not properly reflect the long-term debt activity that will take place in
10 2010. PEF currently has a \$300 million first mortgage bond outstanding with an
11 interest rate of 4.50% that matures on June 1, 2010. In order for the 2010 long-term
12 debt cost rate to remain at the 2009 embedded level of 6.05%, the \$750 million new
13 bond required in 2010 would have to be issued at a rate of 4.30%, assuming all other
14 assumptions are held constant. This rate is well below the current yields Dr.
15 Woolridge references for 10-year, A and BBB+ rated utility bonds of 5.19% and
16 5.60%, respectively (page 24).

17 In addition, Dr. Woolridge states that "a projected yield of 6.98% [PEF's
18 assumed rate on the new \$750 million bond on page 1 of MFR Schedule D-4a] is not
19 reflective of current market interest rates" (page 24). PEF's projected yield is a
20 reflection of expected *future* market interest rates, not current interest rates. His
21 statement does not consider the fact that the yields on ten-year and thirty-year U.S.
22 Treasury notes/bonds are expected to increase in the future, to well over 4.0% and

1 5.0%, respectively, in 2010. Please see Exhibit No. __ (TRS-26) to my rebuttal
2 testimony.

3 In addition, PEF has historically issued a mix of 10- and 30-year bonds. The
4 assumed interest rate for the new 2010 issuance was intended to reflect the potential
5 for a blend of 10-year notes and 30-year bonds. The 30-year bond would have a
6 higher interest rate than the 10-year bond. Using only today's 10-year rates as a
7 proxy for rates in the future leads to unrealistically low new debt issuance cost
8 assumptions for 2010.

9
10 **Q. Have you addressed the principle arguments raised by the intervenors that**
11 **challenge the Company's proposed capital structure and the impact of their**
12 **recommended return on equity and cost of debt on the Company's financial**
13 **health?**

14 A. Yes, I believe that I have. To the extent that I have not addressed some further
15 argument to the contrary, however, the Company does not agree with it but rejects it
16 for all the reasons that I have provided in my direct and rebuttal testimony.

17
18 **Q. In conclusion, could you please summarize your conclusions regarding the**
19 **impact of the intervenors' recommendations on the Company's financial health**
20 **and credit rating?**

21 A. As I stated in my original direct testimony, it is important for PEF to strengthen its
22 credit profile and achieve a consistent target credit rating of mid-single A. No
23 intervenor witness disputed these positions. Their recommendations regarding the

1 cost of capital and capital structure, however, would not allow PEF to achieve these
2 goals. If their recommendations were adopted, the change in the tone of the Florida
3 regulatory environment and the resulting implications on the Company's cash flow
4 and credit metrics would likely result in a credit rating downgrade, which in turn
5 would jeopardize the Company's ability to serve its customers effectively and would
6 ultimately result in higher rates.

7
8 **Q. Does this conclude your testimony?**

9 **A. Yes, it does.**

10

1 BY MR. WALLS:

2 Q And, Mr. Sullivan, do you have a summary of
3 your prefiled rebuttal testimony?

4 A Yes, I do.

5 Q And will you please provide that summary to
6 the Commission?

7 A Yes. Good day, Commissioners.

8 My rebuttal testimony addresses issues raised
9 by the Intervenor witnesses Dr. Woolridge, Mr. Lawton,
10 Mr. Schultz and Mr. Pollock. Each of these witnesses
11 have filed testimony with recommendations that, if
12 implemented, would adversely impact the company's
13 financial position, jeopardize the company's current
14 credit rating and its ability to meet customer needs.

15 These Intervenors recommend adjustment to
16 PEF's cash flow, return on equity, capital structure and
17 cost of debt. The adjustments would negatively impact
18 the company's ability to maintain, much less improve
19 it's credit and financial profile. This in turn would
20 limit the company's ability to access the capital
21 markets in order to provide reliable energy for its
22 customers at a reasonable cost.

23 Furthermore, if implemented by the Commission,
24 the Intervenors' recommended changes would represent a
25 material departure from the historically constructive

1 regulatory environment in Florida and would be viewed
2 negatively by the financial markets.

3 Mr. Lawton's claim that the proposed
4 adjustment to the depreciation reserve would not
5 adversely affect the company is incorrect. Even he
6 acknowledges his adjustment would result in an immediate
7 reduction in cash flow, but the impact is worse than he
8 states because of the calculation errors in his
9 analysis, and he ignores the overall impact of the
10 Intervenors' proposed \$35-million rate reduction. The
11 rate reduction proposal suggested by the Intervenors
12 would result in, number one, reduced cash flow; number
13 two, weaker credit metrics; and, three, an overall
14 weaker balance sheet.

15 It is important for PEF to achieve and
16 maintain it's target rating of mid-single A. No
17 Intervenor witness disputes this position; however,
18 their recommendations regarding the cost of capital and
19 capital structure would not allow PEF to achieve this
20 goal.

21 If their recommendations were adopted, the
22 change in the tone of the Florida regulatory environment
23 and the resulting implications on the company's cash
24 flow and credit metrics would likely result in a credit
25 rating downgrade. This in turn would jeopardize the

1 company's ability to support the investment necessary to
2 meet customer energy needs now and in the future.

3 Before I close, I would like to reiterate a
4 statement introduced by Mr. Glenn earlier in this
5 proceeding, and this is from a Fitch Rating Service note
6 on September 8th of 2009. It states as follows: "PEF's
7 stable rate outlook assumes that the outcome of the base
8 rate and Levy filings will result in improvement in cash
9 flow and credit metrics at PEF in 2010. On the other
10 hand, if regulatory decisions are adverse, Fitch would
11 expect to take negative rating action."

12 This concludes my summary and I'm happy to
13 answer any questions.

14 MR. WALLS: We tender Mr. Sullivan for cross.

15 CHAIRMAN CARTER: Thank you. Mr. Rehwinkel,
16 you're recognized.

17 CROSS EXAMINATION

18 BY MR. REHWINKEL:

19 Q Thank you, Mr. Chairman.

20 Good morning, Mr. Sullivan.

21 A Good morning.

22 Q The statement you just read from Fitch uses
23 the word "adverse," is that correct?

24 A Let me go back and review it.

25 Yes, the word "adverse" was used by Fitch.

1 Q Okay. Does the document say what adverse
2 means?

3 A No, it does not define adverse.

4 Q You've asked for a half-a-billion-dollar rate
5 increase, correct?

6 A That is correct.

7 Q If the Commission grants -- and I see that the
8 exact number is four-hundred-ninety-nine million nine
9 ninety-seven, right?

10 A I'll take your word for it.

11 Q 997,000.

12 Okay. If the Commission knocks \$997,000 off
13 your request, would that be considered adverse by Fitch?

14 A My testimony is that we required the ask that
15 we've made. I cannot answer what Fitch will do or not
16 do.

17 Q Okay. Does the document that you read say
18 what Fitch will do?

19 A Yes, it does.

20 Q Does it say what Fitch will do if the
21 Commission gives you all but \$997,000 of your request?

22 A No, it does not.

23 Q Would a \$997,000 reduction to your request be
24 considered adverse by Fitch?

25 A I can't judge what Fitch will assume is

1 adverse or not.

2 Q Okay. So is it your testimony here today that
3 you really can't tell this Commission what Fitch means
4 by the use of the word adverse?

5 A My testimony is that we require the ask that
6 we've -- or the request that we've asked for, and Fitch
7 has said that any adverse change will cause a
8 potential -- an increased potential for a ratings
9 downgrade.

10 Q So the answer to my question is no, you cannot
11 testify to the Commission what they mean by adverse?

12 A That's what I said.

13 Q Okay. Now, you said change, but doesn't it
14 say adverse decision?

15 A I'm sorry. I don't get your question.

16 Q I thought the word after "adverse" and what
17 you read was "decision."

18 A As -- let me read it back to you, if you don't
19 have it in front of you. The last sentence, "On the
20 other hand, if regulatory decisions are adverse, Fitch
21 would expect to take negative rating action."

22 Q Okay. So the word decision was in front of
23 adverse, right?

24 A I just read you the statement.

25 Q Okay. I want to talk to you or ask you some

1 questions about the PPA adjustment that's at issue here.
2 Would you object if I referred to the -- well, on page
3 22 of your rebuttal testimony, could you turn to line --
4 to that page on line 9?

5 A I am there.

6 Q Okay. There's \$696.3 million number there, is
7 that correct?

8 A Yes, it is.

9 Q Would it be correct to refer to that as phony
10 debt?

11 A Excuse me.

12 Q Would it be correct to refer to that as phony
13 debt?

14 A No. I believe the technical term is imputed
15 debt, not phony debt.

16 Q Is it real debt?

17 A It is imputed debt.

18 Q Well, my question is is it real?

19 A It's real to the S&P rating agency.

20 Q Is it real to your books?

21 A It is real to our rating.

22 Q Is it real to your books?

23 A No, it is not.

24 Q Okay. And you have a number of interest
25 expense of \$40 million on that line, is that correct?

1 A That is correct.

2 Q Is that phony interest expense?

3 A That is again imputed, so it is not book.

4 Q Okay. So it's not real on your books?

5 A I said it is imputed, not book. I didn't say
6 whether it was real or not.

7 Q Okay. Do you have MFR Schedule D, the D
8 schedules with you?

9 A I'm sorry, my MFR?

10 Q Yeah, the D schedules, do you have your D
11 schedules? I want to look at D-1-A. Do you have that
12 one?

13 A I do not think I that I do here have all of my
14 exhibits.

15 Q Well, if it's -- with your permission, Mr.
16 Chairman, I will just hand him my copy of D-1-A.

17 CHAIRMAN CARTER: You may approach.

18 THE WITNESS: Thank you.

19 BY MR. REHWINKEL:

20 Q Is D-1-A, Mr. Toomey --

21 A Mr. Sullivan.

22 Q I'm sorry. It's been a while. This is day
23 nine, I think; isn't it?

24 A Yes, sir; it's been a while.

25 Q I'm sorry, Mr. Sullivan.

1 Have you had a chance to look at D-1-A? Are
2 you familiar with that document?

3 A Yes, I am.

4 Q Is that the capital structure that the company
5 is submitting for purposes of the Commission setting
6 rates in this docket?

7 A Yes, it is.

8 Q Are the S&P imputed debt dollars included in
9 that capital structure?

10 A Yes. Under the specific adjustment column, if
11 you follow that adjustment all the way over, it
12 incorporates that into the capital structure.

13 Q Is that adjustment that you referred to, is
14 that for equity or for debt?

15 A It is to compensate for the increase in debt
16 that S&P imputes due to the PPA contracts.

17 Q Okay. So the \$696 million that is referred to
18 on line 9 on page 22 of your rebuttal testimony, are
19 those dollars included in the long-term debt figures
20 that are on D-1-A?

21 A No, they're not because, as we discussed
22 earlier, they are imputed, not book.

23 Q Okay. Where does the interest expense that
24 you refer to on line 9, page 22 -- where does that show
25 up in the ratemaking calculation?

1 A I believe that would show up as just the
2 imputed interest expense on the imputed debt.

3 Q Okay. Is there any income tax effect or
4 benefit to the company for that interest?

5 A Not that I'm aware of.

6 Q So interest expense normally represents a cost
7 in the capital structure but a tax benefit in the income
8 statement, is that correct?

9 A If it is on the books, that's correct, and we
10 have established that it is not on the books.

11 Q Okay. On pages 21 and 22 of your rebuttal
12 testimony you -- this is where you -- well, actually on
13 page 22, this is where -- let me strike that and
14 start -- pages 20 through 22 is where you address Dr.
15 Woolridge's testimony with respect to PPAs in rebuttal,
16 is that correct?

17 A That's correct.

18 Q And on page 22, lines 10 through 13, you
19 reference in rebuttal your direct testimony on pages 20
20 and 21; is that right?

21 A I have.

22 Q Do you have your direct with you?

23 A My direct?

24 Q Yes, sir.

25 A No, I just have my rebuttal.

1 MR. REHWINKEL: Mr. Chairman, with your
2 permission, I'd like to --

3 CHAIRMAN CARTER: You may approach.

4 MR. REHWINKEL: -- approach the witness and
5 hand him a copy of his direct testimony.

6 BY MR. REHWINKEL:

7 Q And could I ask you to look on page 21 of your
8 direct testimony starting on lines 18 through the end of
9 that page, through page 3 of the next page.

10 A Line 3 the next page, is that --

11 Q Yes, sir.

12 A At the bottom of page 21?

13 Q Yeah, the bottom of page 21 through the top of
14 page 22. There in your direct testimony you state that
15 both the Public Service Commission, the Florida Public
16 Service Commission and Standard & Poors have given
17 recognition to PPAs; is that correct?

18 A Yes, that's correct.

19 Q Now, specifically you cite the 2005
20 stipulation; correct?

21 A Yes, that's correct.

22 Q Do you have a copy of that stipulation with
23 you?

24 A No, I do not.

25 Q I have a copy of it, and it is --

1 CHAIRMAN CARTER: Do you need a moment, Mr.
2 Rehwinkel?

3 MR. REHWINKEL: Mr. Chairman, I think I've got
4 what I need. It's Exhibit 129 in the hearing already.
5 It is attached to Mr. Slusser's testimony, and I had it
6 in front of me and I lost it. Oh, here it is.

7 With your permission, if I could approach the
8 witness --

9 CHAIRMAN CARTER: You may proceed.

10 BY MR. REHWINKEL:

11 Q -- and hand him Exhibit 129. Do you recognize
12 Exhibit 129, Mr. Sullivan?

13 A This is the first time I've seen it.

14 Q Well, you reference an order in your direct
15 testimony on page --

16 A Right. Well, this is -- I'm familiar with the
17 order, but this is the first time I've seen the
18 document.

19 Q Yes, sir. That's a fair answer.

20 Could I ask you to turn, please -- that --
21 what I've asked you to look at is the order that you
22 reference in your direct testimony, correct?

23 A Yes.

24 Q Could I ask you -- now specifically you cite
25 that order, the 2005 stipulation order, and that order,

1 just for the record, is PSC-05-0945-S-EI. Is that
2 correct? Is that what it says?

3 A Yes.

4 Q Okay. And you cite that order and a
5 non-ratemaking order for the Public Service
6 Commission's -- what you claim is their recognition of
7 the PPAs, correct?

8 A Yes, and that was based upon the approval of
9 the stipulation.

10 Q Okay. Now in your testimony you don't mention
11 that there's a Tampa Electric Company order that's even
12 more recent, in fact, a 2009 order that rejected Tampa
13 Electric Company's request for a PPA, do you?

14 A Yes. I'm not sure if the timing of that --
15 what the timing of that decision was with our respective
16 testimony, but I am aware of that decision, yes.

17 Q Okay. That order was filed on -- well,
18 there's an April 30th order PSC-09-0283-FOF-EI. Does
19 that ring a bell?

20 A If it's something I referenced in the
21 testimony, yes. Otherwise I can't identify it.

22 Q Okay. If I represented to you that the TECO
23 order was issued on April 30th, would you -- are you
24 suggesting that, since you filed your testimony on March
25 20th, that this came after your testimony and that's

1 why --

2 A My point was I just was not sure what the
3 timing of that decision was relative to our filing.

4 Q Okay. Fair.

5 Can I get you to turn to page 21 of Exhibit
6 129?

7 A Which --

8 Q Which is the stipulation, the 2005
9 stipulation.

10 A I'm sorry. What page, please?

11 Q Page 21, and that would be also page 13 of the
12 attached stipulation. Do you see that?

13 A It's Attachment A I believe at the top.

14 Q Yes, sir.

15 A Yes, I have that.

16 Q And in paragraph 13, would you review that
17 paragraph, and I wanted to ask you a couple of questions
18 about it.

19 A I have read it.

20 Q Now, would you agree with me that this
21 paragraph 13 on page 21 of Exhibit 129 is the source of
22 your statement and your testimony on direct that you
23 cite on rebuttal that the Commission has given
24 recognition to PPA?

25 A Yes, that's correct, and that's based upon

1 their approval of the stipulation.

2 Q Okay. Can you read to me -- I've circled or
3 outlined, if you will, in highlighter a sentence that
4 starts, "The parties agree." Do you see that?

5 A Yes.

6 Q Could you read that sentence?

7 A "The parties agree that the common equity
8 adjustment set forth in this section is unique to the
9 specific circumstances of PEF as it relates to this
10 agreement, and the treatment of PEF's common equity in
11 this section shall not constitute binding Commission
12 precedent in any future proceeding. PEF's adjusted
13 equity ratio will be capped at 57.83 percent."

14 Q Okay. Thank you.

15 Do you have Dr. Woolridge's testimony with
16 you?

17 A Yes, I do.

18 Q I can relieve you of that clutter, those two
19 large documents on your desk.

20 CHAIRMAN CARTER: You may do so now.

21 THE WITNESS: You have one more.

22 CHAIRMAN CARTER: Mr. Rehwinkel.

23 THE WITNESS: One more.

24 CHAIRMAN CARTER: You may proceed.

25 BY MR. REHWINKEL:

1 Q Thank you.

2 You do not disagree with Dr. Woolridge on page
3 59 of his testimony on lines 21 through 22?

4 A I'm sorry?

5 Q Oh, I'm sorry, page 59.

6 A I'm there.

7 Q On lines 21 through 22, you do not disagree,
8 do you, with his testimony where he states, "However,
9 S&P does not indicate how the risk factor that ranges
10 from zero percent to 100 percent is determined," do you?

11 A I don't believe they in their public
12 literature do, but based upon our direct conversations
13 with them, we do understand the risk system that they
14 use.

15 Q Okay. I'll come back to that, but I want to
16 ask you if you could turn to page 61 of Dr. Woolridge's
17 direct testimony.

18 A I'm there.

19 Q Now, in your rebuttal testimony, you have not
20 provided any rebuttal to Dr. Woolridge where he states
21 on page 61, lines 9 through 12, "In a regulatory
22 setting, a utility is given the," quote, "'opportunity
23 to earn,'" close quote, "its cost of debt as well as its
24 overall cost of capital through the ratemaking process.
25 Given the many uncertainties associated with revenues

1 and expenses between rate cases, there is no guarantee
2 that the overall cost of debt can be earned." You don't
3 disagree with that, do you?

4 A No, I don't.

5 Q And you have not rebutted that, correct?

6 A I have not.

7 Q PEF has never had any PPA costs disallowed,
8 have they?

9 A Not to my knowledge, and that would stem from
10 the time of the merger to the current.

11 Q Okay.

12 A I think it is important, as I discussed last
13 week and I think it was even in our discussion, that we
14 have made efforts to go to S&P to educate them about the
15 tightness, if you will, of the contracts and therefore
16 how they should look at them at a lower risk rating, but
17 as I mentioned, we've been unsuccessful with that.

18 Q In your -- on page 21 of your rebuttal, line
19 5, you state, "PEF's recovery of PPAs is not prescribed
20 by legislation," is that right?

21 A Yes, in the state of Florida, that's my
22 understanding.

23 Q Are you saying when you say that, that the
24 Florida Legislature has not given its approval to the
25 Commission's practice of allowing PPA recovery?

1 A No, I'm not saying that. This is an S&P
2 requirement, and they cite states such as New Jersey and
3 so forth that have specific legislation associated with
4 these contracts as opposed to Commission rules.

5 Q You only testify, do you not, that S&P's
6 determination criteria that is publicly available as
7 applied to PEF's PPA situation yields a number that is
8 not zero; correct?

9 A That's correct.

10 Q And essentially on lines 12 and 13 of your
11 rebuttal testimony on page 21, you confirm Dr.
12 Woolridge's testimony that PPA does not disclose its
13 criteria when you state, "Based on our discussions with
14 S&P, a 25-percent risk factor is used for PEF's PPA
15 adjustment," correct?

16 A The 25 percent is the factor that's used by
17 S&P.

18 Q And by stating this the way you did, you're
19 saying that they do not publicly disclose how they came
20 up with that number; correct?

21 A Yes. As I said, they've disclosed
22 methodologies, they've disclosed ranges; however, this
23 is one thing within the PPA adjustment that they have
24 not published publicly.

25 Q Okay. And you did -- there is no witness from

1 Standard & Poors here that we can cross-examine on how
2 they came up with the 25-percent number?

3 A No, there is not.

4 Q Yet, the Florida Public Service Commission is
5 being asked to grant \$24 million -- 24.7 I think it
6 is -- million dollars of the rate increase request based
7 solely on this secret methodology of Standard & Poors,
8 correct?

9 A I wouldn't call it a secret methodology. I
10 would say that it's not fully vetted, but it is
11 certainly developed over the last few years to be much
12 more transparent than it was in the past.

13 Q Okay. But your testimony here today is that,
14 between zero and 25, we don't know how Standard & Poors
15 came up with that number; correct?

16 A Well, between zero and 100 would be the full
17 range. Our contracts get assigned 25 percent, which is
18 the lowest risk rating.

19 Q Well, the reason I asked that question that
20 way is you testified that, because of this
21 non-prescribed-by-legislation criteria, that the number
22 has to be greater than zero; correct?

23 A Per the S&P guidelines, yes.

24 Q Per their guidelines. And they stopped at
25 25 percent on the continuum to 100 percent?

1 A No. It's zero to 100 percent.

2 Q But they came up with 25 percent?

3 A They valued ours at a 25-percent risk, yes.

4 Q And we have no testimony in the record as to
5 how that number was generated, correct?

6 A How the 25 percent was arrived at?

7 Q Yes.

8 A No. That's S&P's decision.

9 Q So we don't know -- we know -- it's kind of
10 interesting, isn't it, that, 24.7, if you round it up a
11 little bit, that's \$25 million; right?

12 A Yes.

13 Q So every percentage point from zero to 25 is a
14 million dollars of revenue requirements, correct?

15 A If that's what the math works out to be, I
16 would agree.

17 Q So what the Commission doesn't know is why
18 they didn't stop at one percent or two percent or
19 three percent or five percent or seven percent; correct?

20 A Right, that's because their ranges are in
21 25-percent increments.

22 Q So it is true, is it not, that, since they
23 don't know how that number was derived at, that it is a
24 secret to them, them being the Public Service
25 Commission; correct?

1 A Well, it isn't a secret now that I've told
2 them what it is.

3 Q No. How they arrived at that number is a
4 secret, isn't it?

5 A How S&P arrived at that number?

6 Q Yes.

7 A Obviously they have some basis for that, but
8 you'd have to ask them.

9 Q Okay. But my yes-or-no question is, it is a
10 secret, isn't it?

11 A It's not a secret to me.

12 Q I'm asking if you it is a secret to the Public
13 Service Commission?

14 A I don't know.

15 Q Well, let's do this -- I'm not going to stop
16 with this line of questioning --

17 A That's okay.

18 Q -- because you've got to answer the question
19 yes or no.

20 A That's fine.

21 Q You're asking for \$25 million associated with
22 this adjustment, and there's nowhere in your testimony
23 or in the filing of the company MFRs or the testimony
24 that discloses how that number was derived; correct?

25 A Correct.

1 Q Okay. Now, from a ratemaking standpoint, if
2 they have to have information to make a decision and it
3 is not provided to them because it is -- there is a
4 party out there that is unwilling to disclose it, it is
5 a secret; isn't it?

6 A As you define it that way, I'll agree.

7 Q Okay. I was going to ask you, are you
8 familiar with your annual report that the company files?

9 A Yes.

10 Q I don't know that I really need to go through
11 the rigmarole of handing this out to you.

12 You don't disclose -- on your data that you
13 file with the SEC, your financial statements, you don't
14 have in your debt instruments there -- you don't list
15 this PPA adjustment, correct?

16 A No. Those are listed in the footnotes.

17 Q But they're not included in your capital
18 structure on your balance sheet, correct?

19 A Of course, because they're not on the books.
20 We've established that.

21 MR. REHWINKEL: All right. That's all the
22 questions I have. Thank you.

23 CHAIRMAN CARTER: Thank you, Mr. Rehwinkel.

24 Mr. Moyle, good morning. You're recognized,
25 sir.

BY MR. MOYLE:

Q Good morning. Thank you, Mr. Chairman.

Mr. Sullivan, good morning, John Moyle on behalf of FIPUG.

A Good afternoon.

Q And I have some questions I would like to ask you. The first thing I want to ask you about is you reference in your testimony --

A Direct or rebuttal, please?

Q Rebuttal. Well, I don't know that it's essential that I tag it for you, but one of the points was is that, to the extent that this commission took action on ROE that was less than you requested, that it might affect your ability to finance storm repairs; isn't that right?

A That sounds correct, but I don't recall specifically where that is.

Q It's on page 9, line 3, and I'll just quote it for you: "Access to capital required for immediate service restoration following storms could also be impacted by lower credit ratings." Do you see that?

A That's correct, yes.

Q When a storm hits, does the company currently have access to capital?

1 A Well, we have two things. Number one, we have
2 a storm reserve --

3 Q Yes, sir.

4 A -- that we can call on. And then our
5 additional liquidity plans are to access the commercial
6 paper market, and if those aren't available, draw on our
7 bank facilities.

8 Q Okay. So how much is in the storm reserve?

9 A I believe the current balance, accrued balance
10 is about \$150 million, but I may be off by a little bit.

11 Q Okay. And then, with respect to the
12 commercial paper, how much capacity do you have with
13 respect to your commercial paper as we sit here today?

14 A We have three different programs in the
15 company. We have a holding company program, and then
16 one at each of our utilities. We have -- currently have
17 a \$450 million facility at PEF.

18 Q So that's -- when you answered my question,
19 you had talked about commercial paper, and then you also
20 talked about credit facilities. I understood your
21 answer to kind of mix those. Am I --

22 A They are mixed because you can't issue
23 commercial paper without a credit facility.

24 Q Okay. Because you back up the commercial
25 paper with the credit facility?

1 A In the instance where you cannot finance
2 commercial paper, then you would fall back to the bank
3 line.

4 Q Okay. And so, as we sit here today, you have
5 a PEF -- Progress Energy Florida has a \$450-million
6 credit facility available to it?

7 A They have that much capacity. What's
8 available to them now is about half of that.

9 Q So 225 is available?

10 A Right, and that's used -- the credit
11 facilities and commercial paper are used for the
12 day-to-day operations of the company, not for storm type
13 situations unless we were forced to do that.

14 Q But you do plan for storms, do you not?

15 A Absolutely.

16 Q And that credit facility is available for
17 storms, correct?

18 A It can be, yes.

19 Q And do you actually -- I have heard that some
20 utilities, when they enter storm season, they take steps
21 to try to free up additional capacity on their credit
22 facilities to have additional funds available for
23 storms. Do you all do that?

24 A We certainly evaluate that and we determine if
25 we need to have ready funds available or not.

1 Q Have you historically taken steps to free up
2 more money on the line of credit?

3 A As I said, we evaluate that every year. I
4 would have to go back and look at each year to determine
5 whether we did that or not.

6 Q Okay. So as we sit here today, you don't have
7 a recollection one way or the other?

8 A No, because, as I said, we haven't --
9 fortunately, we haven't had any storms in the last few
10 years, but again, we go into every -- the beginning of
11 every hurricane season with a plan in case storms do
12 hit.

13 Q So as we sit here today, if I were to ask you
14 how much total funds do you have available if, God
15 forbid, a storm were to hit, I would take your 150
16 number and add it to your 225 number, the 150 give or
17 take in the storm reserve, and the 225 in the credit
18 facility?

19 A And then, if the situation was really bad, if
20 we got into a '04-'05 situation, then we would consider
21 accessing the term capital markets by raising capital
22 that way.

23 Q Okay. Could you also knock on the door of the
24 parent?

25 A That would be possible if there's any capacity

1 there. There is a separate credit facility there and
2 funds can be shared through the money pool process that
3 we have in place, but again, that would depend on what
4 else the holding company's involved with.

5 Q Yes, sir. And with respect -- do you have
6 information about the holding company's finances?

7 A Well, the holding company is really a
8 consolidation of everything underneath it, so it has its
9 own debt, but it doesn't own any assets or anything like
10 that.

11 Q Yes, sir. I was going to ask you if you knew
12 what the line of credit or the credit facility for the
13 parent was.

14 A Yes. The credit facility for the parent is
15 about a billion dollars. Currently -- it has about
16 80 percent of that capacity currently available.

17 Q So again, worst case scenario, as we sit here
18 today, you would have -- and the parent was going to
19 help the subsidiary, which it would do, would it not? I
20 mean, it has two main subsidiaries, PEF of Florida and
21 then the Carolina entity; right?

22 A Even though it's not there primarily for the
23 utilities, it can be used in a backup situation, yes.

24 Q So at we sit here today, there's another
25 800 million available under the parent's credit

1 facility?

2 A Sitting here today, but tomorrow that will
3 change, as I said, because of our operating expenses and
4 specifically with the margin that we have posted with
5 our natural gas hedging program.

6 Q And to the extent it changes, it changes on a
7 daily basis, but not in significant quantities; correct?

8 A Well, no. It could change -- for instance,
9 we've had swings of \$100 million a day on posting
10 collateral for the gas hedge portfolio, so I would call
11 that material.

12 Q All right. So, if you had a gas hedge
13 position where you came up short and they hit you for a
14 hundred million, you'd be down to 700 million on the
15 parent?

16 A That would be one activity on a given day that
17 would move funds around the company, yes.

18 Q But notwithstanding the fact that you have 375
19 available to Progress Energy Florida and between 700 and
20 800 million available through the parent, you're asking
21 this commission to allow you to recover additional
22 monies from ratepayers for storm expenses?

23 A I would have to correct you. The seven to 800
24 million in the holding company is not available because
25 it's not specifically for Florida. And again it would

1 be available first and primarily for emergency
2 situations such as storm, not day-to-day operating
3 expenses.

4 Q Okay. And I don't think we're missing each
5 other on that.

6 And a storm would be an emergency situation,
7 correct?

8 A Yes, that's correct.

9 Q And to the extent that you used up the 375
10 number available to Progress Energy Florida, you could,
11 as I termed it, go knock on the parent's door, and to
12 the extent there was an emergency situation, it would be
13 appropriate for them to consider providing capital to
14 you to deal with the storm situation; correct?

15 A That's correct, yes.

16 Q I guess my question was, you're asking this
17 commission to also -- in these tough economic times, to
18 have the ratepayers fund additional hurricane monies;
19 correct?

20 A This is a continuation of the strategy that we
21 employ that incorporates the storm reserve into the
22 overall liquidity of PEF, and yes, that's what we're
23 asking for.

24 Q Did you read the entire Fitch document that
25 you referenced in your opening?

1 A Yes, I did.

2 Q So -- and you have familiarity with rating
3 agencies and how they do their business.

4 A Yes. I've been doing it for 25 years.

5 Q What can a rating agency do when it is talking
6 about a company? I mean, I understand that they provide
7 outlooks, correct?

8 A Well, they provide credit ratings that
9 determine ultimately the cost of debt for companies, and
10 those credit ratings are based upon probability of
11 default.

12 Q And when they establish their credit ratings,
13 they do a very close review of the company, its business
14 risks and its operational risks; do they not.

15 A Yes. We actually visit them formally once a
16 year and pretty much have a consistent dialogue with
17 them throughout the year.

18 Q And you would agree that the ratings provided
19 by the credit agencies are relied on by the investment
20 community, correct?

21 A Absolutely.

22 Q And as we sit here today, you don't challenge
23 the credit rating agencies' judgments with respect
24 generally to how they rate companies. Would you agree
25 with that?

1 A Well, I wouldn't challenge anything they rate
2 other than our own company because I don't really get
3 involved with other companies, but, no; we understand
4 how they go about this and we do fight for the rating
5 that we think we deserve.

6 Q What are you rated today?

7 A Which agency and what entity?

8 Q Why don't we just go through all three, Fitch
9 Moody's and Standard & Poors.

10 A I don't have those off the top of my head, but
11 basically you have -- as a matter of fact, I have a
12 table in an exhibit that might help with that.

13 I'm sorry. I must have -- in my direct
14 testimony, I must have had the ratings table at the
15 bottom of the chart. At this point, if memory serves,
16 S&P has us at triple B plus for senior, unsecured, and
17 both of the other agencies have us as at an A rating, A
18 minus and A for Moody's and Fitch respectively.

19 Q So triple B plus and --

20 A For S&P.

21 Q And then a couple of A's?

22 A Yes.

23 Q Do you think those are on target as we sit
24 here today?

25 A We, as well as others in the industry, have

1 had issue with the S&P consolidated rating methodology.
2 Again, it's sometimes viewed as the least common
3 denominator methodology, and -- however, we are -- since
4 they are one of the two most powerful rating agencies,
5 we're held accountable to those, and they're a financial
6 reality for us.

7 Q And you had made a comment about fighting for
8 your ratings. You're not suggesting that the rating
9 agencies have overrated you as we sit here today, are
10 you?

11 A No. In their minds they obviously have us
12 rated appropriately, otherwise they would have an
13 outlook change or have some other proceeding or review
14 under way.

15 Q So from your judgment, you think the ratings
16 are appropriate as we sit here today?

17 A I think they are in general. Again, we have
18 our issues with the consolidated methodology of S&P, but
19 in general, yes, they're reflective.

20 Q Okay. And you had made a comment about the
21 outlook would have changed. If a rating agency had a
22 concern about the future, what would they use as the
23 description for the outlook?

24 A Most of them will -- prior to taking a rating
25 action change, will change the outlook. So if it's good

1 news, they'll change the outlook to positive and
2 potentially look at an upgrade. If it's bad news,
3 they'll change the outlook to negative and then
4 potentially make a decision after that.

5 Q Okay. So just so we're clear, when they look
6 at something, if it's looking pretty good, it's
7 positive; if it's looking bad, it's negative; and I
8 guess if it's okay, they say stable. Is that right?

9 A Yes. It's usually positive, negative or
10 stable.

11 Q And the press release that you referenced,
12 that -- Fitch has said that the outlook was stable for
13 Progress Energy Florida, correct?

14 A That's correct, yes.

15 Q They -- even though they comment about what
16 may happen, you know, notwithstanding that fact, their
17 recommendation for the company is stable?

18 A In other words, going into, for instance, the
19 two proceedings they reference, yes, the outlook is
20 stable pending the outcome of those proceedings.

21 Q Right. But this press release was done on
22 September 8th, correct?

23 A Yes, it was.

24 Q And the proceedings were ongoing then, were
25 they not?

1 A I'm not sure when we started.

2 Q Okay. I'm not either at this point but -- the
3 press release also indicates that the company's capital
4 structure was enhanced by issuing 15.5 million common
5 shares with net proceeds of \$545 million including a
6 public offering of 523 million in January, 2009; is that
7 correct?

8 A Yes, that is correct. We did a marketed
9 transaction at the beginning of this year.

10 Q Okay. And there's been some discussion about
11 marketing stability back in the last quarter of 2008.
12 You all were able to go in the market and raise over
13 half a billion dollars in January, 2009.

14 A Well, we did that with a combination of
15 things. This is not the only deal that we executed that
16 week. We raised equity which is something we've been
17 doing every year; however, the way that we do it is
18 different. This was in a large single transaction as
19 opposed to averaging in over the course of a year.

20 We executed at that time because we felt that
21 the market had come back from the November lows and our
22 outlook for the balance of this year was very uncertain.
23 Our price/earnings ratio, which is an evaluation of
24 stock, was at a high point, and we felt it was good time
25 to go to the markets.

1 Q So how much equity did you raise in January?

2 A You quoted the numbers here.

3 Q Okay. So those numbers are all equity, no
4 debt?

5 A That's correct.

6 Q And we had a lot of discussion about ROE, and
7 you talked about it in your testimony; correct?

8 A Actually I'm -- cost -- not cost of equity.
9 That was Dr. Vander Weide.

10 Q I'm sorry?

11 A That was Dr. Vander Weide that was our cost of
12 equity witness.

13 Q Right. But you say you support a 12.54 ROE,
14 correct?

15 A That's because I support his testimony, yes.

16 Q Well, do you know what the company's return on
17 equity was for 2008 which presumably investors would
18 have been looking at when deciding --

19 A Financial or regulatory ROE?

20 Q Both.

21 A No, I do not.

22 Q Do you know either one?

23 A Do I know either one of those? No, I do not.

24 Q If it was -- that information would be
25 available to investors, would it not, when they were

1 making a decision as to whether to buy stock in the
2 company?

3 A They should be able to look at our SEC filings
4 and do the analysis necessary to make their decision.

5 Q Okay. And so, if the ROE -- just assume for
6 the purposes of my question -- let's assume it was a
7 flat 10 percent for 2008. An investor would have that
8 in mind and that might be a piece of data that would be
9 something they would consider when they were making a
10 decision as to whether to invest in the stock of the
11 parent company in January, 2009. You would agree with
12 that, would you not?

13 A I would agree with the fact that they had the
14 ability to look at the value of the stock. The return
15 on equity calculation is done at the end of financial
16 reporting periods. So they could go in and look at -- I
17 think at that point they would have had September 30th
18 numbers available to them.

19 Q Do you know what those September 30th numbers
20 were?

21 A No, I do not.

22 Q And they probably could have looked at
23 surveillance reports in front of the Public Service
24 Commission as well, correct?

25 A Depending on how far they wanted to dig, yes.

1 Q The final point I wanted to just discuss with
2 you briefly about this Fitch document that you
3 referenced in your opening is is that you would agree
4 that the rating agencies are aware that we are in a weak
5 economy, correct?

6 A I would think that, given their
7 responsibilities, they are aware of the economic
8 conditions, yes.

9 Q Okay. And that is something that they
10 consider when issuing press releases such as this,
11 wouldn't you agree?

12 A Well, no. This is a press release on the
13 company and its outlook. So, no, I don't agree with
14 that.

15 Q The rating agencies consider the state of the
16 economy when trying to predict or judge what a
17 commission may do or the impacts upon the company. You
18 would agree with that, would you not?

19 A Well, no. I think they'd look at the state of
20 the economy. The reputation of the commission is
21 established by their historic decisions.

22 Q So if I were to tell you that the weak economy
23 may affect your -- Progress Energy Florida's chances for
24 getting adequate, immediate relief to restore credit
25 ratios to guidelines, you would say, well, that's

1 probably not accurate?

2 A The economy -- the rating agencies look and
3 are -- ask us for what we need to run the company to
4 meet the credit ratings and deliver the proper level of
5 service. So to me it doesn't have to do as much with
6 the economy as what it takes to run the company and
7 deliver the service we're required to.

8 Q Do you have that press release in front of
9 you?

10 A The Fitch press release?

11 Q Yes, sir.

12 A Yes, I do.

13 Q Do you see the second to the last sentence in
14 the fifth paragraph that starts with "however"?

15 A The fifth paragraph. I have it beginning
16 with, "Fitch primarily rating concern include."

17 Q And you go down four or five sentence and you
18 see the sentence that says, "However, the weak economy."

19 A Yes.

20 Q Don't you read that sentence to suggest that
21 the weak economy is something that may affect your
22 chances of getting the relief that you're seeking in
23 this case?

24 A That's what they state here, yes.

25 Q And so, from a rating agency perspective --

1 and we've had a lot of discussion about it. I mean,
2 it's -- you would agree, would you not, that commission
3 decisions around the country are taking into account the
4 weak economy and that that's a factor when they're
5 setting rates. Would you agree with that?

6 A I would think that -- while I don't follow the
7 other cases, I would think it's part of the
8 responsibility of the Commission to consider all aspects
9 in their decisions.

10 Q Let me direct your attention to page three of
11 your testimony, of your rebuttal.

12 A I'm there.

13 Q Up at the first paragraph, you say that you're
14 going to discuss how adjustments will negatively impact
15 the company's ability to maintain and improve its
16 financial strength, and you state, quote, "This in turn
17 will limit the company's ability to access capital in
18 order to provide reliable energy for its customers at a
19 reasonable cost."

20 What is the basis for that statement? Are you
21 saying that you don't think that, if this Commission
22 goes with the Intervenors' position -- you know, let's
23 say that, you know, they give a zero rate increase, not
24 a negative 35 million. Are you saying that that will
25 not allow you to access capital?

1 A I'm not saying it won't allow us to access
2 capital. We're talking about timely and cost-effective
3 access to capital.

4 Q So just -- I want to talk through this with
5 you and make sure I'm understanding it. Let's say the
6 decision is such that the rating agencies say, you know,
7 we're going to have to downgrade this company and we're
8 going to take them down one notch, okay. Typically when
9 a rating agency takes action, they do it in one-notch
10 increments unless there's something very dramatic;
11 correct?

12 A I wouldn't say in these times. Normally it's
13 one notch. They can do whatever they feel like doing.

14 Q Sure, they can, but in your 20 years of
15 following it, it's typical, a one-notch downgrade or
16 upgrade?

17 A I would say that probably something less than
18 50 percent of the time it's one notch.

19 Q So assume a one-notch downgrade for the
20 purposes of this line of questioning. How would that
21 affect the cost of access to debt, if you know?

22 A Right. The first thing it would do, it would
23 lower our commercial paper rating which is an additional
24 rating that the rating agencies provide that we're
25 currently a Tier-2 issuer. This could push us to Tier

1 3. I would classify or characterize Tier 3 commercial
2 paper issuers as the have-nots. Those are the people
3 that were shut out of the market. They were not --
4 those are usually not investment grades or barely
5 investment grade companies. So we would have difficulty
6 accessing the commercial paper market, and also our
7 costs would go up because the rate --

8 Q And is it your testimony that a Tier 3 cannot,
9 as we sit here today, access debt, or are you --

10 A Possibly today, but they've been shut out of
11 the market pretty much the last quarter of last year
12 through the first half of this year.

13 Q Right. And that was the credit crunch that
14 we've been talking about that was acute in the fourth
15 quarter of 2008. Is that right?

16 A Well, I wouldn't say it was acute in the
17 fourth quarter. I would say it began in the third
18 quarter of last year and extended through probably the
19 middle of the second quarter of this year.

20 Q Okay. But it's abated and gotten better as we
21 sit here today, correct?

22 A Yes. I think it's fair to say and I've heard
23 it characterized that the market is not priced in a
24 depression anymore but just a recession.

25 Q So what's the delta between a Tier 2

1 commercial paper and a Tier 3 commercial paper in terms
2 of the spread, if you know?

3 A Well, the first thing would be access. Either
4 your -- a 2 might have it and a 3 may not --

5 Q But as we sit here today -- and, I'm sorry, if
6 I could just interject. As we sit here today, you don't
7 know whether, you know, a 3 cannot access capital?

8 A It would be greater -- it would issuer
9 specific.

10 Q Okay. So what would be the delta, if you
11 know?

12 A I would say probably about 50 to 75 basis
13 points today.

14 Q All right. Do you have information as to a
15 delta between let's say -- you said that you were A
16 rated. The difference between an A and the notch right
17 below that --

18 A Triple B.

19 Q Triple B.

20 A Again, the market prices deals every day. I
21 don't have a specific number for that.

22 Q Can you give me a general idea?

23 A Probably LIBOR plus 40, 40 basis points.

24 Q So a 40-basis-point spread?

25 A Right. And you would add what I gave you, the

1 numbers before, on top of that to estimate a Tier 3
2 issuer.

3 Q And have you done any kind of an analysis
4 to -- because I read your testimony to say, well, if we
5 don't get, you know, the ROE we're asking for, then
6 ultimately it will cost ratepayers more money. Isn't
7 that the sense of the testimony?

8 A Yes, because it would affect the credit
9 ratings and, as I said, a lower credit rating requires a
10 higher cost to fund.

11 Q So if we were just to take, for example, 2010,
12 how much debt are you looking -- or how much equity are
13 you looking -- let's talk about debt. How much debt are
14 you looking to raise in 2010?

15 A Just at PEF, I believe the number was 750,000
16 because we have a refinancing of a maturity and then we
17 have some new cash to raise.

18 Q So 750,000, is that right?

19 A Or, excuse me, 750 million.

20 Q Let's just call it a billion for the purposes
21 of this hypothetical because it's easier to work with.

22 A Okay.

23 Q Which will give you another 250 million that
24 you don't need, but let's just --

25 A If the market gives it to us, yes.

1 Q So, if it's a billion dollars that you need
2 next year and the difference between the A and the
3 triple B is 40 basis points, is a 40-basis-point spread,
4 how much would that cost on a billion dollars?
5 40 million, isn't that right?

6 A Forty, yes, .4 times a billion.

7 Q Right. And so each point of return on equity,
8 each hundred basis points on return on equity is worth
9 about \$50 million, correct?

10 A I don't follow that calculation, but subject
11 to verification, I would agree with you.

12 Q Okay. So from a pure economic standpoint, it
13 would be better for ratepayers to say, look, I would
14 rather save \$10 million by this commission going with a
15 10 or 11.5 ROE and paying a little bit more for the cost
16 of the debt next year as compared to paying 50 million
17 for a 12.5 ROE --

18 A Well, I think that's a pretty narrow view of
19 things given the fact that there are other things such
20 as storms that we talked about that can come up that can
21 impact the company over the course of the year. So, no,
22 I wouldn't agree with that.

23 Q All right. And to the extent that this
24 commission decided to hit the average for ROE that's
25 been a ruling in 2009, do you know what that average is?

1 A That have been awarded in the United States in
2 2009?

3 Q Yes, sir.

4 A I'm aware of specific cases but not what those
5 numbers would average to.

6 Q Have you seen an exhibit that's been used in
7 this proceeding that has a list of all the 2009
8 decisions?

9 A I'm aware, but I don't think I've seen it.

10 Q Okay. If I represented to you that the
11 average was 10.51, given our hypothetical discussion
12 here, that would save ratepayers for 2010 \$100 million
13 and, given what you indicated were your debt needs --
14 and I raised it up to a billion dollars -- it would cost
15 them 40 million. Wouldn't it be a better deal for
16 ratepayers to get the lower ROE and pay a little bit
17 more for the debt?

18 A I don't think it would be a better deal for
19 ratepayers. It would be a better deal for their bill,
20 but it may affect the service levels of the company.

21 Q And why do you say that?

22 A If we have trouble accessing capital or it
23 costs more, we might end up doing less as far as capital
24 investment and those things go.

25 Q But you're not telling this commission that

1 you're not going to honor your statutory obligation --

2 A I didn't say that.

3 Q -- to serve?

4 A I didn't say that.

5 Q I thought I heard you in your answer suggest
6 that, if you got a 10.51 ROE, that the quality of
7 service might be adversely affected.

8 A I don't believe I said the quality of service.
9 I said we may have to make prioritization decisions in
10 investment in projects, things of that nature.

11 Q Okay. And you're aware that businesses make
12 prioritization decisions every day. That's part of
13 running a business, is it not?

14 A Absolutely.

15 Q And you're not suggesting that, if you got a
16 10.51, that you would not be able to provide safe,
17 adequate and reliable energy; correct?

18 A No, because we would have to do that. I don't
19 know to what degree we would be able to do that without
20 lowering our ROE.

21 Q Right. And if you really got in a pinch --
22 you know, we've already talked about the credit
23 facilities that are available to you.

24 A Well, you can't count on the parent being
25 there because the parent isn't there for PEF. The

1 parent is there for its own needs as well as a potential
2 backstop, but only in emergency situations.

3 Q Does the parent have any operations?

4 A No, it does not.

5 Q The parent is a holding company, is it not?

6 A That is correct.

7 Q And it has two siblings, or not -- siblings
8 isn't the right word, but I guess subsidiaries --

9 A They have several subsidiaries including the
10 service company and two utilities, yes.

11 Q Okay. And the lion's share of the money comes
12 from the two utilities, isn't that right.

13 A That's basically where all of the money comes
14 from, yes.

15 Q Okay. So the -- I think we said 800 million
16 available, that would largely be available to help in
17 financial needs of the subsidiaries; would it not?

18 A I wouldn't say largely available. The holding
19 company has interest expense on its debt and also common
20 dividends to pay.

21 Q Let me direct your attention to page 8.

22 A I'm there.

23 Q And again we're talking about return on
24 equity. On line 8 you state, I quote, "Investors would
25 not invest in a company earning a lower ROE when they

1 could invest in other companies of similar risk and earn
2 a higher ROE." Do you see that?

3 A Yes.

4 Q And that's a true and accurate statement?

5 A I believe that's a fundamental investor
6 philosophy, yes.

7 Q And wouldn't it also follow that investors --
8 you know, the converse of that would be true, that
9 investors would invest in a company that has less risk
10 if they could earn the same or a slightly higher return
11 in investing in that company as compared to a similar
12 company that has greater risk?

13 A Yes. I think investors would be looking for
14 that market and efficiency in making investments.

15 Q Okay. And with respect to this capital that
16 you have to attract, you would agree that's a national
17 market, correct, a national market for capital?

18 A Yes, I would.

19 Q Okay. So a company like, you know, Progress
20 Energy Florida's going to be competing with Idaho Power
21 as it goes into the capital markets to get debt;
22 correct?

23 A Right, or other utilities across the country,
24 yes.

25 MR. MOYLE: Mr. Chair, if I could --

1 CHAIRMAN CARTER: Yes, sir, Mr. Moyle. Do you
2 need a number?

3 MR. MOYLE: -- hand out a couple of exhibits.
4 No, these are exhibit that are already in the record but
5 I've marked on them a little bit.

6 CHAIRMAN CARTER: You're just going to use
7 them for cross-examination?

8 MR. MOYLE: Yeah, and I guess they're probably
9 demonstrative exhibits would be the right thing to call
10 them, but --

11 CHAIRMAN CARTER: Okay. Let's take a moment
12 here to get them passed out, and then we'll go from
13 there. 264 again --

14 MR. MOYLE: Yes, sir.

15 CHAIRMAN CARTER: -- as opposed to 462 in the
16 other case.

17 MR. MOYLE: I'm sorry. It's 264 in this case?

18 CHAIRMAN CARTER: Yes, sir. The one-pager.

19 MR. MOYLE: Yes, sir. Okay.

20 CHAIRMAN CARTER: You may proceed, Mr. Moyle.

21 BY MR. MOYLE:

22 Q Thank you. Mr. Sullivan, I've handed you what
23 the Chairman has correctly indicated I think is already
24 in the record. In this case it's 264, the 462 was also
25 admitted in the FPL case, and then also a Fitch's rating

1 document that I believe is in the record as 294 in this
2 case, and I have some handwritten notes on it that I
3 wanted to spend a minute and just talk with you about,
4 particularly given our recent conversation where I think
5 we agreed that investors would put their capital at work
6 to earn a return -- if they could earn the same return
7 with a company with less risk, that's where their money
8 would go, okay?

9 A Uh-huh.

10 Q All right. So let's just take a couple of
11 these. What I've done on the Exhibit 264 is I've
12 circled all of the ones that I could find that came in
13 at a return on equity of 10.5 that also were listed on
14 Exhibit 294, the Fitch rating sheet. And if I were an
15 investor -- let's just take the first one, Avista Power
16 Corp there, do you see that?

17 A Yes, I do.

18 Q They have a return on equity of 10.5, correct?

19 A Yes.

20 Q And a common equity of about 50 percent.

21 A Yes.

22 Q All right. So if I had money to invest -- if
23 you look over on the other sheet, Avista Capital is
24 rated what?

25 A Double B plus.

1 Q Okay. And so, assuming that's the same rating
2 today, but if I had money to invest, wouldn't the
3 investor go to Progress Energy Florida because it is
4 rated higher than Avista if the return on equity was the
5 same as -- well, let's just say it's 10.51. Let's say
6 this commission says 10.51 is the number. If you were
7 an investor, you would go to a 10.51 number because it's
8 slightly higher than 10.5, and Progress Energy of
9 Florida is rated higher than Avista; correct?

10 A Well, again, we're mixing credit ratings and
11 equity here. An equity investor is going to look at
12 earnings, growth rates, EPS, as well as the things
13 you've indicated here. A bond investor, in going over
14 and looking at the Fitch rating sheet, is going to say,
15 okay, if I buy a bond, this is my probability of
16 default, and those are two separate investments, a debt
17 investment versus an equity investment.

18 Q Assume a debt investor is making this
19 decision. A debt investor would go to Progress Energy
20 Florida given the information we just discussed, would
21 they not?

22 A Yes, they would look at the two ratings of the
23 companies and see where the respective bonds are priced
24 and make a relative value assessment along the lines you
25 outlined earlier.

1 Q And with respect to like the next one, Idaho
2 Power, that decision was made on January 30th, 2009;
3 correct?

4 A Yes.

5 Q And that was close to the period of time we
6 were just talking about where you had said that credit
7 was harder to come by, correct?

8 A And again, this is again a rate case. This
9 would be the equity side of it. And again, the markets
10 were certainly stressed at that period of time, yes.

11 Q Okay. And the Commission in Idaho, apparently
12 they made a judgment that a 10.5 was a proper return on
13 equity to allow that company to operate successfully;
14 correct.

15 A I'm not aware of those circumstances, but
16 obviously, if they approved that, they thought that was
17 appropriate.

18 Q Okay. And the Idaho Power Company, they're
19 rated lower than Progress; correct?

20 A Yes, and they also have a negative outlook.

21 Q All right. And I guess we could go through
22 all of these questions, but I guess the point is is
23 that, with respect to, you know, a 10.51 return on
24 equity, you would agree, based on Exhibit 264, that that
25 suggests that that's the average return on equity

1 awarded in 2009; correct?

2 A The average for the country or for Idaho
3 Power?

4 Q For the companies listed on this Exhibit 264.

5 A The exhibit, as I see it, has all the ten and
6 a half's circled. I don't know what the arithmetic
7 average is of those.

8 Q Do you see down at the bottom it says,
9 "Average authorized ROE"?

10 A Okay. Is that the calculation of that?

11 Q You know, staff had originally introduced this
12 exhibit. I presume it's right. I didn't do it myself,
13 but I think, if you added them all up, that would be
14 where you'd end up. And do you know, are any of thees
15 companies currently not able to provide safe, reliable,
16 adequate electricity to their customers?

17 A I have no idea.

18 Q If they weren't -- I assume you follow the
19 trade press in the electric industry, do you not?

20 A We would probably hear about it, yes, if they
21 ran into difficulties.

22 Q Back on page 3, you make this statement on
23 line 9: "The Intervenors' recommended changes would
24 represent a material change from the historically
25 constructive regulatory environment in Florida and would

1 be viewed negatively by the financial markets." Do you
2 see that?

3 A Yes, that's correct.

4 Q And if you reference this exhibit, 264, you
5 would agree with me, would you not, that, even if this
6 commission only took 100 basis points off the request
7 that your company is making, it would still be the
8 highest return on equity award in 2009; correct?

9 A No, I'm not sure because I have some data that
10 contradicts that. I have three companies --

11 Q Well, let me refer to you this chart, 2 of 4,
12 okay.

13 A Based upon the data that's there, I would have
14 to agree with that; yes.

15 Q Okay. And do you see the common equity totals
16 that are also circled?

17 A Yes.

18 Q All right. You're seeking a common equity
19 that is higher than any of the companies that are
20 circled on Exhibit 264, correct?

21 A That would be correct, but I don't know the --
22 for instance, if they have nuclear exposure or anything
23 like that. So I can't make a complete assessment.

24 Q If the average meant something -- and you
25 would agree it probably does, does it not, the --

1 A I don't think averages mean a whole lot
2 because I've got three other companies here that are
3 above 12 and a half that filed this year.

4 Q Okay. Well, are those decisions that have
5 been entered or requests being made, and what are you
6 referring to?

7 A I'm a little concerned I'm going to get
8 something I haven't seen before, but let's go ahead.

9 A Again, I have three companies here that have
10 filed rate filings this calendar year, and I was just
11 looking to crosscheck to see if they're on this sheet.

12 Q And what are you looking at when you say you
13 have three companies?

14 A I'm looking at information provided by
15 Dr. Vander Weide.

16 Q Was that part in your testimony in any way?

17 A This so not part of my testimony.

18 Q Is this something that he just gave to you
19 recently that you asked for or what?

20 A This is something that I did not ask for it
21 myself but was provided to me.

22 MR. MOYLE: Mr. Chairman, could I take a look
23 at that information?

24 CHAIRMAN CARTER: You may approach.
25 Mr. Wright? Ms. Bradley? Mr. Walls?

1 MR. WALLS: I could probably explain this.

2 CHAIRMAN CARTER: Go ahead.

3 MR. WALLS: Dr. Vander Weide was here. I
4 believe he was asked by one of the parties or staff -- I
5 can't remember who asked him the question -- of whether
6 he was aware of any other utilities that had asked for a
7 higher ROE than the one he was asking for for the
8 company, or recommending for the company this calendar
9 year, and he said he wasn't aware, but when he left
10 here, he checked, and that's what he sent Mr. Sullivan.

11 CHAIRMAN CARTER: Mr. Moyle, you're
12 recognized.

13 BY MR. MOYLE:

14 Q Okay. And I think my question, sir, was
15 focused on asking you whether you would agree that, as
16 we sit here today, if this commission were to knock off
17 100 basis points from your requested ROE of 12.54,
18 whether that would be the highest return on equity
19 awarded in the country this year? Can you answer that?

20 A Based upon this sheet in front of me, I would
21 have to agree with that.

22 Q And you would also agree with it based upon
23 the sheet that I've just borrowed from you, would you
24 not?

25 A No, because I don't know if those proceedings

1 have been concluded yet.

2 Q There's nothing on this sheet that indicates
3 that they have been concluded, correct?

4 A That's correct.

5 Q All there is is a column entitled "Date
6 Filed." There's not a corresponding column like there
7 is on this sheet to say increase authorized, correct?

8 A No, and that would lead me to believe that
9 they're not completed. The proceedings are not
10 completed at this time.

11 Q Okay. So the answer to my question would be,
12 based on the best information you have today, even if
13 100 basis points were knocked off, this commission would
14 still be the highest in the country on ROE; correct?

15 A Based upon this information I have in front of
16 me, yes.

17 Q And this information?

18 A I don't know how they were decided yet. I
19 don't know how you can decide on something until a
20 decision is rendered or incorporated into the analysis.

21 CHAIRMAN CARTER: Mr. Moyle, I don't think we
22 got your last comment for the record.

23 BY MR. MOYLE:

24 Q I'm sorry. Again, I'm just trying to make the
25 point that the information that you referred me to, it

1 doesn't have anything to indicate that a commission has
2 awarded a return on equity higher than 11.54; correct?

3 A Based upon this information and the lack of a
4 decision date here, yes, I would agree.

5 Q Okay. All right. And you're aware that the
6 effect of this commission being number one in return on
7 equity in the country if it were to award either a 12.54
8 or a 11.54 return on equity would be that ratepayers
9 have to pay more in their bills, correct?

10 A That's a hypothetical.

11 MR. WALLS: Objection, lack of foundation.

12 CHAIRMAN CARTER: To the objection, Mr. Moyle.

13 MR. MOYLE: Well, I'm trying to test his
14 understanding of return on equity. He testifies to it.
15 He supports a 12.54 return on equity. I think it's a
16 fair question.

17 THE WITNESS: But the --

18 CHAIRMAN CARTER: Mr. Walls.

19 MR. WALLS: I was objecting to the statement
20 that Mr. Moyle made about this commission being number
21 one in the country. I'm not sure anyone here has
22 testified to that, and I don't know of any analysis that
23 supports that, but --

24 CHAIRMAN CARTER: Rephrase, Mr. Moyle.

25 BY MR. MOYLE:

1 Q Okay. And when I say number one in the
2 country, let me confine it by saying number one in the
3 country for 2009, okay.

4 A As far as we know, because the year is not
5 over yet, and obviously we have three proceedings that
6 are not concluded yet.

7 Q Okay. And my question was, if they are -- if
8 they make a decision that puts them number one in the
9 country, doesn't that have the effect of having
10 ratepayers pay more money in their rates?

11 A I don't know what ranking within the country
12 has to do with anything. Our ask is for us to provide
13 reliable service and we believe our ask is what's
14 required to do that.

15 Q Let me ask it this way: If the Commission
16 awards a 10.5 ROE as compared to an 11.5 ROE, a 10.5 ROE
17 would mean ratepayers pay less money to your company;
18 correct?

19 A I guess, depending upon the other aspects of
20 the agreement, that could be the case, yes.

21 Q All other things being equal, again, just
22 focusing on the ROE, you would agree with me; would you
23 not?

24 A Could you state the question again, please?

25 Q Sure. If this Commission were to award a 10.5

1 ROE as compared to an 11.5 ROE, the result, all other
2 things being equal, of the 10.5 ROE would be that
3 consumers pay less money to the company in their rates;
4 correct?

5 A Yes, they would pay less money.

6 Q And I had asked you previously about the
7 markets for money being a national market, correct?

8 A Actually it's a global market, but yes.

9 Q Okay. And also the relevant points in time
10 for that is try to ascertain current market conditions,
11 correct?

12 A Yeah. Unfortunately this market has varied
13 for the balance of this year from day to day and week to
14 week.

15 Q Okay. So, to the extent that there was an ROE
16 decision made ten years ago, that wouldn't have as much
17 sway or import, you know, as one that was made at a
18 closer point in time to where we are today; correct?

19 A In general I would agree with that, yes.

20 Q And that would be because the markets were
21 different when the ROE decision that I referenced was
22 made?

23 A It could be a lot of different reasons, but
24 yes.

25 Q And in your testimony you reference some high

1 ROEs.

2 A Yes, I believe I do.

3 Q You reference them on --

4 A Page 7.

5 Q -- page 7. Do you see those? And you're
6 talking about utilities in the southeastern United
7 States. You're not suggesting that the market for money
8 is limited in the southeastern United States, are you?

9 A No, but they -- as I said, we are compared
10 with our neighbors both regionally and nationally.

11 Q Sure. Isn't it true that that Alabama Power
12 ROE was authorized more than ten years ago?

13 A I'm not aware of the award date.

14 Q Do you know -- on any of these ROEs that you
15 are referencing, do you have any information about when
16 they were awarded?

17 A Yes, I do.

18 Q All right. So you don't know about Alabama
19 Power as to the date of ROE?

20 A No, I don't. Georgia Power was last year.

21 Q I'm sorry. Let me just take them one at a
22 time. Alabama Power, you do not know?

23 A No, I do not know.

24 Q Georgia Power was when?

25 A I believe it was last -- their most recent

1 rate proceeding.

2 Q When was that?

3 A I believe it was last year.

4 Q What timeframe last year?

5 A I don't know.

6 Q Did you get this information off an order, off
7 the orders in these cases?

8 A I can't recall where we sourced this
9 information.

10 Q Did you source it?

11 A Yes.

12 Q But you're not sure --

13 A Personally I did not. I had staff help me
14 with this.

15 And the Progress Energy Carolinas was also
16 dated -- that was 1988.

17 Q 1988?

18 A That's correct.

19 Q And how about the Gulf Power?

20 A I believe it was their last rate case, which
21 was three years ago maybe. I'm not quite sure of the
22 timing of that, though.

23 Q Okay. Thank you for that.

24 CHAIRMAN CARTER: Are you ready for another
25 line, Mr. Moyle?

1 MR. MOYLE: Yes, sir, and it might be a good
2 chance for me to take a breath and --

3 CHAIRMAN CARTER: Okay. Why don't we do this:
4 We're back on our regular lunch break. We'll go from
5 1:00 to 2:15. See everybody at 2:15.

6 (Recess.)

7 CHAIRMAN CARTER: We are back on the record,
8 and when we last left, Mr. Moyle, you were on
9 cross-examination. You are recognized, sir.

10 MR. MOYLE: Thank you. Thank you,
11 Mr. Chairman.

12 BY MR. MOYLE:

13 Q Mr. Sullivan, I'm going to try to just finish
14 the line of questioning about the return on equity and
15 move on to a couple of other lines and then we'll be
16 done.

17 I was asking you questions about the Exhibit
18 264, which is the rate case history for 2009.

19 A Yes, I have that in front of me.

20 Q With respect to any of the companies that I
21 had circled that picked up a 10.5 ROE, you're not aware
22 of any of them being downgraded following the issuance
23 of the commission decisions, are you?

24 A I haven't done the analysis, but I'm not aware
25 of it.

1 Q Okay. And with respect to some data points,
2 the settlement agreement, Mr. Rehwinkel asked you some
3 questions about that; right?

4 A Yes.

5 Q And do you know what the ROE was in that
6 agreement that gave the company the ability to seek
7 relief?

8 A And this is the 2005 stipulation?

9 Q Yes, sir.

10 A I believe it was not a specific ROE but a
11 range, and there was a revenue-sharing component to
12 that.

13 Q Right, but there was also a provision that
14 said, if you go below a certain ROE, you can come in?

15 A Yes, I believe that was 10 percent.

16 Q So that was 10 percent. You weren't at that
17 settlement. You didn't participate in that, did you?

18 A No, I did not.

19 Q Okay. Would it be fair to derive that, at
20 least for the purposes of that settlement, that anything
21 above 10 percent was satisfactory to the company?

22 A No, because I believe that 10 percent was
23 there to allow for filing of interim rate relief as that
24 was deemed to be too low a return.

25 Q Okay. We've already talked about Exhibit 264

1 and that average being 10.51. Let me refer you to page
2 10, line 14 of your testimony.

3 A I'm there.

4 Q In this section you're quoting a Fitch report,
5 correct?

6 A That's correct, yes.

7 Q And Fitch is saying that it appears that
8 return on equities are currently in the 10.25 to 10.5
9 range with some jurisdictions approaching nine. Is that
10 right?

11 A Yes, and I believe that referenced recent
12 commission decisions.

13 Q Okay. And if I showed you the annual
14 report -- you're familiar with the company's annual
15 report, are you not?

16 A Yes.

17 MR. MOYLE: Can I approach, Mr. Chairman?

18 CHAIRMAN CARTER: You may approach.

19 BY MR. MOYLE:

20 Q I place before you the company's annual report
21 for what year?

22 A 2008.

23 Q Okay. And what was the ROE report in that
24 annual report?

25 A Under the common stock data section, this is

1 the financial ROE, return on average common equity of
2 9.59 percent.

3 Q And when was that report issued?

4 A It's usually in the spring of the following
5 year. So this is for the year ended December 31, 2008,
6 so sometime in the February-March timeframe I believe.

7 Q So the annual report reflects a 9.59. Now,
8 Dr. Woolridge, he suggested that that -- that the
9 appropriate number is 9.75, correct?

10 A Now, again, I want to make sure we're not
11 mixing apples and oranges here. That is a financial
12 return on equity, not a regulatory return on equity, and
13 I believe we're discussing here the cost of equity
14 relative to setting rates.

15 Q I understand. And then, with respect to the
16 actual return on equity, that's something that investors
17 look at to see how did the company do, how did it
18 actually perform financially; correct?

19 A That's one measurement, yes.

20 Q Let me just spend a minute talking about the
21 TECO decision. On page 6, line 8, you indicate that
22 Tampa Electric was recently awarded a return of 11.25;
23 correct?

24 A Yes.

25 Q And are you aware that staff had recommended a

1 lower ROE in that case?

2 A No, I'm not. I just am aware of the outcome.

3 Q Okay. If we go back to the chart here and we
4 were talking about -- on line 14, you talk about a
5 higher cost of capital. Do you see that?

6 A Yes.

7 Q Capital can be either debt or equity, correct?

8 A That's correct.

9 Q So let's just focus on debt for a minute.

10 Would it logically follow that, if Tampa Electric was
11 awarded an 11.25 and they have more risk associated with
12 them, that Progress Energy -- and assuming 11.25 was the
13 right number, that Progress Energy should be awarded a
14 lower return on equity. You would agree with that,
15 would you not?

16 A No.

17 MR. WALLS: Objection, assumes facts not in
18 evidence.

19 CHAIRMAN CARTER: To the objection, Mr. Moyle.

20 MR. MOYLE: What small fact is assumed that
21 wasn't in evidence?

22 MR. WALLS: He said TECO had less risk than
23 PEF. I'm not aware of any witness testifying to that
24 fact.

25 CHAIRMAN CARTER: Mr. Moyle.

1 MR. MOYLE: There's a document that I can
2 refer him to that we can talk about with respect to bond
3 ratings.

4 CHAIRMAN CARTER: Rephrase.

5 BY MR. MOYLE:

6 Q We've already talked about the bond companies
7 and that they evaluate risk when they put together their
8 ratings, correct?

9 A Yes, and this is default risk, yes.

10 Q Okay. And with respect to Document No. 294,
11 doesn't this reflect that Tampa Electric Company has
12 more risk than Florida Power Corp, this document?

13 A These ratings reflect a higher risk of default
14 on its debt, yes.

15 Q Okay. So then my question was, if you assume
16 that's correct, that the rating agencies are correct and
17 this commission made a correct judgment of 11.25 for
18 Tampa Electric, given our discussion of economic theory
19 and risk, wouldn't it make sense that, if this -- if
20 Progress Energy had less risk, that it should be awarded
21 a return on equity lower than 11.25?

22 A I'm not sure if the debt risk takes into
23 account all the risks of the company because, again,
24 that's default risk, not ability to earn.

25 Q And I'm just talking about debt risk right

1 now.

2 A Yes, based upon the ratings -- not related to
3 ROE, but just based upon the ratings of default, that
4 would be correct.

5 Q And when you go to finance things, you
6 typically do a combination of debt and equity; is that
7 right?

8 A No, that's not the case. It depends on what
9 the capital plan is and what our credit metrics
10 situation is at the time will dictate how much of each
11 we do.

12 Q So you kind of have the flexibility or
13 discretion to finance it kind of depending on the facts
14 and circumstances at the time?

15 A Well, I wouldn't call it total discretion but
16 I would say that we do from time to time have
17 flexibility and try to time that at the most appropriate
18 moment.

19 Q Given our discussion, again, with respect to
20 debt, your sentence on line 19, "Providing PEF a lower
21 return on equity than that awarded to Tampa Electric
22 would be viewed as inconsistent and negative by the
23 rating agencies and the financial community," isn't
24 really the converse of that true, again, if we're
25 speaking to debt, that, to the extent that Progress

1 Energy has less risk than Tampa Electric, awarding
2 Progress Energy a higher return on equity would raise
3 questions?

4 A Based upon the rating agency disclosures that
5 I've made as well as the Fitch exhibit, they have stated
6 exactly what their expectations are, and again, if we
7 don't meet those credit metrics, they will downgrade us.

8 Q But I don't think you answered my question
9 which --

10 A Okay. Can you repeat it then, please?

11 Q Sure. You know, given our discussion on
12 economic theory and the risk relative to debt, wouldn't
13 it raise questions with respect to the logic if this
14 commission were to award PEF a higher return on equity
15 than Tampa Electric Company given the fact that Tampa
16 Electric Company has greater risk than PEF?

17 A No, I would not agree with that because you're
18 basing the greater risk only on the credit ratings and
19 not on the whole operations of the company, which
20 includes nuclear in our case.

21 Q Were the credit -- are the credit agencies
22 aware that your company is pursuing nuclear?

23 A Yes, they are.

24 Q And isn't it true that the credit agencies
25 take into account the fact that you're pursuing nuclear

1 when they issue their ratings?

2 A The existing portfolio that we operate as well
3 as any future plans, yes.

4 Q And if you said -- on line 12, you said that
5 these capital expenditures significantly increase
6 Progress Energy's risk profile over Tampa Electric. Are
7 you suggesting that the rating agencies should rate you
8 lower than Tampa Electric given that statement?

9 A No, I'm not.

10 Q You mentioned Levy. As we sit here today, you
11 don't have any plans to construct Levy; correct?

12 A The current schedule is a 20-month delay on
13 the proposed schedule.

14 Q Right. And there's still a number of steps
15 that have to be taken with respect to Levy outside of
16 this proceeding, such as obtaining approval by the
17 Nuclear Regulatory Commission and renegotiating your EPC
18 contract; correct?

19 A Yes, both of those items are correct.

20 Q I wanted to refer you to page 17, and you take
21 issue with Dr. Woolridge's choice of a peer group
22 because he selected a peer group that had both operating
23 companies and parent companies. Do you see that?

24 A Yes.

25 Q Okay. Isn't it true that your expert also

1 selected a peer group that contained both operating
2 companies and parent companies?

3 A Yes, but I believe it's my understanding that
4 he made some adjustments for that to isolate the
5 electric utility operations of that entity.

6 Q What is that understanding based on?

7 A Going in and looking on the annual report
8 which I believe he said he pulled and he was able to,
9 where possible, delineate electric -- regulated electric
10 operations from non-regulated electric operations.

11 Q Mr. Rehwinkel asked you a bunch of questions
12 about purchase power agreements, and I don't want to
13 re-plow that ground. I just want to have you confirm,
14 if you know, that this Florida Public Service Commission
15 has never denied one dollar of recovery related to a
16 Progress Energy Florida purchase power agreement.

17 A They have not, but that wasn't the point I
18 made. As I said, when we went up there and tried to
19 convince them and educate them about the Florida
20 situation and saying it's as good as legislation if you
21 don't have legislation, and as I said, I think we
22 accomplished getting the lowest possible risk rating
23 that we could.

24 Q Don't you think that it's a little unfair to
25 ask this Commission to make a judgment based on the

1 thinking or the rationale of a third party who, you
2 know, is not here --

3 A It's a financial reality that --

4 Q If I can finish my question please. Who is
5 not here, who can't be asked questions about what goes
6 into their thinking? Don't you think, given that, that
7 that's unfair?

8 A I think in the exhibits, multiple exhibits
9 that we've provided, they are very clear in delineating
10 their analysis and their expectations.

11 Q And you provided your testimony, correct?

12 A Yes.

13 Q And the testimony provides words, but what
14 we're doing now in having conversations of having me ask
15 questions. Doesn't that draw out and help explain the
16 thinking behind your testimony?

17 A I think it only depends on how specific or how
18 in-depth their testimony was, just like the rating
19 agency articles.

20 Q Lawyers have a hard time cross-examining
21 documents, but let me move on.

22 The last sentence in your testimony, not the
23 one about does this conclude it, but this one that is on
24 page 27.

25 A I'm there.

1 Q You state, quote, "If their recommendations
2 were adopted, the change in tone of the Florida
3 regulatory environment and the resulting implications on
4 the company's cash flow and credit matrix would likely
5 result in a credit-rating downgrade which in turn would
6 jeopardize the company's ability to serve its customers
7 effectively and would ultimately result in higher
8 rates."

9 Given the discussions that you've had with
10 respect to questions by Mr. Rehwinkel where I think you
11 agreed you don't know what the credit rating agencies
12 will do, correct?

13 A Well, again, just based upon the indications
14 they've given in their written documents, but again, you
15 never know what they'll ultimately do.

16 Q Right. And given the fact that, with respect
17 to the Fitch report, when compared to the exhibit that
18 shows the return on equity decisions in 2009, you don't
19 know whether any of those companies were downgraded; do
20 you?

21 A As I said before when you asked, no.

22 Q All right. Isn't it overstated to suggest
23 that a credit rating downgrade will result -- which will
24 jeopardize the company's ability to serve the customers
25 effectively and would result in higher rates,

1 particularly given our discussion about the impacts of
2 having, you know, higher debt costs, 40 basis points?
3 Isn't that last statement really an overstatement?

4 A No.

5 MR. MOYLE: Okay. That's all I have. Thank
6 you.

7 ACTING COMMISSIONER EDGAR: Mr. Wright, do you
8 have questions on cross?

9 MR. WRIGHT: Yes, I do, Madam Chairman.

10 MS. BRADLEY: Madam Chairman.

11 ACTING COMMISSIONER EDGAR: Ms. Bradley.

12 MS. BRADLEY: Unfortunately I was out of the
13 room, and when Mr. Wright finishes, if I could have just
14 a moment, I would appreciate it.

15 ACTING COMMISSIONER EDGAR: You didn't have
16 the opportunity?

17 MS. BRADLEY: No, I unfortunately had started
18 sneezing and had to go outside.

19 ACTING COMMISSIONER EDGAR: I'm sorry. I
20 apologize also because my days are blurring a tad. So
21 deja vu all over again. Would you like -- Mr. Wright,
22 would you let Ms. Bradley proceed first?

23 MR. WRIGHT: Certainly.

24 ACTING COMMISSIONER EDGAR: If you're ready,
25 why don't you go ahead, Ms. Bradley.

BY MS. BRADLEY:

Q Thank you. Sir, I just have a few real quick questions. If you agree with me, we'll be right through them. No pressure.

Would you agree that a high ROE is not a guarantee of a better credit rating?

A There are no guarantees, but it certainly is supportive of a higher credit rating.

Q But standing alone?

A I said no, there is no guarantees.

Q Okay. Would you agree that the Commission, in considering the rate request by Progress, also has a duty to look at the needs of the customers and what is reasonable and fair for them as well?

A As I understand the Commission responsibilities, yes, that is a part of their role.

Q Okay. Did you hear Dr. -- and I'm hoping I'm pronouncing this correctly -- Vilbert's testimony last night?

A I was in and out during the course of the day.

Q Well, subject to check, he indicated that he believed that regulated utilities that are a monopoly are a safe investment, and would you agree with that?

A Well, based upon the stock performance, I

1 would say no because it's acted not like a safe
2 investment but like all other investments, equity
3 investments over the last year.

4 Q But are not regulated utilities considered a
5 safer risk than those that are not regulated?

6 A Generally, yes, that's true.

7 Q Okay. And also those that are monopolies are
8 generally considered safer than those that are
9 competitive in nature?

10 A Yes.

11 MS. BRADLEY: All right. Thank you.

12 No further questions.

13 ACTING COMMISSIONER EDGAR: Mr. Wright.

14 CROSS EXAMINATION

15 BY MR. WRIGHT:

16 Q Thank you, Madam Chairman.

17 Good afternoon, Mr. Sullivan. Welcome back.

18 A Thank you.

19 Q You're welcome.

20 I have a few questions following up on some
21 questions that Mr. Moyle asked you, and then I have a
22 few questions that I prepared on my own.

23 I'm not exaggerating on the downside. It's
24 not many questions.

25 ACTING COMMISSIONER EDGAR: I guess we'll see,

1 won't we?

2 BY MR. WRIGHT:

3 Q Yes, we will. Start the clock.

4 First, Mr. Moyle asked you about the current
5 Georgia Power Company return on equity which you report
6 in your testimony is 11.25 percent; correct?

7 A Yes.

8 Q Do you know whether that ROE was arrived at as
9 the result of a stipulation?

10 A I do not.

11 Q Mr. Moyle gave you a document that's actually
12 an exhibit I believe from the Florida Power & Light rate
13 case. It's this Fitch ratings from its U.S. Utilities
14 Power and Gas 2009 Outlook.

15 A Yes, I have that.

16 Q Thank you. I just want to clear up one thing.
17 He asked you about Avista Corporation and he asked you
18 what their rating was, and you responded double B plus
19 or BB plus. Do you recall that?

20 A I'll just look and see. Yes. Yes, that's
21 correct.

22 Q And in giving that answer, you are referring
23 to what is known as the IDR or issuer default rating;
24 correct?

25 A Yes, that was the rating I picked up.

1 Q Thanks. In your direct testimony you give the
2 ratings for Progress' --

3 A Senior unsecured.

4 Q Yeah, senior unsecured, et cetera. And the
5 senior unsecured rating for Progress is triple B,
6 correct?

7 A From S&P, I believe. I don't have the chart
8 in front of me, but --

9 Q Actually for Fitch it's A. For S&P it's
10 triple B plus, and for Moody's it's A three.

11 All I wanted to clarify is that the
12 corresponding rating on the table that you were
13 discussing with Mr. Moyle for Avista would be a BBB
14 minus per Fitch, correct?

15 A That is correct, yes. That is the senior
16 unsecured rating.

17 Q Thank you. And I note that Avista's outlook
18 is rated as positive by Fitch, correct?

19 A Yes, at the time of this publication, yes.

20 Q And am I correct that Progress' outlook is
21 rated as stable at this time?

22 A That is correct, based upon the last annual
23 review by each of the agencies.

24 Q Thank you. Another followup on a discussion
25 you had with Mr. Moyle. You spent some time discussing

1 short-term debt and commercial paper borrowing. Do you
2 know offhand what the jurisdictional percentage of
3 short-term debt in the company's capital structure is?

4 A At this point in time? I know we have
5 commercial paper outstanding, but I don't know what
6 percentage that would be as of today.

7 Q Well, I'm looking at Schedule D-1-A for the
8 projected 2010 test year, and that shows a 13-month
9 average short-term debt in the jurisdictional capital
10 structure of about \$38.6 million and a ratio of
11 06.2 percent. Does that sound about right to you?

12 A Subject to check, yes. As I said, those are
13 jurisdictional, and while I do spend time with that, I
14 spend more time with financial ratios outside of
15 financial.

16 Q I apologize, but you trailed off there. You
17 said --

18 A I spend more time dealing with investors on
19 book and GAP numbers than I do on jurisdictional
20 numbers.

21 Q Well, do you deal with them on the Progress
22 Energy Florida Company totals?

23 A Yes, that would be something they'd be looking
24 at more, I think, than jurisdictional breakdowns.

25 Q Well, the corresponding value for company

1 total shown on your MFR schedule is about \$72.9 million.

2 Does that sound about right?

3 A And that was average you said for the period
4 you --

5 Q The title -- the explanation of the schedule
6 is: Provide the company's 13-month average cost of
7 capital for the test year, the prior year and the
8 historical base year. I interpret that as indicating
9 that the dollar values shown are the projected 13-month
10 average values for 2010. Does that sound right to you?

11 A Yes. Yes, that's correct.

12 Q Thank you. Does the \$73 million sound about
13 right on an average annual basis for 2010?

14 A Yeah. I think the mins and the maxes would
15 arguably be higher or lower than that, but that sounds a
16 reasonable average, yes.

17 Q Thank you. I have a few questions for you
18 regarding page 6 of your testimony. At a couple of
19 points on that page you talk about the company's capital
20 requirements in relation to its nuclear program,
21 correct?

22 A Yes.

23 Q I will bet that you and I will agree that
24 investors are sophisticated. Would that be correct?

25 A I'm not sure after the last year or not, but

1 we hope most of them are, yes.

2 Q Would you agree that most investors are aware
3 of the capital recovery treatment given to Progress'
4 proposed Levy nuclear project through the nuclear cost
5 recovery clause?

6 A Absolutely. In fact, it's viewed as a very
7 supportive piece of legislation.

8 Q And would you agree that they largely would be
9 aware that the return on equity -- regulatory return on
10 equity rate embedded in the capital cost factor for
11 recovery of Levy -- of allowable Levy costs is
12 11.75 percent?

13 A I believe that is the currently-approved
14 recovery rate for preconstruction dollars, yes.

15 Q Would you agree that it's also the approved
16 recovery rate for what we might just call construction
17 interest?

18 A It's my understanding that would be the case
19 unless that was superseded by another stipulation or a
20 litigated outcome.

21 Q Okay. Continuing on page 6, and you talk
22 about the Tampa Electric decision in a few places, and I
23 just want to ask you about that.

24 May I approach, Madam Chairman?

25 ACTING COMMISSIONER EDGAR: Yes.

1 MR. WRIGHT: Thank you. Madam Chairman, I
2 have just handed the witness a copy of the Commission's
3 staff recommendation in the Tampa Electric rate case,
4 Docket 080317, issued on March 5th, 2009.

5 ACTING COMMISSIONER EDGAR: I remember it
6 well.

7 MR. WRIGHT: As do we all. Thank you.

8 BY MR. WRIGHT:

9 Q First, Mr. Sullivan, I just want to ask you,
10 if you would, turn to the first yellow tab there which
11 is on page 88.

12 A I'm there.

13 Q Okay. And you see there the staff's initial
14 recommendation in the case was that Tampa Electric's
15 rates be set using a return on common equity of
16 10.75 percent, correct?

17 A Yes, with a range, plus or minus 100 basis
18 points around that, yes.

19 Q And then if you'd look at page 172, which is
20 where the second yellow Post-it is located, you would
21 see that the staff -- staff's initial recommendation for
22 revenue requirements as the outcome of the case was
23 \$76.7 million?

24 A Yes, I see that.

25 MR. WRIGHT: May I approach, again, Madam

1 Chairman?

2 ACTING COMMISSIONER EDGAR: Yes, sir.

3 BY MR. WRIGHT:

4 Q Thank you. Madam Chairman, I've just handed
5 the witness a copy of Exhibit 297 which is already in
6 evidence in this case. It's a printout from I think
7 Yahoo Finance of Tampa Electric's stock prices during
8 the course of this year.

9 If you would, Mr. Sullivan, just look at Tampa
10 Electric's stock price on March 5, the date that the
11 recommendation was issued, and on March 6th, the date
12 following.

13 A I see those.

14 Q Thanks. And you'd agree that that information
15 shows that the stock price increased by about 67 cents
16 per share from March 5 to March 6?

17 A Yes, I would.

18 Q I'll aver to you that that's about
19 7.8 percent, but you're welcome to check the math, or
20 you can accept that subject to check.

21 A Subject to check is fine.

22 Q And would you also agree that the volume of
23 shares purchased on March 6th was more than twice the
24 volume of shares purchased on March 5?

25 A Yes, there was.

1 MR. WRIGHT: Thanks.

2 Madam Chairman, I have asked my colleague, Mr.
3 Moyle, to kindly distribute another exhibit which I
4 would like numbered.

5 ACTING COMMISSIONER EDGAR: Okay. I am
6 showing that this will be 319.

7 MR. WRIGHT: Thank you.

8 ACTING COMMISSIONER EDGAR: Title?

9 MR. WRIGHT: A short title, you can just call
10 it Dow 2/2/09-3/30/09.

11 MR. WALLS: I'm sorry. I didn't catch that.

12 MR. WRIGHT: It's the Dow Jones Industrial
13 Average for the period February 2nd, 2009 to March 30,
14 2009. I suggested a short title of Dow 2/2/09-3/30/09.

15 (Exhibit No. 319 marked for identification.)

16 BY MR. WRIGHT:

17 Q Mr. Sullivan, if you would, I'd like to ask
18 you to look at what is the last page of the document
19 there. That page happens to include the week of March
20 2nd through 6th.

21 A Yes, I'm there.

22 Q Okay. You'd agree that that week represented
23 the lowest values of the Dow Jones Industrial Average at
24 the bottom of the market this year, would you not?

25 A Again, I believe for the Dow Jones Average,

1 that's correct. I believe S&P might have been around
2 the 9th, but yeah, right around these two or three days
3 was the bottom.

4 Q Thank you. I think actually the Dow itself
5 bottomed on -- just flat out bottomed bottomed on Monday
6 the 9th, and you can see those numbers there.

7 A Yes.

8 Q 6547 was the close and 6440 was the low for
9 the date, correct?

10 A Yes, that's correct.

11 Q And if you'd look at -- again, looking at
12 March 5 to March 6th, you can do the arithmetic, but
13 would you agree that the close on the 6th was about half
14 a percent higher than the close on the 5th?

15 A Yes.

16 Q Further down on -- really toward the bottom of
17 page 6, you make the statement that, "Providing PEF a
18 lower return on equity than that awarded to Tampa
19 Electric would be viewed as inconsistent and negative by
20 the rating agencies and financial community and begin to
21 raise doubts as to the regulatory climate in the state
22 of Florida." Now, that's your testimony, right?

23 A Yes, it is.

24 Q I just want to ask you this: Are you
25 suggesting that, if the Florida Public Service

1 Commission believes that the appropriate return on
2 equity for Progress for purposes of setting rates in
3 this case is lower than that 10.5 percent, 10.75, ten
4 whatever -- are you suggesting that, if the Commission
5 believes it's lower than that, that they should still
6 give you all 11 and a quarter?

7 A I'm sorry. Could you state the question
8 again, please?

9 Q Sure. Are you suggesting by your testimony
10 that we just confirmed that, even if the Commission
11 thinks that the appropriate return on equity is less
12 than 11 percent for Progress, that they should still
13 give you 11 and a quarter because they gave that to
14 Tampa Electric?

15 A Well, I think we should get 12.54, to start
16 with, but again --

17 Q I understand that, but that wasn't the
18 question.

19 A Right. No, I don't agree with that.

20 Q I'm sorry. Pardon?

21 A I said no, I don't agree that we should get a
22 higher rating or a lower rating because of that.

23 Q Okay. You talked about other utilities in the
24 southeast. Now, you live in Raleigh; correct?

25 A Yes.

1 Q And you're aware, I'll bet, that Duke Energy
2 has a rate case pending in North Carolina; are you?

3 A Yes.

4 Q And do you recall what return on equity Duke
5 is seeking in that proceeding?

6 A I do not know what they're asking for in this
7 proceeding.

8 Q Okay. I will aver to you it's in evidence per
9 Dr. Vander Weide they are seeking an 11 and a half
10 percent return on equity. That's in evidence otherwise.

11 Do you know whether Duke's credit outlook is
12 stable or positive, or do you know?

13 A I don't know what their current rating
14 situation is.

15 MR. WRIGHT: Thank you, Madam Chairman and
16 Mr. Chairman. Mr. Sullivan, that's all the questions I
17 have.

18 CHAIRMAN CARTER: Thank you, Mr. Wright.
19 Staff, you're recognized.

20 CROSS EXAMINATION

21 BY MS. FLEMING:

22 Q Thank you. Good afternoon, Mr. Sullivan.

23 A Good afternoon.

24 Q I just have a few brief questions for you.
25 Could I have you turn to your exhibit TRS-15, please.

1 A I'm there.

2 Q And looking at this, this is the August, 2009
3 Moody's report; is that correct?

4 A That's correct.

5 Q And this report provides guidance on Moody's
6 approach to assigning credit ratings to electric utility
7 companies, is that correct?

8 A Yes, that's correct.

9 Q Could I have you turn to page 31 of this
10 exhibit, please.

11 A I'm there.

12 Q And I'm looking in the middle of the page
13 under the heading "Factors Determining the Treatment of
14 PPAs." Do you see that?

15 A Yes.

16 Q Could you please read aloud the first three
17 sentences of that paragraph following that section?

18 A "Because PPAs have a wide variety of financial
19 and regulatory characteristics, each particular
20 circumstance may be treated differently by Moody's. The
21 most conservative treatment would be to treat the PPA as
22 a debt obligation of the utility as, by paying the
23 capacity charge, the utility is effectively providing
24 the funds to service the debt associated with the power
25 station. At the other end of the continuum, the

1 financial obligations of the utility could also be
2 regarded as an ongoing operating cost with no long-term
3 capital component recognized."

4 Q Thank you. During your direct testimony, we
5 had a discussion regarding PEF's recovery of purchase
6 power costs when you were on the stand. Do you remember
7 that?

8 A Yes, I do.

9 Q And you testified that PEF recovered the
10 capacity payments and fuel costs associated with the
11 purchase power agreements through the cost recovery
12 clauses, is that correct?

13 A Yes, that's my understanding.

14 Q Okay. Do you see the second bullet that's
15 titled "Pass-through Capability"?

16 A Yes, I do.

17 Q Could you please read aloud the first three
18 sentences of that section, please?

19 A "Some utilities have the ability to pass
20 through the costs of purchasing power under PPAs to
21 their customers. As a result, the utility takes no risk
22 that the cost of power is greater than the retail price
23 it will receive. Accordingly, Moody's regards these PPA
24 obligations as operating costs with no long-term-debt
25 like attributes. PPAs with no pass-through ability have

1 a greater risk profile for utilities. In some markets
2 the ability to pass through costs of a PPA is enshrined
3 in the regulatory framework, and in others it can be
4 dictated by market dynamics. As the market becomes more
5 competitive, the ability to pass through costs may
6 decrease, and as circumstances change, Moody's treatment
7 of PPA obligations will alter accordingly."

8 Q Okay. Thank you. So, as a result of the
9 Commission-approved cost recovery mechanisms for the
10 costs associated with PPAs, isn't it true then that
11 Moody's states it will treat PPAs or past PPA
12 obligations as operating costs with no long-term-debt
13 like attributes?

14 A I believe that's partially true because some
15 of the PPAs are classified as operating leases and
16 capital leases. So those would get picked up while they
17 would most likely exclude PPAs that don't fit into those
18 two categories.

19 Q And now could I have you turn to your exhibit
20 TRS-21, please.

21 A I'm there.

22 Q And this is a Moody's Global Infrastructure
23 Finance Report dated June, 2009. Is that correct?

24 A Yes.

25 Q And turning to page 10 of that report --

1 A I'm there.

2 Q In this section, it's titled, "New Nuclear
3 Generation, Ratings Pressure Increasing." Do you see
4 that?

5 A Yes.

6 Q And in this report Moody's states that, in
7 order to defend existing ratings or to limit negative
8 rating actions, they will look for investor-owned
9 utilities to do four specific items. Do you see those?

10 A Yes, I do.

11 Q Could you please read aloud those four items
12 that Moody's suggests that the IOUs do, take?

13 A No. 1 is, "Create strategic partnerships to
14 share costs and risks; No. 2, increase reliance on
15 equity as a component to financing plans; No. 3,
16 moderate their dividend policies to retain cash flow;
17 and 4, adopt a back-to-basics focus on core electric
18 utility operations posing less distractions for
19 management."

20 Q Now, during your testimony, we discussed these
21 brief bullet points. Do you recall that during your
22 deposition?

23 A Yes, I do.

24 Q And I believe that it was your testimony
25 during that deposition that it is the discretion of

1 Progress Energy management as well as the Board of
2 Directors as to how closely the company will comply with
3 suggestions by Moody's regarding how a company can
4 mitigate the perceived risk associated with new nuclear
5 construction. Isn't that correct?

6 A Yes.

7 Q And even though Moody's in this article has
8 written about the risks associated with new nuclear
9 construction and it has made specific suggestions to
10 IOUs of what they can do to maintain their existing bond
11 rating through the construction cycle, it is ultimately
12 up to the company, meaning PEF, PEF's management to
13 determine whether those suggestions will be followed.
14 Is that correct?

15 A Yes. This guidance is extremely helpful in
16 setting those expectations, and then management and the
17 Board acts accordingly.

18 MS. FLEMING: Thank you. We have no further
19 questions.

20 CHAIRMAN CARTER: Commissioner Skop.

21 COMMISSIONER SKOP: Thank you, Mr. Chairman,
22 just briefly. Good afternoon, Mr. Sullivan.

23 THE WITNESS: Good afternoon.

24 COMMISSIONER SKOP: If I could turn your
25 attention to page 17 of your rebuttal testimony, please,

1 lines 14 through 17.

2 THE WITNESS: I'm there.

3 COMMISSIONER SKOP: Okay. And on those lines
4 you discuss how the 2008 book equity ratio was lower due
5 to timing differences associated with the fuel cost
6 recovery and fuel hedging. Can you briefly explain
7 that? Was that resultant from cash flow timing
8 resultant of commission approval in 2007 and 2008?

9 THE WITNESS: I don't think it was as much
10 commission approval because our fuel case was approved.
11 It had to do with the timing and the magnitude of
12 changes in the markets. We had two main drivers of
13 debt, or that increased debt, which, in essence, lowered
14 equity as a result of that, and they had to do primarily
15 with margin postings associated with the gas hedging
16 portfolio that I referred to earlier.

17 COMMISSIONER SKOP: So that was basically the
18 change in the volatility of the fuel and the hedging
19 losses that factored into that, is that correct?

20 THE WITNESS: Yes. And to give you an order
21 of magnitude, we went from holding \$500 million to
22 posting \$500 million in about six months.

23 COMMISSIONER SKOP: All right. Very well.

24 Turning to page 19 in your rebuttal testimony,
25 please --

1 THE WITNESS: Yes.

2 COMMISSIONER SKOP: -- lines 9 through 14.

3 THE WITNESS: Uh-huh.

4 COMMISSIONER SKOP: And on that you I guess
5 rebut Dr. Woolridge's presumption that the common equity
6 ratio on a jurisdictional basis is approximately
7 47.51 percent. Can you briefly explain the adjustment
8 and the correction there, please.

9 WITNESS: Yes, we believe that the -- or it's
10 my testimony that his calculation of the real
11 recommended common ratio does not properly incorporate
12 the jurisdictional factor adjustment for PPAs, and that
13 drives the difference.

14 COMMISSIONER SKOP: All right. So he did not
15 do the imputed debt adjustment in his analysis that
16 would have increased the equity, is that correct?

17 THE WITNESS: That is in the last sentence.
18 It would increase it to 49.2 from 47.51.

19 COMMISSIONER SKOP: Okay. Very well. If I
20 could briefly turn your attention to what has been
21 previously marked as Exhibit 296, please, and I don't
22 know if you have that available, but I'm sure your
23 counsel might.

24 CHAIRMAN CARTER: Staff, do you have one you
25 can share with the witness?

1 MS. FLEMING: We are looking for it.

2 CHAIRMAN CARTER: Okay. Let's take a moment.
3 Thank you, Mr. Walls. Commissioner Skop.

4 COMMISSIONER SKOP: Thank you, Mr. Chairman.

5 I'll give Mr. Sullivan a moment to take a look
6 at that page, please.

7 THE WITNESS: I have reviewed it.

8 COMMISSIONER SKOP: Subject to check, this is
9 basically a summary of Florida Public Service Commission
10 surveillance reports for earnings for Progress Energy of
11 1998 to 2008; correct?

12 THE WITNESS: Yes.

13 COMMISSIONER SKOP: Okay. Now, assuming that
14 the numbers stated for ROE in the last column are
15 purported to be accurate -- and again, I think Progress
16 had reserved the right to check the accuracy of that,
17 but do you see the years 1999 to 2004 and the ROEs
18 identified for those years?

19 THE WITNESS: Yes, I do.

20 COMMISSIONER SKOP: Subject to check, for the
21 years 1998 to 2004, would you agree that the average ROE
22 would be approximately 13.09 percent for those years?

23 THE WITNESS: Subject to check for those
24 years, I would agree.

25 COMMISSIONER SKOP: Okay. All right. Now, if

1 I could ask you to look briefly at years 2005 to 2008.

2 THE WITNESS: Yes.

3 COMMISSIONER SKOP: Subject to check, would
4 you agree that the average ROE for those years, 2005
5 through 2008, is approximately 9.8 percent?

6 THE WITNESS: I would agree.

7 COMMISSIONER SKOP: Okay. I guess my question
8 regarding the presentation of this information is, as
9 treasurer, do you have an opinion as to what may have
10 contributed to the sharp decline in the realized ROE
11 during the settlement period as opposed to the
12 presettlement period generally from 2002 to 2004?

13 THE WITNESS: I think, in reflecting back over
14 those time periods, certainly you have a weakening and
15 ultimately recessionary situation in the second group.
16 The trend over that time period, as I said, is downward.
17 If you look at the first group that you outlined, you
18 have the tech bubble that burst, and then you had 9-11
19 in there. So again, I think overall that is a much more
20 robust economic time in the first group of years you
21 highlighted versus the second group of years.

22 Also I think our investment in plant increased
23 significantly over that second group of time as we
24 implemented post-acquisition a commitment to excellence
25 and then addition of new plant and uprates.

1 COMMISSIONER SKOP: Okay. So the majority of
2 that, if I heard you correctly, may have been
3 improvements -- not improvements, but additions to
4 capital in terms of new generation and such?

5 THE WITNESS: Yes, I think that going up and
6 then revenues declining due to the economy caused the
7 negative direction of ROE.

8 COMMISSIONER SKOP: All right. Just I believe
9 three additional questions.

10 I think, in looking at your rebuttal
11 testimony, in order to maintain the financial integrity
12 of the company, including credit quality, debt ratings,
13 I think you emphasized the importance of strong cash
14 flow from operations; is that correct?

15 THE WITNESS: Yes.

16 COMMISSIONER SKOP: And moving on to two
17 additional points, and I'm sorry that -- I think it got
18 punted to you, and it's in the gray area between ROE and
19 executive compensation, so I'm going to ask the question
20 and hopefully you're the right witness, but do you
21 believe that there is a tradeoff between awarded ROE and
22 the amount of executive compensation that shareholders
23 should be required to absorb?

24 THE WITNESS: I think that that's one
25 component because, again, we -- while we're mostly

1 regulated, we do do some other things, but I think, yes,
2 that's the -- some alignment with that would be
3 applicable because that does roll up into, again, the
4 overall company performance.

5 COMMISSIONER SKOP: Okay. And the reason I
6 was asking is, you know, I was wondering if that could
7 be viewed similarly to a leverage formula whereas, if
8 you have higher equity, less risk, less ROE, whereas you
9 have, you know, more debt, higher risk, a higher ROE,
10 and I'm looking at that in the same rationalization and
11 wondering if there is any correlation based on your
12 previous response. Is that an appropriate way to look
13 at it?

14 THE WITNESS: Again, I think there are other
15 factors, but in general that is directionally correct,
16 yes.

17 COMMISSIONER SKOP: Okay. And just the last
18 question: Why is it not appropriate for executive
19 compensation above a certain threshold level to be
20 absorbed by shareholders utilizing the retained earnings
21 of the company rather than having that be recovered
22 through the ratepayers?

23 THE WITNESS: I don't really have a good
24 answer for that. That's certainly a different way of
25 looking at it than the historical ratemaking process

1 that I'm aware of.

2 COMMISSIONER SKOP: All right. Thank you very
3 much.

4 CHAIRMAN CARTER: Thank you, Commissioner.
5 Commissioners, anything further from the
6 bench. Redirect?

7 MR. WALLS: Briefly.

8 CHAIRMAN CARTER: You're recognized.

9 REDIRECT EXAMINATION

10 BY MR. WALLS:

11 Q Mr. Sullivan, I wanted to direct your
12 attention to page 7, lines 2 to 4 of your rebuttal
13 testimony where you had referenced the other utilities
14 in the southeast and their ROEs, and you may recall that
15 Mr. Moyle was asking you questions regarding when these
16 ROEs were issued or when the orders came out. Do you
17 recall that?

18 A Yes, I do.

19 Q Does it matter, when you're competing in the
20 market for capital, when these ROE awards were issued?

21 A No. If these are the existing returns that
22 the companies are allowed to earn, the timing of that
23 decision is not relevant.

24 Q And he also asked you a few questions about
25 Idaho Power and that you compete with Idaho Power. Do

1 you recall that?

2 A Yes, I do.

3 Q Do you also compete with the companies that
4 are listed here on page 7 at lines 2 through 4 for
5 capital?

6 A Yes, probably more so because they're more
7 comparative in size and operations than Idaho Power
8 would be.

9 Q You may also recall a series of questions that
10 Mr. Moyle asked you about his customers' preference for
11 the utility to be downgraded. Do you recall that?

12 MR. MOYLE: I'm not exactly sure it was stated
13 that way, but --

14 MR. WALLS: That's the way I heard it.

15 MR. MOYLE: -- go ahead.

16 THE WITNESS: I'll answer the question.

17 BY MR. WALLS:

18 Q Do you recall that?

19 A It was certainly inferred in his statements.
20 I don't know if he came right out and said that, but the
21 accumulation of his comments would lead to that, yes.

22 Q Well, based on your experience over 25 years
23 dealing with investors on both sides of the capital
24 market, debt and equity, how do you think the investment
25 community would react to a downgrade?

1 MR. MOYLE: I object to the extent it calls
2 for speculation. We spent, you know --

3 CHAIRMAN CARTER: Overruled, overruled. You
4 may answer.

5 THE WITNESS: I'm sorry. Could you repeat,
6 please?

7 BY MR. WALLS:

8 Q Yes. Based on your 25 years of experience
9 dealing with the capital markets, both the debt and
10 equity side, how would you think the investment
11 community would react to a downgrade of the utility?

12 A It would react negatively.

13 Q I'm sorry. I didn't catch the answer.

14 A It would react negatively.

15 Q All right. Thank you.

16 And one final question. You were asked about
17 the June, 2009 Moody's report regarding nuclear and the
18 four factors that Moody's had recommended that utilities
19 follow. Do you recall that?

20 A Yes, I do.

21 Q And I believe one of them was adopt a
22 back-to-basics focus on core electric utility
23 operations.

24 A Yes.

25 Q Has the company done that?

1 A Yes, we have.

2 Q Okay. And, in fact, you've also increased
3 equity in your company this year; right?

4 A Yes, we have.

5 MR. WALLS: No further questions.

6 CHAIRMAN CARTER: Exhibits?

7 MR. WALLS: Yes, we have -- if I can find the
8 list.

9 CHAIRMAN CARTER: It's on page -- starting at
10 page 44.

11 MR. WALLS: Exhibits 233, 233, 234, 235 --

12 CHAIRMAN CARTER: It goes to 245?

13 MR. WALLS: Yeah, to 245. We would move in
14 evidence.

15 CHAIRMAN CARTER: Are there any objections?

16 Okay. Hang on a second before we go to the
17 back pages.

18 Without objection, show it done.

19 (Exhibit Nos. 233, 234, 235, 236, 237, 238,
20 239, 240, 241, 242, 243, 244 and 245 entered into the
21 record.)

22 CHAIRMAN CARTER: Now let's go to the back
23 pages. Mr. Wright.

24 MR. WRIGHT: 319, Mr. Chairman, move it.

25 CHAIRMAN CARTER: Are there any objections?

1 MR. WALLS: No objection.

2 CHAIRMAN CARTER: Without objection, show it
3 done.

4 (Exhibit No. 319 was received in evidence.)

5 CHAIRMAN CARTER: Anything further for this
6 witness, staff or the parties? Commissioner Skop?

7 COMMISSIONER SKOP: Thank you, Mr. Chair.

8 Just one clarification to the last question
9 you answered with respect to that you increased the
10 equity in your company. Do you remember the last
11 response that you gave?

12 THE WITNESS: Yes.

13 COMMISSIONER SKOP: Is that for Progress
14 Energy at the corporate parent or would that be Progress
15 Energy Florida?

16 THE WITNESS: Well, again, given that the
17 entity or one view of the entity is a consolidated, yes,
18 it affects the whole entity, depending upon, you know,
19 ultimately where it gets invested, but it does raise the
20 whole entity, yes.

21 COMMISSIONER SKOP: Thank you.

22 CHAIRMAN CARTER: Thank you, Commissioner.

23 Anything further from the bench? Anything
24 further for this witness?

25 Thank you, sir. You may be excused. Have a

1 great day and call your next witness.

2 MR. BURNETT: Mr. Chair.

3 CHAIRMAN CARTER: Yes, sir.

4 MR. BURNETT: With your indulgence, may I have
5 five minutes or so with the parties and colleagues?

6 CHAIRMAN CARTER: Let's do this.

7 Commissioners, we are going to take a quick
8 break. We will come back at -- is that 25 after -- 25
9 after.

10 (Recess.)

11 CHAIRMAN CARTER: We are back on the record.

12 Commissioners, I just wanted -- we have got a
13 preliminary matter, and I think that everyone will be
14 happy to hear this.

15 Mr. Burnett, you're recognized.

16 MR. BURNETT: Thank you, Mr. Chairman.

17 Mr. Chairman, in working with the intervenors
18 to eliminate the portions of Mr. Toomey's testimony that
19 dealt with Mr. Marz testimony, which we would need to
20 strike, we also took the effort to look and see through
21 Mr. Toomey's testimony of what, if anything, is left
22 that other witnesses haven't covered. And Progress has
23 been able to come to the determination that the record
24 is sufficient from our perspective as we stand, and we
25 will withdraw Mr. Toomey's rebuttal at this time. And I

1 believe that would conclude our rebuttal case.

2 **CHAIRMAN CARTER:** Mr. Wright.

3 **MR. WRIGHT:** We certainly have no objection,
4 and we're grateful for the great working relationship we
5 have.

6 Thank you.

7 **CHAIRMAN CARTER:** Mr. Moyle.

8 **MR. MOYLE:** Thank you.

9 **CHAIRMAN CARTER:** Wow, Mr. Moyle, one word.

10 Ms. Bradley.

11 **MS. BRADLEY:** We concur.

12 **CHAIRMAN CARTER:** Mr. Rehwinkel.

13 **MR. REHWINKEL:** Yes. Mr. Burnett saved all
14 the parties three hours of cross from me, literally. I
15 really appreciate the collegial effort that everyone
16 showed, despite our adversarial purposes here.

17 **CHAIRMAN CARTER:** Outstanding, Mr. Rehwinkel.

18 Staff, thank you for your hard work.

19 Commissioners, before we adjourn, let me just
20 go and see if there are any closing comments.

21 Commissioner Skop, you're recognized for
22 closing comments.

23 **COMMISSIONER SKOP:** Thank you, Mr. Chairman.

24 I just wanted to commend our staff, both the
25 technical and legal staff, for the hard work,

1 preparation, and dedication that they have shown during
2 the course of these proceedings, and also recognize the
3 parties for the professional manner in which they have
4 litigated the case and conducted themselves.

5 **CHAIRMAN CARTER:** Thank you.

6 I'm coming from my left to my right.

7 Commissioner Edgar.

8 **COMMISSIONER EDGAR:** It's a beautiful day in
9 the state of Florida, Mr. Chairman.

10 **CHAIRMAN CARTER:** Another great day.

11 And I want to say to the parties how you
12 conducted yourself with the highest level of expertise.
13 I'm privileged and pleased to be in the presence of so
14 many outstanding legal minds. Things were tight, but
15 they were right.

16 With that, Commissioners --

17 **COMMISSIONER ARGENZIANO:** Mr. Chair.

18 **CHAIRMAN CARTER:** Commissioner Argenziano,
19 you're recognized.

20 **COMMISSIONER ARGENZIANO:** Just to reiterate
21 just very quickly. I really do appreciate staff's hard
22 work on this. They did a great job, and all involved.
23 And nobody was killed while we did it. No doors, I
24 mean, nothing really bad happened, so I appreciate
25 everybody's hard work. And thank you.

1 **CHAIRMAN CARTER:** Thank you, Commissioner.

2 And to you, Commissioner Argenziano, I want to
3 express our apologies for the technology concerns and
4 problems that we have, but we think that you were able
5 to get in most times and we appreciate your patience on
6 that.

7 **COMMISSIONER ARGENZIANO:** Mr. Chair, I forgot
8 to thank our technical staff. Really, they have done a
9 great job in enabling me to be part of the meetings, the
10 proceedings, and even the service hearings while I have
11 been recuperating. I really can't appreciate it -- say
12 how much more I appreciate it. They did a great job,
13 and I think it was just about perfect.

14 **CHAIRMAN CARTER:** And to the greatest public
15 service commission staff in the cosmos, you are the
16 best.

17 With that, Commissioners, we are adjourned.

18 (The hearing concluded at 3:28 p.m.)

CERTIFICATE OF REPORTER

STATE OF FLORIDA)

COUNTY OF LEON)

WE, RAY D. CONVERY and JANE FOUROT, do hereby certify that we were authorized to and did stenographically report the foregoing proceedings at the time and place herein stated.

IT IS FURTHER CERTIFIED that the foregoing transcript is a true record of our stenographic notes.

I FURTHER CERTIFY that we are not a relative, employee, attorney, or counsel of any of the parties, nor are we a relative or employee of any of the parties' attorney or counsel connected with the action, nor are we financially interested in the action.

DATED this 5th day of October, 2009, at Tallahassee, Leon County, Florida.

RAY D. CONVERY

JANE FOUROT
