PROCEEDINGS: SPECIAL AGENDA

COMMISSIONERS  
PARTICIPATING: CHAIRMAN NANCY ARGENZIANO  
COMMISSIONER LISA POLAK EDGAR  
COMMISSIONER NATHAN A. SKOP  
COMMISSIONER DAVID E. KLEMENT  
COMMISSIONER BEN A. "STEVE" STEVENS III

DATE: Wednesday, January 13, 2010

TIME: Commenced at 9:30 a.m.

PLACE: Betty Easley Conference Center  
Room 148  
4075 Esplanade Way  
Tallahassee, Florida

REPORTED BY: LINDA BOLES, RPR, CRR  
JANE FAUROT, RPR  
RAY CONVERY, RPR

DOCUMENT NUMBER-DATE

00360 JAN 14 2

FPSC-COMMISSION CLERK

## P R O C E E D I N G S

1  
2           **CHAIRMAN ARGENZIANO:** We're going to call our  
3 meeting to order. Welcome to everyone. I see we have  
4 some guests also from AARP. Welcome to your state  
5 government and your Public Service Commission. We're  
6 glad you're here today.

7           And what I was going to do is just open -- if  
8 the Commissioners have any opening comments.

9           Commissioner Stevens.

10          **COMMISSIONER STEVENS:** Thank you,  
11 Commissioner.

12          And, again, I know I sound like a broken  
13 record player, but I want to express my appreciation to  
14 staff. Every one of these guys have helped me a lot get  
15 through a lot of information in a very short period of  
16 time and they've been very patient with some of the  
17 questions that I've asked. So thank you very much. And  
18 they've done an outstanding job putting this together.  
19 Thank you.

20          **CHAIRMAN ARGENZIANO:** Thank you.

21          Commissioner Edgar.

22          Commissioner Klement.

23          **COMMISSIONER KLEMENT:** Thank you, Madam Chair.  
24 I would like to reiterate that also, the appreciation to  
25 all the staff who helped me understand many of these --

1 all of these complex issues in order to be able to be up  
2 to speed. It's been a long process, but a very valuable  
3 one. So thank everyone.

4 **CHAIRMAN ARGENZIANO:** And not just to the AARP  
5 members, anyone else who's here today visiting their,  
6 their Public Service Commission, welcome. We're glad  
7 you're here today.

8 I'm just going to say about, we're probably  
9 going to do lunch around 1:00. I know there was some  
10 discussion of maybe calling out for like pizza or  
11 something where our staff can get it ahead of time so we  
12 can have lunch immediately and get back as quick as  
13 possible because it's going to be a long day. So,  
14 staff, about, probably about 12:30 would be a good time  
15 to call. And then we'll get together with what  
16 everybody wants and all that stuff. And hopefully  
17 1:00 we break for lunch, eat lunch and get back here at  
18 2:00 and give staff some time to do what they need to  
19 do. So just for planning purposes.

20 Commissioner Skop, you're recognized.

21 **COMMISSIONER SKOP:** Thank you, Madam Chair.

22 I just wanted to take this opportunity in  
23 opening comments this morning to thank our dedicated  
24 staff for all of their hard work that they've put forth  
25 in this rate case. As we get ready to move forward with

1 deciding the case before us today, I look forward to  
2 deciding that case on the merits in a fair and impartial  
3 manner.

4 Before we get into that, however, there are a  
5 couple of points that I think would be good to warrant  
6 clarification for the members in the audience, for  
7 people that may be listening in relation to what it is  
8 that we're here to decide today in this base rate  
9 proceeding. So I'd like to take this opportunity, Madam  
10 Chair, if I could, to ask some questions to Mr. Willis,  
11 if that would be appropriate. And just let, give a  
12 background explanation on cost recovery and such, if  
13 that would be appropriate. All right. Thank you.

14 Mr. Willis, I just wanted to, to walk through  
15 a couple of points. This is a base rate proceeding for  
16 the base rate component of a customer's bill; is that  
17 correct?

18 **MR. WILLIS:** That's correct, Commissioner.

19 **COMMISSIONER SKOP:** Okay. And this proceeding  
20 is limited to strictly base rates.

21 **MR. WILLIS:** It's limited strictly to base  
22 rates.

23 **COMMISSIONER SKOP:** Okay. And basically base  
24 rates, we have a base rate and all the clauses on the  
25 bill, and basically the clauses are about 61 percent of

1 the consumer's bill, with the base rates being the  
2 remainder subject to taxes and such; is that correct?

3 **MR. WILLIS:** They're between 51 and  
4 60 percent, I believe.

5 **COMMISSIONER SKOP:** Okay. That's the clauses,  
6 not the base rates.

7 **MR. WILLIS:** The clauses. Yes.

8 **COMMISSIONER SKOP:** Okay. So the remainder,  
9 portion of that, 30 or something percent, is the base  
10 rates; is that --

11 **MR. WILLIS:** That's correct.

12 **COMMISSIONER SKOP:** Okay. All right. Just  
13 with respect to the cost recovery for fossil generating  
14 assets, could you briefly explain how the Commission  
15 goes through the need determination approval process and  
16 the ultimate cost recovery for fossil generating assets  
17 placed in service?

18 **MR. WILLIS:** As far as the need determination,  
19 before a fossil fuel plant is actually, construction is  
20 actually started, the Commission does make a  
21 determination on whether or not that plant is needed.  
22 Once the plant is, has been determined that there's a  
23 need, the company will commence construction on a  
24 timeframe.

25 During the construction period, the

1 Commission's practice is normally to allow AFUDC to be  
2 accumulated. Which AFUDC is the allowance for funds  
3 used during construction, which is normally the  
4 utility's cost of capital for their debt and equity  
5 being put into the project to be capitalized under the  
6 cost of construction. The total cost of construction  
7 plus the allowance for funds used during construction  
8 would normally be capitalized at the point the plant  
9 goes into commercial service. That would normally --  
10 could end up in a, in a rate case proceeding.

11 **COMMISSIONER SKOP:** Okay. Thank you. And  
12 then with respect to the AFUDC that you mentioned, the  
13 carrying costs that are incurred while the plant is  
14 being constructed, what is the current AFUDC rate for  
15 FPL?

16 **MR. WILLIS:** Mr. Slemkewicz may know that.

17 **MR. SLEMKEWICZ:** No, I do not know what the  
18 current rate is off the top of my head.

19 **COMMISSIONER SKOP:** Subject to check, would it  
20 be about 11.75 percent or --

21 **CHAIRMAN ARGENZIANO:** I think we have --

22 **COMMISSIONER SKOP:** I think we have the  
23 answer.

24 **CHAIRMAN ARGENZIANO:** I think we have the  
25 answer coming up from staff.

1                   **MR. MAUREY:** Andrew Maurey, Commission staff.  
2                   It's 7.41 percent.

3                   **COMMISSIONER SKOP:** Okay. And that's the  
4                   weighted cost of capital.

5                   **MR. MAUREY:** Weighted cost of capital.

6                   **COMMISSIONER SKOP:** Okay. All right. Great.  
7                   Thank you.

8                   Now with respect, as you mentioned, for  
9                   generating assets that are placed in service pursuant to  
10                  being approved via a need determination process, the  
11                  company is not allowed to recover its costs other than  
12                  the AFUDC which is capitalized, but the cost of the  
13                  project is actually recovered once the fossil generating  
14                  asset is placed in service; is that correct?

15                  **MR. WILLIS:** That's the normal course of  
16                  business for the Commission is to allow that when they  
17                  go in commercial service.

18                  **COMMISSIONER SKOP:** Okay. And that would  
19                  either be via a GBRA adjustment or a rate case  
20                  proceeding; is that correct?

21                  **MR. WILLIS:** That's, that's correct. That's  
22                  been past practice.

23                  **COMMISSIONER SKOP:** Okay. Now with respect to  
24                  the case before us today, the WCEC 1 and 2, which is  
25                  West County 1 and 2 generating plants which are assets

1 in, I believe, Palm Beach County, those were already  
2 included with the GBRA -- or actually they will be  
3 included in the test year in the GBRA adjustment for  
4 2010 because they will be placed in service in 2010, and  
5 that's pursuant to the 2005 settlement agreement; is  
6 that correct?

7 **MR. WILLIS:** The company received those  
8 through the generation base rate adjustment in 2009 and  
9 they will be rolled into the 2010 test year.

10 **COMMISSIONER SKOP:** Okay. And then with  
11 respect to WCEC 3, the WCEC 3 generating asset is  
12 scheduled to come into service in the 2011 test year,  
13 and that would be the subsequent year adjustment that  
14 FPL is seeking in this rate case; is that correct?

15 **MR. WILLIS:** FPL is not requesting West County  
16 3 through the 2011 test year. Their case is filed,  
17 requested that they get that through the generation base  
18 rate adjustment if it's continued.

19 Staff's recommendation indicates that if the  
20 generation base rate adjustment is not approved but the  
21 2011 subsequent test year is, that the West County 3 be  
22 included in that 2011 subsequent test year.

23 **COMMISSIONER SKOP:** Okay. Thank you. Now  
24 with respect to the Riviera Beach and the Canaveral  
25 repowering, those plants are not due to come into

1 service for quite some time; is that correct?

2 **MR. WILLIS:** My recollection is, well, 2012,  
3 2013, I believe.

4 **COMMISSIONER SKOP:** Okay. Now with respect to  
5 the rate case before us today, the rate case before us  
6 today has nothing to do with the cost recovery for the  
7 repowering on Riviera Beach and Canaveral; is that  
8 correct?

9 **MR. WILLIS:** They are not included in this  
10 rate case.

11 **COMMISSIONER SKOP:** Okay. So, again, this has  
12 absolutely nothing to do, this rate case proceeding has  
13 absolutely nothing to do with the cost recovery for  
14 those two proposed plants; is that correct?

15 **MR. WILLIS:** Cost recovery has not been  
16 requested in this rate case.

17 **COMMISSIONER SKOP:** Okay. Now in, in  
18 fairness, to your knowledge has the Commission ever  
19 denied the cost recovery for prudently incurred costs  
20 associated with placing a new generating asset into  
21 service?

22 **MR. WILLIS:** Commissioner, no, not to my  
23 knowledge.

24 **COMMISSIONER SKOP:** Okay. Great. Now just,  
25 Madam Chair, just two more points.

1           If we can briefly talk about nuclear cost  
2 recovery, and if, if Mr. Willis might be able to just  
3 give a little bit insight how costs are recovered under  
4 the nuclear cost recovery clause and statute.

5           **CHAIRMAN ARGENZIANO:** Excuse me one second.  
6 Just to make sure, can all the people in the back hear  
7 okay? If not, raise your hands. Everybody is okay?  
8 All right. Just checking. Thank you.

9           Mr. Willis.

10          **MR. WILLIS:** Okay. Commissioner, the nuclear  
11 cost recovery statute, the statute does provide that any  
12 preconstruction costs will be collected upfront through  
13 the capacity cost recovery clause. The utility each  
14 year will be able to collect the allowance for funds  
15 used during construction to build that power plant.  
16 When it goes into commercial service the statute  
17 provides that the cost of the construction plant will be  
18 rolled into base rates at that point in time.

19          **COMMISSIONER SKOP:** Okay. So with respect to  
20 nuclear cost recovery or the recovery of costs for  
21 nuclear related construction, that's governed by the  
22 statutory provision that provides for complete cost  
23 recovery of both the preconstruction costs and the  
24 actual construction costs irrespective of plant  
25 completion; is that correct?

1           **MR. WILLIS:** That's correct.

2           **COMMISSIONER SKOP:** Okay. All right. Now  
3 with respect to the two new nuclear units, Turkey Point  
4 6 and 7, would it be correct to understand that the  
5 current base rate proceeding before us has nothing to do  
6 with the recovery of costs for those two projects?

7           **MR. WILLIS:** They have not been included in  
8 this rate case.

9           **COMMISSIONER SKOP:** Okay. And that's because  
10 they're handled by the nuclear cost recovery clause; is  
11 that correct?

12          **MR. WILLIS:** That's correct.

13          **COMMISSIONER SKOP:** Okay. All right. Thank  
14 you.

15                 Now just one or two more additional points,  
16 again, background for the people in the audience. With  
17 respect to the three solar projects that have been  
18 approved by the Commission that FPL has either placed in  
19 service or will place in service in the near future, can  
20 you briefly discuss the cost recovery mechanism for  
21 those solar projects?

22          **MR. WILLIS:** Solar projects normally would go  
23 through a clause and not through a base rate proceeding.

24          **COMMISSIONER SKOP:** Okay. So just to be  
25 clear, the three solar projects that FPL has been,

1 already had approved by the Commission, this base rate  
2 proceeding, basically the costs associated with those  
3 solar projects would not be recovered in this base rate  
4 proceeding; is that correct?

5 **MR. WILLIS:** That's correct.

6 **COMMISSIONER SKOP:** Okay. Great. All right.

7 Just I guess in summary then, as it pertains  
8 to this base rate proceeding irrespective of any  
9 representations that have been made, that this base rate  
10 proceeding has nothing to do with the recovery of costs  
11 for the Riviera Beach and the Canaveral plants; is that  
12 correct?

13 **MR. WILLIS:** They are not included in the rate  
14 case.

15 **COMMISSIONER SKOP:** Okay. And this rate base  
16 proceeding or base rate proceeding has nothing to do  
17 with the recovery of costs for the Turkey Point 6 and 7  
18 proposed nuclear generating units; is that correct?

19 **MR. WILLIS:** And, again, they're not included  
20 in the rate case.

21 **COMMISSIONER SKOP:** Okay. And this base rate  
22 proceeding has nothing to do with recovery of costs for  
23 FPL's three solar projects.

24 **MR. WILLIS:** And, again, they're not included  
25 in the rate case.

1           **COMMISSIONER SKOP:** Okay. Now in fairness to  
2 FPL, with respect to what the Commission may decide in  
3 this base rate proceeding, this base rate proceeding  
4 could have some impact on FPL's ability to reach out  
5 into the financial markets on a forward-going basis to,  
6 you know, basically fund its capital projects, is that  
7 generally -- I mean, FPL is a strong company today and I  
8 have no doubt they'll be strong tomorrow, but if you  
9 could just elaborate on that briefly.

10           **MR. WILLIS:** Well, Commissioner, depending on  
11 the Commission's actions, if, if the Commission actions,  
12 I suppose, were detrimental to the company, they would,  
13 they could possibly face problems going out to the  
14 market to obtain any kind of equity or debt funding for  
15 future projects. I mean, that, that could be an effect,  
16 if that's what you're asking.

17           **COMMISSIONER SKOP:** Okay. But FPL is, FPL  
18 today is a very strong, financially sound company; is  
19 that correct?

20           **MR. WILLIS:** Yes, it is.

21           **COMMISSIONER SKOP:** Okay. And that's based on  
22 the Commission's sound regulatory practices for the most  
23 part.

24           **MR. WILLIS:** Yes. That's correct.

25           **COMMISSIONER SKOP:** Okay. All right. Now --

1                   **CHAIRMAN ARGENZIANO:** Commissioner Skop, that  
2 may be a little confusing. I understand where you're  
3 trying to go, but it depends on what the Commissioners  
4 vote on today.

5                   **COMMISSIONER SKOP:** Right.

6                   **CHAIRMAN ARGENZIANO:** We -- if we did  
7 something that could harm the company, we would hope  
8 that we would have discussion about that before we did  
9 that.

10                  **COMMISSIONER SKOP:** I understand.

11                  **CHAIRMAN ARGENZIANO:** It's not just because we  
12 have a rate case before us that we would harm the  
13 company. I don't want to leave people thinking that.

14                  **COMMISSIONER SKOP:** Right. And I just have  
15 two, two points, and I agree wholeheartedly.

16                  With respect to funding capital projects  
17 though, you know, certainly having free cash flow from  
18 operations allows you to fund capital projects  
19 internally. But alternatively a company typically goes  
20 out to the capital markets and borrows either debts or  
21 bonds to fund capital expansions; is that correct?

22                  **MR. WILLIS:** Resources, internal funds  
23 generated from the company and outside market sources,  
24 be it either debt or equity.

25                  **COMMISSIONER SKOP:** Okay. And just one final

1 point, Madam Chair.

2 Just based on that point, irrespective of the  
3 projects that the Commission has approved and what  
4 mechanism, what mechanism is used to fund those projects  
5 once they are built, the company typically does not  
6 recover those costs, with the exception of the nuclear  
7 cost recovery or solar projects, but for fossil projects  
8 does not recover those costs until the assets are placed  
9 in service; is that correct?

10 **MR. WILLIS:** That's correct.

11 **COMMISSIONER SKOP:** Okay.

12 **MR. WILLIS:** That's been the case with the  
13 generation base rate adjustment too.

14 **COMMISSIONER SKOP:** And then with respect to  
15 all the projects that were mentioned, the Commission  
16 currently has adequate cost recovery mechanisms to  
17 provide for the recovery of those projects once they're  
18 placed in service; is that correct?

19 **MR. WILLIS:** I believe so.

20 **COMMISSIONER SKOP:** Thank you, Madam Chair.

21 **CHAIRMAN ARGENZIANO:** Commissioners, anything  
22 else? Okay. Let's get started. Thank you,  
23 Commissioner Skop.

24 If staff would move to Issue 1. And the same  
25 thing as yesterday, Commissioners, whatever you feel

1 comfortable with, if we can take things in block, that  
2 doesn't mean that we can't discuss them individually,  
3 take things in block and vote on them. And for the ones  
4 that you would like separated, there are a couple of  
5 issues that I might want separate, to vote on  
6 separately, please let me know. And we'll start with  
7 Issue 1.

8 Commissioner Skop.

9 **COMMISSIONER SKOP:** Yes, Madam Chair.

10 I just wanted to mention too also for the  
11 benefit of my colleagues, I presented another handout  
12 sheet, and I know staff has done a similar one. So I  
13 just wanted to mention that for the record.

14 **CHAIRMAN ARGENZIANO:** And at the proper time  
15 you'll go through that with us?

16 **COMMISSIONER SKOP:** Yes, ma'am. Thank you.

17 **CHAIRMAN ARGENZIANO:** Okay. Thank you.

18 Staff, if you could start with Issue 1. And I  
19 guess we'll take the 1, 3 -- 1 to 3 together and proceed  
20 that way. Thank you.

21 **MS. BENNETT:** Thank you, Madam Chair.

22 Commissioners, I'm Lisa Bennett with the  
23 General Counsel's Office.

24 Issue 1 is does the Commission have legal  
25 authority to use a 2010 projected test year? Staff

1 recommends that the Commission does have the legal  
2 authority. And that's based --

3 **CHAIRMAN ARGENZIANO:** Let, let me do this.  
4 Excuse me. Let's let everybody grab their papers and  
5 then take a seat again because there -- it's hard to  
6 hear you with the papers rustling and people moving  
7 around, and I want to be able to hear everything. We're  
8 almost there. It's only fair to let everybody get their  
9 papers and to be able to take a look at them.

10 I think it quieted down enough. Thank you.  
11 Proceed, please.

12 **MS. BENNETT:** Issue 1 is does the Commission  
13 have the legal authority to approve a 2010 projected  
14 test year? Staff recommends that the Commission find  
15 that you do have the authority, and that's been a  
16 standard that has been recognized by the Florida Supreme  
17 Court.

18 **CHAIRMAN ARGENZIANO:** Any, any questions,  
19 Commissioners? Any comments? Okay. Proceed.

20 **MR. PRESTWOOD:** Good morning, Commissioners.

21 **CHAIRMAN ARGENZIANO:** Good morning.

22 **MR. PRESTWOOD:** I'm Clarence Prestwood with  
23 the staff.

24 Issue 2 deals with the year 2010 as whether  
25 it's appropriate for the test year in this case. And

1 the staff recommends that it is the appropriate year for  
2 the test year in this case.

3 **CHAIRMAN ARGENZIANO:** Any, any questions?

4 Okay. Proceed to Issue 3.

5 **MR. STALLCUP:** I'm Paul Stallcup of the  
6 Commission staff. Issue 3 addresses whether FP&L's 2010  
7 forecast for the number of customers kWh sales and kW is  
8 appropriate for ratemaking purposes. Staff recommends  
9 based on the information in the record that Florida  
10 Power & Light's forecast is appropriate.

11 **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
12 Stevens, then Commissioner Skop, and then I have a  
13 question.

14 **COMMISSIONER STEVENS:** Thank you,  
15 Commissioner, and I'll be brief.

16 **COMMISSIONER ARGENZIANO:** You don't have to  
17 be.

18 **COMMISSIONER STEVENS:** I think I'll be brief.

19 **COMMISSIONER ARGENZIANO:** You don't have to  
20 be. You can ask what you need to ask.

21 **COMMISSIONER STEVENS:** Can, can you guys  
22 explain the reanchoring adjustment and whether or not we  
23 took that as staff into effect on our recommendation and  
24 how that relates to the OPC's recommendation?

25 **MR. STALLCUP:** Yes. The reanchoring

1 adjustment is an adjustment frequently made in economic  
2 forecasting. An economic model by its very definition  
3 is a simplification of reality. In Power & Light's  
4 model the energy forecast and net energy, net energy for  
5 load per customer model is driven by price and economic  
6 variables and weather variables. That doesn't  
7 necessarily capture every factor that could affect  
8 energy sales. That deletion or omission of certain  
9 variables is called model error, and the reanchoring  
10 adjustment takes the output of the model and trues it up  
11 to the latest available actual data such that the  
12 forecast from the model runs continuously from the last  
13 available piece of historical data. The difference  
14 between those two is called model error, and the  
15 reanchoring adjustment removes that model error.

16 **COMMISSIONER STEVENS:** And so did we take into  
17 consideration in our recommendation or staff's  
18 recommendation to us that reanchoring?

19 **MR. STALLCUP:** Yes, we did.

20 **COMMISSIONER STEVENS:** Okay. Thank you.  
21 Thank you, Chairman.

22 **COMMISSIONER SKOP:** Madam Chair, I'll yield to  
23 you and pick up last.

24 **CHAIRMAN ARGENZIANO:** Okay. I have a question  
25 in regards to the long-term average on the vacancy

1 rates, and I guess maybe, maybe you can help me here.  
2 I'm trying to, to come to grips with it.

3 Basically if the long-term average that's used  
4 here really applies to the 2010 and 2011 as far as the  
5 minimal use, given the fact that from what I understand  
6 there's quite an exodus of people that occurred in the  
7 last several years of the State of Florida, and I didn't  
8 know if that, to what degree that was taken into  
9 consideration or how it fits into the minimal use issue  
10 and the vacancy rate.

11 **MR. STALLCUP:** I think I can explain that to  
12 you. Power & Light when they ran their basic forecast  
13 noted that at the end of two thousand and -- well,  
14 starting really in 2007, 2008, then carrying forward  
15 through the test year there was a growing number of what  
16 they called minimal use customers. Basically what these  
17 are are unoccupied residences that are still connected  
18 to the grid but only drawing a minimal amount of power  
19 for the purpose of keeping the structure ventilated,  
20 perhaps security lights, that sort of thing. Because  
21 these residences are only drawing a small amount of  
22 power, it reduces the average use per customer that  
23 Power & Light forecasts and bases its sales forecasts  
24 upon.

25 This minimal use customer adjustment is

1 designed to account for what we call an abnormal number  
2 of minimal use customers. Now if you want to measure  
3 the effect of something that's abnormal, the first thing  
4 you've got to do is figure out what constitutes normal  
5 so that you can draw a difference between what you would  
6 normally expect and what you're seeing now.

7 The way that Power & Light defined what normal  
8 was is that they went back to Census data, U.S. Census  
9 data, and I think it was for the period 2002 through two  
10 thousand -- no, two thousand -- yeah, 2002, 2003, and  
11 noted that during that particular time period the  
12 vacancy rates in Florida were very near their long-term  
13 average.

14 So what Power & Light did is they used that  
15 2002 to 2003 time period as their definition of what  
16 normal was for the purpose of calculating the minimal  
17 use adjustment.

18 **CHAIRMAN ARGENZIANO:** See, that's, that's  
19 where my question comes in. It's been to me far from  
20 normal the last several years. 2002 and 2003 were, that  
21 was before many things happened, before the economy  
22 changed, before there was -- I've just been reading a  
23 PSC study that showed that so many, I think it was  
24 2 million people, and of course there's people that come  
25 back in, but there was more of an exodus. And I don't

1 know -- what I'm trying to say is I don't know if using  
2 2002 and 2003 are appropriate, given what's happened to  
3 the State of Florida since then.

4 **MR. STALLCUP:** The use to which that 2002,  
5 2003 data was put was to define the extent of which the  
6 rates that we're seeing now, which are roughly about  
7 9 percent I think, are different from the historical  
8 period upon which the econometric model was based for  
9 sales. That model is based on data that went from 1998  
10 through 2008. So what the model is looking at is how  
11 sales reacted during that ten-year period to things like  
12 weather and so forth.

13 So from the point of view of consistency of  
14 what the model is based on and the minimal use customer  
15 adjustment, there is consistency between the basis of  
16 that adjustment and the data used within the model.

17 I would agree with you that historically a  
18 normal vacancy rate may not look too much like what it's  
19 going to look like in the future, but the adjustment  
20 that Power & Light made is an attempt to accommodate  
21 that.

22 **CHAIRMAN ARGENZIANO:** Okay. Thank you.

23 Commissioner Skop.

24 **COMMISSIONER SKOP:** Thank you, Madam Chair.

25 Just to follow up on that line, on Page 17,

1 the last paragraph before the section titled Analysis,  
2 it discusses the forecast errors in FPL's methodology  
3 versus OPC Witness Brown's methodology. Would it be  
4 correct to say that FPL's methodology in its forecast  
5 overshoots or overestimates the data; whereas, the OPC  
6 Witness Brown's undershoots? Is that the correct way to  
7 interpret the forecast error?

8 **MR. STALLCUP:** I'm not real sure what you mean  
9 by forecast error in that respect.

10 **CHAIRMAN ARGENZIANO:** Commissioner Skop, could  
11 you rephrase or make it clearer?

12 **COMMISSIONER SKOP:** Okay. Well, I'm reading  
13 on Page 17 at the second to the last paragraph, "FPL's  
14 methodology results in a forecast error of only  
15 .1 percent through midyear 2009, while OPC Witness  
16 Brown's methodology results in a forecast error for the  
17 same period of approximately -1.5 percent."

18 **MR. STALLCUP:** Yes.

19 **COMMISSIONER SKOP:** It seems to me that OPC's  
20 analysis or forecast is perhaps more conservative and  
21 undershoots the actual versus FPL's may be a little bit  
22 more aggressive and slightly overshoots the actual. Is  
23 that the correct way to interpret that?

24 **MR. STALLCUP:** The Power & Light adjustment  
25 did depress net energy sales more than would the

1 approach taken by Public Counsel. That's correct.

2 **COMMISSIONER SKOP:** Okay. All right. Thank  
3 you.

4 **CHAIRMAN ARGENZIANO:** Any other, any other  
5 questions? I would ask that staff separate Issue 3.  
6 And if we vote, Commissioners, on 1 and 2, and then I'd  
7 like to vote on 3 separately.

8 **COMMISSIONER SKOP:** Madam Chair.

9 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

10 **COMMISSIONER SKOP:** Thank you. If there are  
11 no further questions, incorporating your suggestion I'd  
12 respectfully move to approve the staff recommendation as  
13 to Items 1 -- or Issues 1 and 2.

14 **COMMISSIONER STEVENS:** Second.

15 **CHAIRMAN ARGENZIANO:** Hearing a second. Any  
16 discussion or comments? All in favor, say aye.

17 (Simultaneous vote.)

18 Same, same sign for opposed. Motion to adopt  
19 1 and 2 has passed, and we'll move on to Issue Number 3.  
20 Do I have a motion?

21 **COMMISSIONER SKOP:** Madam Chair, I'd  
22 respectfully move on Issue 3 to deny staff  
23 recommendation and adopt the position of Public Counsel.

24 **CHAIRMAN ARGENZIANO:** Now is there any comment  
25 or discussion? Now is the time.

1 Commissioner Edgar.

2 **COMMISSIONER EDGAR:** Just a question.

3 **CHAIRMAN ARGENZIANO:** You're recognized.

4 **COMMISSIONER EDGAR:** If I -- thank you --  
5 could ask staff to share with us briefly what the impact  
6 of that change would be.

7 **MR. STALLCUP:** The effect of adopting Public  
8 Counsel's recommendation would be to increase megawatt  
9 hour sales by approximately 1 percent. That would  
10 increase the test year revenues by approximately  
11 \$40 million. It would also have an effect on the  
12 billing determinants used to calculate rates.

13 **COMMISSIONER SKOP:** Madam Chair.

14 **COMMISSIONER STEVENS:** Do you need a second?

15 **COMMISSIONER SKOP:** Hold on for a second.

16 **CHAIRMAN ARGENZIANO:** One second.

17 Commissioner Skop.

18 **COMMISSIONER SKOP:** I'm confused by I guess  
19 the staff response. I'm trying to understand. Because  
20 if that were correct, I would perhaps rethink my motion,  
21 but I think I've got my motion correct.

22 My understanding from OPC's position is, is  
23 that the change to adopt the OPC position would result  
24 in a net reduction in the overall revenue requirement or  
25 the annual revenue requirement of approximately

1 \$63.5 million; is that correct? And that would be --

2 **MR. STALLCUP:** The effect of Public Counsel's  
3 recommendation would be to reduce the difference between  
4 revenue requirement and what revenues would be at  
5 current rates. That is it would reduce the need to  
6 increase rates to satisfy revenue requirements.

7 **COMMISSIONER SKOP:** Okay. So basically what  
8 you're saying is, is that OPC's forecast causes a  
9 reduction in the overall revenue requirement; is that  
10 correct?

11 **MR. STALLCUP:** Basically, yes.

12 **COMMISSIONER SKOP:** Okay. All right. Thank  
13 you.

14 **CHAIRMAN ARGENZIANO:** Commissioner Edgar, did  
15 you have another question or comment?

16 **COMMISSIONER SKOP:** I do have one.

17 **CHAIRMAN ARGENZIANO:** Okay. And then  
18 Commissioner Stevens.

19 Commissioner Skop.

20 **COMMISSIONER SKOP:** Thank you.

21 Just in relation, I think you mentioned that  
22 it would cause megawatt hour sales, adopting OPC's  
23 position and its forecast indicates that for two  
24 thousand and I believe 10, the forecast megawatt hours  
25 would increase by about 1 percent; is that correct?

1                   **MR. STALLCUP:** Correct.

2                   **COMMISSIONER SKOP:** Okay. In light of the  
3 recent peak usage that Florida has experienced recently  
4 there's been heavy demand on the system. Is there any  
5 reason to believe that, you know, that that 1 percent --  
6 I mean, how hard is it to -- how far off is 1 percent  
7 for, in total production? I mean, is that something  
8 that if you have an extended period of either cold  
9 weather or hot weather in the summer, that you're  
10 certainly going to be within that reason, bound of  
11 reasonableness for accepting OPC's position?

12                   **MR. STALLCUP:** Weather can account for  
13 variations in megawatt hour sales of greater than  
14 1 percent. However, it's typically driven by summer  
15 weather rather than by winter weather. The winter peaks  
16 tend to be rather short-lived.

17                   **COMMISSIONER SKOP:** Okay. But at least in  
18 this current year, 2010, the test year, I mean we've had  
19 a substantial period of peak load that has broken  
20 records. So, I mean, there is some support that would,  
21 you know, if we were looking at which forecast is more  
22 accurate, certainly weather and, you know, other things  
23 in the record tend to speak into having, exercising  
24 discretion to use our judgment as to which forecast  
25 might be the most appropriate to use in the current

1 conditions.

2 **MR. STALLCUP:** Certainly the recent cold  
3 weather has increased sales.

4 **COMMISSIONER SKOP:** Okay. All right. Thank  
5 you, Madam Chair. I'm comfortable with my motion.

6 **CHAIRMAN ARGENZIANO:** Okay. There's a motion.

7 **COMMISSIONER STEVENS:** Second.

8 **CHAIRMAN ARGENZIANO:** Any discussion,  
9 questions, debate?

10 Okay. Hearing no discussion, all in favor of  
11 the motion, indicate by saying aye.

12 (Simultaneous vote.)

13 All those opposed, same sign. Show the motion  
14 passing.

15 And, staff, if we could move now to Issue 4.

16 **MS. BENNETT:** Issue 4 is does the Commission  
17 have the legal authority to use a 2011 subsequent test  
18 year? Staff recommends that the Commission does have  
19 the legal authority to approve a 2011 subsequent test  
20 year in the appropriate case, and that's supported by  
21 statute, rule and Supreme Court decisions.

22 **CHAIRMAN ARGENZIANO:** Commissioners?

23 **COMMISSIONER SKOP:** Madam Chair, I have no  
24 questions on Issue 4.

25 **CHAIRMAN ARGENZIANO:** Anyone else?

1           Okay. We can move on to Issue 5.

2           **MR. PRESTWOOD:** Commissioners, Issue 5 deals  
3 with the policy side of whether to allow 2011 subsequent  
4 test year. And I'll mention that Issue 6 deals with the  
5 specific numbers. Staff is recommending against the use  
6 of 2011 as a subsequent test year on the basis that  
7 there's been no showing of extraordinary circumstances  
8 of why back-to-back rate increases should be used. And  
9 by necessity by using a subsequent test year predictions  
10 or forecasts have to reach further into the future, and  
11 by reaching further into the future your projections  
12 become less accurate.

13           **CHAIRMAN ARGENZIANO:** Commissioners?

14           Commissioner Stevens.

15           **COMMISSIONER STEVENS:** I just want to let the  
16 Commission know that I do agree with staff. I think it  
17 is too volatile. I don't, I don't think we can look at  
18 our crystal ball and be close to a prediction.

19           **COMMISSIONER KLEMENT:** Madam Chair.

20           **CHAIRMAN ARGENZIANO:** Commissioner Klement.

21           **COMMISSIONER KLEMENT:** Just to verify.

22           Usually, we usually go one year into the future in  
23 projecting; is that correct?

24           **MR. PRESTWOOD:** Yes, Commissioner. Typically  
25 we've used a single projected test year. But we have in

1 the past, two, two subsequent test years have been used.

2 **COMMISSIONER KLEMENT:** And your recommendation  
3 is based on the, partially based on the volatile  
4 economic times we're in now, correct, that there's a lot  
5 of uncertainty and, and instability?

6 **MR. PRESTWOOD:** That's correct. It causes the  
7 company to project out almost 40 months into the future  
8 from the last historical point. And, again, the further  
9 you go out, the less accurate your predictions become.  
10 And there's, there's been no showing of any kind of  
11 extraordinary reason or circumstances that there's a  
12 need to do that in this case.

13 **COMMISSIONER KLEMENT:** And has there been --  
14 is there much precedent here for back-to-back rate  
15 increases such as this?

16 **MR. PRESTWOOD:** Not, not in recent years,  
17 Commissioner. There have been in, in the past, but it's  
18 been many years as they've been allowed.

19 **COMMISSIONER KLEMENT:** About how many? More  
20 than ten or 20?

21 **MR. PRESTWOOD:** To my knowledge, Florida Power  
22 & Light was allowed one about 20 years ago. And I'm not  
23 sure of the other ones.

24 **COMMISSIONER KLEMENT:** Okay. Thank you.

25 That's all for now, Madam Chair.

1                   **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
2 Skop.

3                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

4                   I guess just looking at Issue 4, I also join  
5 my colleague Commissioner Stevens in sharing the view  
6 that the staff recommendation should be supported on  
7 this issue at least for the 2011 test year. Again, the  
8 costs that are projected are speculative, speculative in  
9 nature. There is a lot of uncertainty in terms of  
10 what's going to happen in terms of forecast demand and a  
11 lot of things. So it would seem to me that in the  
12 current economic environment it may be better to have  
13 limited proceedings or, you know, back-to-back rate  
14 cases, if necessary, to have a better handle on the  
15 company's true cost of providing service. It's fair to  
16 the company. It's fair to the ratepayers. If their  
17 costs increase substantially on a year-to-year basis,  
18 certainly they may be legally entitled to recover those  
19 prudently incurred costs. It also provides a mechanism  
20 for reevaluating other issues that come up based on  
21 prevailing economic conditions at the time. But to go a  
22 whole year or two years into the future, again, at this  
23 point in time, given the turmoil and a lot of things, I  
24 think it would be speculative at best, and I would  
25 rather handle that from a Commission's perspective in a

1 limited proceeding or another rate case proceeding.

2 Thank you.

3 **CHAIRMAN ARGENZIANO:** Okay. Commissioners?

4 Commissioner Klement.

5 **COMMISSIONER KLEMENT:** I'd like to ask staff  
6 if, if the Commission did deny the subsequent test year,  
7 what would be the company's recourse? Could they just  
8 file another rate case tomorrow? And realistically when  
9 would you expect them back, if not tomorrow?

10 **MR. PRESTWOOD:** Commissioner Klement, yes,  
11 they could in all likelihood file another complete rate  
12 case. In that case though we would have the benefit of  
13 at least one more year of actual data, historical data,  
14 2009 to look at. That would, you know, make the,  
15 analysis more meaningful.

16 I, I really can't predict what the company  
17 will do because it'll depend on their overall earning  
18 situation, you know, in the near future and what they  
19 forecast it to be, so.

20 **COMMISSIONER KLEMENT:** If I can understand, if  
21 you -- if they say, just hypothetically proposed 2011,  
22 in 2011 came back, wouldn't we have 2010 data then that,  
23 that is known?

24 **MR. PRESTWOOD:** Yes, Commissioner. We would  
25 have not only -- this case was prepared in the latter

1 part of 2008, so we would have a complete year of 2008  
2 data, a complete year of 2009 data, as well as,  
3 depending on when they filed, some part of 2010. Yes.

4 **COMMISSIONER KLEMENT:** Correct. Correct.  
5 Okay. Good. Thank you.

6 **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
7 Skop.

8 **COMMISSIONER SKOP:** Thank you.

9 Just to, to staff again on that point, in  
10 terms of the company's position, should it seek relief  
11 needed for 2011, then it would have its option, it would  
12 be the company's option whether to file a full-blown  
13 rate case or just come in for a limited proceeding on  
14 the specific issue that it needed cost recovery for; is  
15 that correct?

16 **MR. PRESTWOOD:** That's correct. It could file  
17 a limited proceeding or a full-blown rate case.

18 **COMMISSIONER SKOP:** Okay. All right. Thank  
19 you.

20 **CHAIRMAN ARGENZIANO:** Commissioners, any other  
21 questions on this item, on this issue?

22 **COMMISSIONER KLEMENT:** Could I hear the  
23 motion, please? Is there one?

24 **CHAIRMAN ARGENZIANO:** We're not --

25 **COMMISSIONER KLEMENT:** We don't -- I'm sorry.

1 I thought we --

2 **CHAIRMAN ARGENZIANO:** Do you want this one  
3 separate? Would you want to vote on that issue  
4 separately? Any issue that you feel like that you need  
5 to vote on --

6 **COMMISSIONER KLEMENT:** No.

7 **CHAIRMAN ARGENZIANO:** Okay. Then we're going  
8 to -- then if not, then we'll just move on to the next  
9 issue.

10 **COMMISSIONER KLEMENT:** Okay. Sorry.

11 **MR. PRESTWOOD:** Issue 6 deals with the  
12 specific numbers for 2011, and here again the staff is  
13 recommending against the use of 2011. Again, it's been  
14 over 40 months since the actual kickoff point from  
15 actual historical data that was used. The company has  
16 already made a number of adjustments to its 2009 budget  
17 year that had to be incorporated, which, which would  
18 suggest there are going to be adjustments that are going  
19 to be needed to the 2010 test year that will carry into  
20 the 2011 test year. So given the economic conditions  
21 that we're facing at this time, we simply think that  
22 2011 is just purely too speculative to make a decision  
23 on a full-blown rate case and recommend against it.

24 **CHAIRMAN ARGENZIANO:** Commissioners?

25 **COMMISSIONER STEVENS:** I'm fine. Thank you.

1                   **CHAIRMAN ARGENZIANO:** Okay. The next issue.  
2 Issue 6.

3                   **MR. PRESTWOOD:** That was 6.

4                   **CHAIRMAN ARGENZIANO:** 7. 7. I'm sorry.

5                   **MR. STALLCUP:** Issue 7 deals with the load  
6 forecast number of customers and kWh sales for the  
7 2011 test year. Staff recommends that this forecast is  
8 too speculative and not appropriate for ratemaking  
9 purposes.

10                  **CHAIRMAN ARGENZIANO:** Commissioner Skop.

11                  **COMMISSIONER SKOP:** Thank you.

12                         Like I say, I'm fine with the staff  
13 recommendations on Issues 4 through 7 -- I mean, excuse  
14 me, 4, 5, 6 and 7. And if there's no further questions,  
15 I'd move to adopt the staff recommendation on those  
16 issues.

17                  **COMMISSIONER STEVENS:** Second.

18                  **CHAIRMAN ARGENZIANO:** Any questions?

19                         Comments?

20                         Okay. All those in favor of adopting that  
21 motion, items -- sorry -- 4 through 7.

22                  **COMMISSIONER SKOP:** It's 4 through 7.

23                  **COMMISSIONER ARGENZIANO:** Signify by aye.

24                         (Simultaneous vote.)

25                         All those opposed, same sign. Show the motion

1 adopted.

2 And we'll move on to Issue 8.

3 **MR. WILLIS:** Commissioners, before we get to  
4 Issue 8, I just wanted to let you know that with your  
5 vote there later on you're going to see a Part B as far  
6 as staff recommendations go. Part B is now moot.  
7 That's the recommendation based on the 2011 test year.

8 **CHAIRMAN ARGENZIANO:** Okay. Okay. And also  
9 depending on how we vote on Issue 8, if we vote to go  
10 with staff's recommendation, then would it, am I correct  
11 9 through 13 would be moot? Okay.

12 **MR. WILLIS:** That is correct.

13 **CHAIRMAN ARGENZIANO:** Okay. So we're now on  
14 Issue 8.

15 **MR. GARL:** Thank you, Madam Chair.

16 Commissioners, I'm Steve Garl from PSC staff.

17 Issue 8 addresses the generation base rate  
18 adjustment or GBRA that was instituted as one element of  
19 a stipulated settlement agreement in FPL's 2005 rate  
20 case. FPL requests the GBRA be continued. Staff  
21 recommends FPL's request be denied. Staff's  
22 recommendation is based on FPL being treated as provided  
23 by statute and rule and the same as other IOUs who must  
24 initiate a rate case for rate increases.

25 And as Madam Chairman mentioned, acceptance of

1 staff's recommendation will render moot Issues 9 through  
2 14.

3 **CHAIRMAN ARGENZIANO:** 14.

4 Commissioner Stevens.

5 **COMMISSIONER STEVENS:** Commissioner, I just  
6 want to let the Commission know that I agree with staff.  
7 If we adopted this, I think we'd lose a level of  
8 oversight and would lose a level of scrutiny, which is  
9 in the staff's conclusion. So I'm stealing their words,  
10 and I appreciate the recommendation.

11 **CHAIRMAN ARGENZIANO:** Thank you.

12 **COMMISSIONER KLEMENT:** Madam Chair.

13 **CHAIRMAN ARGENZIANO:** Commissioner Klement.

14 **COMMISSIONER KLEMENT:** A couple of clarifying  
15 points, if I may.

16 Have we used this for anyone else? Have we  
17 allowed this recovery?

18 **MR. GARL:** Not to my knowledge. No, sir.

19 **COMMISSIONER KLEMENT:** So would this, does  
20 this -- if we adopted FPL's request, would this  
21 essentially amount to another cost recovery clause type  
22 decision?

23 **MR. GARL:** Exactly. The way that it would be  
24 put together has yet to be determined. In the past it  
25 has flowed through the cost recovery clause capacity

1 clause. Once the rates for the GBRA, the adjustment  
2 were determined, it was included with the capacity  
3 clause cost recovery.

4 **COMMISSIONER KLEMENT:** And in Commissioner  
5 Skop's opening remarks, in Commissioner Skop's opening  
6 remarks reference was made to the percentage of the base  
7 rate that is now realized by cost recovery clauses, and  
8 I heard a couple of numbers. Is it 60 or is it more  
9 than that?

10 **MR. GARL:** It's approximately 61 percent,  
11 Commissioner.

12 **COMMISSIONER KLEMENT:** 61 percent is now  
13 recovered already through automatic pass-throughs,  
14 virtually automatic pass-throughs.

15 **MR. GARL:** I'd hesitate saying automatic.  
16 Yes.

17 **COMMISSIONER KLEMENT:** Subject to the review  
18 by the Commission.

19 **MR. GARL:** Not nearly the oversight that's  
20 done in a rate case.

21 **COMMISSIONER KLEMENT:** Thank you. That's all  
22 for now.

23 **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
24 Skop.

25 **COMMISSIONER SKOP:** Thank you, Madam Chair.

1           I guess I'm, I agree with my colleague  
2 Commissioner Stevens to adopt the staff recommendation  
3 on this, and I think it's important to explain my  
4 rationale.

5           I think that GBRA was negotiated by FPL on  
6 behalf of the 2005 settlement agreement that the  
7 Intervenors and Public Counsel entered into in  
8 conjunction with FPL. The mechanism does have some  
9 positives. It allows for the recovery of costs once a  
10 fossil fuel generating asset is placed in service, but  
11 it also is more of an automatic, you know, pass-through.  
12 I mean, there is some scrutiny, there is some true-ups,  
13 but, again, it's not as heavily scrutinized as it would  
14 be in a limited proceeding or in a full-blown rate case.  
15 So I do see some perceived benefits. There's not a  
16 whole lot of negatives. It's just a matter of what  
17 level of review and scrutiny you want to have to look at  
18 major costs that are going to go into the rate base on  
19 a, on a given thing, whether that's going to be an  
20 automatic process or a more thorough process. So I  
21 think that that's important to look at.

22           The other point that I would make in terms of  
23 the GBRA adjustment is the approval of the GBRA  
24 mechanism by having automatic recovery of costs  
25 basically tends to keep a company out for not filing a

1 rate case for long periods of time. So if you were, if  
2 the Commission were to adopt this, you know, the next  
3 rate case might be, you know, two, three, four years  
4 from now. And given the, you know, the turmoil in the  
5 capital markets and a whole host of other things, I  
6 think having that ability to look at the true costs of  
7 providing service, even if we need to do it on an annual  
8 basis, which I know Andrew said we're geared up for  
9 that, but I don't think anyone wants to go through that  
10 process. But, you know, certainly being fair to the  
11 company it's very easy for them to come in even if it's  
12 for a limited proceeding and request to place the  
13 generating assets, the new generating assets that have  
14 come into service into the rate base.

15 And as Mr. Willis, I think, and correct me if  
16 I'm wrong, you don't build new generating assets of the  
17 size that FPL does without getting a determination of  
18 need for the most part from the Public Service  
19 Commission. So once we've approved it, we've basically  
20 said that you will be legally entitled to incur all  
21 prudently and reasonably incurred costs for the asset  
22 that's placed in service for the public use. So there's  
23 not a whole lot of risk there for the company. It's  
24 more of a convenience factor for the company. And to  
25 come in with a limited proceeding to scrutinize the cost

1 to make sure that there are no substantial cost overruns  
2 I think is a good thing for the Commission, a good thing  
3 for the ratepayers to know that we as public service are  
4 doing our job.

5 So, again, I'm in favor of the staff  
6 recommendation. And I think that, you know, there's  
7 never been an instance in the history of this Commission  
8 that we've denied a reasonably, prudently incurred cost  
9 for a new generating asset placed in service, so there's  
10 no risk to the company by denying a GBRA. Thank you.

11 **CHAIRMAN ARGENZIANO:** Thank you. I, I agree  
12 with staff's recommendation also. I think that it  
13 benefits not only the company and the ratepayer, the  
14 consumer to have a more thorough review always for all  
15 reasons involved.

16 But now that we're at that, any other  
17 comments? Commissioner Skop. Commissioner Edgar. I'm  
18 sorry.

19 **COMMISSIONER EDGAR:** That's okay. Very  
20 briefly I would just say I'm not -- okay. I don't  
21 completely agree with all of the characterizations that  
22 have been made as to how the clause process works. But  
23 regardless of that, which is just purely for discussion  
24 and elaboration, when I came in this morning I was  
25 comfortable with the staff recommendation on this

1 grouping of issues and nothing that I've heard has  
2 changed that. So I concur with the, with the result  
3 that I think that we are working towards here.

4 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

5 **COMMISSIONER SKOP:** Thank you, Madam Chair.

6 If there are no further questions on this  
7 block of issues, I'd move to approve the staff  
8 recommendation for Issue 8, thereby making Issues 9, 11,  
9 12, 13 and 14 moot. Is that correct?

10 **COMMISSIONER STEVENS:** Second.

11 **CHAIRMAN ARGENZIANO:** Okay. Anymore  
12 discussion on it? Hearing none, all in favor, signify  
13 aye.

14 (Simultaneous vote.)

15 Opposed, same sign. Show that motion passing.  
16 And we'll move on to Issue 15.

17 **MR. LAUX:** Mark Laux --

18 **CHAIRMAN ARGENZIANO:** We need to hear you.

19 **MR. LAUX:** Aha. Mark Laux, Commission staff.

20 Issue 15 addresses the question of what  
21 methodology should be applied to certain wholesale sales  
22 and how they should be separated. Staff is recommending  
23 that these particular sales should be separated and not  
24 revenue credited.

25 Given your earlier vote, the information in

1 staff's recommendation for the 2011 year adjustment  
2 would not need to be voted on.

3 **CHAIRMAN ARGENZIANO:** Commissioners? Sorry.  
4 We'll move on to -- I'm sorry. Down on this end? No?  
5 Hearing none, let's move on to the next issue.

6 **MR. LAUX:** Issue 16 addresses what methodology  
7 should be used for the cost of service study to separate  
8 sales and assets between the wholesale and retail  
9 jurisdiction. There is no opposition to the methodology  
10 that was used.

11 **CHAIRMAN ARGENZIANO:** Any questions?  
12 Commissioner Skop.

13 **COMMISSIONER SKOP:** Madam Chair, I don't have  
14 any questions.

15 **CHAIRMAN ARGENZIANO:** Okay. Your motion?

16 **COMMISSIONER SKOP:** If there are no questions  
17 from my colleagues -- yes, ma'am.

18 I'd move to approve the staff recommendation  
19 on Issue 15, noting that Part B is moot, and also move  
20 to approve the staff recommendation on Issue 16.

21 **COMMISSIONER STEVENS:** Second.

22 **CHAIRMAN ARGENZIANO:** Okay. Any discussion?  
23 All those in favor, aye.

24 (Simultaneous vote.)

25 All those opposed, same sign. Show the motion

1 adopted.

2 And we are now on Issue 17.

3 **MR. VICKERY:** Good morning, Commissioners.

4 **CHAIRMAN ARGENZIANO:** Good morning.

5 **MR. VICKERY:** Paul Vickery with Commission  
6 staff.

7 Issue 17 concerns FPL's electric service and  
8 whether or not the quality and reliability of the  
9 electric service being provided is adequate. Staff is  
10 recommending that FPL's electric service be determined  
11 as adequate based upon an analysis of customer  
12 complaints, the service hearings that were held, and the  
13 objective measurements of the electric industry metrics  
14 that were examined. Staff is available for any  
15 questions that you may have.

16 **CHAIRMAN ARGENZIANO:** Members?

17 Commissioner Skop.

18 **COMMISSIONER SKOP:** Thank you, Madam Chair.

19 On Page 62 of the staff recommendation where  
20 we discussed quality of service, I just wanted to take a  
21 moment to offer some comments on the staff  
22 recommendation.

23 I support the staff recommendation with the  
24 caveat that staff notes that vegetation, excuse me, the  
25 staff notes that vegetation related outages and

1 momentary power interruptions caused by vegetation do  
2 appear to be increasing and staff will continue to  
3 monitor.

4           You know, I've seen that problem, having gone  
5 to the customer service hearings. There are areas that  
6 are in need of addressing the quality of service issues.  
7 I mean, FPL has a very large service territory  
8 throughout the state, they can't be everywhere at once,  
9 but there are areas down in their home service area that  
10 we've heard loud and clear from customers, I continue to  
11 hear loud and clear from customers that there are  
12 problems at the distribution level. And I don't believe  
13 that adequate attention is being paid by the company to  
14 addressing those issues in a timely manner.

15           You know, I've had a situation where I've had  
16 to mention the plight of Ms. Nagel. Well, we heard from  
17 her at the service hearing, and three months later at  
18 the evidentiary hearing I'm still hearing from her  
19 saying she's having service quality problems. So,  
20 again, you know, there's always going to be problems,  
21 there's always going to be storms, there's always going  
22 to be acts of God that are unforeseeable.

23           But, you know, I would note that FPL by its  
24 own admission in the record is six months behind where  
25 it needs to be in its storm hardening/vegetation

1 management program, and that's of concern to me. And I  
2 think that I'm going to address that on some subsequent  
3 issues, but I just wanted to comment that I feel that  
4 there needs to be a little bit more attention paid to  
5 the important things of providing quality service to  
6 your customers and addressing some of these vegetation  
7 issues, addressing some of these distribution issues,  
8 instead of spending time on discretionary issues that  
9 really don't have anything to do with ensuring that  
10 customers have adequate, reliable and affordable  
11 service. Thank you, Madam Chairman.

12 **CHAIRMAN ARGENZIANO:** Commissioner Klement.

13 **COMMISSIONER KLEMENT:** Thank you, Madam Chair.

14 Acknowledging Commissioner Skop's concerns for  
15 vegetation issues, I would like to commend the company  
16 for the level of service that is reflected in the  
17 ratings that were provided in the hearing and by staff.  
18 For a company the size of FPL, it's amazing that they  
19 are able to do that. It shows that they're concerned  
20 for customer service. And certainly no one is perfect.  
21 There are going to be anecdotal issues here and there.  
22 And I hope the company will be diligent in pursuing  
23 individual cases such as the one Commissioner Skop  
24 mentioned to provide, to work for 100 percent customer  
25 satisfaction, although we know no one who's human is

1 able to do that but we all strive for it. And we should  
2 acknowledge the company's efforts. Thank you.

3 **CHAIRMAN ARGENZIANO:** Thank you, Commissioner  
4 Klement.

5 I just have a comment. While there was a, I  
6 think a small pocket of problems there that I think the  
7 company will pay attention to because their workers -- I  
8 have found, I have to say, that the workers, and it may  
9 not be in all areas, there may be small pockets, but to  
10 know that looking at it as a whole there were some small  
11 pockets and it seemed to be that some of them were in  
12 the older neighborhoods, and I believe the company had  
13 made, made assurances to us that they were going to be  
14 working on that and I appreciated that.

15 I think at some of the service hearings I was  
16 impressed with the fact that there was one lady that did  
17 come in and have a problem and the company helped her  
18 right away. They went out and pulled out some lighting  
19 and so on for her on her porch. And I was impressed  
20 with that, I have to say.

21 But looking at it on a grand scale I have to  
22 commend the company because their quality of service,  
23 that is directly to the workers that are out there.  
24 Those, those workers that are out there in most places,  
25 it may not be for your home or your home because there

1 may be one of those places where we are seeing small  
2 pockets, but overall I commend the workers of FPL for  
3 providing that quality of service.

4 So with that said, any other comments? And,  
5 Commissioner Skop, do you have a motion?

6 **COMMISSIONER SKOP:** Yes, Madam Chair. I'd  
7 basically move to approve the staff recommendation on  
8 Issue 17.

9 **COMMISSIONER STEVENS:** Second.

10 **CHAIRMAN ARGENZIANO:** Any discussion,  
11 comments?

12 Okay. All those in favor, aye.

13 (Simultaneous vote.)

14 All those opposed, same sign. Show that  
15 motion adopted.

16 And we're now on -- now do we, are we going  
17 to -- Mr. Devlin, are we going to hold on, on this issue  
18 or are we going to take it right now?

19 **MR. DEVLIN:** I would, I would suggest, Madam  
20 Chairman, to defer certain issues relating to the  
21 theoretical reserve, and that would be Issue 19F and  
22 then the related issues to that, if I could find my  
23 notes, 19F, 51 and 131, those three particular issues,  
24 like we did with Progress. I would suggest we --

25 **CHAIRMAN ARGENZIANO:** Hang on. Would you

1 repeat? 19F.

2 **MR. DEVLIN:** 19F.

3 **CHAIRMAN ARGENZIANO:** 51.

4 **MR. DEVLIN:** 51, 131. 131.

5 **CHAIRMAN ARGENZIANO:** Okay.

6 **MR. DEVLIN:** Those three. And, but the other  
7 depreciation related issues we should probably go  
8 forward with and resolve.

9 **CHAIRMAN ARGENZIANO:** Go through right now.  
10 Okay. Very good.

11 And at the right time, if anybody needs a  
12 break, please indicate. And to our court reporter, when  
13 it's time, please just let me know. We'll probably,  
14 probably try to take a break at 11:00, at least a  
15 ten-minute break. Is that good with everybody? Unless  
16 you need to go before, let me know.

17 Okay. Let's move on with Issue 19A.

18 **MS. LEE:** Commissioners, Pat Lee of staff.

19 Issues, Issue 19A addresses capital recovery  
20 schedules. Staff's recommended capital recovery  
21 schedules are shown on Table 19A-1, which is Pages 76  
22 and 77. These recovery schedules address unrecovered  
23 costs relating to plant retirements of Cape Canaveral,  
24 Riviera, the nuclear uprates and some obsolete meters.

25 OPC does not disagree with these capital

1 recovery schedules and proposes to take, transfer a  
2 portion of the reserve surplus which is addressed in 19F  
3 to offset the unrecovered costs of these unrecovered --  
4 of these capital recovery schedules.

5 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

6 **COMMISSIONER SKOP:** Thank you, Madam Chair.

7 Just, Ms. Lee, with respect to the tables for  
8 Issue 19A, and I believe those are shown on Pages 76 and  
9 77 respectively of the staff recommendation.

10 **MS. LEE:** Correct.

11 **COMMISSIONER SKOP:** I think if I understand  
12 what staff is trying to present here is that in the case  
13 before us there is a theoretical depreciation reserve  
14 surplus, and these pages on 19A represent a depreciation  
15 deficit. And what I think staff is trying to do is net  
16 the surplus with the deficit so that everything's, that  
17 the actual surplus is known to the Commission; is that  
18 correct?

19 **MS. LEE:** Correct. That is the whole purpose  
20 of capital recovery schedules. These are investments  
21 that are going to be retired that will not be recovered.

22 **COMMISSIONER SKOP:** Okay. I did have one  
23 question on the, the cost code 370, which is the meter.

24 **MS. LEE:** Yes.

25 **COMMISSIONER SKOP:** And the entry there is

1       obsolete by advanced metering infrastructure, AMI.

2               **MS. LEE:** Correct.

3               **COMMISSIONER SKOP:** So basically we're  
4       allowing the company to fully depreciate the old meters  
5       or accelerate the depreciation or just write off the old  
6       meters. Is that correct? Is that what that total  
7       unrecovered costs of \$101 million reflects there?

8               **MS. LEE:** Other than -- I wouldn't  
9       characterize it as accelerating. These are meters that  
10       are going to be retired as a result of bringing in new  
11       meters because of the AMI, bringing in the smart meters,  
12       and we are recovering these over their remaining useful  
13       life, if you will.

14               **COMMISSIONER SKOP:** Okay. I guess that's  
15       where I'm a little confused. Because the meters are  
16       being retired and, you know, I'm not completely into the  
17       complete nuts and bolts of the depreciation but I know  
18       enough to be dangerous, I guess. Those meters that are  
19       being retired have not for the most part reached the end  
20       of their economic useful life. So in a sense the  
21       depreciation, remaining depreciation, the depreciation  
22       in the remaining life for those meters is kind of being  
23       written off and reflected here; is that correct? Is  
24       that --

25               **MS. LEE:** The remaining life is much shorter

1 now than it was. But, yes, they are being written off  
2 over the remaining period that these meters will be in  
3 service. These meters are being retired because of a  
4 new technology, the smart meters coming in, and as a  
5 result their remaining life has been cut short.

6 **COMMISSIONER SKOP:** Okay. So that's just  
7 basically netting out then the remain life depreciation  
8 against the surplus.

9 **MS. LEE:** Correct.

10 **COMMISSIONER SKOP:** All right. Thank you.

11 **CHAIRMAN ARGENZIANO:** Commissioners, anything  
12 further? No?

13 Okay. We can move on.

14 **MS. LEE:** Commissioners, Issue 19B addresses  
15 FP&L's mathematical calculation of the average remaining  
16 life. Staff recommends that FP&L's calculation can lead  
17 to questionable results and can understate the average  
18 remaining life. Staff recommends a remaining life  
19 calculation based on using the average age. And I have  
20 a curve shape and, a selected curve shape in determining  
21 the average remaining life. This is the same approach  
22 that was used in the PEF rate case and the approach that  
23 has been recommended by OPC.

24 **CHAIRMAN ARGENZIANO:** Commissioners? Okay.

25 Then we will move on -- I'm sorry. Okay.

1 We'll wait for Commissioner Edgar and make sure. Any  
2 questions?

3 **COMMISSIONER EDGAR:** I'm good. Thank you.

4 **COMMISSIONER ARGENZIANO:** That's okay. I  
5 wanted to make sure you're good.

6 **COMMISSIONER EDGAR:** Thank you very much.

7 **CHAIRMAN ARGENZIANO:** Okay. We'll move on to  
8 19C.

9 **MS. LEE:** Issue 19C, Commissioners, addresses  
10 the appropriate depreciation parameters, that is the  
11 remaining life, salvage reserve and resulting  
12 depreciation rates for production plant. Staff's  
13 recommendations are shown on Table 19C-2, Pages 101 to  
14 120.

15 **COMMISSIONER SKOP:** Madam Chair.

16 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

17 **COMMISSIONER SKOP:** Thank you, Madam Chair.

18 Ms. Lee, on this particular issue I believe  
19 there's, there's another handout that staff had provided  
20 that compares the positions of each of the parties, the,  
21 a current approved, the OPC, FIPUG, the company and what  
22 staff ultimately recommended I think is this big --

23 **MS. LEE:** The monster spreadsheet?

24 **COMMISSIONER SKOP:** It's not as big as my  
25 sheet I made, but it's something, something similar.

1 This one right here.

2 **MS. LEE:** Correct.

3 **COMMISSIONER SKOP:** Okay. All right.

4 **COMMISSIONER ARGENZIANO:** Yes. But you need a  
5 magnifying glass to read the numbers.

6 **MS. LEE:** I apologize, Commissioners.

7 **COMMISSIONER STEVENS:** That's a good  
8 spreadsheet.

9 **CHAIRMAN ARGENZIANO:** There's a lot of stuff  
10 on there.

11 **COMMISSIONER SKOP:** All right. So, so that  
12 just adds to the, more detail to the data that we  
13 already have up to Pages 120.

14 **MS. LEE:** Correct.

15 **COMMISSIONER SKOP:** All right. Thank you.

16 **CHAIRMAN ARGENZIANO:** And I, I want to take a  
17 minute on this issue and just go over, if we can -- if  
18 can you, I've got the sheet in front of me, but if you  
19 could make it clear -- not the monster sheet, the  
20 smaller sheet. If we could go over the positions of the  
21 parties and then I just have a comment.

22 In other words, the, staff's recommendation  
23 differs by, let's see here, for the combined cycle  
24 units -- hold on one second.

25 **MS. LEE:** Yes. Yes, madam Chairman.

1                   **CHAIRMAN ARGENZIANO:** If you could do that.

2                   **MS. LEE:** FP&L proposed, excuse me, FP&L  
3 proposed a 25-year lifespan for combined cycle units.  
4 OPC did not really address the combined, the lifespan  
5 for combined cycle units, although it did suggest that  
6 30 or 35 years would be reasonable. FIPUG proposed 35  
7 years and the South Florida Hospital proposed 40 years.  
8 Staff is recommending 30 years.

9                   And that 30 years is based on testimony that  
10 the combined cycle units for FP&L are used mainly in  
11 heavy cycling, and the manufacturer information seems to  
12 imply that for heavy cycled units a lifespan 25 to 30  
13 years would be appropriate. And --

14                   **CHAIRMAN ARGENZIANO:** Wait a minute. I read  
15 something. I thought the industry standard was 35  
16 years. Are you saying that for heavily -- I may have  
17 the issues mixed up and that's why I want to ask.

18                   **MS. LEE:** Yes, ma'am. According to Witness  
19 Hardy, FP&L Witness Hardy, he said that the manufacturer  
20 had estimated a design life for combined cycle units of  
21 30 years for baseload and as short as 25 years if they  
22 were heavily cycled.

23                   **CHAIRMAN ARGENZIANO:** And you said 20 years  
24 for --

25                   **MS. LEE:** 25.

1                   **CHAIRMAN ARGENZIANO:** 25 years. Okay.

2                   **MS. LEE:** If they are heavily cycled. 30 for  
3 baseload.

4                   Now FP&L currently has and they are asking to  
5 retain a 25-year lifespan for their combined cycle  
6 units, for their new ones. They do have some combined  
7 cycle units that have exceeded a 25-year lifespan.  
8 Staff thinks that it is time to move incrementally to a  
9 longer lifespan. We aren't ready to move ten years, but  
10 we think moving the right direction will be going to 30  
11 years. And 30 years was suggested as being appropriate  
12 or being reasonable, a reasonable incremental adjustment  
13 made by OPC.

14                   **CHAIRMAN ARGENZIANO:** And that, the numbers  
15 you had mentioned were for the combined cycle.

16                   **MS. LEE:** Correct.

17                   **CHAIRMAN ARGENZIANO:** The large oil and  
18 gas-fueled steam units?

19                   **MS. LEE:** For the large oil and gas-fired  
20 steam units FP&L proposed a 35-year lifespan, OPC  
21 proposed a 50-year lifespan, FRF agreed with OPC, and  
22 staff recommended 50 years, a 50-year lifespan.

23                   **CHAIRMAN ARGENZIANO:** And the coal.

24                   **MS. LEE:** And the coal-fired units, FP&L was  
25 recommending 40 years, OPC was at 60 years, FIPUG was at

1 55 years, FRF agreed with the position of OPC, and staff  
2 is recommending a lifespan of 50 years.

3 **CHAIRMAN ARGENZIANO:** Thank you.

4 Members, any, any questions?

5 Commissioner Skop.

6 **COMMISSIONER SKOP:** Thank you, Madam Chair.

7 I guess I, you know, I see the various  
8 positions of the parties. I think I would, I would note  
9 for the record, you know, FPL has a well-documented,  
10 their Power Generation Division has a well-documented  
11 track record of excellent operational performance. So,  
12 again, I think that there is some discretion. The  
13 company obviously best knows how it cycles its units.  
14 You know, hindsight and armchair quarterbacking is, you  
15 know, out there. Everyone has a difference of opinions.

16 You know, in Florida they do have different  
17 locations, some are more southern than some of the other  
18 operators in the northern parts of the state. There  
19 could be slight differences in corrosion and, you know,  
20 all the salt in the air and such or coastal areas.

21 I think that from my perspective I'm  
22 comfortable with staff's adopting a conservative  
23 approach of moving towards a longer life, not  
24 necessarily on the combined cycle plant themselves  
25 adopting the company -- I mean, the Intervenors'

1 perspective. But, again, departing what the company  
2 wanted, adding to it in the direction of the  
3 intervenors, but not really kind of going all the way  
4 out there. And certainly, you know, that could be  
5 adjusted in any future depreciation case studies. It  
6 would have to be done based on operational fleet  
7 experience.

8 **MS. LEE:** Yes. And, remember, FP&L will be in  
9 for a new depreciation study in three years.

10 **COMMISSIONER SKOP:** Okay. All right. So, I  
11 mean, I think that, you know, it's a step in the right  
12 direction. It respects some of the concerns of the  
13 intervenors and those advanced by Public Counsel. But  
14 at the end of the day, FPL's Power Generation Group,  
15 again, their operational performance in that business  
16 segment is excellent, and I think it's best left to them  
17 to kind of give their best judgment as addressed, or  
18 adjusted by staff as to what the appropriate useful life  
19 would be for the combined cycle units. Thank you.

20 **CHAIRMAN ARGENZIANO:** And just for  
21 clarification, because it can get confusing, what may  
22 work in one area geographically may not work in another.  
23 So there's not just one set number.

24 **MS. LEE:** Absolutely.

25 **CHAIRMAN ARGENZIANO:** Okay.

1           **MS. LEE:** And that is really why staff --  
2 lifespans are your fundamental building blocks to  
3 develop your remaining life, but we really don't like  
4 recommending lifespans because they do vary from company  
5 to company depending on their unique circumstances.

6           **CHAIRMAN ARGENZIANO:** Commissioner Skop.

7           **COMMISSIONER SKOP:** Thank you, Madam Chair.

8           And I'll just give a quick illustrative  
9 example of that. The Lauderdale plant is probably  
10 within two nautical miles of the ocean.

11          **CHAIRMAN ARGENZIANO:** Salt water.

12          **COMMISSIONER SKOP:** Yeah. The Riviera Beach  
13 plant is basically a couple of hundred yards from Lake  
14 Worth Inlet, Canaveral is pretty close to the ocean.  
15 So, again, those operational experience, there was  
16 substantial discussion during the evidentiary proceeding  
17 that really that shouldn't make a difference. But I  
18 think at the end of the day and, you know, and two  
19 conflicting opinions, the tie should go to those  
20 actually operating their unit and their judgment. And,  
21 again, their operational performance of the Power  
22 Generating Division at FPL is excellent in my opinion.  
23 Thank you.

24          **CHAIRMAN ARGENZIANO:** Commissioners, any other  
25 comments, questions?

1 All right. We can --

2 **MS. LEE:** Commissioners --

3 **CHAIRMAN ARGENZIANO:** Sorry.

4 **MS. LEE:** Excuse me. No. I just want to  
5 point out one thing, and that is on Table 19C-2 the  
6 reserve position that staff is recommending, you will  
7 see it noted in the columns as theoretical reserve. I'm  
8 not going to talk a lot about this, but what staff has  
9 done in 19F and in 19E on the theoretical reserve  
10 calculation, we have brought each account's reserve to a  
11 theoretical level and calculated the imbalance, the  
12 reserve imbalance by account and then netted that to a  
13 bottom line. That's what you're going to see in 19E and  
14 19F. By doing that, every account needs to be restated  
15 to its theoretical level, and these are the resulting  
16 rates using that. Now this is different from what OPC  
17 recommended. OPC was not restating the reserves but was  
18 amortizing the reserve surplus.

19 **CHAIRMAN ARGENZIANO:** Uh-huh.

20 **MS. LEE:** And it's my opinion that you don't  
21 want to leave the surplus in the rate plus amortize it  
22 at the same time. That's almost hitting them twice.

23 **CHAIRMAN ARGENZIANO:** Any questions? Okay.

24 Thank you.

25 Commissioner Skop.

1                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

2                   And I think that was the point I was trying to  
3 make earlier, and correct me, Ms. Lee, if I was wrong,  
4 basically what you've reflected is looking at the  
5 current existing depreciation deficit and matching that  
6 against the calculated surplus to make a net surplus, a  
7 net adjusted surplus.

8                   **MS. LEE:** Correct.

9                   **COMMISSIONER SKOP:** All right. Thank you.

10                  **CHAIRMAN ARGENZIANO:** Okay. Next.

11                  **MS. OLLILA:** Commissioners, Sue Ollila for  
12 Commission staff.

13                  Issue 19D addresses the depreciation  
14 parameters for the transmission, distribution and  
15 general accounts. Staff's recommendations are in Table  
16 19D-3, which is contained on Pages 143 and 144. Staff  
17 is available for questions.

18                  **CHAIRMAN ARGENZIANO:** Commissioners?

19                  Okay. Staff, I asked the same thing. I  
20 believe that in this issue on 19D OPC was the only  
21 other, was the only one of the Intervenors to, to add.

22                  **MS. OLLILA:** That's correct, Chairman.

23                  **CHAIRMAN ARGENZIANO:** Can we go through the  
24 differences, please, between staff's recommendations so  
25 that we have a full understanding of the two positions?

1           **MS. OLLILA:** Sure. Okay.

2           **COMMISSIONER KLEMENT:** Madam Chair.

3           **CHAIRMAN ARGENZIANO:** Commissioner Klement.

4           **COMMISSIONER KLEMENT:** Could, could they also  
5 summarize the differences between what the company  
6 proposed?

7           **CHAIRMAN ARGENZIANO:** Yes. That's what I  
8 mean.

9           **COMMISSIONER KLEMENT:** Okay.

10          **CHAIRMAN ARGENZIANO:** That's what I meant, the  
11 companies, staff's.

12          **COMMISSIONER KLEMENT:** And the two.

13          **CHAIRMAN ARGENZIANO:** Absolutely. All  
14 parties.

15          **MS. OLLILA:** Okay. In order to make this  
16 simpler, yesterday we provided this sheet, and this will  
17 show the, the curve shape in the average service life.  
18 And this along with the average age of plant --

19          **COMMISSIONER KLEMENT:** I don't know that I  
20 have that.

21          **COMMISSIONER SKOP:** You have some small print.

22          **MS. OLLILA:** Sorry about that.

23          **CHAIRMAN ARGENZIANO:** No. No. Not that one.  
24 I believe it's this one, Commissioner Klement.

25          **MS. OLLILA:** Yes, ma'am.

1           **CHAIRMAN ARGENZIANO:** If he doesn't have this,  
2 let's make sure we get him a copy. Sometimes it takes a  
3 while digging through the pile here. Commissioner  
4 Klement.

5           **COMMISSIONER KLEMENT:** I can't find it.

6           **CHAIRMAN ARGENZIANO:** Okay. Can we get a copy  
7 for the Commissioner?

8           **MS. OLLILA:** Okay. This spreadsheet goes  
9 through the curve in the average service life, and those  
10 are the two, two of the three building blocks for the  
11 remaining life, which is, which is what you all vote on.

12                   The third piece of what constitutes the  
13 remaining life is the average age of the plant, and  
14 that's, that's a calculation that FPL did and it's  
15 contained in their backup material.

16                   There's also another piece, and that's the net  
17 salvage. And it's your pleasure; we can do the  
18 remaining life first and then go through the net salvage  
19 which is contained on the monster spreadsheet.

20           **CHAIRMAN ARGENZIANO:** Okay. That would be  
21 great. Thank you.

22           **MS. OLLILA:** Okay. The first, the first few  
23 accounts, the accounts that begin with three five are  
24 transmission accounts. The first account is the  
25 easements, 350.2. And the only difference here

1 between -- FPL, OPC and staff all propose the same curve  
2 shape. In the average service life FPL proposed 50  
3 years, OPC proposed 95 years, and staff recommended 75  
4 years. Excuse me. Would you like me to briefly explain  
5 why staff recommended 75 or --

6 **CHAIRMAN ARGENZIANO:** I think on this issue I  
7 would because it's significant.

8 **MS. OLLILA:** Okay.

9 **CHAIRMAN ARGENZIANO:** It's so different.  
10 Well, not that staff is so different. I mean, from  
11 the -- each, each recommendation, each party's opinion  
12 vary.

13 **MS. OLLILA:** Well, the, the narrative part of  
14 my explanation is contained on Page 125. And what it  
15 really boiled down to was that not all of FPL's  
16 easements are perpetual. There are some that they, they  
17 would like them to be perpetual but they're not. And  
18 that was, that was the primary reason -- and I made --  
19 and it is a judgment call, that 75 years -- that 95  
20 years was too long, 50 is too short. 75 seemed to be a  
21 reasonable compromise.

22 **CHAIRMAN ARGENZIANO:** Thank you.

23 Commissioners, any, any questions on that?

24 Okay.

25 **MS. OLLILA:** Okay. The next account, 352,

1 structures and improvements, there was no proposal from  
2 OPC. I reviewed FPL's data and agreed with their  
3 proposal.

4 353 is station equipment, and for this account  
5 FPL proposed a curve of R1.5 and a 38-year life, OPC  
6 proposed an L1 curve and a 43-year life, and staff's  
7 recommendation is the R1.5 curve, but a 40-year life,  
8 which is in between the FPL and OPC proposal.

9 **CHAIRMAN ARGENZIANO:** Okay. Maybe a better  
10 way of doing this is the first one was a keen issue to  
11 me. Instead of having staff go through every one of  
12 them, are there any particular ones that, that the  
13 Commissioners want to go through? I really wanted to  
14 hear -- I didn't want to have to put you through that  
15 because I did look, review the chart and thought that  
16 that was the most, the one that varied the most in  
17 numbers, and that I thought was good. So if there are  
18 no other questions to that, we don't have to put staff  
19 through all that and then we can take it from there. Is  
20 that okay? All right. Then thank you. So we won't  
21 have you read every one of them. That, that was fine.  
22 And if you would continue. Not with this -- the next  
23 issue.

24 **MS. OLLILA:** Okay. There are also the net  
25 salvage recommendations which are contained beginning on

1 Page 10 of the monster spreadsheet. And if there are  
2 any particular ones that you have questions on, if you  
3 would like me to go through them quickly. Just, just to  
4 give you an idea, OPC provided 14 net salvage  
5 recommendations, and I can go through those individually  
6 if you like or --

7 **CHAIRMAN ARGENZIANO:** Which page are we on in  
8 our -- has anybody got the page number of the salvage  
9 open? I've got 127 and I'm not finding it.

10 **MS. OLLILA:** Well, it's an account-by-account  
11 analysis.

12 **CHAIRMAN ARGENZIANO:** I'm sorry. On the  
13 monster spreadsheet.

14 **MS. OLLILA:** Oh, Page 10.

15 **CHAIRMAN ARGENZIANO:** But I meant OPC's and  
16 FPL's position on -- hold on one second. Let me find  
17 it. It would be -- I've got it on 121. I'm sorry.  
18 Okay.

19 **MS. OLLILA:** Yeah. This is a difficult  
20 spreadsheet to go through.

21 **CHAIRMAN ARGENZIANO:** I'm going to adjust my  
22 reading glasses for the next time.

23 And you were saying? I'm sorry. I didn't  
24 mean to cut you off.

25 **MS. OLLILA:** OPC provided net salvage

1 proposals on, for 14 separate accounts.

2 **CHAIRMAN ARGENZIANO:** And the --

3 **MS. OLLILA:** And, I apologize, I'm just trying  
4 to find myself in, in here.

5 **CHAIRMAN ARGENZIANO:** We, I think we all are  
6 on this one trying to find it.

7 **MS. OLLILA:** Okay. Let me just find the first  
8 account. Okay. The first account is station equipment  
9 on Page 11, and it is actually the first account. The  
10 company currently has a net salvage of 5 percent and it  
11 proposed a -10 percent, OPC proposed 0 percent, and  
12 staff recommends -2 percent.

13 **CHAIRMAN ARGENZIANO:** Okay.

14 **MS. OLLILA:** And basically after reviewing the  
15 data staff believed that the net salvage should be  
16 reduced but thought that, that FPL's proposal was, was  
17 too drastic and went with a compromise in essence.

18 **CHAIRMAN ARGENZIANO:** Okay.

19 **MS. OLLILA:** Okay.

20 **CHAIRMAN ARGENZIANO:** Members, any --  
21 Commissioners, any, any questions? Commissioner Skop,  
22 on any --

23 **COMMISSIONER SKOP:** Yes, Madam Chair.

24 **COMMISSIONER ARGENZIANO:** You're recognized.

25 **COMMISSIONER SKOP:** Thank you, Madam Chair.

1           If they could just explain that last part  
2 again in terms of they thought that the company's  
3 position was, was too drastic and they adopted a  
4 compromise. Can you elaborate a little bit more on what  
5 you just said in the last part of your statement?

6           **MS. OLLILA:** Yes, sir. FPL proposed that the  
7 net salvage be reduced from a +5 percent to a  
8 -10 percent. And the data didn't, didn't in staff's  
9 view support that great a reduction in net salvage. The  
10 net salvage is decreasing, is becoming more negative.  
11 But in an effort to not move drastically and because 15  
12 points is actually a large difference, and mindful of  
13 OPC's arguments to reduce it to 0, staff thought  
14 -2 percent. Could you go with, with 0 percent?  
15 Absolutely. Could you go with -4? Yes. It's a  
16 judgment call at this point.

17           **COMMISSIONER SKOP:** Thank you.

18           **CHAIRMAN ARGENZIANO:** Commissioners?

19           **MS. OLLILA:** The next, the next account is  
20 354, towers and fixtures.

21           **CHAIRMAN ARGENZIANO:** Let me ask the  
22 Commissioners if it's their will to go through every  
23 account?

24           **COMMISSIONER STEVENS:** No, ma'am.

25           **COMMISSIONER EDGAR:** I don't need it.

1                   **CHAIRMAN ARGENZIANO:** Okay. Then, then let's  
2 not do that, I think. If there's something  
3 specifically -- Commissioner Skop?

4                   **COMMISSIONER SKOP:** Madam Chair, I think you  
5 mentioned we were going to take a break at 11:00. If I  
6 might be able to get a moment before there, I'd like to  
7 maybe just review the depreciation schedules beforehand.

8                   **CHAIRMAN ARGENZIANO:** Okay. That would be a  
9 good idea. Let's just take, let's -- it's -- how about  
10 we come back at five after. Give everybody time. We're  
11 on recess.

12                   (Recess taken.)

13                   Okay. We are back. And any discussion needs  
14 to go outside the room so we can hear.

15                   Okay. Where did we leave off? Commissioner  
16 Skop, did you, did you have something that you wanted  
17 to, to do or say?

18                   **COMMISSIONER SKOP:** No, Madam Chair. I was  
19 just, I was just looking at the issues, and I guess  
20 staff could proceed on in the block that we're --

21                   **COMMISSIONER ARGENZIANO:** Okay. Is everybody  
22 comfortable at this point?

23                   Okay. Staff, if you would just proceed.

24                   **MS. OLLILA:** Okay. What I did during the  
25 break was I looked at the net salvage recommendations

1 more closely to perhaps give you a better idea of, of  
2 where staff's recommendations came out. And essentially  
3 in some accounts staff agreed with OPC and recommended  
4 OPC's net salvage recommendation. In other accounts  
5 staff did not, and in those cases either recommended a  
6 compromise or agreed with FPL's position.

7 **CHAIRMAN ARGENZIANO:** Okay.

8 **MS. OLLILA:** There was one account where FPL  
9 recommended a decrease in net salvage, and OPC's  
10 recommendation was, yes, there should be a little  
11 decrease in net salvage. Staff didn't agree that there  
12 should be any decrease in net salvage at this point, so  
13 staff kept it the same.

14 **COMMISSIONER ARGENZIANO:** Where it was. Okay.

15 **MS. OLLILA:** So there, there is a range, which  
16 doesn't help, but.

17 **CHAIRMAN ARGENZIANO:** Okay. Okay.

18 Commissioners?

19 Okay. I think we can move on.

20 **MS. OLLILA:** Okay. The other part of 19D  
21 includes accounts that are amortizable, and these are  
22 accounts that are amortized under Commission rules. A  
23 good example would be office equipment.

24 There are other accounts for which FPL  
25 proposed the same type of amortization, and these

1 accounts had their amortizations originally approved in  
2 the 2005 stipulation. There was no testimony on this  
3 issue from anybody really, and staff recommended that  
4 these amortizations continue.

5 **CHAIRMAN ARGENZIANO:** So let me ask you, when  
6 you mentioned the 2005 stipulation, you're saying there  
7 are certain ones. Could you tell us the certain ones  
8 that were stipulated on in 2005?

9 **MS. OLLILA:** Yes, ma'am. These are, excuse  
10 me, these are on Page 141, Tables 19D-1 and 19D-2.

11 **CHAIRMAN ARGENZIANO:** Okay.

12 **MS. OLLILA:** And actually 19D-2 is probably  
13 the perfect example of stipulation, of amortizations  
14 that were stipulated to in 2005 for which staff is  
15 recommending that they continue.

16 **COMMISSIONER SKOP:** Madam Chair.

17 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

18 **COMMISSIONER SKOP:** And am I correct that  
19 that's on Page 141 on that 19D-2?

20 **MS. OLLILA:** Yes, sir.

21 **COMMISSIONER SKOP:** Okay. Great. Thank you.

22 **MS. OLLILA:** And that is really 19D in a  
23 nutshell, a large nutshell.

24 **COMMISSIONER ARGENZIANO:** Okay. Any  
25 questions? Members? Commissioners. I'm sorry. I keep

1 calling you members. You are members I guess. We're  
2 all members, but you're Commissioners. Seeing no  
3 questions, let's -- we had to -- we were going to hold  
4 19F. So we're going to move then to, if there are no  
5 questions, to 19G. 19E. I'm sorry. No. Yes. E.

6 **MS. LEE:** 19E, Commissioners, is the  
7 calculation of the theoretical reserve and determination  
8 of the total reserve imbalance, which in the case of  
9 FP&L is a reserve surplus.

10 On Table 19-1, actually it should be 19E-1, on  
11 Page 146 the imbalance is shown for each function with a  
12 total reserve imbalance of \$1.2 billion.

13 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

14 **COMMISSIONER SKOP:** Thank you, Madam Chair.

15 Just a question to, to Ms. Lee. With respect  
16 to the theoretical depreciation surplus, I know that  
17 there was a lot of testimony that was taken during the  
18 evidentiary hearing, and OPC's position as indicated,  
19 the position of the parties was that their depreciation  
20 or the depreciation study advocated by their witness  
21 indicated a depreciation, a theoretical depreciation  
22 reserve or surplus -- excuse me, let me get my  
23 technology -- theoretical surplus of \$2.7 billion. And  
24 then I know that the company's position was  
25 substantially lower than that. And I think the staff,

1 based on the record evidence, concluded as shown on Page  
2 146 that the total reserve imbalance was approximately  
3 \$1.2 billion. Is that correct?

4 **MS. OLLILA:** That is correct.

5 **COMMISSIONER SKOP:** Okay. Now, you know, I'm  
6 trying from my perspective to reconcile, you know, what  
7 the appropriate numbers should be based on the, the  
8 record evidence before the Commission. I had thought  
9 during the record evidence and in reading the transcript  
10 that OPC or at least one of the parties somewhat  
11 conceded that the reserve might be somewhat less than  
12 2.7 billion. Can, can staff elaborate on that a little  
13 bit just to clear that issue up?

14 **MS. LEE:** The calculation of the theoretical  
15 reserve imbalance or the theoretical reserve period is  
16 based on what the party recommended or proposed as far  
17 as average service life, average remaining life, net  
18 salvage. To the extent that either, any of those three  
19 parameters differed, so will the calculation of the  
20 theoretical reserve.

21 As you already recognized, in production  
22 plant, for example, combined cycle, staff recommended  
23 lifespans that were different from OPC. Also, net  
24 salvage, the net salvage values weren't necessarily  
25 always in line with OPC's proposals either in production

1 or in transmission, distribution. All of those factors  
2 weigh in in your, in your calculation, your actual  
3 calculation of the theoretical reserve. That's why you  
4 have the differences in numbers.

5 **COMMISSIONER SKOP:** Okay. And so staff, based  
6 on its analysis, feels that pursuant to the Table 1. --  
7 or 19.1 on Page 146 feels that the appropriate reserve  
8 imbalance is approximately \$1.2 billion; is that  
9 correct?

10 **MS. LEE:** Correct. Based on the parameters,  
11 the depreciation parameters staff is recommending in the  
12 previous issues. Yes.

13 **COMMISSIONER SKOP:** Okay. And if -- you know,  
14 again, there's -- when you have different studies,  
15 obviously there's reasonable uncertainty and the company  
16 has its position, staff has its position, OPC and  
17 Intervenors have their position. But if, for instance,  
18 the number that staff has arrived at is lower than it  
19 should be, ultimately that will be corrected within the  
20 next depreciation study, which would show an even  
21 greater surplus.

22 **MS. LEE:** Absolutely.

23 **COMMISSIONER SKOP:** Okay. So there is a  
24 mechanism for truing that up as we go forward.

25 **MS. LEE:** Absolutely.

1                   **COMMISSIONER SKOP:** And I think that you  
2 previously stated the next depreciation study is going  
3 to be in three years?

4                   **MS. LEE:** Three years. It's four years from  
5 the last filed study, which was in 2009.

6                   **COMMISSIONER SKOP:** Okay. And then, and then  
7 also too with the adjustment that staff has made to this  
8 number offset by the depreciation deficit, the net  
9 number of the theoretical depreciation reserve surplus  
10 is just somewhat over \$800 million total; is that  
11 correct?

12                   **MS. LEE:** That is correct.

13                   **COMMISSIONER SKOP:** Okay. All right. Thank  
14 you.

15                   **CHAIRMAN ARGENZIANO:** Commissioners?

16                   **COMMISSIONER STEVENS:** Thank you,  
17 Commissioner. That's right on point.

18                   **CHAIRMAN ARGENZIANO:** All right. Let me see  
19 if I have any questions.

20                   Okay. We can -- well, then we have to --  
21 we're going to take 19F separately. So we want to go,  
22 we'll need a --

23                   **COMMISSIONER SKOP:** I'll make a motion.

24                   **CHAIRMAN ARGENZIANO:** -- a motion. Okay.

25                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

1           If there are no further questions, I'd move to  
2 adopt the staff recommendation on Issues 19A, 19B, 19C,  
3 19D and 19E.

4           **COMMISSIONER STEVENS:** Second.

5           **COMMISSIONER EDGAR:** Okay. Any discussion or  
6 questions or debate? Hearing none, all those in favor,  
7 say aye.

8           (Simultaneous vote.)

9           Opposed, same sign.

10          I'm sorry?

11          **MS. OLLILA:** Excuse me, Commissioners. 19G is  
12 the implementation date.

13          **CHAIRMAN ARGENZIANO:** We forgot. All right.  
14 We'll do that, we're going do that separately. Okay.

15          **MS. OLLILA:** Sorry about that.

16          **COMMISSIONER EDGAR:** All those opposed, same  
17 sign. I think it didn't go that way. So hearing none,  
18 the motion is approved.

19          And now we're on 19G.

20          **MS. OLLILA:** Sue Ollila again for staff.

21          19G is the proposed implementation date for  
22 the depreciation rates. Staff recommends January 1st,  
23 2010, which is the same date recommended by FPL and OPC.

24          **COMMISSIONER ARGENZIANO:** Commissioner Skop.

25          **COMMISSIONER SKOP:** Madam Chair, I'd move to

1 approve staff recommendation on Issue 19G.

2 **COMMISSIONER STEVENS:** Second.

3 **COMMISSIONER ARGENZIANO:** All those in favor,  
4 say aye.

5 (Simultaneous vote.)

6 Opposed, same sign. Show the motion passed.

7 That was a smooth way of saying we didn't forget 19G.

8 Okay. All right. Let's just keep trucking on  
9 to, I guess, Issue 40. I'm sorry. I've got the  
10 wrong -- sorry? No, it is 40. Okay. 19G to 40. I'm  
11 right.

12 **COMMISSIONER STEVENS:** Yes, ma'am.

13 **CHAIRMAN ARGENZIANO:** Okay. Thank you.

14 **MR. HIGGINS:** Good morning, Commissioners.

15 Devlin Higgins with Commission staff.

16 Item Number 40 concerns FPL's proposal that  
17 its current annual fossil dismantlement accrual be  
18 revised. Staff recommends the Commission revise the  
19 company's current annual fossil dismantlement accrual.  
20 The specific amount of the annual accrual is addressed  
21 in Issue 42.

22 **CHAIRMAN ARGENZIANO:** Commissioners, do you  
23 need a minute or are we okay?

24 Okay. We can move to 41.

25 **MR. HIGGINS:** Item 41 concerns FPL's proposed

1 fossil dismantlement reserve reallocations. Staff  
2 recommends the Commission approve the reserve  
3 reallocations presented in Table 41-1 of the staff  
4 recommendation.

5 **CHAIRMAN ARGENZIANO:** Commissioners?  
6 Everybody is okay?

7 Okay. We'll go to 42.

8 **MR. SPRINGER:** Good morning, Commissioners,  
9 I'm Michael Springer on behalf of Commission staff.

10 Issue 42 addresses the appropriate annual  
11 provision for dismantlement. Staff recommends  
12 \$18,468,387 as in Table 42-2.

13 **CHAIRMAN ARGENZIANO:** Commissioners?

14 Okay. Let's move to Issue 43.

15 **MR. HIGGINS:** Item Number 43 concerns the  
16 assumptions made in FPL's fossil dismantlement study.  
17 Staff is recommending that the assumptions made in FPL's  
18 2008 fossil dismantlement study with regards to site  
19 restoration are reasonable.

20 **CHAIRMAN ARGENZIANO:** Okay. We'll move on to  
21 44.

22 **MR. HIGGINS:** Item Number 44 concerns whether  
23 the Commission should direct FPL to consider alternative  
24 demolition approaches in its future dismantlement  
25 studies. As it has in the past, staff recommends FPL

1 consider alternative demolition approaches in future  
2 studies.

3 **CHAIRMAN ARGENZIANO:** One second. I think I  
4 had a note on this one. No, I did not. So if anybody  
5 else does -- okay. There we go. Do we have a motion on  
6 this block?

7 **COMMISSIONER SKOP:** Madam Chair, I have a,  
8 before making a motion I would respectfully --

9 **CHAIRMAN ARGENZIANO:** Oh, okay.

10 **COMMISSIONER SKOP:** -- ask to go back to Issue  
11 42 for a point of clarification.

12 **CHAIRMAN ARGENZIANO:** 42. Let's go back to  
13 42. That may be the one I had a question on.

14 Commissioner Skop, you're recognized.

15 **COMMISSIONER SKOP:** Thank you, Madam Chair.

16 On Issue 42, in the first sentence of the  
17 staff recommendation it discusses the appropriate system  
18 annual provision for dismantlement and the number  
19 includes solar, and then it discusses the retail annual  
20 accrual amount for 2010 excluding solar. Can staff just  
21 explain why solar is included in the first number and  
22 not the second?

23 **MR. SPRINGER:** Okay. That's a good question.  
24 Solar -- we look at fossil dismantlement every four  
25 years, and really solar fits into, it's more closely

1 related than looking at it as a nuclear plant. So it's  
2 not really fossil. I know that's probably why the issue  
3 doesn't actually mention fossil in it, but we, the  
4 company when they filed their, their study, they put  
5 solar plants with the fossil plants. And so we looked  
6 at them. And as you're right, the solar plants, the  
7 actually amounts for the solar plants for the  
8 dismantlement will be recovered through the  
9 Environmental Cost Recovery Clause. But we include them  
10 here since we did look at them in the study as well.

11 **COMMISSIONER SKOP:** Okay. And I think that  
12 part of that may be at least one of the three solar  
13 plants is actually integrated in with their fossil  
14 plant, I believe it's the Martin plant that has the,  
15 using that to provide additional heat input into the  
16 steam generator, where the others -- I mean, the steam  
17 turbine, whereas the other two solar projects are just  
18 standalone solar PVs. So that, that might -- I don't  
19 know if that had any influence on staff's thinking and  
20 analysis, but I know one of the actual larger solar  
21 arrays, the parabolic mirror one, is actually kind of  
22 integrated into a combined cycle plant. So I don't know  
23 if that made a difference.

24 **MR. SPRINGER:** I believe that we, we treated  
25 the Martin solar as, separate as solar.

1                   **COMMISSIONER SKOP:** Okay.

2                   **MR. SPRINGER:** And so we, we treated it  
3 through the Environmental Cost Recovery Clause.

4                   **COMMISSIONER SKOP:** Okay. All right. Thank  
5 you.

6                   **MR. SPRINGER:** Thank you.

7                   **CHAIRMAN ARGENZIANO:** Okay. We're ready for a  
8 motion on that block.

9                   **COMMISSIONER SKOP:** Madam Chair, I'd move to  
10 approve staff recommendations on Issues 40, 41, 42, 43  
11 and 44.

12                   **COMMISSIONER STEVENS:** Second.

13                   **CHAIRMAN ARGENZIANO:** Any discussion? Hearing  
14 none, all in favor, say aye.

15                   (Simultaneous vote.)

16                   Opposed, same sign. Show the motion passing.

17                   And let's move to rate base, Issue 46.

18                   **MS. GARDNER:** Commissioners, I'm Betty Gardner  
19 of Commission staff.

20                   Issue 46, should the net  
21 overrecovery/underrecovery of fuel, capacity,  
22 conservation and Environmental Cost Recovery Clause  
23 expenses be included in the calculation of working  
24 capital allowance for FP&L? Staff recommends an  
25 increase of 101,971,000 for overrecovery of fuel and

1 conservation costs in the calculations.

2 **CHAIRMAN ARGENZIANO:** Commissioners? No? Did  
3 you say yes or no?

4 **COMMISSIONER STEVENS:** No questions.

5 **CHAIRMAN ARGENZIANO:** Okay. Let's move on to  
6 47. Thank you.

7 **MR. CLEMENCE:** Good morning, Commissioners.  
8 Walter Clemence with Commission staff.

9 In Issue 47 staff is recommending that the  
10 costs for AMI have been properly included in the rate  
11 case. FPL plans to install smart meters for all of its  
12 over 4 million residential and small commercial  
13 customers. AMI is expected to provide cost savings to  
14 the company and may provide customers with information  
15 on how to better manage their energy usage in the  
16 future.

17 Further, staff is recommending that FPL should  
18 provide the Commission with a yearly progress report on  
19 the implementation of AMI in the energy, energy  
20 conservation cost recovery docket.

21 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

22 **COMMISSIONER SKOP:** Thank you, Madam Chair.

23 Just with respect to the implementation of  
24 FPL's AMI initiative or advanced metering  
25 infrastructure, replacing the meters with smart meters,

1 there will be subsequent benefits to the ratepayers or  
2 benefits to the ratepayers in subsequent years by making  
3 that change to the extent that one would hope to see  
4 some productivity improvements and not having to read  
5 meters and being able to read meters remotely. Is that  
6 staff's understanding.

7 **MR. CLEMENCE:** Definitely. FPL is expecting  
8 to obviously reduce meter readers. These can be read  
9 remotely. They're also expecting increased productivity  
10 within the call center. The call center employees will  
11 have better information, will be able to more quickly  
12 respond to customer inquiries. They're also expecting  
13 other reductions as well.

14 **COMMISSIONER SKOP:** Okay. But those expected  
15 benefits are, are in the future and are not included or  
16 incorporated in the rate case before us today; is that  
17 correct?

18 **MR. CLEMENCE:** There are some savings included  
19 in the 2010 test year. There are greater savings in the  
20 future.

21 **COMMISSIONER SKOP:** In the out years. And  
22 those will be recaptured in the, in the next rate case,  
23 the next proceeding.

24 **MR. CLEMENCE:** Yes, sir.

25 **COMMISSIONER SKOP:** All right. Great. Thank

1 you.

2 **CHAIRMAN ARGENZIANO:** Okay. Issue 50.

3 **MS. GARDNER:** Issue 50, are FP&L's requested  
4 levels of plant-in-service appropriate? Staff  
5 recommends a reduction of \$1,251,217,394. Table, I have  
6 Table 50-1 on Page 198 that reflects a breakdown of that  
7 reduction.

8 **CHAIRMAN ARGENZIANO:** Commissioners? We're  
9 looking at the table. Okay.

10 **COMMISSIONER SKOP:** Madam Chair.

11 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

12 **COMMISSIONER SKOP:** Thank you, Madam Chair.

13 Just on Table 50-1 it shows that the, all  
14 costs for aviation have been removed from, from  
15 plant-in-service for 2010 test year; is that correct?

16 **MS. GARDNER:** Yes.

17 **COMMISSIONER SKOP:** Okay.

18 **MR. SLEMKEWICZ:** John Slemkewicz with staff.

19 I would just like to point out that this will  
20 tend to be a fallout issue because it does include the  
21 impacts of a few other issues that you will vote on  
22 later.

23 **CHAIRMAN ARGENZIANO:** Later. Uh-huh. Okay.  
24 Anything else, Commissioner Skop?

25 **COMMISSIONER SKOP:** No. I believe that was my

1 only question. I know staff noted on Page 198 also that  
2 this item has some relation to 1980 with the capital  
3 recovery schedules for the retirements of the, or  
4 near-term retirements of Cape Canaveral, Riviera,  
5 St. Lucie and Turkey Point, you know, issues in the AMI  
6 project. So I think that -- I just wanted to make sure  
7 that I fully understood the numbers. Thank you.

8 **CHAIRMAN ARGENZIANO:** Okay. Issue 51. Oh,  
9 I'm sorry. That's right. That's one of our last.  
10 Thank you. Let me -- I didn't use my usual marker here.

11 Okay. Then we're going to Issue 52.

12 **MS. GARDNER:** Issue 52, is FP&L's proposed  
13 adjustment to construction work in progress for the  
14 Florida EnergySecure line, the gas pipeline,  
15 appropriate? Staff recommends that the adjustment is  
16 not appropriate and should not be reported to the  
17 Commission on the monthly earnings surveillance report.

18 **CHAIRMAN ARGENZIANO:** Any questions on 52?  
19 Commissioner Skop.

20 **COMMISSIONER SKOP:** Thank you, Madam Chair.

21 And with respect to the staff recommendation,  
22 is the recommendation founded on the premise that the  
23 Commission denied the determination of need for the  
24 pipeline or is there additional rationale that the staff  
25 provided?

1                   **MS. GARDNER:** That's the rationale we used.

2                   **COMMISSIONER SKOP:** All right. Thank you.

3                   **CHAIRMAN ARGENZIANO:** Thank you. 55, Issue

4 55.

5                   **MS. GARDNER:** Issue 55, are FP&L's requested  
6 levels of construction work in progress appropriate?  
7 Staff recommends a reduction of \$20,715,000. And I have  
8 a table on Page 208 that reflects the breakdown, which  
9 also goes back to other issues that will be covered.

10                   **CHAIRMAN ARGENZIANO:** Any questions?

11                   Okay. Let's move on to 56. Thank you.

12                   **MS. GARDNER:** Are FP&L's requested levels of  
13 property held for future use appropriate? Staff  
14 recommends a reduction of 4,200,000.

15                   **CHAIRMAN ARGENZIANO:** Why? I thought I would  
16 just throw that in there. Any questions? I'm teasing  
17 you. Any questions, Commissioner Klement?

18                   **COMMISSIONER KLEMENT:** No.

19                   **COMMISSIONER ARGENZIANO:** Okay. Hearing none,  
20 let's move on to 58.

21                   **MS. GARDNER:** 58, is FP&L's proposed accrual  
22 of nuclear end of life materials and supplies and last  
23 core nuclear fuel appropriate? Staff recommends that  
24 the current accrual is appropriate.

25                   Secondly, staff recommends that the additional

1 expenses requested by the company in the amount of \$6  
2 million for last core and 137,000 for materials and  
3 supplies should be removed from this rate base  
4 proceeding.

5 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

6 **COMMISSIONER SKOP:** Thank you, Madam Chair.

7 With respect to the staff recommendation, I  
8 believe staff is recommending in addition to the first  
9 part that they remove the additional expense in, for the  
10 2010 and 2011 test years in the amount of \$6 million for  
11 last core and I think 137 for end of life materials.

12 They're going to be removed from this base rate  
13 proceeding. But I think staff is also recommending that  
14 they be addressed when the company files its 2010  
15 nuclear decommissioning study, and at that point they  
16 would be addressed in terms of what was appropriate.

17 **MS. GARDNER:** That is correct. That's the  
18 most appropriate docket to address, address these  
19 issues.

20 **COMMISSIONER SKOP:** Thank you.

21 **CHAIRMAN ARGENZIANO:** Okay. Thank you.

22 59.

23 **MS. GARDNER:** Should, should nuclear fuel be  
24 capitalized and included in rate base due to the  
25 dissolution of FPL Fuels, Incorporated? Staff

1 recommends that the nuclear fuel assets should be  
2 capitalized and included in rate base for the projected  
3 test year.

4 **CHAIRMAN ARGENZIANO:** Okay. Thank you. I  
5 hear no questions.

6 Issue 60.

7 **COMMISSIONER STEVENS:** Madam Chair.

8 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

9 **COMMISSIONER STEVENS:** On Issue 60, the, the  
10 numbers that I have in my worksheet under the FPL  
11 section, the 370 and the 404 match the staff's  
12 recommendation. Is that a typo?

13 **COMMISSIONER ARGENZIANO:** Staff.

14 **MS. GARDNER:** That's correct.

15 **COMMISSIONER STEVENS:** Okay.

16 **COMMISSIONER ARGENZIANO:** So it's correct that  
17 it's a typo?

18 **MS. GARDNER:** No. It's correct that the  
19 370,962 that is included in the FP&L position is the  
20 same as staff based upon the reduction, the  
21 recommendation that staff is recommending, the  
22 \$3,771,000 reduction.

23 **COMMISSIONER STEVENS:** So should the yes under  
24 FPL be no?

25 **MS. GARDNER:** Okay. Basically for the

1 2010 projected --

2 **COMMISSIONER STEVENS:** Maybe I misunderstand  
3 it.

4 **MS. GARDNER:** Okay. For the 2010 projected  
5 test year they're stating that the appropriate amount is  
6 374,733,000. Staff is saying, no, that amount is not  
7 appropriate.

8 **COMMISSIONER STEVENS:** Okay.

9 **MS. GARDNER:** But is recommending the  
10 reduction of 3,771,000 from that amount to bring us to  
11 that 370,962,000.

12 **COMMISSIONER STEVENS:** Okay.

13 **MR. SLEMKEWICZ:** And in their brief Florida  
14 Power & Light agreed with that adjustment. That's why  
15 their number and our number, our adjusted number are the  
16 same.

17 **COMMISSIONER STEVENS:** So FPL and staff agree  
18 here.

19 **MR. SLEMKEWICZ:** That's correct.

20 **COMMISSIONER STEVENS:** Okay. That's, that's  
21 just what I wanted to make sure. Thank you.

22 **COMMISSIONER ARGENZIANO:** Thank you.

23 Issue 61.

24 **MS. GARDNER:** Should the unamortized balance  
25 of the FP&L Glades Power Park be included in rate base?

1 Staff recommends that the unamortized balance for Glades  
2 Power Park in the amount of \$34.1 million be included in  
3 rate base and amortized over five years.

4 **CHAIRMAN ARGENZIANO:** I don't see any  
5 questions. Thank you.

6 63.

7 **MS. GARDNER:** 62 is a fallout issue.

8 **CHAIRMAN ARGENZIANO:** Did we just do 62?

9 **COMMISSIONER KLEMENT:** I thought we did 61.

10 **COMMISSIONER STEVENS:** 61.

11 **CHAIRMAN ARGENZIANO:** I'm sorry.

12 **MS. GARDNER:** I just did 61.

13 **CHAIRMAN ARGENZIANO:** We're on 62. Thank you.  
14 I'm jumping ahead. On Issue 62, a fallout issue, and  
15 we'll just go to 63, which is also a fallout issue.

16 **MS. GARDNER:** Is also a fallout issue?

17 **CHAIRMAN ARGENZIANO:** Okay. So we need a  
18 motion, and understanding that we're taking up Item 51,  
19 Issue 51 later.

20 Commissioner Skop.

21 **COMMISSIONER SKOP:** Thank you, Madam Chair.  
22 If there are no further questions from my colleagues,  
23 I'd respectfully move to approve the staff  
24 recommendation for Issues 46, 47, 50, 52, 55, 56, 58,  
25 59, 60, 61, 62 and 63, noting that the Commission has

1 denied the subsequent test year for 2011 and it'll make  
2 that portion of those staff recommendations moot.

3 **CHAIRMAN ARGENZIANO:** Do I have a second?

4 **COMMISSIONER STEVENS:** Second.

5 **CHAIRMAN ARGENZIANO:** Any discussion or  
6 debate?

7 Hearing none, all in favor --

8 **COMMISSIONER STEVENS:** Is --

9 **CHAIRMAN ARGENZIANO:** I'm sorry. Commissioner  
10 Stevens.

11 **COMMISSIONER STEVENS:** Is Item 50 also a  
12 fallout from what we do later?

13 **MR. DEVLIN:** Commissioner, I was going to  
14 interject on that point. Good catch.

15 **COMMISSIONER STEVENS:** Okay. Thank you.

16 **MR. DEVLIN:** I believe Issue 50 should have  
17 been labeled a fallout issue as well, which means  
18 subject to the change.

19 **COMMISSIONER STEVENS:** Thank you.

20 **CHAIRMAN ARGENZIANO:** Very good catch.

21 **COMMISSIONER SKOP:** Thank you, Commissioner  
22 Stevens.

23 **COMMISSIONER STEVENS:** Yes, sir.

24 **COMMISSIONER SKOP:** I'll reflect that to be  
25 embodied in my motion.

1                   **CHAIRMAN ARGENZIANO:** All those in favor, aye.

2                   (Simultaneous vote.)

3                   All those opposed, same sign. Show it

4 adopted.

5                   And we are now on cost of capital on Issue 64,  
6 which is on Page 228.

7                   Would you mind taking that for a moment? I'll  
8 be right back.

9                   **COMMISSIONER SKOP:** All right. If, if staff  
10 is ready to proceed, we'll start with Issue 64,  
11 accumulated deferred taxes under the cost of capital  
12 section.

13                   **MS. SALNOVA:** Good morning, Commissioners.  
14 Natalia Salnova, Commission staff.

15                   Issue 64 addresses the appropriate amount of  
16 accumulated deferred taxes to include in the capital  
17 structure for 2010 projected test year. Based on staff  
18 recommendations, the appropriate amount of accumulated  
19 deferred income taxes is \$2,885,287,055 for the  
20 projected 2010 test year. The appropriate amount of  
21 accumulated deferred income taxes may change based on  
22 decisions in other issues.

23                   **COMMISSIONER SKOP:** Thank you. Any questions  
24 from my colleagues on Issue 64?

25                   Hearing none, if staff could please introduce

1 Issue 66.

2 **MS. SALNOVA:** Issue 66 addresses the  
3 appropriate amount and cost rate of the unamortized  
4 investment tax credits to include in the capital  
5 structure for the 2010 projected test year. Staff  
6 recommends 5,416,335 investment tax credits at a cost  
7 rate 8.64 percent for the projected 2010 test year as  
8 shown on Schedule 2A. Again, the appropriate amount of  
9 ITCs may change based on decisions in other issues.

10 **COMMISSIONER STEVENS:** Madam Chair.

11 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.  
12 Excuse me.

13 **COMMISSIONER STEVENS:** If, if I can ask, help  
14 me understand the difference between staff's  
15 recommendation and the OPC request under A, 2010, of  
16 63 million.

17 **MS. SALNOVA:** The difference results from --

18 **COMMISSIONER STEVENS:** Did that include the  
19 aviation expenses, the OPC number?

20 **MS. SALNOVA:** No, it does not.

21 **COMMISSIONER STEVENS:** Okay. I'm sorry. Go  
22 ahead.

23 **MS. SALNOVA:** The way staff computed the ITC  
24 cost rate is through -- okay. I apologize. ITC's  
25 weighted, weighted average cost rate is 8.64 percent,

1 and it was computed by computed weighted average of  
2 common stock, preferred stock and long-term debt, and  
3 the difference here is that OPC suggests to include  
4 short-term debt as well.

5 **COMMISSIONER STEVENS:** Okay. That's the  
6 difference, the inclusion of short-term debt.

7 **MS. SALNOVA:** That's the main difference.

8 **COMMISSIONER STEVENS:** Okay.

9 **MS. SALNOVA:** And the cost of equity is  
10 slightly different for OPC as well. They're proposing  
11 9.5 percent and staff proposes 10.75 percent.

12 **COMMISSIONER STEVENS:** Why is it inappropriate  
13 to include the short-term debt?

14 **MS. SALNOVA:** The reason why is because ITCs  
15 are related to long-term items, and that's the reason  
16 why.

17 **COMMISSIONER STEVENS:** Okay. Thank you.  
18 Thank you, Madam Chair.

19 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

20 **COMMISSIONER SKOP:** Thank you, Madam Chair.

21 I may have an additional follow-up question on  
22 Issue 66, but at this point we can move forward to Issue  
23 67.

24 **CHAIRMAN ARGENZIANO:** Okay. You want to go  
25 forward before you ask your question?

1                   **COMMISSIONER SKOP:** Yes.

2                   **CHAIRMAN ARGENZIANO:** Okay. Let's go to 67,  
3 unless there's any other questions on 66.

4                   Okay. 67.

5                   **MR. SPRINGER:** Good morning, Commissioners.  
6 Issue 67 addresses the appropriate cost rate for  
7 short-term debt. Staff recommends 2.11 percent for  
8 2010.

9                   **CHAIRMAN ARGENZIANO:** Questions?

10                  **COMMISSIONER STEVENS:** No, ma'am.

11                  **COMMISSIONER ARGENZIANO:** Okay. You want to  
12 go back to -- no? Oh, okay. I thought you wanted to --  
13 okay. I get it.

14                  Let's go to 68, please.

15                  **MR. SPRINGER:** Issue 68 addresses the  
16 appropriate cost rate for long-term debt. Staff  
17 recommends 5.49 percent for 2010.

18                  **CHAIRMAN ARGENZIANO:** Questions? Hearing  
19 none, okay.

20                  69.

21                  **MR. SPRINGER:** Issue 69 addresses if rate base  
22 and capital structure have been reconciled  
23 appropriately. Staff believes that FPL did reconcile  
24 the rate base and capital structure over all sources of  
25 capital as appropriate in this instance.

1                   **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

2                   **COMMISSIONER STEVENS:** Just a, a quick  
3 question. Up at the top of Page 247 it's stated that  
4 FPL, FPL did not furnish the information requested by  
5 staff concerning adjustments by plant to the balances of  
6 the ADITs and the ITCs, the tax credits and the  
7 accumulated. What, what impact could this have had on  
8 this issue?

9                   **MR. SPRINGER:** Really what, what staff likes  
10 to do is get specific adjustments from, from the  
11 company. And in this instance, the company's accounting  
12 functions, they did not trace their sources. They  
13 believed that the sources are fungible, which means, you  
14 know, that they don't have a specific class of capital  
15 that they look at to, to do these adjustments. So  
16 that's, that's where staff was requesting this. But  
17 they just did not, they don't look at it that way, so  
18 they don't provide it that way. And that's the reason  
19 why we're looking at opening up a generic docket and  
20 addressing this on not only FPL's behalf but on all the  
21 IOUs that use this because this, this came up recently  
22 in a TECO motion for reconsideration.

23                   **COMMISSIONER STEVENS:** Right. Right. Thank  
24 you.

25                   Thank you, Madam Chair.

1                   **CHAIRMAN ARGENZIANO:** Could, could staff  
2 clarify for me the concern of customer deposits and how  
3 that is used to reconcile the company's -- how does  
4 that -- the problem I think that a few of the parties  
5 had with that, I was reading through again, and I just  
6 don't have a clear picture of why that shouldn't matter  
7 or should matter.

8                   **MR. SPRINGER:** Customer deposits like deferred  
9 taxes and ITCs are, actually deferred taxes and customer  
10 deposits, they're considered low-cost sources of  
11 capital. And when you do an overall sources of capital,  
12 it actually reduces those balances, so it reduces the  
13 benefit to the customer. Normally we just want specific  
14 adjustments for those different accounts, and we were  
15 originally -- and even in TECO's original filing we had  
16 done it over investor sources.

17                   Because of normalization violations, when the  
18 IRS -- when you change the way that you look at that,  
19 way of looking at the -- accumulate the depreciation of  
20 investment, of income taxes, excuse me, there could be a  
21 way that the customer would not get the full benefit of  
22 it. So what we looked at is there again, excuse me,  
23 there again we wanted to open up a generic docket to  
24 review this because of the fact that not only does it  
25 affect FPL, it affects all the major IOUs. And we want

1 to come with, just not having one little issue here  
2 addressing this issue. We want to go ahead and actually  
3 have all parties and input to understand the best  
4 possible way to deal with this on a going forward basis.  
5 And, and as you can see on the table on Page 249, we  
6 calculated pro rata adjustments over all sources and  
7 then we calculated pro rata adjustments over investor  
8 sources only like we had done previously in other  
9 dockets, and the difference really wasn't a whole lot.

10 If you look at the handout that staff provided  
11 for FPL ROE scenarios, one basis point equals, based on  
12 staff's recommendation, one basis point equals  
13 \$1,284,076. So that, that would be the amount that each  
14 basis point would equal in revenue requirements. And so  
15 that's what we really were looking at as seeing that  
16 this really wasn't a large amount of difference and that  
17 this was appropriate in this instance.

18 **COMMISSIONER ARGENZIANO:** So then you're  
19 saying that staff is using the customer deposits, the  
20 ADIT and the ITC to reduce the pro rata adjustments to  
21 reconcile the company's capitalization to race rates --  
22 to base rates, base rates?

23 **MR. SPRINGER:** They are being reconciled to  
24 rate base. Each one of those categories, the customer  
25 deposits, they're being reduced based on being

1 reconciled to the rate base, but they are being  
2 represented in the capital structure.

3 **MR. MAUREY:** If I may make one, one  
4 clarification. When Mr. Springer referenced the one  
5 basis point change being \$1.2 million, that's one basis  
6 point change in ROE. We're talking about one basis  
7 point change here in this schedule on 249 in the overall  
8 cost of capital. The impact is going to be much less  
9 than the 1.2 million referenced here for ROE.

10 **MR. SPRINGER:** I apologize.

11 **MR. MAUREY:** And the point that he was making  
12 was that the risk of a normalization violation, losing  
13 the ability for the company to recognize deferred taxes  
14 is significant. And we want to pursue this in a, in a  
15 generic proceeding where all companies and all parties  
16 have equal access to the, to the discussion, but we  
17 didn't want to risk losing ADITs going forward over what  
18 was not, not a very material amount.

19 **CHAIRMAN ARGENZIANO:** When reading the other  
20 parties' opposition in doing that -- I don't know how to  
21 ask the question right. The OPC and I guess FIPUG took  
22 a position, as well as the hospital association, that  
23 seems to be the opposite of the outcome that you're  
24 saying, you're telling me. And I'd like to know your  
25 basis for either not agreeing with them or what you

1 think that their concern does in the final outcome.

2 **MR. MAUREY:** Sure. The -- first of all, we  
3 did make specific adjustments to ADITs and ITCs and then  
4 made only the incremental pro rata adjustment over all  
5 sources. So when we removed -- and most of those pro  
6 rata sources that are removed are for adjustments to  
7 rate base related to CWIP, earning AFUDC, they will all  
8 earn the same overall cost and amounts being recovered  
9 through cost recovery clauses. Both those categories of  
10 costs, when they are recovered eventually they will earn  
11 a blended cost of capital that includes ITCs, deferred  
12 taxes, customer deposits. In order to keep in balance  
13 you have to remove them from the capital structure in  
14 the same manner that they earn a return elsewhere in the  
15 equation.

16 And so it's in this manner -- while it appears  
17 to disagree with the position of some of the parties, it  
18 is consistent when you carry it through where the  
19 Environmental Cost Recovery Clause items, fuel items,  
20 other items that go through the clauses, as well as  
21 CWIP, earning AFUDC, they will all earn the same overall  
22 cost of capital.

23 **CHAIRMAN ARGENZIANO:** And the argument on the  
24 tax, potential violation of the Internal Revenue tax  
25 normalization rules, is that a valid one?

1           **MR. MAUREY:** Yes.

2           **CHAIRMAN ARGENZIANO:** Okay. Any other  
3 questions?

4           **COMMISSIONER STEVENS:** No, ma'am. I think you  
5 hit on the most important thing, the IRS and the  
6 normalization rules.

7           **COMMISSIONER ARGENZIANO:** Well, according to  
8 the IRS I think it is. They come and get you. Okay.  
9 Any other questions? Okay. Let's move on.

10          **MR. MAUREY:** Commissioners, Issue 70 asks  
11 whether FPL appropriately described the 59.6 percent  
12 equity ratio reflected in its original MFR filing as an  
13 adjusted 55.8 percent equity ratio on the basis of  
14 imputed debt associated with PPAs.

15                 It's staff recommendation that FPL has  
16 appropriately described. As we discuss in the body of  
17 this issue, there are a number of requirements. The  
18 financial statements filed in accordance with generally  
19 accepted accounting principles or GAAP require certain  
20 adjustments. Financial statements filed with this  
21 Commission for ratemaking purposes, this Commission  
22 requires certain adjustments. They're not the same. So  
23 the same capitalization can be reported in two different  
24 manners. And based on GAAP accounting, it's  
25 approximately 55.6 percent, on S&P or Standard & Poor's

1 adjusted basis it's approximately 55.8 percent. And  
2 for, on a Commissioner adjusted basis it's 59, as we'll  
3 discuss in the next issue, 71, it's 59.1 percent.

4 **CHAIRMAN ARGENZIANO:** Members, I think I'm  
5 going to want to vote on this issue separately, so we  
6 might want to take it up now if there's any other  
7 questions or -- Commissioner Skop.

8 **COMMISSIONER SKOP:** I've got one direct line  
9 of questioning on Issue 70.

10 **COMMISSIONER ARGENZIANO:** You're recognized.

11 **COMMISSIONER SKOP:** And then a -- thank you,  
12 Madam Chair.

13 Mr. Maurey, I guess OPC's position on this  
14 issue tends to address the imputation of, or debt equity  
15 adjustment associated with power purchase agreements.  
16 Can you basically speak to that S&P methodology and  
17 illustrate how the staff recommendation either aligns or  
18 does not agree with OPC's position?

19 **MR. MAUREY:** Yes. When Standard & Poor's and  
20 other rating agencies review a company's financial  
21 position, they will look at off balance sheet  
22 obligations such as purchased power agreements and the  
23 fixed obligation that, associated with those agreements.  
24 They will impute a certain amount of debt into the  
25 capital structure and impute a certain amount of

1 interest expense in the income statement. They will  
2 recalculate the company's ratios for their own  
3 analytical purposes, come up with adjusted ratios for  
4 purposes of assessing the credit quality and ultimately  
5 assigning a credit rating.

6 Separate from that, the GAAP requirements are  
7 that the company file its book amounts. These purchased  
8 power agreements by definition off balance sheet are not  
9 part of their book capitalization. So on an SEC basis,  
10 Securities and Exchange company (sic.), when they file  
11 with those or their annual reports to shareholders, they  
12 will not reflect these imputed debt in the actual  
13 balance sheet. It'll be in the footnotes, but it will  
14 not be in the actual balance sheet or income statement.

15 And then finally, regulatory Commissions such  
16 as this require certain adjustments to the  
17 capitalization to rec, normally to recognize items that  
18 are removed from rate base that are recovered outside of  
19 base rates. For example, storm recovery bonds. On a  
20 GAAP basis they're required to be included in the  
21 financial statements. They're an obligation, they're on  
22 the company's balance sheet. But SEC or, I'm sorry,  
23 Standard & Poor's, because those storm recovery bonds  
24 are nonrecourse to the company, they will remove them  
25 from the balance sheet or from the capital structure.

1           And finally, on a Commission-adjusted basis,  
2 because those storm recovery bonds are recovered through  
3 a separate line item on the bill, they're not, they  
4 shouldn't be reflected in base rates, they also have to  
5 be removed from the capital structure. And so that's  
6 why you can look on Page 253 and you can see three  
7 different equity ratios. They're all projected equity  
8 ratios for 2010, but because of the different  
9 requirements and adjustments of GAAP basis, S&P and  
10 Commission, they'll be slightly different.

11           And staff's recommendation actually is  
12 consistent with all three. We're recommending that  
13 you -- that 59.6, that was the number that was reflected  
14 in the company's original filing. And if you look at a  
15 report from Standard & Poor's, you will see that they  
16 calculate an adjusted equity ratio of 55.8 percent. And  
17 if you looked at the company's 10K report it files with  
18 the SEC, it will have something close to 55.6 percent.

19           **COMMISSIONER SKOP:** Okay. So in summary on  
20 Issue 70, basically they've, FPL's accurately reported  
21 the 59.6 equity ratio, but then the adjusted equity  
22 ratio reflects the debt obligation associated with the  
23 power purchase agreements. And we're not really  
24 imputing that. That's just adjusted for reporting  
25 purposes; is that correct.

1           **MR. MAUREY:** That's a good question. Let me  
2 clarify. We were not -- there's no imputed equity in  
3 this filing, and we're not really recognizing any  
4 imputed debt either. This is the actual amount of  
5 equity in the company. But because the Commission  
6 requires the storm bonds to be removed from the capital  
7 structure, they're recovered separate and apart from  
8 base rates, they cannot remain in the capital structure,  
9 by operation of math that equity ratio increases from  
10 56 percent to 59 percent.

11           **COMMISSIONER SKOP:** Okay. Great. Thank you.

12           **CHAIRMAN ARGENZIANO:** Is that, is that because  
13 there was, that FPL did not specifically adjust equity  
14 to recognize for imputed debt? Am I --

15           **MR. MAUREY:** They did not. No. They -- the  
16 company's argument is that because rating agencies view  
17 purchased power agreements in a certain manner, that  
18 they impute, the rating agencies impute debt, that they  
19 need to keep an equity ratio in a certain range to  
20 compensate for that. They did not impute any equity in  
21 their filing.

22           **COMMISSIONER SKOP:** Madam Chair.

23           **CHAIRMAN ARGENZIANO:** Commissioner Skop.

24           **COMMISSIONER SKOP:** Thank you.

25           On follow-up, Mr. Maurey, you have been

1 speaking -- it has been a long morning, so maybe I'm  
2 missing something, but you speak to the securitization  
3 of storm financing, and I'm not really sure -- in  
4 reading the staff recommendation it talks extensively  
5 about the power purchase agreements, but can you just  
6 help me through the process on how the storm  
7 securitization affects Issue 70.

8 **MR. MAUREY:** Okay. When a company has two  
9 choices for generation, it can either build the capacity  
10 or it can enter into purchase power agreements. When it  
11 builds that capacity it will finance it with a mix of  
12 debt and equity. When it purchases that capacity  
13 through long-term contracts, it agrees to a fixed  
14 obligation over a long period of time. And in the view  
15 of the rating agencies that is a debt-like obligation.  
16 It is not a mix of debt and equity as the company would  
17 engage if it were to build the capacity itself, but  
18 rather a long-term fixed debt-like obligation. And  
19 because of that, the rating agencies impute debt and  
20 impute interest in the company's ratios when evaluating  
21 the company's financial position.

22 **COMMISSIONER SKOP:** Okay. So in a  
23 constructive regulatory environment as we have here in  
24 Florida, because we approve long-term power purchase  
25 agreements and that basically those costs are recovered

1 annually, there is little or no risk in denial of  
2 recovery of prudently incurred costs for purchased  
3 power, is that correct?

4 **MR. MAUREY:** That has been the case.

5 **COMMISSIONER SKOP:** Okay. And that has been  
6 the constructive practice that this Commission has  
7 followed historically?

8 **MR. MAUREY:** Yes.

9 **COMMISSIONER SKOP:** Okay. The part I was  
10 missing there, and maybe it was semantics or a slip of  
11 words, but you talked about storm securitization being  
12 tied into this issue. And then somehow maybe I missed  
13 something, but I thought we were talking PPAs and then  
14 you jumped to storm securitization.

15 **MR. MAUREY:** Well, I apologize for that  
16 misunderstanding. The reason I mentioned the storm  
17 bonds is because if you look at the table on Page 253 on  
18 GAAP on S&P and FPSC they all make certain adjustments,  
19 and the reason that the FPSC adjusted basis of 59.6 --  
20 Standard and Poor's backs out those storm recovery  
21 bonds, and the Commission backs out the storm recovery  
22 bonds but for different reasons. Well, actually it is  
23 the same reason, they are nonrecourse to the company.  
24 They are going to be recovered in this case through a  
25 separate line item charge on the customer's bill.

1           You are absolutely correct, though, it is a  
2 separate argument. The securitization bonds has nothing  
3 to do with purchased power agreements. When I was  
4 discussing that, I was trying to explain why these  
5 ratios are different even though they all report the  
6 2010 equity ratio.

7           **COMMISSIONER SKOP:** And I figured that out. I  
8 guess that is the Footnote 88 on Page 253 where the  
9 statement on the GAAP basis FPL's capitalization will  
10 include storm recovery bonds to finance, yadda, yadda.  
11 There is a brief explanation there. So thank you for  
12 clarifying that point.

13           My other question on this specific issue as it  
14 relates back to Issue 68 for the cost rate of long-term  
15 debt, and my question is this: Given FPL's high equity  
16 ratio and strong financial position, what would you  
17 expect FPL's cost -- or would you expect FPL's cost of  
18 long-term debt to increase incrementally if it went to  
19 the capital markets to finance the capital projects that  
20 have already approved by this Commission?

21           **MR. MAUREY:** Well, the markets will demand the  
22 rate that -- they will assign a rating to this company  
23 and they will demand a certain rate notably based on the  
24 outcome of this case. At a 59 percent -- well, that is  
25 59 percent on a commission-adjusted basis, but as far as

1 the investment community is concerned, as far as  
2 Standard and Poor's is concerned it is about 56 percent.  
3 That is still a high equity ratio over the range of  
4 equity ratios, and the company as well as its customers  
5 have benefited from that position of financial strength.  
6 This company was able to issue long-term debt at  
7 favorable terms.

8 **COMMISSIONER SKOP:** Okay. And on a  
9 forward-going basis certainly they will be able to  
10 access the capital markets to finance capital projects,  
11 it's just a matter of will there be an incremental  
12 increase into the long-term borrowing rate should they  
13 incur substantial amounts of debt for the projects.

14 **MR. MAUREY:** That's correct.

15 **COMMISSIONER SKOP:** Is that fair? So, I mean,  
16 do you have any comfort level that it will be 50 to 100  
17 basis points incremental, I mean, is that fair,  
18 ballpark, reasonable?

19 **MR. MAUREY:** Well, the long-term average  
20 before the disruption in the credit markets in 2008  
21 between incremental levels, say between A+ and A, or  
22 BBB+ and BBB, those increments may have been ten basis  
23 points between those. After the events of the fall of  
24 2008, those spreads expanded, in some cases,  
25 dramatically. Now the markets have returned to some

1 degree of normalcy. Those spreads have contracted. I  
2 think a 50 to 100 basis point spread is a worst-case  
3 scenario.

4 **COMMISSIONER SKOP:** Okay. So basically if --  
5 in answering my question, I think what you are saying is  
6 that given FPL's strong -- I mean, high equity -- excuse  
7 me. Given FPL's high equity ratio and relatively strong  
8 financial position, that it should be able to have no  
9 problem going to the capital markets to borrow for the  
10 capital projects that this Commission has already  
11 approved.

12 **MR. MAUREY:** It will continue to have access  
13 to the capital markets. The one variable will be at  
14 what price.

15 **COMMISSIONER SKOP:** All right. Thank you.

16 **CHAIRMAN ARGENZIANO:** If I may ask a couple of  
17 questions. I remember some of the testimony, and I'm  
18 reading over it again, I think it was Witness Woolridge  
19 who had indicated that if there wasn't a capitalization  
20 strategy that had an appropriate balance of equity and  
21 debt in the capital structure that could -- could make  
22 rates unnecessarily higher. Is that true?

23 **MR. MAUREY:** If you look at a component in  
24 isolation, generally speaking because the equity layer  
25 is the highest cost component, the higher the equity

1 ratio the hire the cost of capital in isolation. But we  
2 are setting rates on the overall cost of capital, and in  
3 this particular case because its position of financial  
4 strength it has been able to borrow money at lower rates  
5 than companies with weaker or thinner equity layers.  
6 And we talk about that a little bit in Issue 71.

7 Not to jump too far ahead, but on Page 261 we  
8 discuss how the goal of the appropriate equity ratio is  
9 to minimize the overall cost of capital. And in this  
10 case, staff itself is recommending an overall cost of  
11 capital of 7 percent. That's almost 130 basis points  
12 below Tampa Electric's overall cost of capital, and it  
13 is 88 basis points below the cost of capital that was  
14 approved on Monday for PEF. So even at that level of  
15 equity layer this company still has a lower cost of  
16 capital, and that's what will directly impact customer  
17 rates.

18 **CHAIRMAN ARGENZIANO:** Didn't TECO -- you  
19 mentioned TECO, but didn't TECO recognize imputed debt?

20 **MR. MAUREY:** This Commission did not.

21 **CHAIRMAN ARGENZIANO:** Okay. TECO --

22 **MR. MAUREY:** Well, they proposed it, but the  
23 Commission didn't approve it.

24 **CHAIRMAN ARGENZIANO:** Okay. That's what I  
25 recall.

1           One other question in regards to Witness  
2 Pollock's testimony that the equity ratio if it was  
3 approaching 60 percent would have FPL -- FPL would be  
4 one of the least leveraged regulated electric utilities  
5 in the nation. Is that also correct and what does that  
6 really mean?

7           **MR. MAUREY:** On the margin. The equity  
8 ratio -- when we get to talk about ROE later, the  
9 companies that are behind the range that staff is going  
10 to recommend, those equity ratios varied from a low of  
11 42.5 to a high of 66 and averaged 54. The bulk of them  
12 were between 50 and 60 percent. So, yes, equity ratios  
13 above 60 percent are definitely at the high end of the  
14 scale.

15           One thing staff tried to balance here is that  
16 while it is a 59 percent equity ratio for Commission  
17 purposes, it's still 56 percent from the investment  
18 community's perspective. And when you look at the cost  
19 of capital, the overall cost of capital, and the equity  
20 ratio as a percentage of total capital at 47 percent, 47  
21 percent is consistent with the relative equity ratio  
22 that was approved for PEF on Monday and for Tampa  
23 Electric last March. They all have a comparable equity  
24 ratio as a percentage of total capital.

25           **CHAIRMAN ARGENZIANO:** Commissioner Skop.

1                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

2                   I know Mr. Maurey had jumped ahead to Page  
3 261, which is Issue 71. But if I could on Page 260 --  
4 at the bottom of Page 260 just illustrate, I think, a  
5 point that I think Mr. Maurey made in response to my  
6 prior line of questioning. At the last sentence of that  
7 page, staff notes in the case of FPL, however, due to  
8 its strong financial position, it was able to sell  
9 30-year bonds at rates under 6 percent during 2008 and  
10 2009 despite significant disruption in the credit  
11 markets.

12                   So I think, Mr. Maurey, would that be accurate  
13 to reflect on FPL's strong financial position and its  
14 ability to reach out to the capital markets to finance  
15 capital expenditures?

16                   **MR. MAUREY:** Yes.

17                   **COMMISSIONER SKOP:** Thank you.

18                   **MR. MAUREY:** And just to add to that point,  
19 because of its ability to do that that is why in this  
20 issue we are recommending no adjustment to the equity  
21 ratio.

22                   **CHAIRMAN ARGENZIANO:** And the argument or the  
23 testimony that indicated that if excessive -- their  
24 term -- equity ratio is approved for FPL, it could  
25 result in inappropriate cross-subsidization through the

1 cost of capital. Could you reflect a little bit more or  
2 speak to that a little bit more for me.

3 **MR. MAUREY:** Sure. And that was a serious  
4 issue, particularly in the telecommunications industry,  
5 where we were seeing wide spreads between the equity  
6 ratios maintained at the operating company or the  
7 utility and the parent company. That's not the case  
8 here.

9 When you look at a lot of the debt that is  
10 used to finance FPL Group's nonregulated activities,  
11 that is project specific debt nonrecourse to the parent  
12 company. They also have a number of hybrid instruments  
13 that when the time comes they will convert to equity.  
14 So if you look at the two capitalizations on an  
15 apples-to-apples basis from the rating agencies'  
16 perspective, the investment communities' perspective,  
17 yes, FPL has a higher equity ratio than the company  
18 maintains on a consolidated basis and then what it uses  
19 to finance its nonregulated activities, but that spread  
20 is not nearly as significant or pronounced as a pure  
21 book comparison would indicate.

22 **CHAIRMAN ARGENZIANO:** And I have got to ask  
23 this question because it's there and I remember it and I  
24 read it again. OPC's argument was that there was a  
25 pretend equity, and we may have touched base on this,

1 but I need some more information on this. Because what  
2 they contending is that they seek to add -- FPL seeks to  
3 add an increment of pretend equity that they don't have  
4 on their books, which means that FPL's actual equity  
5 ratio according to OPC is so extravagantly high that it  
6 asks the Commission to pretend its actual equity ratio  
7 is lower than it really is. Is there a pretend equity?

8 **MR. MAUREY:** No, ma'am, not for this company.

9 **CHAIRMAN ARGENZIANO:** Why? Can you tell me  
10 why there is or isn't? I mean, what if -- what I'm  
11 trying to get at is how OPC got to that. And I'm  
12 reading and I remember their argument, and I just need  
13 staff's -- a little bit more on staff's --

14 **MR. MAUREY:** The Office of Public Counsel's  
15 argument here, while it is relevant in the TECO case and  
16 in the Progress case, it's misplaced here. They have  
17 extended it to this company, and it's --

18 **CHAIRMAN ARGENZIANO:** And I guess I can't  
19 figure out why it's misplaced here. But that's okay. I  
20 think -- unless you want to elaborate on that.

21 **MR. MAUREY:** Well, I would say that, you know,  
22 FPL is asking that its actual equity layer be  
23 recognized. They have not made the -- if you looked at  
24 the TECO books and you looked at the PEF books, there  
25 was a specific adjustment to impute equity into those

1 capital structures. No such adjustment was made in this  
2 case. There is no pretend, or phantom, or any other way  
3 you want to describe it, there is no imputed equity  
4 here.

5 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

6 **COMMISSIONER SKOP:** Thank you, Madam Chair.

7 Maybe I can add some clarification to a point, because I  
8 thought that you raised an excellent point in your  
9 opening comment as we discussed these issues. You noted  
10 that at least from the evidence and your reading of the  
11 record that FPL was one of the lowest leveraged  
12 utilities in the nation, and that speaks directly to its  
13 high equity ratio. And I think that is a good thing in  
14 light of a company that has a legitimate strong -- I  
15 mean, a high equity ratio and is in a strong financial  
16 position is able to then go out and leverage itself or  
17 access the capital markets at attractive rates to borrow  
18 additional money to fund its capital projects that will  
19 be coming down the line.

20 So having that strong equity ratio now is not  
21 necessarily a bad thing because it puts them in an  
22 excellent position, contrary to some of the  
23 representations that have been made to the public, of  
24 being able to go out and access the capital markets and  
25 leverage that equity ratio a little bit to borrow for

1 the capital projects that this Commission will approve  
2 the cost-recovery of in future years.

3 So I think that that strong equity ratio in  
4 light of what they have on their plate, in light of what  
5 the Commission has already approved for projects under  
6 need determinations puts them in an excellent position  
7 to be able to go borrow, float bonds, incur long-term  
8 debt to finance the cost of these projects and not  
9 necessarily have to rely on internal generated cash  
10 flow -- and I will get to that when we get into the  
11 return on equity issue about my impression of this case  
12 as a whole.

13 But, you know, when you were financing a  
14 project you can use internal funds from operations,  
15 internal cash flow, or you can go borrow debt. And in  
16 this case they have an excellent -- they are in a  
17 favorable position with a high equity ratio to go reach  
18 into capital markets at attractive rates to borrow  
19 long-term debt or float bonds. Thank you.

20 **CHAIRMAN ARGENZIANO:** Thank you.

21 Staff, can you answer another question? Does  
22 FPL -- does the Commission assure recovery of the PPA  
23 costs through the recovery clause?

24 **MR. MAUREY:** The capacity component and the  
25 fuel component, yes, are recovered through costs.

1                   **CHAIRMAN ARGENZIANO:** And are PPAs considered  
2 risky?

3                   **MR. MAUREY:** We're speaking strictly on the  
4 financial side. There's some operational risk that the  
5 provider won't follow through, but speaking strictly to  
6 the financial aspect, as I touched on earlier, the  
7 rating agencies treat these as long-term fixed  
8 obligations of the companies. Even though commissions  
9 have cost-recovery mechanisms available, the rating  
10 agencies still look at these as a future obligation of  
11 the utility. They have to pay these contracts over  
12 time.

13                   **CHAIRMAN ARGENZIANO:** I understand.

14                   **MR. MAUREY:** Now recovery, they get recovery,  
15 that's true.

16                   **CHAIRMAN ARGENZIANO:** So if they get their  
17 recovery at -- I believe was it's Moody's who thinks  
18 PPAs are somewhat positive?

19                   **MR. MAUREY:** Yes. I mean, there is some risk  
20 mitigation from purchase power agreements. They allow  
21 the company to have a generation mix that it might not  
22 otherwise be able to achieve through a self-build. It  
23 also shifts a lot of the construction risk, operation  
24 risk, and some other risks onto the provider and away  
25 from the company.

1                   **CHAIRMAN ARGENZIANO:** Commissioner Skop.

2                   **COMMISSIONER SKOP:** Thank you.

3                   To Commissioner Argenziano's point, which I  
4                   thought was a good one, I tried to kind of flesh that  
5                   out also earlier. You know, irrespective of what the  
6                   rating agencies choose to do, S&P has a discrete  
7                   formula, 25 percent; Moody's just kind of takes it into  
8                   consideration and views it as a positive. So not all  
9                   the credit rating agencies do the same thing. But at  
10                  least in Florida, again, with our constructive  
11                  regulatory environment we approve long-term purchased  
12                  power agreements up front so that the companies already  
13                  have a strong foothold to provide a legal basis for  
14                  recovery. And on top of that we have our annual fuel  
15                  and capacity clause proceeding which we approve those  
16                  costs annually. So it's almost like they have realtime  
17                  cost-recovery for costs as they occur. I mean, there is  
18                  some lag there, but, again, that is trued up with  
19                  interest and such.

20                  But when you put our constructive regulatory  
21                  environment as we have here in Florida into the mix and  
22                  our cost-recovery mechanisms through the clauses that  
23                  comprise 61 percent, approximately, of a customer's  
24                  bill, I think that the risk associated with the PPA  
25                  becomes negligible and it is really hard to make that

1 imputation argument that the rating agencies would like  
2 to make. And I think that's why in other cases -- and,  
3 again, I don't want to get into that -- this Commission  
4 has consistently denied that adjustment.

5 **MR. MAUREY:** Yes, it has denied imputed  
6 equity, and I do want to make one other point. This  
7 Issue 70 talks about from a purchased power obligation,  
8 but the level of equity when we talk about it in 71,  
9 that is just one aspect of the company's explanation for  
10 why it needs an equity ratio at a higher end of the  
11 range.

12 The intervenors seem to have attached to that  
13 one argument and really have not spent any time with the  
14 other explanations that the company provided that it  
15 needs to have a position of financial strength to  
16 weather challenges, volatile prices in natural gas,  
17 storm cost-recovery, disruptions in the credit markets,  
18 that it needs to be in a position of financial strength  
19 to go through those. That's separate and apart from  
20 recovery. They have to be strong to spend the money  
21 first and then get recovery later. That's where we get  
22 to where staff does not recommend an adjustment in the  
23 equity ratio.

24 Issue 70 deals strictly with this purchased  
25 power argument. And as far as that goes, staff is

1 recommending that the company has accurately described  
2 it. The intervenors have shaded it a certain way, but  
3 there is no imputed equity here. There is nothing to  
4 remove as was the case in Tampa Electric and the PEF  
5 cases.

6 **CHAIRMAN ARGENZIANO:** Are you indicating that  
7 the intervenors and their shading of it a different way  
8 are not correct at all, that there is not -- some of the  
9 questions that I asked, which I'm glad I got some  
10 answers that I did not have a clear picture of, and that  
11 helped, but it seems that higher rates could come from  
12 this, if this is not capitalized, I guess, or the  
13 capitalization is not done appropriately. The balance  
14 that I was talking about before. And I'm just not sure  
15 when we say that -- of course we want the company to be  
16 financially healthy, and I think they are. And I hear  
17 you telling me I think that they have to be healthier,  
18 is that it?

19 **MR. MAUREY:** No, no. Let me clarify, then.  
20 And, first, let me touch on -- I didn't mean to cast  
21 aspersions on any party.

22 **CHAIRMAN ARGENZIANO:** No, I didn't mean it  
23 that way. I'm just trying to really get down to if you  
24 are telling me that you don't think the intervenors have  
25 any -- any of their comments could come to fruition, I

1 guess.

2 **MR. MAUREY:** Well, I can be specific --

3 **CHAIRMAN ARGENZIANO:** Or merit.

4 **MR. MAUREY:** -- the position from FIPUG. The  
5 Commission should reject FPL's request to impute  
6 949 million of debt. That didn't happen. There is  
7 nothing to pull back out. And the same thing with  
8 Office of Public Counsel. I mean, I have a great deal  
9 of respect for both of those parties; on this particular  
10 issue, we don't agree.

11 **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
12 Skop.

13 **COMMISSIONER SKOP:** Thank you. I think what  
14 Mr. Maurey -- and correct me if I'm wrong, and then I  
15 have a follow-up question. I think Mr. Maurey stated in  
16 a response that in other instances for other companies  
17 the argument advanced for Public Counsel might have  
18 been appropriate, but in this case FPL already reflects  
19 the adjustment that needs to be made, is that --

20 **MR. MAUREY:** Well, I guess I should be clear.  
21 No adjustment has been made. The management of the  
22 company has made the decision that the rating agencies  
23 look at these contracts, evaluate them in a certain  
24 manner, therefore, we need to have a higher equity ratio  
25 because we have those contracts. If an IOU is out there

1 and had zero purchased power, the rating agencies would  
2 not be imputing any debt for them, and their ratio could  
3 be the same.

4 But if a company does have purchased power  
5 agreements and they receive more than 10 percent of  
6 their capacity through those contracts, the rating  
7 agencies believe that that is a fixed obligation of the  
8 company and they reflect it in their evaluation of those  
9 companies.

10 **COMMISSIONER SKOP:** Okay. But let's put that  
11 in a little bit further perspective not only from a  
12 utility's perspective, but also on a state regulatory  
13 perspective. If you have a utility that relies heavily  
14 on purchased power agreements in lieu of building its  
15 own generation, then arguably it would be more apt or  
16 one would be more apt to consider an imputation  
17 adjustment based on the power purchase agreement because  
18 there is more of it, to some degree.

19 **MR. MAUREY:** Well, staff has taken the  
20 position that that is a management call. If the rating  
21 agency is telling a company that it needs more equity  
22 because of its purchased power, then the company needs  
23 to invest that hard equity in the utility. That was our  
24 point.

25 **COMMISSIONER EDGAR:** And, Commissioner Skop,

1 if you would let Commissioner Stevens jump in for a  
2 moment. Thank you.

3 **COMMISSIONER STEVENS:** To build on  
4 Commissioner Skop, and to see if I understand this  
5 correctly, aren't the purchased power agreements --  
6 don't the companies use these as a hedge?

7 **MR. MAUREY:** Well, for short-term purchased  
8 power that is accurate. We are talking, though, about  
9 long-term purchased power agreements here that are  
10 actually displacing capacity. These are contracts --  
11 long-term contracts.

12 **COMMISSIONER STEVENS:** Thank you, Madam Chair.

13 **COMMISSIONER EDGAR:** Commissioner Skop.

14 **COMMISSIONER SKOP:** Thank you, Madam Chair.

15 The issue that I think I was trying to raise  
16 that if you have a utility that relied in large part of  
17 meeting its base load need by entering into purchased  
18 power agreements, that might be a different situation  
19 that warranted taking a closer look at whether  
20 imputation was appropriate or not. Or, for instance, if  
21 you had a different state with a different regulatory  
22 environment which was not as constructive as that of  
23 which we have here in Florida, which did not allow the  
24 annual recovery of purchased power costs, then that  
25 might also be a sufficient basis to consider an

1 imputation adjustment. But here you almost get realtime  
2 cost-recovery for a long-term purchased power agreement  
3 that the Commission has approved, and by virtue of  
4 approving it in the first place almost guarantees you  
5 are going to get full recovery. It's just we do it  
6 annually.

7 So, again, I find there to be very little risk  
8 in the manner in which our utilities enter into power  
9 purchase agreements with the exception of one I recently  
10 dissented on to the extent that, you know, they are  
11 afforded an adequate recovery mechanism, and it is  
12 almost -- you know, our clause works well in Florida.  
13 Some people criticize it, but for fuel and capacity it  
14 avoids the utility having stranded costs.

15 But the point that I really wanted to make in  
16 relation to the equity ratio and why I think staff's  
17 position is correct and that OPC's argument is making  
18 some points, but I think those points have already  
19 been -- I think they are stating points and the points  
20 are somewhat moot because that has already been done.

21 My point is where I think staff is right is  
22 that the higher equity ratio that FPL has reflects its  
23 strong financial position, and there's interplay between  
24 equity ratio and return on equity to the extent that the  
25 higher equity ratio the more earnings you are going to

1 get from your return on equity. It is directly  
2 proportional.

3 But when you are in a situation where you have  
4 a strong equity ratio -- and, again, the ROE will be  
5 determined in a separate issue -- this's not necessarily  
6 a bad thing. It doesn't steer the discussion. You can  
7 have a high equity ratio and a low ROE versus a low  
8 equity ratio and a high ROE and the low equity ratio  
9 with the high ROE might generate more funds for the  
10 company than a high equity ratio and a low ROE. Is that  
11 true, Andrew?

12 **MR. MAUREY:** Yes.

13 **COMMISSIONER SKOP:** Okay. So, again, it is  
14 sometimes getting too hung up on one of the details when  
15 they are all inextricably interrelated. It kind of  
16 gives the wrong thing. Just like we often get too --  
17 you know, ROE is not an end all be all. But what I'm  
18 trying to say is that the high equity ratio that FPL has  
19 is not a bad thing because it's indicative of its strong  
20 financial strength which will be necessary to be able to  
21 further leverage itself.

22 It has the ability to leverage itself. It has  
23 the ability that other utilities have in the state to go  
24 out and access the capital markets, to float bonds, to  
25 float long-term debt, and it can do so at will. I mean,

1 it is not hamstrung in any way. It has -- you know, all  
2 it needs to do is pick up the phone and say we need a  
3 couple of million dollars, and I best it has got  
4 investment bankers running to it.

5 So that's indicative of the financial strength  
6 that FPL has, and that is reflected in its high equity  
7 ratio and that is not a necessarily bad thing. When we  
8 get to ROE we will have a little different discussion.

9 So, thank you, Madam Chair.

10 **CHAIRMAN ARGENZIANO:** Thank you. And I  
11 understand that my concern is just that it is just too  
12 high, and I think I'm just concerned about it. I  
13 understand and I appreciate some of the explanations  
14 because they have helped me in certain areas, especially  
15 with the imputed debt, but I'm just a little bit  
16 concerned that the proportion of equity is just too high  
17 and that will cause rates to be higher than they need to  
18 be. So I am concerned with that, and other than  
19 expressing that at this point -- Commissioner Skop.

20 **COMMISSIONER SKOP:** Thank you, Madam Chair.

21 And I agree with you. You know, if you have a  
22 high equity ratio with a high ROE, certainly consumers  
23 could be in a situation as you correctly alluded to of  
24 being in the position where they are paying more. They  
25 are intertwined. I mean, again, as I think Andrew and I

1 have discussed many times, if you have a high equity  
2 ratio and a low ROE or a middle ROE versus --

3 **MR. MAUREY:** A fair ROE.

4 **COMMISSIONER SKOP:** That's a better way to say  
5 it. If you have a high equity ratio and a fair ROE --  
6 that is an excellent way to put it -- versus a low  
7 equity ratio and an extraordinary ROE, then, you know,  
8 you could be in a situation where the low equity ratio  
9 and extraordinary ROE allows the -- makes the ratepayers  
10 pay more than they need to. Andrew, is that factually  
11 accurate?

12 **MR. MAUREY:** Yes.

13 **CHAIRMAN ARGENZIANO:** Yes, and we will  
14 determine later, I guess, what the Commission thinks is  
15 a fair ROE. Okay. Thank you very much. I'm done on  
16 the discussion. Any other --

17 **COMMISSIONER EDGAR:** Madam Chair, just for  
18 myself -- not at this time, but as we do go into the  
19 next few issues, I do think, as Commissioner Skop has  
20 said, in my mind they are very much interrelated, so I  
21 may have some questions on this as we move forward, but  
22 I'm ready to move on now, if you are.

23 **CHAIRMAN ARGENZIANO:** Okay. Everybody good?  
24 All right. Let's move on to Issue 71.

25 **MR. MAUREY:** I did touch briefly on 71. In

1 this issue the Commission will decide the equity ratio  
2 to be used for ratemaking purposes in this case. And as  
3 I mentioned earlier, the staff's recommendation is for  
4 an equity ratio of 47 percent as a percentage of total  
5 capital, and 59.1 percent as a percentage of investor  
6 capital.

7 Now, when rates are set it is going to be  
8 based on that 47 percent. But when the investment  
9 community looks at this, they are looking at the  
10 investor relationship of investor sources. That is how  
11 Value Line reports it, that is how a lot of the outside  
12 firms look at it. We are one of the few commissions,  
13 however -- just like one of the few commissions that  
14 have merger approval authority, we are one of the very  
15 few commissions that include deferred taxes, investment  
16 tax credits, and customer deposits in the capital  
17 structure.

18 Most commissions use those as a deduction to  
19 rate base and apply a relatively higher cost of capital  
20 to a lower rate case. We apply a lower cost of capital  
21 to a higher rate base. In theory you get to the same  
22 place. But why I bring that up is for comparability.  
23 Oftentimes when you look at -- you say the 59 percent is  
24 pretty high, but if you look at the 47 percent as a  
25 percentage of total capital, that is reflective of a lot

1 of our utilities here, and that is lower than the --  
2 that's at the lower end of the range I mentioned earlier  
3 between 42 and 66.

4 Now, in this particular issue the parties  
5 recommended equity ratios ranging from as low as 50 to  
6 as high as 54 as a percentage of investor capital. The  
7 Commission should consider for purposes of this case,  
8 for the reasons we discussed, the need for the company  
9 to be financially strong to meet challenges, spikes in  
10 fuel prices, uncertain hurricane seasons, uncertainty in  
11 the markets. Coming at position of financial strength  
12 serves both the company and its customers, and we  
13 recommend no adjustment to the company's equity ratio.

14 **CHAIRMAN ARGENZIANO:** Okay. Move on to 73.

15 **MR. SPRINGER:** Issue 73 addresses the  
16 appropriate capital structure for FPL for the purpose of  
17 setting rates in this docket. This is basically  
18 somewhat of a fallout issue based on decisions rendered  
19 in previous issues.

20 **CHAIRMAN ARGENZIANO:** Commissioners. This a  
21 fallout issue. Move on to -- oh, the big one -- 80.  
22 Okay. Now we are on return on equity.

23 And you know what, we were going to go to  
24 lunch at 1:00, but I think we should start -- it will be  
25 the will of the Commission, but I think maybe we

1 should -- I don't know where the pizza is in the  
2 delivery, but maybe we should think about starting this  
3 issue without breaking it up after lunch.

4 Commissioner Skop.

5 **COMMISSIONER SKOP:** Thank you, Madam Chair.

6 Could staff at least introduce the issue, and  
7 then I just have a brief comment.

8 **CHAIRMAN ARGENZIANO:** Okay. Why don't we do  
9 that, introduce it, and we can go back and forth, and  
10 then I think we will just break for lunch rather than  
11 break it all up.

12 **COMMISSIONER SKOP:** I just have a brief  
13 comment after they introduce it.

14 **CHAIRMAN ARGENZIANO:** Okay. Very good.

15 **COMMISSIONER SKOP:** Thank you.

16 **CHAIRMAN ARGENZIANO:** Staff.

17 **MR. MAUREY:** Thank you.

18 Issue 80 concerns the authorized return on  
19 equity for purposes of this proceeding. And based on  
20 the evidence in the record, the indicated return could  
21 be between 7.6 percent and 13.9 percent. That  
22 represents the -- those returns represent the range of  
23 returns indicated by witnesses' respective models.

24 If you want to look at just the returns  
25 actually recommended by certain witnesses, you have a

1 low of 9.5 from the Office of Public Counsel's witness,  
2 you have a high of 12.5 from the company's witness, and  
3 you have 10.4 from the witness on behalf of South  
4 Florida Hospital Association. So you have a range of  
5 9.5 to 12.5 based on the witnesses' actual  
6 recommendations. And then, finally, based on staff's  
7 review of the testimony, the evidence in the record, we  
8 believe the record more strongly supports an ROE for FPL  
9 in the range of 10.3 to 11.5 percent, recognizing that  
10 the midpoint of that range is 10.9.

11 The average equity ratio for the companies  
12 behind those ROEs is 54 percent to the extent that a  
13 company has a little higher equity ratio than that,  
14 whether it's 56 percent on investor sources basis, or 59  
15 on a commission adjusted basis, we shaded the ROE a  
16 little lower than the midpoint, and staff is  
17 recommending 10.75 with a range of plus or minus 100  
18 basis points.

19 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

20 **COMMISSIONER SKOP:** Thank you, Madam Chair.

21 And I'll make this brief, and then if it's  
22 your desire, we can break for lunch.

23 I guess ROE is probably the best place to, I  
24 guess, make this comment, but at least with respect to  
25 my impression of the rate case before us, based on the

1 record evidence, is that this rate case seems to be more  
2 about improving cash flow from operations and  
3 discretionary expenditures rather than substance. And I  
4 think that that's clearly illustrated by the substantial  
5 adjustments that the staff has made in the staff  
6 recommendation from the company's request, and the  
7 company requested approximately \$1.2 billion. The  
8 staff's recommended revenue requirement is about  
9 \$357 million. So staff in its recommendations before  
10 the Commission has made any cuts has substantially cut  
11 the majority of that out of the rate case.

12 I think that in large part the company's  
13 request is driven by its requested ROE of 12.5. And,  
14 again, staff has also made a recommendation of 10.75.  
15 And I'm not necessarily sure -- I don't necessarily  
16 think that the staff recommended ROE is appropriate in  
17 this case.

18 So I will leave it at that. But, again, my  
19 gut impression of this case based on the record evidence  
20 is that it is more about improving cash flow from  
21 operations and discretionary expenditures rather than  
22 substance. Thank you.

23 **CHAIRMAN ARGENZIANO:** Okay. With that said,  
24 how about we break for lunch and come back -- how about  
25 we say 12:40. I know that's kind of nit-picking. Do

1 you think we could make it? Staff, will you have enough  
2 time? I'm sorry, 1:40. We were going to eat really  
3 quick.

4 **COMMISSIONER EDGAR:** I was going to say, I  
5 don't that's enough time for me, Madam Chair.

6 **CHAIRMAN ARGENZIANO:** How about 1:40. Okay.  
7 We are on recess.

8 (Lunch recess.)

9 **CHAIRMAN ARGENZIANO:** We are on Issue 80. And  
10 just -- let me do one thing. On Issue 70, I would ask  
11 that we vote independently on that issue. Pull that out  
12 separate. Thank you.

13 **COMMISSIONER EDGAR:** Madam Chairman.

14 **CHAIRMAN ARGENZIANO:** Commissioner Edgar.

15 **COMMISSIONER EDGAR:** Thank you. Along those  
16 same lines, and I realize that we are still in  
17 discussion, we are not voting yet.

18 **CHAIRMAN ARGENZIANO:** Uh-huh.

19 **COMMISSIONER EDGAR:** I would like to ask if we  
20 could, when we get to voting, take up Issue 80 prior to  
21 taking up Issue 70. I would like to put that out for  
22 consideration.

23 **CHAIRMAN ARGENZIANO:** Absolutely. I thought  
24 about that, too, and I'm pretty sure that on Issue 80 we  
25 would want to vote that out of the block, too, if that

1 is okay with everybody. All right.

2 Thank you. And we are good to go, Staff.

3 **MR. MAUREY:** Good afternoon. Before the  
4 break, staff introduced Issue 80, authorized return on  
5 equity. Just briefly, the parties recommended a range  
6 of 9.5 percent to 12.5 percent. And for various  
7 reasons, staff believes the range is between  
8 10.3 percent and 11.5 percent, and recommends that  
9 10.75 percent with a range of plus or minus 100 basis  
10 points be approved for the purpose of this proceeding.

11 We're available for questions.

12 **CHAIRMAN ARGENZIANO:** Okay.

13 Commissioners, now we are on the ROE. I'll  
14 have one question and it does pertain to Item 70. Am I  
15 correct that if we adopt the staff recommendation on 70,  
16 would that effectively -- let me see how I can put it.  
17 ROE would be applied to a higher capital component,  
18 therefore, it allows the -- I guess, the company, or  
19 permits the company to, quote, borrow money at twice the  
20 rate that they otherwise could. Do you follow what I'm  
21 saying?

22 **MR. MAUREY:** No.

23 **CHAIRMAN ARGENZIANO:** You don't follow what  
24 I'm saying?

25 **MR. MAUREY:** Not the twice the rate.

1           **CHAIRMAN ARGENZIANO:** Well, in other words --  
2 okay, let me see if I can rephrase it. Are there any  
3 questions? There has got to be some discussion. Who  
4 wants to go?

5           **COMMISSIONER KLEMENT:** Madam Chair, I'll open  
6 up.

7           **CHAIRMAN ARGENZIANO:** Commissioner Klement,  
8 and I'll rephrase my question.

9           **COMMISSIONER KLEMENT:** My comments don't have  
10 anything to do with your question. Is it all right to  
11 change it?

12           **CHAIRMAN ARGENZIANO:** Of course.

13           **COMMISSIONER KLEMENT:** Staff, you, again,  
14 believe that the record supports an ROE in the range of  
15 10.3 to 11.5 for FPL, which is precisely the same range  
16 you recommended for Progress on the case we considered  
17 on Monday. Is this rate more of an industry average  
18 that you are considering than tied to one particular  
19 company?

20           **MR. MAUREY:** No, Commissioner, it's tied to  
21 these two records specifically, and it is not an  
22 industry average, not from our perspective. There is an  
23 exhibit in the record that shows authorized ROEs during  
24 2009, and you can see that there was an average  
25 authorized ROE of 10.5. That would be an industry

1 average. But our recommended range of 10.3 to 11.5  
2 represents our view of these two specific records.

3 Now, why the range is the same in both cases  
4 is because the records in these two cases on this point  
5 are fairly similar. In fact, we have some of the same  
6 witnesses in both cases on this issue.

7 **COMMISSIONER KLEMENT:** Yes, I noticed.

8 **MR. MAUREY:** But they are specific to these  
9 two records.

10 **COMMISSIONER KLEMENT:** Well, I would be  
11 willing to, for purposes of discussion, jump out with  
12 something of a proposal, if not specific, but I think  
13 what Andrew just said, it gets at where we are now with  
14 this company and in these times. I want to reiterate  
15 some of what I said yesterday that the times that we are  
16 in affect both companies, the one we dealt with Monday  
17 and FPL today. So I don't think we are going to see the  
18 growth rates that we have seen in the past and perhaps  
19 not even for a decade based on some projections that I  
20 have read. So we know that our customers in this market  
21 are hurting as they are throughout the state. And I am,  
22 again, conscious of the need to provide an equitable and  
23 fair rate of return for FPL, but I would just recommend  
24 for starting out that we consider the most prudent rate  
25 of return on equity.

1                   **CHAIRMAN ARGENZIANO:** And, I'm sorry,  
2 Commissioner Klement, did you make a suggestion as to  
3 what that was?

4                   **COMMISSIONER KLEMENT:** I did not name a  
5 figure.

6                   **CHAIRMAN ARGENZIANO:** Okay. Do we want to  
7 wait; do we want to have more discussion?

8                   **COMMISSIONER KLEMENT:** For purposes of  
9 discussion, perhaps I would suggest 10.7.

10                   **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

11                   **COMMISSIONER STEVENS:** Madam Chair,  
12 yesterday -- excuse me, Monday, we looked at an industry  
13 average, I believe, that showed 8.75 up to 11-1/2 for  
14 utility companies with the 8.75 being very low because  
15 it was a -- was it a small issue, was it a single issue?

16                   **MR. MAUREY:** That particular company that got  
17 the 8.75, that's a transmission and distribution only  
18 company.

19                   **COMMISSIONER STEVENS:** Okay. And that's why  
20 that was so low, correct?

21                   **MR. MAUREY:** I believe so, yes.

22                   **COMMISSIONER STEVENS:** Okay. But the industry  
23 averages other than that number went within that range.

24                   **MR. MAUREY:** Correct.

25                   **COMMISSIONER STEVENS:** Okay. I'm sorry,

1 Commissioner Klement, what was the number that you had?

2 **COMMISSIONER KLEMENT:** 10.7.

3 **COMMISSIONER STEVENS:** 10.7?

4 **COMMISSIONER KLEMENT:** Right.

5 **CHAIRMAN ARGENZIANO:** And staff is at 10.75.

6 **COMMISSIONER STEVENS:** I'm much lower than

7 that, and I will lay that out there.

8 **CHAIRMAN ARGENZIANO:** Okay. Commissioner

9 Skop.

10 **COMMISSIONER SKOP:** I'll defer.

11 **CHAIRMAN ARGENZIANO:** To who?

12 **COMMISSIONER SKOP:** Whoever.

13 **CHAIRMAN ARGENZIANO:** Well, I thought we would

14 have a good discussion on this, and we should.

15 **COMMISSIONER SKOP:** We will.

16 **CHAIRMAN ARGENZIANO:** If everybody defers,

17 we're never going to discuss anything.

18 **COMMISSIONER STEVENS:** I would be -- I'm in  
19 the range of 9 to 9-1/2 percent because of the current  
20 economic climate and the level of risk. With the  
21 information that staff has reviewed with us, that's the  
22 range I'm in.

23 **CHAIRMAN ARGENZIANO:** Okay. Commissioner

24 Edgar, do you want to --

25 **COMMISSIONER EDGAR:** Thank you, Madam Chair.

1           I am still thinking, so let me say that to be  
2 perfectly clear. I have not made up my mind, and I just  
3 wanted to say that. And I am looking forward to more  
4 discussion, and as we did on Monday, as we kind of  
5 grappled, I think, with it individually and then  
6 collectively to come to some consensus, I'm hoping that  
7 we'll have the ability to do that today.

8           I'm trying to think through, and let me kind  
9 of -- I'm going to look kind of to Andrew, but I don't  
10 know that I have a specific question yet. But if I say  
11 something that maybe you can just chime in, or talk back  
12 to me, that's fine. But I'm trying to think through,  
13 again, the relationship for this company under these  
14 facts with, of course, the background of the other  
15 discussions and other decisions that we have made as a  
16 Commission prior to this. But the relationship between  
17 Issue 80, the return on equity, and the discussion that  
18 we had before lunch on Issue 70.

19           So that's the basis, and so if you could maybe  
20 speak to me a little bit about that again. I know we  
21 have talked about it many times, but, I guess one more  
22 might help me. And if, as Commissioner Stevens has  
23 suggested, or has put out there for discussion, there  
24 were to be -- for discussion purposes, if there were to  
25 be a decision by this Commission to go significantly

1 lower on ROE than the staff recommendation, how would  
2 that -- under those circumstances, would that perhaps  
3 change the thinking of the staff recommendation then on  
4 Issue 70?

5 **CHAIRMAN ARGENZIANO:** Commissioner Edgar, I  
6 think I need more on that, too. Because as we mentioned  
7 before, Issue 70 is directly -- you know, they are going  
8 to --

9 **COMMISSIONER SKOP:** Intertwined.

10 **CHAIRMAN ARGENZIANO:** Intertwined is a good  
11 word. And perhaps when we get to a number, and we have  
12 a couple of numbers out there, we can see what that  
13 means at that ROE that was suggested by the two  
14 Commissioners. What that means in the end. That would  
15 give us a better idea, or whatever we come to later.  
16 And maybe the other thing, also, is that you go over the  
17 positions of the parties as to why they feel -- maybe we  
18 can get a better discussion going to feel -- what is the  
19 basis for each individual recommendation because we need  
20 to -- that's what we are voting on, the basis of the --  
21 I mean, merits I guess of the recommendations, or if we  
22 have our own. So if we can go to Commissioner Edgar's  
23 comments and questions, maybe we can get the ball  
24 rolling there.

25 **MR. MAUREY:** Fair enough. Let me make one

1 clarification. Issue 70 is more of a descriptive issue.  
2 It is Issue 71 where staff recommends an equity ratio  
3 and that would drive the ROE discussions. So with that  
4 clarification, in Issue 71 we recommend that the  
5 company's existing equity layer be approved, and we say  
6 at the end of Issue 71 -- I believe it's Page 261 where  
7 we talk about the equity ratio and ROE being  
8 inextricably related. And our ROE of 10.75 in Issue 80  
9 is predicated on the Commission approval of the  
10 company's -- of the equity layer that we recommend in  
11 Issue 71.

12 Now, generally, the equity ratio determines  
13 the financial risk, the financial risk determines the  
14 ROE, and we go in that order as opposed to setting the  
15 ROE and backing into an equity ratio. I realize that  
16 mathematically you could go in either direction, but  
17 theoretically it's generally equity ratio, you determine  
18 the level of financial risk, and then you determine an  
19 ROE. So what we were --

20 **CHAIRMAN ARGENZIANO:** I think what you're  
21 hearing from the Commissioners, though, is that they  
22 would like to hear realistically, meaning timely today  
23 instead of theoretically, maybe what some of those  
24 ramifications would be as we mentioned before.

25 And to that point, 71 should be separate. I

1 would like 70 and 71 and 80, I believe, and if there are  
2 any others to be voted on separately.

3 **MR. MAUREY:** We have no disagreement with  
4 that. What I guess I was proposing that the order flow  
5 that 70, 71, and then 80 in that order, not that they be  
6 taken up in a block.

7 **CHAIRMAN ARGENZIANO:** Right.

8 **MR. MAUREY:** Now, the sensitivity you were  
9 asking about, in our recommendation we came to 10.7  
10 based on a certain level of financial risk, in this case  
11 an equity ratio on a GAAP basis of 56 percent and an  
12 FPSC adjusted basis of 59. And we recommend an ROE of  
13 10.75. And as we say here in the final sentence on Page  
14 261, if the equity ratio is higher or lower, the level  
15 of financial risk of the utility will be higher or  
16 lower, and our recommended ROE could change  
17 commensurately.

18 So just to add another -- for further  
19 explanation, the range of 10.3 to 11.5, the midpoint of  
20 that happens to be 10.9, and the average equity ratio  
21 for the group of companies that is behind that range of  
22 10.3 to 11.5 happens to be 54. So if the equity ratio  
23 were lower than 54, then we would tend to shade towards  
24 the higher end of the ROE range to recognize that higher  
25 financial risk. If the equity ratio is above 54, we

1 would shade to the lower end of the ROE range to  
2 recognize that lower financial risk. That's where we  
3 came about.

4 And so if company or if the Commission were  
5 contemplating adjusting the equity ratio in 71, and I  
6 doubt seriously you're talking about raising it, if you  
7 are talking about lowering it, we would recommend a  
8 higher ROE to compensate for that shift in risk. Now,  
9 that is just our suggestion. You certainly have a wide  
10 discretion in this regard. Now --

11 **CHAIRMAN ARGENZIANO:** One second.

12 Commissioner Skop, did you have a question?

13 **COMMISSIONER SKOP:** Thank you, Madam Chair.

14 And I just wanted to touch upon this, because,  
15 again, I think that it's an important aspect to discuss  
16 risk. And, again, I appreciate Mr. Maurey's analysis  
17 and have the utmost respect for it. I think he is one  
18 the finest regulatory analysts in this subject matter in  
19 the country. There are some times where I do disagree,  
20 though, and I know that I think the preference of the  
21 Commission is to take a critical look at where we are at  
22 on ROE, and then look at the equity ratio, at least what  
23 I'm hearing from my colleagues. I'm comfortable doing  
24 it the historic way or the way my colleagues would.

25 But the point that I'm trying to differentiate

1 here is the staff recommended ROE is a midpoint of 10.75  
2 plus or minus 100 basis points based on the staff  
3 recommended equity ratio, is that correct?

4 **MR. MAUREY:** That's correct.

5 **COMMISSIONER SKOP:** Okay. What staff had  
6 recommended, and it may be in Issue 80, and it's tied in  
7 with the GBRA, or the generation base rate adjustment,  
8 that if the Commission were to accept GBRA, which the  
9 Commission denied, then staff would recommend an  
10 appropriate ROE midpoint of 10.25.

11 **MR. MAUREY:** That's correct.

12 **COMMISSIONER SKOP:** Okay. So looking at this  
13 holistically in a risk perspective, I'm struggling to  
14 understand the basis point differential between the  
15 staff recommendation at the recommended equity ratio and  
16 then what staff would have recommended a lower ROE under  
17 GBRA, and here is why. As previously discussed earlier,  
18 the Commission -- when a generation asset comes through,  
19 the Commission grants a determination of need. That  
20 gives the company Commission approval to go build the  
21 asset to be placed in public service for the public  
22 benefit.

23 Now, under GBRA the company -- when that  
24 generating asset comes into service under GBRA, the  
25 company gets basically an automatic increase the first

1 year, system revenue requirement. Conversely, in the  
2 absence of GBRA, the company either comes in for a  
3 limited proceeding or a rate case to include the cost of  
4 the generating assets into rate base. Either way, this  
5 Commission has never denied prudently incurred --  
6 reasonably and prudently incurred costs for placing new  
7 generating assets in service to the best of my  
8 knowledge. So to me there is not a whole lot of risk  
9 either way.

10 If you do it GBRA or you do it the hard way,  
11 GBRA is really more of an administrative convenience and  
12 then you look at things later. But I don't really see a  
13 50 basis point risk differential based on GBRA alone.  
14 So that's what I'm trying to understand. I know there  
15 is a sensitivity analysis. Certainly a higher equity  
16 ratio, less risk, less ROE; a lower equity ratio, more  
17 perceived risk, higher ROE. But I'm trying to  
18 incorporate risk into the discussion of how staff came  
19 in at a 50 basis point lower number if the Commission  
20 would have adopted GBRA, because I don't understand that  
21 that GBRA adjustment should drive, you know, 50 basis  
22 points. Because the recovery is the same. It is,  
23 again, automatic. It's the same point in time it is  
24 just one is automatic and one takes a little longer, but  
25 you should get the same result under our constructive

1 regulatory environment that we have here.

2 **MR. MAUREY:** You're correct, we do disagree on  
3 that point. I believe that the GBRA mechanism does  
4 lower the company's risk because they get an automatic  
5 base rate increase without having to come before the  
6 Commission, without having to go through all of the  
7 hearings and tremendous production of documents. It's a  
8 very labor intensive process.

9 Also, if they are able to implement multiple  
10 GBRA base rate increases over time, then they may not  
11 come in for quite some time, and that was staff's view  
12 of why that mechanism lowered the company's risk.

13 Another factor is --

14 **COMMISSIONER SKOP:** That's fine. I'll concede  
15 that point. I think your last point was an excellent  
16 one that addresses my concern in terms of the  
17 cost-recovery of getting it automatic versus a limited  
18 proceeding. On a combined cycle unit or a combustion  
19 turbine the costs are pretty much fixed and bound. I  
20 mean, there shouldn't be a lot of disallowances. It  
21 should be here is what it costs, here is what goes into  
22 the rate base. So I think your second point clarifies  
23 my concern, but I was just trying to better distinguish  
24 the risk in staff's eyes in terms of the recommended  
25 10.25 -- I mean, the 10.75 versus the 10.25 with GBRA.

1 So, thank you.

2 **CHAIRMAN ARGENZIANO:** Well, I appreciate that.  
3 That didn't alleviate my concern, because the concern I  
4 have is then the automatic part of that. There is no  
5 thorough -- as a Commissioner, what I have to look at is  
6 prudence and look at -- I feel it's my responsibility to  
7 give a thorough review, and I think the GBRA does not  
8 allow that, thus putting the ratepayer at risk. So I'm  
9 a little concerned with that and a different kind of  
10 risk, so to speak. So that hasn't really -- I think  
11 your first point was to my point, and I think that's why  
12 we didn't accept the GBRA, if I recall. And I think you  
13 were going to answer, Commissioner Edgar, on another --  
14 was there another question?

15 **MR. MAUREY:** I believe I touched on the first  
16 question about the impact -- okay, the impact on the  
17 company of a lower ROE than what we have recommended.

18 **COMMISSIONER EDGAR:** If, indeed, there were to  
19 be a -- if indeed the Commission were to adopt a ROE  
20 number different than the 10.75 that is recommended,  
21 then would that hypothetically change the staff's  
22 thinking or analysis for Issue 70 to 71?

23 **MR. MAUREY:** No. As I mentioned earlier,  
24 there is a certain level of financial risk and it drives  
25 the ROE.

1                   **COMMISSIONER EDGAR:** And I do recognize that  
2 I'm asking that backwards from the way you said it kind  
3 of -- I mean, I do recognize that.

4                   **MR. MAUREY:** We don't have a position on that  
5 whether we would do a higher equity ratio or no.

6                   **COMMISSIONER EDGAR:** Okay, fair enough. I'm  
7 sorry, I did have one additional question, but go right  
8 ahead.

9                   **MR. MAUREY:** The other question I have here  
10 was -- and I believe it was the Chairman raised about  
11 the position of the other parties, but if you have  
12 something on that last point before I move into that  
13 area I can address that.

14                   **COMMISSIONER EDGAR:** I'm not sure which it  
15 most pertains to, so while I'm thinking about it, if it  
16 is okay I will just put it out there. When we were  
17 discussing Issues 70 and 71 before lunch, there was some  
18 discussion about imputed equity and imputed debt both  
19 from some of the testimony in this case, but then also  
20 in some of the decisions with other companies that we  
21 have had previously.

22                   So to clarify for my thinking in Issue 70 and  
23 71 with the staff recommendation, does that take into  
24 account or utilize either imputed debt or imputed  
25 equity?

1           **MR. MAUREY:** For purposes of this company,  
2 there is no imputed debt or imputed equity. And just to  
3 be clear on this, the rating agencies impute debt in  
4 their analysis, and some companies that have come before  
5 this Commission have asked that imputed equity be  
6 recognized to offset that. In this case, the rating  
7 agencies still impute debt because of FPL's long-term  
8 purchased power agreements, but instead of imputing  
9 equity, this company has invested hard equity to  
10 compensate for that perceived increase in risk that the  
11 rating agencies have.

12           Now, they don't have that equity ratio just  
13 because they have PPAs, they have that equity ratio --  
14 management has said it has that equity ratio to  
15 compensate for other challenges the company faces.

16           **COMMISSIONER EDGAR:** Okay. And then just to  
17 follow along that line, and then I think I'm done for  
18 the moment, anyway. Along that line, in the recent  
19 decisions that this Commission has made, have we  
20 utilized or incorporated either imputed debt or imputed  
21 equity into the calculation and the decision that was  
22 ultimately made?

23           **MR. MAUREY:** No, it has not.

24           **COMMISSIONER EDGAR:** Okay. Thank you.

25           **MR. MAUREY:** The other question I have on my

1 list, I believe it was from the Chairman, was to discuss  
2 briefly how the other parties came to their ROE  
3 positions, and I can touch briefly on that. All the  
4 witnesses, there are three witnesses that did  
5 independent analysis of the return on equity in this  
6 case. All the witnesses used the discounted cash flow  
7 model, or DCF model. All three witnesses used the  
8 capital asset pricing model, CAPM. And one witness also  
9 used an expected earnings approach. And based on those  
10 analyses, they came up with their indicated returns and  
11 their recommended returns.

12 The primary difference, if you want to look at  
13 first the DCF model, most of the assumptions the proxy  
14 groups are relatively similar from a risk perspective.  
15 They are not exactly the same companies, but from a risk  
16 perspective the proxy companies are relatively similar  
17 in risk. And the DCF model, the constant growth DCF  
18 model is the same for all witnesses. Dividend growth  
19 expectations are very similar. The key difference is  
20 expected growth. And for the DCF model its expected  
21 growth in cash flows that investors have for a  
22 particular company.

23 Now, some analysts will use only earnings per  
24 share growth to estimate that growth. Other analysts  
25 use a mix of earnings per share growth, dividend per

1 share growth, book value per share growth. The theory  
2 supporting the discounted cash flow model is that it is  
3 a dividend discounting model because that is the cash  
4 flows investors actually receive. They don't receive  
5 the earnings from the company, they reserve a dividend  
6 from the company. But because earnings per share is  
7 more readily forecasted, there's more analysts out there  
8 covering it, it's considered a more robust growth  
9 estimate, a lot of analysts will just use earnings per  
10 share growth. Others will use a blend of these growth  
11 rates.

12 **CHAIRMAN ARGENZIANO:** Can I do this for a  
13 minute, and I don't mean to break your train of thought.  
14 The only reason I asked for the difference is -- I think  
15 we have all read them -- was to get the conversation  
16 started, because it seemed we were stuck before. And  
17 with all due respect, I don't want to cut staff off, do  
18 we still need that --

19 **MR. MAUREY:** Oh, no, cut me off. (Laughter.)

20 **CHAIRMAN ARGENZIANO:** Because the only reason  
21 I did that was to generate some debate when we were  
22 deferring everywhere before, but I don't know if we need  
23 to go there. And it's the will of Commission if you  
24 want to continue. Okay.

25 Commissioner Klement and then Commissioner

1 Skop.

2 **COMMISSIONER KLEMENT:** Well, just to finish  
3 Andrew's thought on that, I note on the recommendations  
4 near the bottom of 277, a lot of the defense for the  
5 recommended range is growth rates, different assumptions  
6 about growth rates, right?

7 **MR. MAUREY:** Correct.

8 **COMMISSIONER KLEMENT:** For my colleagues that  
9 is one consideration to make.

10 **CHAIRMAN ARGENZIANO:** Oh, absolutely. And it  
11 is whoever in the testimony or -- and you guys weren't  
12 here, but you have read up, but whoever has made those  
13 points to you are the best, or I guess where you wind  
14 up.

15 **COMMISSIONER KLEMENT:** Or what you believe  
16 about the economy and the equity market.

17 **CHAIRMAN ARGENZIANO:** Everything. There are a  
18 lot of inputs, aren't there?

19 Commissioner Skop.

20 **COMMISSIONER SKOP:** Thank you.

21 And just to clarify the growth rates on 277, I  
22 want to make sure that we are talking about growth rate  
23 in the proper context. My understanding of growth rate  
24 there is not the economy, but basically the growth rate  
25 in the dividend under the discounted cash flow analysis.

1           **MR. MAUREY:** That's correct.

2           **COMMISSIONER SKOP:** Thank you. I'll yield to  
3 Commissioner Klement.

4           **COMMISSIONER KLEMENT:** I'm finished for now,  
5 Madam Chair.

6           **CHAIRMAN ARGENZIANO:** Okay. So then we have  
7 cut you off.

8           **MR. MAUREY:** Thank you. (Laughter.)

9           **CHAIRMAN ARGENZIANO:** Unless anybody else  
10 needs --

11           **COMMISSIONER STEVENS:** But it sounded good.

12           **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
13 Skop.

14           **COMMISSIONER STEVENS:** Thank you, Madam Chair.

15           I guess this would be a good point to discuss  
16 the handout that I gave my colleagues this morning. At  
17 the top of the handout it shows the impact on revenue  
18 requirement for different ROE values in millions. And,  
19 basically starting with the staff recommendation, the  
20 10.75, I proceeded to run a range of sensitivities down  
21 to the Public Counsel's recommended ROE of 9.5, and it  
22 basically shows the differential in millions of dollars  
23 to revenue requirement for each of the respective ROE  
24 sensitivities in that range.

25           So as you go down in ROE, you reduce your

1 revenue requirement, and that's what that chart shows  
2 you. And the difference between 10.75 and just, say,  
3 10 is a useful number, is approximately \$100 million per  
4 year rounded up based on the numbers shown there.

5 I guess, you know, in discussing ROE it is  
6 always a contentious issue and some people, you know,  
7 tend to overreact to the fact that the Commission is  
8 faced with discussing this in the first rate case that  
9 the Commission has dealt with in quite a number of  
10 years. And I just think from my perspective, the  
11 Florida Public Service Commission has had and will  
12 continue to have a constructive view of regulation.

13 And the mere fact that the Commission is  
14 discussing adjusting ROE to a more appropriate level  
15 based on prevailing economic conditions is not in itself  
16 a bad thing. It's not -- you know, it doesn't speak to  
17 us doing anything wrong other than recognizing the  
18 prevailing economic realities that Florida consumers and  
19 the companies and everyone is facing right now.

20 So, again, in looking at developing a fair and  
21 appropriate ROE for the Commission to set, you know,  
22 reviewing what ROE affects, you know, certainly as we  
23 discuss ROE significantly affects the revenue  
24 requirement. ROE also impacts cash flow from  
25 operations. And, you know, setting a fair return on

1 equity is the important thing, but irrespective of what  
2 the Commission does, whether it grants the FPL request  
3 of 12.5, or 10, or OPC's number of 9.5, the cash  
4 generated from that return on equity, there is no  
5 guarantee that the net income from operations will be  
6 reinvested in FPL for capital projects as opposed to  
7 being swept up to the parent.

8           So I think that is an important consideration  
9 in light of the representations that we have to consider  
10 about we need this rate increase to do X, Y, and Z. I  
11 mean, certainly you can access the capital markets to  
12 borrow to float debt. You know, you have a high equity  
13 ratio. You're in a strong financial position. But, you  
14 know, doling out ROE for the sake of doling out of ROE  
15 does -- you know, it certainly provides internal funds  
16 for investment in the company, but there is no guarantee  
17 that those funds will be reinvested.

18           So in looking at where I'm at, I think that  
19 the staff recommended ROE certainly that is a starting  
20 point, but, you know, I somewhat share Commissioner  
21 Stevens' view that, you know, perhaps a downward  
22 adjustment is more appropriate in light of FPL's risk on  
23 a stand-alone basis. And I think risk factors  
24 prominently in what is a fair and appropriate ROE to the  
25 extent that if you have 61 percent of your customer

1 bills passed through a clause on an annual basis, there  
2 is not a whole lot of risk there. So I'm having trouble  
3 grappling with the company's request of 12.5.

4 And that was a significant driver in the  
5 revenue requirement of the company's request, and so we  
6 need to be very cognizant of that. You know, I'm  
7 certainly open to having a discussion, but on a  
8 risk-adjusted basis looking, you know, at FPL's risk in  
9 relation to the other investor-owned utilities in the  
10 state of Florida, I would reasonably argue that FPL is  
11 in a strong financial position, has substantially less  
12 risk, and, you know, certainly I think that an ROE, you  
13 know, somewhere between the range of 10.2 and 10.5 would  
14 be appropriate. I'm more apt towards, you know, 10.25,  
15 and 10.3. I have a little margin on the downward side,  
16 but I think it is very important to consider what we are  
17 looking at.

18 I mean, 10 may even be appropriate. Under 10  
19 I start to get a little bit concerned. But, you know,  
20 certainly that is a basis for discussion. I'm not wed  
21 to a position, but I think there becomes a point where  
22 you are looking to being fair to the company, fair to  
23 the ratepayers, making sure they are not have to pay  
24 more than they need to to support a dividend or other  
25 things that are just unnecessary.

1           And I think that we need to take a critical  
2 look here, and this is an opportunity, but it should not  
3 be viewed as not being constructive. It should be  
4 viewed as reality that we need to set an ROE that is  
5 fair and commensurate with the prevailing economic  
6 conditions. Thank you, Madam Chair.

7           **COMMISSIONER KLEMENT:** Madam Chair.

8           **CHAIRMAN ARGENZIANO:** Commissioner Klement.

9           **COMMISSIONER KLEMENT:** Is it appropriate to  
10 consider the depreciation reserve amortization in this  
11 context as we did in the previous case in this  
12 overall --

13          **CHAIRMAN ARGENZIANO:** I think if you would  
14 like to discuss that, then --

15          **COMMISSIONER KLEMENT:** -- revenue requirement?  
16 We impacted the revenue requirement for Progress by  
17 looking at that, so I think we should put that on the  
18 table.

19          **COMMISSIONER SKOP:** Madam Chair, if I could  
20 address Commissioner Klement's comments?

21          **CHAIRMAN ARGENZIANO:** If you would like to  
22 address them, sure.

23          **COMMISSIONER SKOP:** Thank you, Madam Chair.

24                 What is shown on this sheet -- and, again, I  
25 want to emphasize that I'm looking at each of the issues

1 on a separate and independent basis. I mean, they are  
2 all interrelated because they are all cumulative to the  
3 extent that they all impact revenue requirement and the  
4 number at the end is what it is. But, you know,  
5 certainly the first column or first set of numbers in  
6 the analysis and sensitivities deals with the reduction  
7 of ROE. The second block is reduction of revenue  
8 requirement or the incremental reduction to revenue  
9 requirement resulting from a four-year amortization of  
10 theoretical depreciation reserve amounts in millions.  
11 And this is on top of what staff has already  
12 recommended.

13 Staff basically, I believe, amortized -- and  
14 I'm looking for my quick sheet here.

15 **COMMISSIONER STEVENS:** Are you talking about  
16 the 142.9?

17 **COMMISSIONER SKOP:** No, here it is. Staff  
18 basically -- the staff recommendation basically  
19 amortizes \$500 million of the net surplus over four  
20 years, and what staff did not do is amortize  
21 approximately \$400 million of the remaining depreciation  
22 surplus, or the net surplus. They choose to depreciate  
23 that over the remaining life rather than four years.

24 My concern, and, again, it's based on each  
25 individual situation, that \$400 million, if it were

1 returned to the customers, would reduce the revenue  
2 requirement as shown in this chart by approximately  
3 \$77 million. And certainly when we get to Issue 19F, I  
4 think that that is an issue of discretion that the  
5 Commission is going to have to take into consideration  
6 whether customers, you know, should be entitled to  
7 getting that surplus back. And, you know, my position  
8 -- I don't want to jump ahead to issues -- is I feel  
9 they should.

10 And just, finally, the last column on the  
11 handout page discusses the revenue requirement from a  
12 reduced storm accrual amount. And staff has recommended  
13 a \$50 million storm reserve annual accrual. There is no  
14 incremental revenue reduction required in the staff  
15 recommendation, but if you were to reduce that across  
16 the board, whether it be 40, 30 million, 25 million, or  
17 down to zero, if you were to make that accrual zero,  
18 and, again, FPL has a funded reserve which is a  
19 segregated account, it's not an unfunded reserve, and it  
20 actually has over -- I think the bond issuance over \$200  
21 million, and I will wait until we get into the issue.  
22 But if you were to deny the staff recommendation for a  
23 \$50 million annual accrual, you would save the  
24 ratepayers a revenue requirement of approximately  
25 \$50 million per year.

1           So these are not cumulative effects. These  
2 are individual effects as they affect the Commission's  
3 decision on each individual issue. And I think it is  
4 important that we look at issues individually except  
5 when they are interrelated like equity ratio and ROE.  
6 But it is just meant to illustrate the cause and effect  
7 of the various decisions that the Commission is called  
8 to decide upon in this rate case.

9           **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

10           **COMMISSIONER STEVENS:** Commissioner, if you  
11 wanted to discuss 19F and set aside 80, or discuss 19F,  
12 120, and 80 altogether, I will do whatever you prefer.

13           **CHAIRMAN ARGENZIANO:** Well, we are --

14           **COMMISSIONER STEVENS:** I'm prepared to discuss  
15 all of them.

16           **CHAIRMAN ARGENZIANO:** Well, we should have a  
17 thorough discussion, it's just now, I guess, the order  
18 in the discussion. We are on 80. Is it the will of the  
19 Commissioners to go back to -- I'm sorry, to go to --  
20 Commissioner Klement, where did you want to go?

21           **COMMISSIONER KLEMENT:** Well, to consider how  
22 much -- if any or how much of the reserve to offset the  
23 revenue requirements from the ROE. It looks to me like  
24 if you used, for example, 300 million for offsets and  
25 500 could be used to reduce rates for four years. Is

1 that correct?

2 **CHAIRMAN ARGENZIANO:** That's staff's  
3 recommendation, uh-huh.

4 **COMMISSIONER KLEMENT:** So that would leave  
5 400 million in the reserve?

6 **CHAIRMAN ARGENZIANO:** Which is what  
7 Commissioner Skop had indicated his preference would be  
8 to amortize the whole?

9 **COMMISSIONER SKOP:** Yes. Basically, what it  
10 is is the surplus as calculated by staff was  
11 \$1.2 billion, but you need to net that against the 340,  
12 which is the -- or the 314, which is the underrecoveries  
13 or the deficit. So basically you match those. You have  
14 a net surplus, and that net surplus is \$894.6 million.

15 Staff has chosen in its recommendation to  
16 amortize only 500 million of that over four years, and  
17 my preference would be to amortize the entire net  
18 surplus of approximately 894.6 million over four years,  
19 which would further reduce the staff recommended revenue  
20 requirement by approximately \$77 million per year.

21 **COMMISSIONER STEVENS:** That's exactly what I  
22 have written down here. I agree with that.

23 **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
24 Klement.

25 **COMMISSIONER KLEMENT:** Is there a point,

1 Staff, a minimum balance reserve that we should not go  
2 under to avoid creating other problems?

3 **MS. LEE:** Commissioner Klement, Pat Lee of  
4 staff.

5 This as a surplus. This is a calculated  
6 surplus. In other words, this is the amount that they  
7 have not overrecovered, but they have recovered to date  
8 that they don't need.

9 **COMMISSIONER KLEMENT:** Right, I understand.

10 **MS. LEE:** So there is -- this is certainly a  
11 depreciation expense that can be credited back to bring  
12 the reserve down.

13 **COMMISSIONER KLEMENT:** Well, Commissioner  
14 Skop, what was the level of the reserve balance you were  
15 suggesting?

16 **COMMISSIONER SKOP:** The entire amount. The  
17 entire amount. The whole enchilada.

18 **COMMISSIONER KLEMENT:** Then that answers --  
19 well, I guess, I was just going to ask does that create  
20 other problems? Would that, would that.

21 **MS. LEE:** The amortization over four years  
22 brings the reserve to a theoretically correct level  
23 based on the recommended parameters today. Could that  
24 change? Yes, it could. Certainly rate base will be  
25 higher in year five by approximately -- well, it would

1 be the entire amount, 1.2 billion.

2 **COMMISSIONER STEVENS:** Madam Chair.

3 **COMMISSIONER SKOP:** No, probably 800.

4 **MS. LEE:** 800. I'm sorry, 800.

5 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

6 **COMMISSIONER STEVENS:** Well, also in three  
7 years we have a thorough review of depreciation, right?

8 **MS. LEE:** Absolutely.

9 **COMMISSIONER STEVENS:** So based on information  
10 we have today, what you said is absolutely correct, but  
11 three years from now that may change.

12 **MS. LEE:** Absolutely.

13 **COMMISSIONER STEVENS:** And one of the -- and I  
14 didn't give a reason why I agreed with Commissioner  
15 Skop, but I had gone through these numbers, and I read  
16 the comments, and we spoke Monday about  
17 intergenerational inequity, and that's a whole bunch of  
18 syllables there, but it's there. And that's why I did  
19 not want to wait 22 years. And I think there was a  
20 point made in the discussions that over 50 percent  
21 turnover in residential customers during the period, so  
22 although depreciation is an estimate, I think the  
23 estimate should be a little bit closer than it is. And  
24 if we do this right now, it brings things where I  
25 believe that they should be. Thank you.

1                   **CHAIRMAN ARGENZIANO:** Commissioner Klement.

2                   **COMMISSIONER KLEMENT:** (Inaudible.)

3                   **CHAIRMAN ARGENZIANO:** Commissioner Skop.

4                   **COMMISSIONER SKOP:** One other thought on that,  
5 Madam Chair. The way I'm looking at this is, again,  
6 there is an intergenerational inequity argument to be  
7 made. Certainly, in four years we'll have to readdress  
8 the depreciation situation, what is what the  
9 depreciation study is for, to do your true up to make  
10 the regulatory accounts trued up. But, I mean, let's be  
11 honest here. If there were a depreciation deficit, the  
12 company would come in here and request dollar per dollar  
13 to recover that from its customers in rates today.  
14 That's what would happen.

15                   So when there's surplus, again, if we talk  
16 about asymmetrical risk in arguments, you know, from a  
17 customer's perspective, if there's a theoretical reserve  
18 surplus, you know, customers, that's -- you know, it's a  
19 non-cash item, but, again, it's something that we need  
20 to look when we're truing up our regulatory accounts.  
21 Now, in different economic times, would I maybe think  
22 more conservatively about this? Absolutely. But in  
23 these difficult economic times, any dollar revenue  
24 requirement is a dollar paid by customers, and it's  
25 something that has to be on the table, it has to be

1 thoroughly discussed, and we need to take a critical  
2 look at that in terms of the discretion and judgment  
3 that the Commission chooses to exercise on these  
4 discretionary issues.

5 Thank you, Madam Chair.

6 **CHAIRMAN ARGENZIANO:** I had the other day on  
7 Monday the argument or the questions and the concerns, I  
8 should say, about the intergenerational inequity. And  
9 that day we didn't -- the Commission took a different  
10 position. I wanted to go a little farther in returning  
11 more of that -- because of that -- I mean, the  
12 intergenerational inequity. But I think to Commissioner  
13 Klement's point, and I want to make sure your question  
14 was answered. That day we found that if we went any  
15 further, or staff had indicated, and I think the reason  
16 the vote went that way was because if you went any  
17 further you would hurt the company, and I think that is  
18 what the Commissioner was asking.

19 Did you get the answer to that question?

20 **COMMISSIONER KLEMENT:** Yes, I did. Thank you.

21 **CHAIRMAN ARGENZIANO:** Okay. Just to make  
22 sure.

23 **COMMISSIONER SKOP:** Madam Chair.

24 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

25 **COMMISSIONER SKOP:** Thank you.

1                   And in this chair -- in this instant case on  
2 the record evidence before me, given FPL's  
3 capitalization, its equity ratio and its strong  
4 financial position, I do not feel that refunding the net  
5 surplus -- theoretical depreciation surplus amount or  
6 amortizing that over four years would have a detrimental  
7 effect to the company.

8                   **CHAIRMAN ARGENZIANO:** Okay.

9                   **COMMISSIONER STEVENS:** I'm ready.

10                  **CHAIRMAN ARGENZIANO:** On issue -- wait a  
11 minute.

12                  **COMMISSIONER EDGAR:** I am not sure where we  
13 are.

14                  **CHAIRMAN ARGENZIANO:** What issue are we ready,  
15 because I --

16                  **COMMISSIONER KLEMENT:** Madam Chair, I think  
17 that on the table are recommendations for consideration  
18 between 9 to 10.7 percent, and we have not heard any  
19 positions from Commissioners Edgar or -- (simultaneous  
20 conversation)

21                  **CHAIRMAN ARGENZIANO:** Hang on a second.

22                  **COMMISSIONER EDGAR:** I thought for a moment we  
23 were on storms, so --

24                  **CHAIRMAN ARGENZIANO:** Hang on a second. We  
25 have jumped all around the place, and I think what it

1 just shows you is how everything does -- even though  
2 they're separate issues, there are interrelationships  
3 that are -- that are critical in thinking. So let's do  
4 this. We were on Issue 80. Is it the will of the  
5 Commission to remain, stay on Issue 80 or should we be  
6 going back to 19F at this point? I'm going to look at  
7 staff, too. Does it make a difference at this point?

8 **MR. DEVLIN:** It's a matter of preference,  
9 whatever your --

10 **CHAIRMAN ARGENZIANO:** Okay.

11 **MR. DEVLIN:** There is no magic to --

12 **COMMISSIONER KLEMENT:** Well, Commissioner  
13 Edgar, did I hear you mention also consider storm  
14 reserve?

15 **COMMISSIONER EDGAR:** Well, I was just saying  
16 -- there was some discussion on storm reserve when I  
17 thought we were on another item. And then there was  
18 some discussion about 19, and then back to -- and I  
19 guess, perhaps, I'm just not thinking as quickly as  
20 everyone else that's up here. When I think we are  
21 getting ready on one issue -- I don't mean to forestall  
22 any discussion, it's just -- Madam Chair, I guess it  
23 would be helpful for my thinking if we able to just sort  
24 of lay out a little bit of the plan.

25 **CHAIRMAN ARGENZIANO:** Okay. Here's the plan.

1 Here is the plan, because I have heard it now, and we  
2 each talk a little about it, a little bit of everything,  
3 and I understand that. Let's go to 19F.

4 **COMMISSIONER KLEMENT:** Madam Chair.

5 **CHAIRMAN ARGENZIANO:** Commissioner Klement.

6 **COMMISSIONER KLEMENT:** Since Commissioner Skop  
7 has included storm reserve in his chart, and since if we  
8 reduce the recommendation considerably, which based on  
9 Monday's debate, there's that possibility, perhaps that  
10 should be considered, too. Because if we reduce it a  
11 lot, that will affect the revenue amount, also. And I  
12 know that --

13 **CHAIRMAN ARGENZIANO:** Are you saying you don't  
14 want to go to 19 now --

15 **COMMISSIONER KLEMENT:** I'm just asking if  
16 we --

17 **CHAIRMAN ARGENZIANO:** Okay.

18 **COMMISSIONER KLEMENT:** I guess I want to know  
19 what amount of revenue we are willing to go to.

20 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

21 **COMMISSIONER SKOP:** Madam Chairman, I'll  
22 offer a compromise solution in terms of the issues.  
23 And, again, I will yield to your discretion as the  
24 Chairman. It might be, and I don't want to bounce  
25 around, but the simplest issue for me that I think we

1 could quickly build a consensus on is Issue 120, which  
2 is the storm reserve. We could go then to 19F, and then  
3 we could go back to Issue 80, which is the ROE. That  
4 might be the easiest way. But I will yield to you.

5 **CHAIRMAN ARGENZIANO:** If that makes the  
6 Commissioners feel happy, is anybody opposed to that?

7 **COMMISSIONER STEVENS:** No. No, ma'am.

8 **CHAIRMAN ARGENZIANO:** Okay.

9 **COMMISSIONER STEVENS:** I'm ready to do either  
10 one of them.

11 **CHAIRMAN ARGENZIANO:** This is the way it's  
12 going to go. We are going to go to the storm reserve,  
13 and then we are going to go to 19F, and then we are  
14 going to proceed from there.

15 **COMMISSIONER STEVENS:** All right.

16 **CHAIRMAN ARGENZIANO:** Okay. Let's go to the  
17 storm reserve, which is Issue 120.

18 **MR. PRESTWOOD:** Commissioners, Florida Power  
19 and Light had, as you know, proposed an annual accrual  
20 of \$150 million a year, with a target reserve of 650  
21 million. Staff has proposed a gradual shift in that  
22 direction leaving the target at 650 million, but  
23 reducing the accrual to \$50 million a year. And we are  
24 available for questions.

25 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

1                   **COMMISSIONER SKOP:** Thank you, Madam Chair.  
2 To staff, I know that we had the storm securitization,  
3 but with respect to the money that is currently in the  
4 funded reserve account, what is that balance?

5                   **MR. PRESTWOOD:** 215 million.

6                   **COMMISSIONER SKOP:** All right. So that is  
7 what is currently paid into the restricted account  
8 that's available if we have a very major storm for FPL  
9 to use for storm restoration?

10                  **MR. PRESTWOOD:** Yes, sir.

11                  **COMMISSIONER SKOP:** Not another surcharge?

12                  **MR. PRESTWOOD:** Yes, Commissioner, that's  
13 correct.

14                  **COMMISSIONER SKOP:** Okay. Now, is it also  
15 correct that there is currently a surcharge on  
16 customers' bills for the storm reserve?

17                  **MR. PRESTWOOD:** Yes, Commissioner, that's  
18 correct.

19                  **COMMISSIONER SKOP:** So by adopting the staff  
20 recommendation, noting that we currently have \$250  
21 million currently in the reserve, we would be  
22 effectively adding a surcharge on top of a surcharge, in  
23 effect, being cumulative or increase customers' bills.

24                  **MR. PRESTWOOD:** In effect. Of course, the  
25 additional amount would be built into base rates, but,

1 in effect, yes.

2 **COMMISSIONER SKOP:** Okay. All right. That's  
3 my concern.

4 Commissioners, you know, I don't want to scare  
5 the discussion on this one, but, again, any time you  
6 have got a discretionary amount, it's subject to taking  
7 a critical look at. And I have sharpened my pencil, and  
8 where I'm at is I would deny staff recommendation on the  
9 storm reserve accrual and set the accrual amount at  
10 zero.

11 **COMMISSIONER KLEMENT:** Madam Chairman.

12 **CHAIRMAN ARGENZIANO:** I am there at zero  
13 accrual, also. I think it's a bad time right now to do  
14 that. I said it Monday, and I didn't change it today.

15 Commissioner Klement.

16 **COMMISSIONER KLEMENT:** May I ask the staff  
17 what -- how many months or years remain in the bonded  
18 storm surcharge?

19 **MR. PRESTWOOD:** The surcharge that is underway  
20 now, I don't know exactly, maybe -- Andrew. I'm sorry,  
21 Andrew knows.

22 **MR. MAUREY:** The bonds were issued in 2010  
23 with a ten-year maturity. It should be paid off in  
24 2017, but there is flexibility for it to go as long as  
25 2019.

1                   **COMMISSIONER KLEMENT:** And about how much is  
2 it on the -- a thousand kilowatt hour bill?

3                   **MR. PRESTWOOD:** It fluctuates. It's changed  
4 every six months to update, but currently it is set at  
5 \$2.59 per thousand kilowatt hours for residential. It  
6 does vary depending on the classes.

7                   **CHAIRMAN ARGENZIANO:** And can I ask as we did  
8 on Monday if there were -- there is money in the reserve  
9 now, as Commissioner Skop had indicated, if you could  
10 give me that amount again. And if there were  
11 catastrophic storms to occur, the company gets to  
12 recover, has other mechanisms of recovery, is that  
13 correct?

14                   **MR. PRESTWOOD:** Yes. Yes, Commissioner.

15                   In addition to using up the storm reserve,  
16 then the company always has the option to go to  
17 securitization and issue additional bonds to cover the  
18 storm damage. So effectively -- if your question is --  
19 the company is protected from storm damage because that  
20 is -- considered prudently incurred storm damage repair  
21 because that is considered a cost of service and it  
22 either could -- can collect that through a surcharge  
23 retroactively or build it up through a reserve going  
24 forward.

25                   **CHAIRMAN ARGENZIANO:** And if the accrual were

1 continued, that -- those are monies that the company  
2 does not specifically keep somewhere, as I think  
3 Commissioner --

4 **COMMISSIONER STEVENS:** In trust.

5 **CHAIRMAN ARGENZIANO:** -- Stevens had said in  
6 trust. It can be used, but they have to account for it  
7 at sometime, right?

8 **MR. PRESTWOOD:** No, that's not correct. It is  
9 actually set aside in a trust type fund.

10 **CHAIRMAN ARGENZIANO:** I'm sorry. That's  
11 right. This company has a --

12 **MR. PRESTWOOD:** This has a funded reserve,  
13 Florida Power and Light has funded reserve.

14 **CHAIRMAN ARGENZIANO:** Okay. And what is in  
15 that reserve at this time?

16 **MR. PRESTWOOD:** That is the 215 million, and  
17 it earns interest, and the interest is credited to that  
18 reserve and so forth.

19 **CHAIRMAN ARGENZIANO:** Okay.

20 **COMMISSIONER KLEMENT:** Madam Chair.

21 **CHAIRMAN ARGENZIANO:** Commissioner Klement.

22 **COMMISSIONER KLEMENT:** May I ask how many  
23 years would it take at the staff recommended rate of  
24 \$50 million to reach the goal of 650?

25 **MR. PRESTWOOD:** Commissioner Klement, I can't

1 answer that question directly. I do know from the  
2 testimony in the case that at \$150 million a year, the  
3 experts had estimated at the end of five years they  
4 would have approximately 358 billion. That's giving  
5 effect to a couple of storms occurring during that  
6 five-year period, you know, that would bring the reserve  
7 down, and then continuing to accrue to build it back up  
8 again. So they had anticipated a 358 million at the end  
9 of five years. So if you cut that to one-third, I guess  
10 you could do a rough calculation of --

11 **COMMISSIONER KLEMENT:** A long time.

12 **MR. PRESTWOOD:** A long time.

13 **COMMISSIONER KLEMENT:** Ma'am Chair.

14 **CHAIRMAN ARGENZIANO:** Yes.

15 **COMMISSIONER KLEMENT:** It seems like on this  
16 issue, and I don't -- it's very philosophical as well as  
17 financial. It is a pay me now and pay me later almost  
18 either way you go if -- assuming that there are storms,  
19 and we have to assume there will be, whether it is next  
20 year or the year after. So it seems prudent to store up  
21 some -- save up some money now. It's a form, as someone  
22 in the testimony referenced, it's a form of insurance.

23 We all carry insurance on our cars and our  
24 homes and ourselves and our health. Why would you not  
25 carry insurance against a storm -- a hurricane in

1 Florida?

2 **CHAIRMAN ARGENZIANO:** Well, if you are asking  
3 me, that's what the 214 is, that is insurance. And the  
4 reason -- in my opinion at this time -- is the same  
5 reason I had on Monday, was that is it necessary to do  
6 it at this time, since the company is protected if it  
7 does occur. The people, the ratepayers right now are  
8 under tremendous stress with the economy, why put more  
9 on them now when it can be recovered anyway at another  
10 time. So while I appreciate the company having the  
11 dedicated fund for that, I think the money that they  
12 have in the fund could do for now, and if we do want --  
13 my opinion, and if we do have storms, we know the  
14 company is protected, they can recover, and that we also  
15 know that at the same time we are alleviating some of  
16 the burden from the ratepayer. So that's my philosophy  
17 and my opinion.

18 Commissioner Skop and then Commissioner Edgar.

19 **COMMISSIONER SKOP:** Thank you, Madam Chairman.

20 I could not agree more with what the Chairman  
21 just said. There is an existing surcharge in the amount  
22 of almost \$2.60 per month. Adopting the staff  
23 recommendation would just add effectively another  
24 surcharge within base rates to do the same thing, to add  
25 to a reserve that we already have. So it's pay me now,

1 and pay me now on something that we don't know when it  
2 is going to be used. But when it is necessary to use  
3 it, we have \$250 million in the bank in a dedicated fund  
4 ready to go.

5 And, historically, the Commission is very  
6 proactive about meeting the utility's needs of doing a  
7 surcharge should we need to do it. So, again, in  
8 different economic times I would be more amenable to  
9 this, but in this economic situation, as Commissioner  
10 Argenziano or Chairman Argenziano alluded to, it puts an  
11 additional burden on a dollar per dollar basis on the  
12 customers. And I think that better use of discretion  
13 and judgment in this case is to suspend the accrual.  
14 And, again, if economic times change, and we come on  
15 better times of prosperity, we certainly can reinstate  
16 it in a heart beat.

17 I mean, the way we're talking about having  
18 follow on rate cases, you know, we may in -- in great  
19 economic times a year or two from now, and then we will  
20 take another critical look. But for now I think you  
21 provide the customers with rate relief.

22 Thank you.

23 **CHAIRMAN ARGENZIANO:** Commissioner Edgar.

24 **COMMISSIONER EDGAR:** Thank you.

25 I actually had a question about an answer that

1 was given some time ago now, so I'm going to try to come  
2 back to that. It is correct, is it not, that there is  
3 currently a line item on FPL customer bills to account  
4 for the securitization?

5 **MR. PRESTWOOD:** There is, yes, Commissioner.

6 **COMMISSIONER EDGAR:** Is there a separate line  
7 item for storm accrual, because I think that's the  
8 answer I heard earlier.

9 **MR. PRESTWOOD:** No, Commissioner.

10 **COMMISSIONER EDGAR:** And maybe I heard wrong,  
11 but I thought that that's the answer I heard.

12 **MR. PRESTWOOD:** And the idea of building it  
13 into the case is it would become a part of base rates.

14 **COMMISSIONER EDGAR:** Correct.

15 **MR. PRESTWOOD:** And --

16 **COMMISSIONER EDGAR:** Yes. But as of now, as  
17 of now there is not a separate line item for storm cost  
18 accrual.

19 **MR. PRESTWOOD:** Not for the -- well, no,  
20 that's correct.

21 **COMMISSIONER EDGAR:** Okay. And, again, this  
22 is an issue that, as I have said before, and as we had  
23 the discussion on Monday, that even like-minded people  
24 could disagree, and I agree with, as I think I have said  
25 many times also, and I think I have heard today that it

1 is also a philosophy. My own belief is that the 214  
2 million that is there, approximately, currently is a  
3 good amount, but that it represents underinsurance. And  
4 that, again, is based upon my experience as a  
5 Commissioner a few years ago when we had to look  
6 critically at storm costs and storm response and the  
7 impact that that had on communities.

8 I don't remember the exact words, but I think  
9 a few moments ago here in discussion I heard a concern  
10 about a pancaking of surcharges related to this. My  
11 concern on that is on the other side, which is that  
12 securitization surcharge is going to continue for a  
13 certain number of years, but, yet, if there were to be  
14 storms, and not necessarily just catastrophic storms  
15 over a large geographic swath, but even very targeted  
16 smaller areas but yet destructive to generation,  
17 transmission, or even more likely distribution. Having  
18 heard repeated testimony at public service customer  
19 meetings across the state a few years ago about the  
20 disruption and the economic hardship that being out of  
21 power caused to individual families, to small business,  
22 to schools, to hospitals, et cetera, to then after the  
23 fact when people are trying to get on their feet and  
24 when they are trying to rebuild often is the time that  
25 you will be using even more power than you might have in

1 a normal day or in a normal week or a normal month.

2 So I think that issue of possibly pancaking at  
3 a time where individuals and businesses would feel that  
4 additional cost perhaps even more greatly, but certainly  
5 would feel it, is a concern of mine. And, again, that  
6 goes back to past experience. So not being critical in  
7 any way, I do agree with the sort of pay me now or pay  
8 me later, put a very, very small amount in, and I  
9 realize there is an objection to any amount, but I  
10 believe in the philosophy of having an amount that is  
11 collected a little at a time and, hopefully, does build  
12 up and doesn't have to be tapped into every year,  
13 depending on the storms that we receive, I do think is  
14 good policy, and I have supported it before and I won't  
15 need to stick with that.

16 Now, one additional comment if I may, Madam  
17 Chair, as to the exact amount, I recognize that the  
18 staff recommendation is an accrual amount of 50 million  
19 per year. I don't know if that would be -- if, indeed,  
20 you buy into the concept, if, indeed, that would be the  
21 exact right amount -- excuse me -- if there were a  
22 majority who believe, as I do, that it is good policy,  
23 then I would have hoped for some discussion about what  
24 is the right amount. I don't know that there is any  
25 right number, but I do believe in the concept.

1                   **COMMISSIONER KLEMENT:** Madam Chair.

2                   **COMMISSIONER EDGAR:** Thank you.

3                   **CHAIRMAN ARGENZIANO:** I just want to comment,  
4 and then Commissioner Klement.

5                   And I respect that and understand that. I do,  
6 having been around the storm -- the communities very  
7 hard hit by many hurricanes in the past in my senate  
8 district, which was 13 counties, so we had a lot of  
9 damage. But I guess what gets -- it's hard right now.  
10 Because ordinarily, I think, as Commissioner Skop said,  
11 you would say, well, okay, a rainy day fund is probably  
12 a good fund to have.

13                   But at this same time, and as you have heard  
14 the voices, I've heard the voices of the consumers out  
15 there saying right now is not a time to charge us for  
16 something of an unknown storm in the future. And it  
17 could be -- it could be that when those storms -- it  
18 could be, God forbid, I hope they don't hit us, but what  
19 I'm hearing the people say today is we can't handle it  
20 right now. They are paying right now, the current  
21 customers are still paying for the past storms. And at  
22 a time when people can hardly pay their mortgages  
23 anymore, I don't think they can handle anymore. So what  
24 I'm looking at is trying to minimize the impact on  
25 ratepayers, also telling them that in the future if

1 storms hit, we're going to have to pay, that's the way  
2 it goes. And also assuring the company, and feeling  
3 assured that the company will recover.

4 But at this moment my main concern, and  
5 understanding yours and respecting yours, is that we  
6 alleviate what we can. And to charge -- to say that,  
7 you know, if we are going to charge today for what  
8 storms we don't know are going to come, to me is one I  
9 could take off the table right now, and not have that on  
10 the ratepayer. So that's where I'm coming from,  
11 understanding your philosophy, too.

12 Commissioner Klement.

13 **COMMISSIONER KLEMENT:** Thank you, Madam Chair.

14 You could do the corollary and say, although  
15 2004 and '05 were highly unusual, if the company and/or  
16 this Commission had been more prudent back then, there  
17 might have been a fund to -- so that there wouldn't be  
18 this charge against customers, four, five, ten years  
19 later to make up for the fund that wasn't there. So I  
20 would be --

21 **CHAIRMAN ARGENZIANO:** I wasn't -- I'm sorry.  
22 I wasn't here then, so I can't answer that, but I'm not  
23 going to disparage the --

24 **COMMISSIONER KLEMENT:** No, I don't meant to  
25 disparage.

1           **CHAIRMAN ARGENZIANO:** No, I know you're not.

2           **COMMISSIONER KLEMENT:** It's learning from the  
3 past. If we don't, then we are condemned to repeat it.  
4 So let's learn from the past.

5           **CHAIRMAN ARGENZIANO:** And I agree.

6           **COMMISSIONER KLEMENT:** I would be prepared to  
7 make motion on an amount.

8           **CHAIRMAN ARGENZIANO:** That's fine, and you can  
9 do that. I would just like to respond that I can agree  
10 that we try to learn, but there comes a point at some  
11 time -- the economy was the main thing. That was not  
12 there when Commissioners were here then. The situation  
13 that we have today was not the same. So that is --  
14 that's the major thing that I think Commissioner Skop, I  
15 think myself, and I think Commissioner Stevens had said  
16 the same thing the other day, that is what makes it  
17 different, the economy today and the burden on the  
18 consumer.

19                   Commissioner Skop and then Commissioner  
20 Klint -- Klement -- I'm going to change your name  
21 totally soon, then if you would like to make a motion,  
22 that is --

23           **COMMISSIONER SKOP:** Madam Chair, just briefly.

24                   Again, I couldn't agree more with how you  
25 characterize the situation. Certainly a rainy day fund

1 is nice, but in this case this is a completely  
2 discretionary expenditure or accrual. And, again, in  
3 using judgment and, again, that is why we have to face  
4 the heat for the decisions we make. But, you know, I'm  
5 prepared to use my judgment.

6 I think consumers understand, you know, even  
7 in difficult economic times if there were catastrophe  
8 event, they would appreciate the need, hey, we have to  
9 pay for storm restoration to keep the lights on. But  
10 what I don't think they can appreciate is why are we  
11 being asked to pay more today on top of the existing  
12 surcharge when we don't know when the next storm is  
13 going to occur, and we already have \$215 million saved  
14 away for that.

15 So, again, different times I would be more apt  
16 to approve the accrual amount as staff recommended, but  
17 not in these difficult, desperate financial times. And  
18 I think that that's where discretion has to come into  
19 play. And I will be probably aligning with Commissioner  
20 Argenziano. I haven't heard Commissioner Stevens on  
21 this one yet, but I think this is discretionary, and I'm  
22 prepared to use my judgment.

23 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

24 **COMMISSIONER STEVENS:** I agree. I think it is  
25 discretionary. I don't remember if I voiced it or not,

1 but I agree.

2 **CHAIRMAN ARGENZIANO:** Commissioner Klement,  
3 would you care to make a motion?

4 **COMMISSIONER KLEMENT:** Thank you, Madam Chair.  
5 With respect to Issue 120 regarding the storm  
6 damage reserve request by FPL, I would move that we make  
7 a -- make a recommendation for a \$25 million annual  
8 recovery. That's half of what the staff recommended and  
9 how much -- a lot less than the company asked. So  
10 25 million annual is my motion.

11 **COMMISSIONER EDGAR:** May I ask a question?

12 **CHAIRMAN ARGENZIANO:** Absolutely. You're  
13 recognized.

14 **COMMISSIONER EDGAR:** Thank you.

15 And I don't know if this is possible, but to  
16 staff -- I don't even know who to look at, so -- for  
17 that amount which, according Commissioner Skop's chart,  
18 the 25 million would equate to approximately  
19 330 million, any idea what -- could you give me a  
20 potential as to what that would represent on a -- either  
21 a thousand or 1200 monthly bill? And I do recognize  
22 that then it would go into base rates, but it is still  
23 an amount that would need to be quantified.

24 **MR. SLEMKEWICZ:** I'm not sure if you are  
25 looking at the -- you may be looking at the reserve, the

1 depreciation surplus, and not the storm damage reserve.  
2 If you lower it to 25 million, the revenue effect would  
3 be -- would decrease the rate increase by \$25 million,  
4 and I'm not sure what that equates to for a customer  
5 bill.

6 **MR. WILLIS:** Commissioner Edgar.

7 **COMMISSIONER EDGAR:** Yes, sir.

8 **MR. WILLIS:** I've just gotten a ballpark  
9 figure of about 20 to 25 cents on a bill, a thousand  
10 kilowatt bill.

11 **COMMISSIONER EDGAR:** Okay. Thank you. I  
12 appreciate that. And I recognize that that is an  
13 estimate and a ballpark, but I thank you for the  
14 clarification that I must have needed as well. You  
15 know, I can count. And as I said earlier, I do  
16 recognize that any specific amount is probably not a  
17 science but a rational range if, indeed, you do buy into  
18 the concept. So, again, I can count, but I do think  
19 that it would be good policy to go forward. And so with  
20 that in mind, I will second the motion.

21 **CHAIRMAN ARGENZIANO:** Do you have a second?  
22 You did second the motion?

23 **COMMISSIONER EDGAR:** I did.

24 **CHAIRMAN ARGENZIANO:** Okay.

25 Commissioner Stevens.

1                   **COMMISSIONER STEVENS:** Madam Chair, I can't  
2 second, or I can't join in that motion. It's just the  
3 way it is. I'm at 50 million right now, and that's just  
4 the way it is. Thank you.

5                   **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
6 Skop, and then we are going to vote on the motion.

7                   **COMMISSIONER SKOP:** Thank you, Madam Chair.  
8 Just as the discussion on the motion has been properly  
9 seconded, I appreciate Commissioner Klement making the  
10 motion. I think that there is merit, and certainly I  
11 respect the point of view of my colleague. It's just  
12 that I think where the difference of opinion lies is  
13 what is the best thing to do is in terms of the  
14 discretion and judgment. And at least from my  
15 perspective that would result in \$25 million of  
16 additional revenue requirement to the ratepayers, and in  
17 this economic condition, I think that I need to use my  
18 discretion to avoid that. Thank you.

19                   **CHAIRMAN ARGENZIANO:** Okay. We have motion  
20 and a second. All those in favor of the motion say aye.

21                   **COMMISSIONER KLEMENT:** Aye.

22                   **COMMISSIONER EDGAR:** Aye.

23                   **CHAIRMAN ARGENZIANO:** All those opposed?

24                   Aye.

25                   **COMMISSIONER STEVENS:** Aye.

1                   **COMMISSIONER SKOP:** Aye.

2                   **CHAIRMAN ARGENZIANO:** Motion fails. And now  
3 we will move on to -- we are going back to --

4                   **COMMISSIONER SKOP:** Actually, we --

5                   **CHAIRMAN ARGENZIANO:** We actually need another  
6 motion. All right. We need another motion.

7                   **COMMISSIONER SKOP:** Madam Chair, I  
8 respectfully move to deny staff recommendation on Issue  
9 120 and suspend the accrual to zero dollars.

10                   **COMMISSIONER STEVENS:** Second.

11                   **CHAIRMAN ARGENZIANO:** Okay. We have a motion  
12 and a second. Any discussion? Hearing none, all those  
13 in favor say aye.

14                   Aye.

15                   **COMMISSIONER SKOP:** Aye.

16                   **COMMISSIONER STEVENS:** Aye.

17                   **CHAIRMAN ARGENZIANO:** Same sign for opposed.

18                   **COMMISSIONER KLEMENT:** Aye.

19                   **COMMISSIONER EDGAR:** Aye.

20                   And, Madam Chair, if I may, just a qualifying  
21 comment. By virtue of the seconding the earlier motion,  
22 I would absolutely have been in favor of an amount less  
23 than what the staff had recommended, so I would just  
24 like that to be clear.

25                   **CHAIRMAN ARGENZIANO:** And noted.

1                   **COMMISSIONER EDGAR:** But, again, I do believe  
2 that an amount would be a more appropriate way to go  
3 than what the motion that we have now passed would have  
4 carried, and I would just like to make that clear.  
5 Thank you.

6                   **CHAIRMAN ARGENZIANO:** And that was made clear,  
7 and the motion is approved.

8                   Okay. Now, are we going back -- do the  
9 members want to go back to 19F, and I think that's what  
10 we said we were going to do. Okay.

11                   So are we ready?

12                   Oh, and goodbye, ladies and gentleman. Thank  
13 you for coming. Have a safe trip home. Be careful.

14                   Okay. I think we are on 19F. Do you want to  
15 wait a minute? Let's wait a minute, okay, just so we  
16 collect our thoughts.

17                   **MS. LEE:** Commissioners, issue -- Item Number  
18 19F deals with the -- what corrective action, if any, to  
19 dispose of the \$1.2 billion reserve surplus that has  
20 been quantified in Issue 19E. The 1.2 billion, as  
21 Commissioner Skop has alluded to previously, the first  
22 thing the staff has recommended is that 314.2 million  
23 associated with the capital recovery schedule  
24 unrecovered costs that we discussed in Issue 19A, we  
25 believe that that portion, 314, should be taken from the

1 reserve surplus and recovered. That reduces your total  
2 reserve surplus to 894 million, approximately, of which  
3 staff is recommending 500 million be amortized over five  
4 years with the remaining 394.6 million, I believe it is,  
5 to be amortized over the remaining life of the embedded  
6 investments which is 22 years.

7 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

8 **COMMISSIONER SKOP:** Thank you.

9 **MS. LEE:** Four years. Did I say --

10 **COMMISSIONER SKOP:** Yes, you said five.

11 **MS. LEE:** I'm sorry, I apologize. Four.

12 **COMMISSIONER SKOP:** Madam Chair, I think that  
13 we had -- certainly, I can refrain from making a motion.  
14 We had some substantial discussion on this previously,  
15 though. But my inclination would to be make a motion on  
16 19F to deny staff recommendation and to basically  
17 amortize the net theoretical depreciation reserve  
18 surplus of 894.6 million over four years in lieu of the  
19 staff recommendation, and that would result in a revenue  
20 requirement reduction of approximately \$77 million.

21 **COMMISSIONER STEVENS:** Could I ask a question  
22 for a second.

23 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

24 **COMMISSIONER STEVENS:** That 77 would be added  
25 to the 142?

1                   **COMMISSIONER SKOP:** No, the 77 million --  
2 again, staff has amortized -- the staff recommendation  
3 amortizes 500 --

4                   **COMMISSIONER STEVENS:** Right.

5                   **COMMISSIONER SKOP:** -- million over four  
6 years. And so that is already built into staff's  
7 revenue requirement. The incremental effect -

8                   **COMMISSIONER STEVENS:** But they also have 17  
9 in there, too, because of the 22 years. So the 125 plus  
10 the 17 is the 142.9. And I'm not disagreeing with your  
11 motion, because I agree with it. I'm just trying to  
12 make sure that I have your number right.

13                   **COMMISSIONER SKOP:** Yes, I think that, you  
14 know, I need staff clarification on this 142.9, if I  
15 could. I may have jumped --

16                   **COMMISSIONER STEVENS:** Wouldn't that include  
17 the 17 million that is the 22-year amortization also, so  
18 it's the 125 plus the 17?

19                   **COMMISSIONER SKOP:** We need some clarification  
20 on that.

21                   **CHAIRMAN ARGENZIANO:** Everybody is looking at  
22 who is going to answer.

23                   **MS. LEE:** I think you're right, Commissioner.

24                   **COMMISSIONER STEVENS:** Okay. If I could ask  
25 Commissioner Skop if --

1                   **CHAIRMAN ARGENZIANO:** Go right ahead.

2                   **COMMISSIONER STEVENS:** I would simplify it a  
3 little bit. I would deny staff's motion and take the  
4 894 net after the offset and amortize it over the full  
5 four years, and I agree with that.

6                   **COMMISSIONER SKOP:** And I think that was the  
7 intent of the motion.

8                   **COMMISSIONER STEVENS:** Okay. Second.

9                   **COMMISSIONER SKOP:** But I do want some  
10 clarification here, because I see this little fragment  
11 number of 142.9. So let me get clarification on staff  
12 as to would it be appropriate to style the motion to  
13 deny staff recommendation to adopt amortizing the net  
14 surplus of 894.6 million over four years? Will that get  
15 us to where we need to be?

16                   **MS. LEE:** Yes, it would, Commissioner.

17                   **COMMISSIONER STEVENS:** Second. Perfect.

18                   **CHAIRMAN ARGENZIANO:** Okay. Is that where you  
19 need to be on your motion? Okay.

20                   Any discussion, Commissioners?

21                   Commissioner Klement.

22                   **COMMISSIONER KLEMENT:** (Indicating no.)

23                   **CHAIRMAN ARGENZIANO:** No. Okay. We have a  
24 motion and a second. All those in favor signify by aye.

25                   (Simultaneous vote.)

1                   **CHAIRMAN ARGENZIANO:** All those opposed, same  
2 sign. Show the motion adopted.

3                   All right. Hang on a second. I buried my  
4 notes. We are moving on to -- we held up 51. All  
5 right. I got 131. We will take 51.

6                   **COMMISSIONER SKOP:** If Staff on Issue 51 could  
7 explain whether there is any change to the staff  
8 recommendation as a result of the Commission's decision  
9 on 19F?

10                   **CHAIRMAN ARGENZIANO:** Let me get to that page.

11                   **MR. SLEMKEWICZ:** Issue 51 will change based on  
12 the -- you know, the change in the level of the  
13 amortization in Issue 19F.

14                   **CHAIRMAN ARGENZIANO:** Right.

15                   Commissioner Skop?

16                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

17                   I respectfully move to approve the staff  
18 recommendation for Issue 51, noting that the amount of  
19 accumulated depreciation will change as a result of the  
20 Commission's decision on 19F.

21                   **COMMISSIONER STEVENS:** Second.

22                   **CHAIRMAN ARGENZIANO:** Okay. Any discussion or  
23 questions? Hearing none, all in favor say aye.

24                   (Simultaneous vote.)

25                   **CHAIRMAN ARGENZIANO:** All those opposed, same

1 sign. Show the motion passing.

2 And now we are going to go to 131.

3 **COMMISSIONER SKOP:** If staff could please  
4 introduce that issue, because we have gotten there yet.  
5 I think that's a fallout issue, also. But if staff  
6 could briefly speak to Issue 131.

7 **MR. SLEMKEWICZ:** That's correct. That will  
8 also change based on what you have done with the  
9 amortization of the surplus.

10 **COMMISSIONER SKOP:** Madam Chair, if there's no  
11 further questions on Issue 131 --

12 **CHAIRMAN ARGENZIANO:** Any other questions?

13 **MR. SLEMKEWICZ:** Well, there's still a lot of  
14 other adjustments that may go into this based on the  
15 other issues in NOI, so you probably don't want to vote  
16 on that right now.

17 **CHAIRMAN ARGENZIANO:** We will hold off on 131.

18 Okay. Now we are going to go back to 80.  
19 Commissioners.

20 **COMMISSIONER EDGAR:** Madam Chair, that's just  
21 flat worn me out. Would it be possible to take  
22 five-minute stretch?

23 **CHAIRMAN ARGENZIANO:** Absolutely. Let's take  
24 ten-minute stretch.

25 **COMMISSIONER EDGAR:** Thank you.

1 (Recess.)

2 **CHAIRMAN ARGENZIANO:** Okay. We're back, and  
3 we are on Issue 80. Let's give staff a chance to get  
4 back to their seats, too, sorry. Okay.

5 Are we ready, Commissioners?

6 **COMMISSIONER STEVENS:** Yes, ma'am.

7 **CHAIRMAN ARGENZIANO:** Okay. It looks like  
8 staff is -- do we need to give staff a couple of  
9 minutes?

10 **MR. DEVLIN:** Are we on issue --

11 **CHAIRMAN ARGENZIANO:** 80.

12 **MR. DEVLIN:** 80, everybody is here.

13 **CHAIRMAN ARGENZIANO:** Everybody? Good. Then  
14 we are good to go.

15 **MR. MAUREY:** More punctual than Monday.

16 **CHAIRMAN ARGENZIANO:** Okay. Commissioners,  
17 anybody want to start off? We had some discussion on  
18 the return on equity before.

19 Commissioner Skop, did you want to --

20 **COMMISSIONER SKOP:** Thank you, Madam Chair.

21 Just as a basis for discussion in picking up  
22 where we left off, I guess there was a breath of  
23 suggestions. I think that to reiterate, I guess, what I  
24 feel a fair and appropriate ROE would be, I was looking  
25 at somewhere in the range from 10 to 10.5, targeting,

1 you know, 10.2, 10.25, 10.3 as an appropriate midpoint,  
2 but I'm open for discussion.

3 **CHAIRMAN ARGENZIANO:** And, Commissioner  
4 Stevens.

5 **COMMISSIONER STEVENS:** Yes, ma'am, thank you.  
6 And, again, I read this information over and over again,  
7 and considering the ranges that the witnesses had, the  
8 current economic environment that we are in, and the  
9 risk that I believe is associated with this return, I'm  
10 between the 9 and the nine and a half. Which OPC, I  
11 believe, was recommending 9 and a half. I believe staff  
12 was at 10.75, and I think FPL was at 12.5. Thank you.

13 **CHAIRMAN ARGENZIANO:** Commissioner Klement or  
14 Commissioner Edgar, anything at this time?

15 **COMMISSIONER EDGAR:** Not at this moment.

16 **CHAIRMAN ARGENZIANO:** Okay.

17 Commissioner Klement.

18 **COMMISSIONER KLEMENT:** Thank you, Madam Chair.

19 I started out by throwing out 10.7, I believe,  
20 which was just a couple of tenths under staff. I can  
21 concur, I think, with Commissioner Skop at around 10.3.

22 **CHAIRMAN ARGENZIANO:** Is that it? Okay.

23 Commissioner Edgar.

24 **COMMISSIONER EDGAR:** Thank you, Madam Chair,  
25 and thank you for giving me an extra moment there to

1 think it through with all the numbers that are being  
2 discussed.

3           Once again, I said this on the earlier item,  
4 and I've said it many times, I don't think there is one  
5 exact right perfect answer to this issue as with many of  
6 the others that come before us. I am glad always for  
7 the discussion and for a range that then we can kind of  
8 bat around, and talk about pros and cons and see if  
9 there is the possibility for consensus. And just as an  
10 aside, I'll say that there have been times when I have  
11 voted for something that I thought was a good consensus,  
12 but would not have been probably my first choice. And I  
13 think that is part of the process. And there have been  
14 times when I felt like I needed to vote against  
15 something because I just couldn't get there in my own  
16 mind. And I think that's probably something we all do  
17 at different times with different issues.

18           So with that lead in and trying to listen very  
19 closely to each of you, and to harken back to the many  
20 days of testimony that we spent in this room, not a  
21 perfect number, but I guess, Madam Chair, what I would  
22 put out there as to where I am at this moment in time,  
23 would be 10.4.

24           **CHAIRMAN ARGENZIANO:** Okay. Thank you,  
25 Commissioner Edgar. And I seem to be more aligned with

1 Commission Stevens, except my range is probably 9 to 10,  
2 and that's probably within that range where I'm going to  
3 go.

4 Commissioner Skop.

5 **COMMISSIONER SKOP:** Thank you, Madam Chair.

6 And, again, I'm not wed to a specific number.  
7 Again, my range, at least in terms of my analysis,  
8 looking at the staff recommendation and based on the  
9 record evidence in this case, again, I think an  
10 appropriate range is probably 10 to 10.5. Again, I'm  
11 trying to evaluate the risk as I think Commissioner  
12 Stevens has alluded to, and I don't think there's a lot  
13 of risk. FPL is a strong performing company, has a very  
14 high equity ratio, and 61 percent of its costs are  
15 recovered through clauses, so not a whole lot of risk in  
16 that equation.

17 But, again, if we could build consensus, you  
18 know, I could come down a little bit. I mean,  
19 certainly, 10 is at my low range, but if that would make  
20 Commissioner Argenziano comfortable and Commissioner  
21 Stevens comfortable, and we could get some buy-ins from  
22 my colleagues, I would rather, you know, try and build  
23 consensus rather than be fragmented. So I'm open to  
24 discussion.

25 **CHAIRMAN ARGENZIANO:** I appreciate that.

RECEIVED-FPSC

10 FEB 12 AM 11:51

Commissioner Stevens.

COMMISSION  
CLERK

**COMMISSIONER STEVENS:** Madam Chair, in order

to build consensus, I will go to 10, but I can't go any higher.

**CHAIRMAN ARGENZIANO:** And I can tell you,

10 is my high. And, really, the risk factor is a big one for me. Reading Bluefield and Hope that, to me, makes all the sense in the world. And risk being low for the company, the company being strong as Commissioner Skop has indicated is a good thing. We want them to stay there, and the current economic conditions.

And I have to say that Witness Woolridge was very convincing to me, and not only in his basis for his calculations, but his demeanor. And it just meant a lot to me. I was tossed around there, because there were some good points by all the witnesses, but Witness Woolridge won me over. So 10 would be my high.

Commissioner Klement and then Commissioner Skop, I'm sorry.

**COMMISSIONER KLEMENT:** I wanted to ask, perhaps Andrew, whether he had any reaction to the proposal of 10 percent --

**MR. MAUREY:** No.

**COMMISSIONER KLEMENT:** -- as far as staff's --

1 (Laughter.)

2 **CHAIRMAN ARGENZIANO:** He's going to be very  
3 safe and say no.

4 **COMMISSIONER KLEMENT:** Well, I guess to  
5 elaborate on the question --

6 **CHAIRMAN ARGENZIANO:** Did you mean what  
7 ramifications --

8 **COMMISSIONER KLEMENT:** The ramifications for  
9 the company is my concern, yes.

10 **CHAIRMAN ARGENZIANO:** Because otherwise, be  
11 careful.

12 (Laughter.)

13 **COMMISSIONER KLEMENT:** Yes.

14 **MR. MAUREY:** Well, return on equity -- it has  
15 been discussed many times today -- is a controversial  
16 issue principally because of the money involved. And as  
17 we've seen, there's a range of returns. In my  
18 introduction I said that there was a range of returns  
19 that are supported by the record. The lower the  
20 authorized return, the lower the cash flow. And the  
21 company will take this rate order back, it will work  
22 with that and decide where it needs to go.

23 But nothing I've heard here I could take  
24 exception to, no.

25 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

1                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

2                   And, you know, I would emphasize that if we  
3 were to adopt and build consensus around a midpoint ROE  
4 of 10 percent, that would be just the midpoint, and it's  
5 subject to plus or minus 100 basis points.

6                   So, for instance, if FPL would tighten it's  
7 belt, and we'll get to some of those areas in some  
8 issues later, certainly you could earn at the 11.0  
9 range. So, again, you know, looking at that and, you  
10 know, looking at the current economic situation -- and,  
11 again, I think trying to build consensus is an important  
12 thing, but as I said previously, you know, utilities are  
13 just going to have to make do in these difficult  
14 economic times. And I think that, you know, a range of  
15 10 percent, even 10.1, 10.2, somewhere in that area,  
16 would be a fair return commensurate with the risk that  
17 the company has. And I think it's fair to the company  
18 and fair to the ratepayers. I just wanted to reiterate  
19 that again.

20                   **CHAIRMAN ARGENZIANO:** Commissioners? Okay.  
21 Is there any other discussion? Is anyone prepared to  
22 make a motion?

23                   Commissioner Skop.

24                   **COMMISSIONER SKOP:** Thank you, Madam Chair.  
25 If there are no further questions, I would

1 respectfully move to adopt a midpoint ROE on Issue 80 of  
2 10 percent.

3 **COMMISSIONER STEVENS:** Second.

4 **CHAIRMAN ARGENZIANO:** Any discussion?

5 **COMMISSIONER EDGAR:** Yes, ma'am.

6 **CHAIRMAN ARGENZIANO:** Commissioner Edgar.

7 **COMMISSIONER EDGAR:** Thank you.

8 And as I said a few moments ago, it is good  
9 when we can reach consensus. I did throw out there in  
10 an effort to maybe see where we could go with it a  
11 number slightly higher, so I would ask that I not read  
12 in the paper tomorrow that I wanted to charge way more  
13 to the consumers, but that it was for discussion, and I  
14 do think that the number 10.4 is a rational approach.

15 I can support the motion with the  
16 understanding that we are all trying to work together  
17 and move forward. I do think that it means there may  
18 be, may be the possibility of another rate case sooner  
19 than there might be with a different number. No  
20 judgment as to whether that is a good thing or not, but  
21 I do think it is maybe a possibility. We did have some  
22 discussion about that on Monday, as well.

23 So, with that, I'm glad for the discussion,  
24 Madam Chairman.

25 **COMMISSIONER SKOP:** Madam Chair.

1                   **CHAIRMAN ARGENZIANO:** Commissioner Skop.

2                   **COMMISSIONER SKOP:** And just to the discussion  
3 on the motion, which I believe has been seconded.  
4 Again, you know, in the State of Florida, we have a  
5 constructive regulatory environment and will continue to  
6 have one. Again, the discussion for ROE and the  
7 discussion to adopt a low ROE, I think, is predicated  
8 solely based upon the prevailing economic realities that  
9 the company faces and consumers face. And I think that  
10 in difficult economic times you have to look at what's  
11 fair, reasonable, and appropriate.

12                   And I think that at different times, again, if  
13 the company were to come in for interim relief or a  
14 limited proceeding to look at its ROE in better economic  
15 times based on the needs of the company, I would be  
16 happy to entertain that. But as we are called upon to  
17 decide the case today on the merits in a fair and  
18 impartial manner, I do believe that 10 percent is fair.

19                   **CHAIRMAN ARGENZIANO:** Any other discussion?

20                   **COMMISSIONER KLEMENT:** Madam Chair.

21                   **CHAIRMAN ARGENZIANO:** Commissioner Klement.

22                   **COMMISSIONER KLEMENT:** I believe I probably  
23 lean a little higher, as Commissioner Edgar does, to the  
24 10.25 or 10.3 area.

25                   However, in the interest of consensus and

1 recognizing all the factors that Commissioner Skop has  
2 so well aptly put regarding our economy, and  
3 Commissioner Stevens, as well. Everybody, really. I  
4 certainly recognize those factors myself, so I can  
5 support the motion.

6 **CHAIRMAN ARGENZIANO:** Thank you.

7 Hearing no other discussion, all those in  
8 favor of the motion, signify aye.

9 (Vote taken.)

10 **CHAIRMAN ARGENZIANO:** All those opposed?

11 The motion passes.

12 I'm sorry, what did you say?

13 **COMMISSIONER SKOP:** I think next would be  
14 Issues 70 and 71, Madam Chair.

15 **CHAIRMAN ARGENZIANO:** Yes. I just had a  
16 question. Did we -- I think we did, but did we get to  
17 19G? We did 19G, didn't we?

18 **COMMISSIONER KLEMENT:** Yes, we did.

19 (REPORTER NOTE: Scrivener's error.  
20 Transcript resumes on Page 199, Line 1, with Chairman  
21 Argenziano speaking.)

1           So now we're going to move back to 70 and 71  
2 on the equity ratio, Commissioners.

3           Commissioner Skop?

4           **COMMISSIONER SKOP:** Madam Chair, just to  
5 facilitate the discussion, and I'll take those jointly  
6 on the issues 70 and 71, I feel that the ROE level  
7 adopted by the Commission that FP&L's proposed equity  
8 ratio and that the appropriate equity ratio for  
9 ratemaking purposes as recommended by staff in issue 71  
10 is appropriate in light of the ROE that was approved by  
11 the Commission.

12           **COMMISSIONER STEVENS:** Second.

13           **CHAIRMAN ARGENZIANO:** Any discussion?

14           **COMMISSIONER EDGAR:** I'm sorry, could you  
15 repeat that, and maybe even a little slower?

16           **COMMISSIONER SKOP:** Madam Chair, and, again,  
17 I'm speaking to two issues, not necessarily making a  
18 motion, but just to facilitate discussion.

19           I know that we wanted to take these issues up  
20 separately, in regards to the issues 70 and 71, which  
21 involve the equity ratio and the appropriate equity  
22 ratio for ratemaking purposes respectively, in light of  
23 the Commission's decision on issue 80 to adopt a  
24 midpoint return on equity of ten percent plus or minus a  
25 hundred basis points, I feel that the proposed equity

1 ratio in issue 71 -- I mean, issues 70 and 71 is  
2 appropriate and I would be in support of the staff  
3 recommendation.

4           Again, the equity ratio is inextricably  
5 intertwined with return on equity, and again, I think  
6 that the ROE, I've heard some consensus from my  
7 colleagues that some would like to have seen a little  
8 bit higher ROE, but in the spirit of building consensus,  
9 we adopted a unanimously agreed-upon midpoint of ten,  
10 and I think that the relationship between the equity  
11 ratio, everything balances out with that, so I'm pretty  
12 comfortable with issues 70 and 71 as proposed by staff.

13           **CHAIRMAN ARGENZIANO:** Did that answer --

14           **COMMISSIONER EDGAR:** It did, thank you, and I  
15 am supportive of the staff recommendation on these  
16 issues as well.

17           **CHAIRMAN ARGENZIANO:** Okay. Any other  
18 discussion?

19           Okay, we have a motion and a second. All --  
20 you didn't make the motion. I thought I heard a motion  
21 and a second, I'm sorry. Didn't you second the motion?

22           **COMMISSIONER STEVENS:** I seconded what I  
23 thought it was.

24           **COMMISSIONER SKOP:** I'll properly make the  
25 motion. Thank you, Madam Chair. I respectfully move to

1 adopt the staff recommendation on issues 70 and 71.

2 **COMMISSIONER STEVENS:** Second.

3 **CHAIRMAN ARGENZIANO:** All those in favor, say  
4 aye.

5 (Chorus of ayes.)

6 **CHAIRMAN ARGENZIANO:** Opposed, same sign.  
7 Aye. And motion is adopted.

8 Now we go to eighty -- wait a minute. Go  
9 ahead, Commissioner Stevens.

10 **COMMISSIONER STEVENS:** Did we vote on 64  
11 through 69?

12 **COMMISSIONER EDGAR:** We have not.

13 **CHAIRMAN ARGENZIANO:** That's a very good  
14 catch. We need to do that first. So do we have a  
15 motion on 64 -- I'm sorry.

16 **COMMISSIONER EDGAR:** The remaining issues in  
17 the block under "Cost of Capital."

18 **CHAIRMAN ARGENZIANO:** The block of cost of  
19 capital, that would be best way of saying it.

20 **COMMISSIONER SKOP:** We haven't discussed 73 or  
21 81 yet, which are fallout issues.

22 **CHAIRMAN ARGENZIANO:** So do you want to wait?

23 **COMMISSIONER SKOP:** What I'd like to do, Madam  
24 Chair, is move to approve staff recommendation on issues  
25 64, 66, 67, 68 and 69, and I think that will put us in

1 the position to discuss 73 and 81, will be fallout  
2 issues that we have not yet discussed yet.

3 **COMMISSIONER STEVENS:** Second.

4 **CHAIRMAN ARGENZIANO:** Any discussion? Hearing  
5 none, all those in favor, say aye.

6 (Chorus of ayes.)

7 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

8 (No response.)

9 **CHAIRMAN ARGENZIANO:** Show that motion  
10 adopted.

11 And now Commissioner Skop.

12 **COMMISSIONER SKOP:** If staff could just  
13 briefly introduce issues 73 and 81, which I believe are  
14 fallout issues?

15 **CHAIRMAN ARGENZIANO:** 73 and 81.

16 **MR. SPRINGER:** That's correct. Issue 73 is  
17 the appropriate -- addresses the appropriate capital  
18 structure for FP&L for the purposes of setting rates in  
19 this docket, and this is basically, like Commissioner  
20 Skop said, it's a fallout issue based on decisions in  
21 preceding issues. Do you want me to move on to issue  
22 81?

23 **CHAIRMAN ARGENZIANO:** Please.

24 **MR. SPRINGER:** Issue 81 addresses the  
25 appropriate weighted average cost of capital, and that

1 also is a fallout issue.

2 **CHAIRMAN ARGENZIANO:** Commissioners?  
3 Commissioner Skop?

4 **COMMISSIONER SKOP:** Madam Chair, there are no  
5 additional questions. I'd respectfully move to adopt  
6 the staff recommendation on issues 73 and 81, noting  
7 that those issues would be subject to change based on  
8 the Commission's decision in issue 80.

9 **CHAIRMAN ARGENZIANO:** Hearing no other  
10 questions --

11 **COMMISSIONER STEVENS:** Second.

12 **CHAIRMAN ARGENZIANO:** We have a second. All  
13 those in favor, say aye.

14 (Chorus of ayes.)

15 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

16 (No response.)

17 **CHAIRMAN ARGENZIANO:** Show the motion adopted.

18 And now we can move on to 82. We'll let staff  
19 change out, and let me find my page.

20 **MR. MAUREY:** Commissioners, issue 82 addresses  
21 the issue of whether or not the inflation and customer  
22 growth rates used by FP&L are appropriate for both 2010  
23 and 2011 test year. With respect to the 2010 test year,  
24 we are recommending that the growth rates are  
25 appropriate. No party took a position on this issue.

1                   **CHAIRMAN ARGENZIANO:** Any discussion on issue  
2 83?

3                   **MR. PRESTWOOD:** Commissioner, issue 83  
4 addresses the transfer of capacity charges from base  
5 rates to the capacity cost recovery clause for St. Johns  
6 River Power Park. This is consistent with past  
7 Commission decisions and also -- and consistent with the  
8 way this issue is treated by other companies as well.  
9 The staff recommendation is to approve the  
10 recommendation -- to approve the transfer.

11                   **CHAIRMAN ARGENZIANO:** Commissioners? We're  
12 approving the transfer from base rates to the capacity  
13 cost recovery clause, is that correct?

14                   **MR. PRESTWOOD:** Yes, Madam Chairman.

15                   **CHAIRMAN ARGENZIANO:** Any questions?  
16 Hearing none, we'll move on to 84.

17                   **MR. PRESTWOOD:** Issue 84 is simply removing  
18 from revenue requirements costs associated with the fuel  
19 adjustment clause, revenues, expenses and so forth, so  
20 that the revenue requirement excludes any costs related  
21 to those issues. Staff recommendation is to approve  
22 this. No parties opposed this adjustment.

23                   **CHAIRMAN ARGENZIANO:** Any comments?  
24 Okay, hearing none, 85.

25                   **MR. PRESTWOOD:** 85 similarly is to remove from

1 revenue requirements any costs associated with the  
2 conservation revenue clause. Again, no parties opposed  
3 this adjustment. Staff recommends it be approved.

4 **CHAIRMAN ARGENZIANO:** Any discussion,  
5 comments? Commissioner Skop?

6 **COMMISSIONER SKOP:** Thank you, Madam Chair.  
7 Before we get too far ahead, would it be appropriate to  
8 make a motion to adopt the staff recommendation on  
9 issues 82, 83, 84, 85 and 86, noting that part B of the  
10 staff recommendation is moot on those issues?

11 **CHAIRMAN ARGENZIANO:** If there's no other  
12 comments, then -- and questions?

13 **COMMISSIONER KLEMENT:** Second.

14 **CHAIRMAN ARGENZIANO:** Hearing none, all those  
15 in favor, signify aye.

16 (Chorus of ayes.)

17 **CHAIRMAN ARGENZIANO:** All those opposed, same  
18 sign.

19 (No response.)

20 **CHAIRMAN ARGENZIANO:** Show the motion adopted,  
21 and we can move on -- you went to 86 -- 87, I'm sorry.

22 **MR. PRESTWOOD:** 87, again, is --

23 **CHAIRMAN ARGENZIANO:** We included 87 in that,  
24 didn't we?

25 **COMMISSIONER SKOP:** 86.

1                   **CHAIRMAN ARGENZIANO:** Okay, that's what I  
2 thought I said, and you just told me 87. Okay. We're  
3 on 87.

4                   **MR. PRESTWOOD:** 87 is similar to the other  
5 adjustments. It's removing the costs associated with  
6 the environmental recovery clause from revenue  
7 requirements, and again, no parties opposed this. Staff  
8 has recommended the adjustment be approved.

9                   **CHAIRMAN ARGENZIANO:** Commissioners, on 87,  
10 any discussion?

11                   Hearing none, 88, issue 88.

12                   **MR. PRESTWOOD:** 88 is an adjustment proposed  
13 by Florida Power & Light to its revenue forecast to  
14 reflect that it -- in the calculation of revenue, that  
15 it had excluded the effect of CI demand rider incentive  
16 credits, which are actually debits to revenue or  
17 reductions to revenue. It simply omitted those in the  
18 forecast and proposed a separate adjustment to include  
19 the effects of those. Staff is recommending that they  
20 be approved.

21                   **CHAIRMAN ARGENZIANO:** Any comments?

22                   Okay, issue 89.

23                   **MR. PRESTWOOD:** Issue 89 -- I'll mention that  
24 this is the first of several issues where there is a --  
25 it's a two-parter. There's an update to the forecast.

1 Florida Power & Light in the rebuttal stage made several  
2 adjustments to its original case to make, primarily,  
3 corrections to its forecast. This is the first of one  
4 such issue. In late payment fees in the original filing  
5 the forecast for late payment fees was not in sync with  
6 the forecast for the other additional revenues.  
7 Nobody -- no other party opposed the adjustment to  
8 update this revenue forecast, and the staff is  
9 recommending that that part of the issue be approved.

10 Continuing with the rest of the issue, the  
11 second part dealt with FP&L's proposed tariff change.  
12 FP&L currently has a late payment fee of one and a half  
13 percent on the unpaid balance. In this case, it is  
14 proposing to charge a minimum of \$10 plus one and a half  
15 percent over the unpaid balance. As a result of that  
16 change, FP&L estimated a 30 percent reduction in demand,  
17 or a behavioral change; that customers receiving the  
18 charge, 30 percent of them would in fact pay their bill  
19 on time and not pay the charge.

20 There was no support given for the 30 percent.  
21 Later in the rebuttal stage of the case, the company  
22 came up with a 65 percent elasticity of demand to prove  
23 that the 30 percent was very conservative. OPC, on the  
24 other hand, recommended using an average of 2007 and  
25 2008 actual late payments, and -- which was a 20 percent

1 reduction in customers -- or a 20 percent increase in  
2 customers paying their bills late, and this would also  
3 have been a slight -- showed a slight decrease over what  
4 it was in 2008. Staff is recommending that OPC's  
5 adjustment be approved in this case.

6 **CHAIRMAN ARGENZIANO:** Commissioners?

7 Commissioner Skop.

8 **COMMISSIONER SKOP:** Thank you, Madam Chair.

9 Mr. Prestwood, on issue 89 I believe that  
10 we're talking about, the adjustments, I'm looking at the  
11 staff recommendation, and even I would be hard- pressed  
12 to style a motion to adopt what was just said, so I'm  
13 going to probably need some help from staff, or one us  
14 of will, when we make that motion. I'm looking at part  
15 A and then at part B, but part B is moot and I'm not  
16 just kind of getting all that you just conveyed upon us  
17 from looking at part A.

18 **MR. PRESTWOOD:** Okay. In the conclusion, I  
19 think you might see that there's -- first there's -- we  
20 are recommending to accept -- in the analysis, we're  
21 recommending to accept the adjustments that the company  
22 put forth in Exhibit 358, which were the forecast  
23 updates, which came from item 6-A and item 10, and then  
24 we're also recommending that we use the average of 2007  
25 and '08 as proposed by OPC to estimate the amount of

1 late payment revenue that would be generated from the  
2 \$10 fee.

3 **COMMISSIONER SKOP:** Okay. Can you help me  
4 with that last part? I saw that the 358 on page 309 for  
5 part A, based on the corrections identified Exhibit 358,  
6 OPC's proposed adjustment, staff recommends a net  
7 adjustment to increase late payment revenue for the 2000  
8 test year by \$18,390,146. Is that -- will that embody  
9 the staff recommendation?

10 **MR. PRESTWOOD:** Yes, that's --

11 **COMMISSIONER SKOP:** Or only part of it?

12 **MR. PRESTWOOD:** That's part of it.

13 **COMMISSIONER SKOP:** Okay. Where's the other  
14 part? That's what I'm missing. Because I get blamed  
15 when I mess up these motions, so I need to be  
16 understanding it.

17 **MR. PRESTWOOD:** Okay, bear with me here for a  
18 second.

19 On page 308, "OPC" -- about the third  
20 paragraph down, "OPC Witness Brown recalculated late  
21 payment fees of 25 million and 26 million for 2010 and  
22 2011."

23 **COMMISSIONER SKOP:** Okay.

24 **MR. PRESTWOOD:** Those are the numbers that we  
25 are adjusting to, and I may have left out the actual

1 adjustment amount so that you can total that over to  
2 either -- to the amount and the conclusion, which I did.  
3 But it comes to -- I'll use 2010. Item 6-A was a  
4 negative adjustment of seven million three eighty-six,  
5 Item 10 was a positive adjustment of \$751,895, and then  
6 the adjustment for the behavioral change, I'll call it,  
7 was 25,024,251. Yeah, that's the amount that shows on  
8 page 308, paragraph 3.

9 **COMMISSIONER SKOP:** Okay. I'm going to have  
10 to wing it on that one when I make that motion.

11 **MR. PRESTWOOD:** All three of those total to  
12 \$18,390,146, which is what's shown in --

13 **COMMISSIONER SKOP:** 309.

14 **COMMISSIONER STEVENS:** Just accept staff's  
15 recommendation.

16 **CHAIRMAN ARGENZIANO:** I was going to just say,  
17 we can do it the easy way or the hard way. Do you want  
18 to take a stab at it?

19 **COMMISSIONER SKOP:** Why don't I do this to get  
20 us up to where we're at. I'd respectfully move to adopt  
21 staff recommendation on issues 87, 88 and 89, noting  
22 specifically that we need to adopt the staff  
23 recommendation as presented in the record with the  
24 corrections that staff discussed, and noting that part B  
25 of those three items or issues are moot by virtue of not

1 accepting the 2011 subsequent test year.

2 **COMMISSIONER STEVENS:** Second.

3 **CHAIRMAN ARGENZIANO:** Any discussion?

4 All those in favor, say aye.

5 (Chorus of ayes.)

6 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

7 (No response.)

8 **CHAIRMAN ARGENZIANO:** Show the motion adopted.

9 Now we are --

10 **COMMISSIONER SKOP:** Issue 90.

11 **CHAIRMAN ARGENZIANO:** I have a note by the  
12 side of 90, and I don't know why. Oh, I see, never  
13 mind. We're on 90.

14 **MR. PRESTWOOD:** Issue 90 actually goes back to  
15 the quantification of your previous ruling in issue 3  
16 where you adopted the OPC recommendation. And  
17 Mr. Stallcup is going to address that.

18 **MR. STALLCUP:** Okay. Yeah, issue 90 handles  
19 the effect, or the fallout, if you will, of having  
20 adopted OPC's forecast adjustment to Power & Light's  
21 load forecast. The increased kWh sales that that  
22 adjustment implies would increase test year revenues.  
23 Since you adopted OPC's adjustment, the appropriate  
24 resolution of this issue would be what is listed down  
25 there as OPC's position in this case.

1           The revenue increase that was in testimony and  
2 also in the exhibits was \$46,500,182 for the 2010 test  
3 year. I'd like to point out at this point that this  
4 number, the 46 million number, differs from a roughly  
5 \$63 million number that was in OPC's brief.

6           **CHAIRMAN ARGENZIANO:** That's the note I had by  
7 number 90, okay, that's right. I'm sorry.

8           **MR. STALLCUP:** And I've gone back and  
9 attempted to locate in the record the \$63 million number  
10 and am unable to do so; however, the forty- six five  
11 number is supported by the testimony of OPC Witness  
12 Brown.

13           **MS. BENNETT:** What we would like is before you  
14 actually take a vote on this, to have a brief break,  
15 give us an opportunity one last time to check the record  
16 and see which numbers are correct.

17           **CHAIRMAN ARGENZIANO:** Okay, I think that  
18 sounds wise.

19           Commissioner Skop?

20           **COMMISSIONER SKOP:** Thank you.

21           Ms. Bennett, in doing so, can you look at the  
22 disposition as to whether we'd need to reconsider issue  
23 3 to reflect the correct number due to the, either the  
24 typographical error in the OPC position or whatever is  
25 supported by the record so we get that straight?

1                   **MS. BENNETT:** Certainly.

2                   **COMMISSIONER SKOP:** Thank you.

3                   **CHAIRMAN ARGENZIANO:** So do we want to just  
4 move on, then, or do you want to that break now? Staff  
5 is going to need to take a break at some point to figure  
6 out where we're at. Would you advise me, Mr. Devlin,  
7 when you think you need to do that, at what point should  
8 we consider doing that and can we do issue 90 at that  
9 time also?

10                   **MR. DEVLIN:** Normally we would take a break  
11 after all the revenue requirement issues are resolved.  
12 I'm not sure how much time Ms. Bennett thinks she needs  
13 to reconcile these two numbers. I would suggest we just  
14 move forward.

15                   **CHAIRMAN ARGENZIANO:** Just move on and then we  
16 can take 90 up at the same time and give you time, okay,  
17 great. Let's move forward.

18                   **MR. PRESTWOOD:** Issue 91 is a fallout issue  
19 for total operating revenue.

20                   **CHAIRMAN ARGENZIANO:** Okay, issue 92.

21                   **MR. PRESTWOOD:** 92 issue deals with whether  
22 it's necessary to remove any charitable contributions  
23 from test year operations. Based on the evidence, there  
24 are none. Staff recommends no further adjustment for  
25 this issue, with the exception of issue 93, which we'll

1 talk about next.

2 **CHAIRMAN ARGENZIANO:** Okay, any questions?

3 Okay, 93.

4 **MR. PRESTWOOD:** 93 deals with FP&L's  
5 contributions to its historical museum. The historical  
6 museum is set up as a nonprofit organization, FP&L pays  
7 its expenses, that the museum records the receipts that  
8 it receives from FP&L as charitable contributions. It  
9 has, among other responsibility, to maintain historical  
10 records on FP&L as well as electric industry records.  
11 There is nothing in the federal Code of Regulations  
12 requiring a company to maintain electric industry  
13 records, and based on interrogatories and other  
14 evidence, we believe that this really is -- represents a  
15 charitable contribution on behalf of Florida Power &  
16 Light to the museum, and the museum is really more in  
17 the nature of a corporate image- enhancer than it is a  
18 serious business purpose, as far as that goes. And  
19 staff recommendation is to disallow the contributions  
20 made to Florida Power & Light museum.

21 **CHAIRMAN ARGENZIANO:** Any questions?

22 Okay, 94.

23 **MR. PRESTWOOD:** 94 is the aviation cost,  
24 Florida Power & Light aviation cost, which the company  
25 voluntarily withdrew. This issue is just simply

1 necessary to put the numbers into the exhibit so that we  
2 can include them in the quantification of revenue  
3 requirement.

4 **CHAIRMAN ARGENZIANO:** Commissioner Skop?

5 **COMMISSIONER SKOP:** Yeah. So on issue 94, I  
6 guess they voluntarily withdrew, but it was under  
7 substantial scrutiny from the Commission that caused the  
8 company to volunteer to do that in the first place,  
9 because they originally included it in the rate case, is  
10 that correct?

11 **MR. PRESTWOOD:** It was originally included in  
12 the rate case and withdrawn during hearings -- actually  
13 withdrawn during the hearings, and with the  
14 understanding that it would help to move the hearings  
15 along more quickly and reduce some of the controversy.

16 **COMMISSIONER SKOP:** That might have been true.  
17 The issue with 94 then, if I'm correct, I  
18 understand that all aviation costs have been removed  
19 from the FP&L rate base, is that correct?

20 **MR. PRESTWOOD:** That's correct.

21 **COMMISSIONER SKOP:** All right. Thank you.

22 **CHAIRMAN ARGENZIANO:** Any other questions on  
23 94?

24 Let's go to 95.

25 **MR. CLEMENCE:** Good afternoon, Commissioners,

1 Walter Clemence with the Commission staff.

2 In issue 95, staff is recommending that the  
3 cost savings for AMI have been properly included in that  
4 operating income.

5 **CHAIRMAN ARGENZIANO:** Any questions?  
6 Commissioner Skop?

7 **COMMISSIONER SKOP:** Thank you.

8 When they mentioned the cost savings  
9 associated with the AMI meters on issue 95, that's only  
10 for the 2010 test year, so that would probably be a  
11 nominal amount, given the fact that more substantial  
12 savings are expected to be incurred in the out years, is  
13 that correct?

14 **MR. CLEMENCE:** Yes, sir.

15 **COMMISSIONER SKOP:** Okay, thank you.

16 **CHAIRMAN ARGENZIANO:** 96.

17 **MR. PRESTWOOD:** 96 deals with bad debt  
18 expense. There's two parts to this, again, as well.  
19 One is the forecast update. In the original filing, the  
20 company did not sync up its forecast for bad debt  
21 expense with the latest forecast of revenue, and it made  
22 an adjustment to do that. Nobody opposed those  
23 adjustments, so staff is recommending that part of the  
24 adjustment be accepted.

25 OPC had also recommended for bad debt expense

1 that bad debt be lowered to reflect an increase in the  
2 amount of automatic bill payment, as well as remote  
3 connect switching. Remote connect switching is tied  
4 into the AMI project. As the AMI project progresses,  
5 the company will be able to remotely connect and  
6 disconnect customers. However, OPC had simply taken the  
7 four-year schedule of the AMI deployment and averaged  
8 the savings that would occur from that due to bad  
9 debt -- or to bad debt, the savings in bad debt,  
10 averaged them over the four-year period and wanted to  
11 use all that in -- one-fourth of that in 2010, which  
12 would have required FP&L to actually deploy AMI faster  
13 than it had planned to. So the staff does not recommend  
14 that adjustment.

15 Also, FP&L proved that in its projections, I  
16 think -- we think that it proved in its projections that  
17 it had already incorporated the effects of increased  
18 automatic bill payment, so we are -- staff is  
19 recommending that no adjustment be made for the  
20 proposals by OPC for bad debt expense, and that the  
21 adjustment for the update due to the forecast be  
22 accepted.

23 **CHAIRMAN ARGENZIANO:** Commissioner Stevens?

24 **COMMISSIONER STEVENS:** I'm fine. Thank you.

25 That was good.

1                   **CHAIRMAN ARGENZIANO:** Any other -- any  
2 questions? Okay, 97.

3                   **MR. PRESTWOOD:** 97 deals with bad debt expense  
4 again. In this case, the company had proposed to  
5 allocate portions of bad debt expense to the various  
6 clause mechanisms so that it would recover bad debt  
7 expense from each of the clauses, such as fuel  
8 adjustment, capacity clause and so forth, based on the  
9 percentage of revenue that it receives from each of  
10 those clauses.

11                   Staff is opposed to this for -- generally  
12 opposed to passing more costs on to these clauses which  
13 has less scrutiny for recovery. It would also put more  
14 requirements on the staff for tracking purposes and so  
15 forth to keep up with bad debt. Also it would have less  
16 incentive -- it would create less incentive for the  
17 company itself to reduce bad debt. As long as it knew  
18 that it would eventually recover the bad -- some large  
19 portion, approximately 61 percent of bad debt through  
20 the clauses, there would be much less incentive for it  
21 to do the efforts it undertakes now to reduce bad debt.  
22 And bad debt is done basically as one function today,  
23 it's a collection function that's done by the company.

24                   So the staff is recommending that this  
25 proposal be denied, and we also take note of an earlier

1 decision in 2009 with one of the gas companies that  
2 attempted to do something similar with the purchase gas  
3 adjustment clause that the Commission denied, and that  
4 was in People's Gas.

5 **CHAIRMAN ARGENZIANO:** Anyone, any comments?  
6 Okay. 100, or --

7 **MR. PRESTWOOD:** Issue 100 deals with the  
8 number of budgeted positions that will be unfilled  
9 during the test year. In this case, OPC looked back  
10 over a number of years and discovered that for each year  
11 the company did not fill 100 percent of its budgeted  
12 positions, there was always some level of vacancies  
13 left. However, in their 2010 projections, their  
14 salaries or their payroll cost was based on 100 percent  
15 of those positions being filled.

16 It did some calculations. First of all, there  
17 were some aberrations in the numbers in the earlier  
18 years, 2004 and '05, so it excluded those, and then it  
19 also excluded distribution employees because that  
20 category of employees had been tending to be decreased  
21 instead of increased. So based on the remaining number  
22 of employees, it calculated an average for 2006, '07 and  
23 '08 on a number of positions that would not be filled,  
24 and that calculation produced 2.09 percent, and it  
25 applied the 2.09 percent to the number of employees that

1 were forecast in 2010, excluding distribution employees,  
2 and calculated that 177 employees would not -- would  
3 be -- would remain vacant through the test year. Staff  
4 is recommending that this adjustment be approved.

5 **CHAIRMAN ARGENZIANO:** Commissioner Skop, then  
6 Commissioner Stevens.

7 **COMMISSIONER SKOP:** Thank you, Madam Chairman.

8 Just to -- Mr. Prestwood, I think, if I  
9 understood your explanation, I do have some question on  
10 issue 100 as it pertains to Public Counsel's position.  
11 I think that you stated in your discussion that OPC used  
12 a method of averaging the 2006, 2007 and 2008 vacant  
13 positions to estimate its adjustment for vacant  
14 positions, and I'm trying to get a better handle on  
15 that, but I think that the gist of what you said was  
16 that if FP&L had a higher number of vacant positions in  
17 2007 than the three- year average, and if the 2007  
18 percentage was used instead of what staff recommended in  
19 the three-year average, then the vacant positions for  
20 the 2010 test year would have been approximately -- or  
21 \$6.5 million higher, if I understood it correctly. I  
22 think we had some discussion with staff in the briefing,  
23 but hearing that, I guess my question would be, is it  
24 possible that the 2010 test year may be more reflective  
25 than 2007 in terms of the percentage of vacant positions

1 that the OPC was -- position was adopted in lieu -- or  
2 OPC argument was adopted in lieu of staff, because  
3 again, it seems to me that the higher number in 2007  
4 might skew the results somewhat rather than using the  
5 average, and I'm wondering whether that understates the  
6 vacancy level.

7 **MR. PRESTWOOD:** Well, OPC noted -- they did  
8 note that there was a high of unfilled positions in 2007  
9 in their testimony in total employees of 2.48 percent,  
10 and then in their exhibits, when you looked at the  
11 number of employees, excluding distribution, remembering  
12 that they did not include distribution employees in  
13 their calculations, the percentages were also -- there  
14 was a high in 2007. The numbers for 2006 were 1.78,  
15 2007 was 3.49, and for 2008, 1.02, which, again, average  
16 out to 2.09 percent, which was used in their  
17 calculations.

18 And we did give some consideration to the fact  
19 that there was testimony in this case from FP&L itself,  
20 especially Witness Slattery, where since the end of 2008  
21 they had been on a very conservative mode about filling  
22 vacant positions. I think she stated that any vacant  
23 position, even if it was a rehire of a position,  
24 required the approval of the executive vice-president of  
25 Human Resources as well as the approval of the president

1 of Florida Power & Light.

2 So one consideration might be that 2009 and  
3 '10 are going to be much higher years in terms of  
4 positions that don't get filled. If we, for example,  
5 took the 2007 high year number of 3.49 percent and  
6 calculated that compared -- or took the difference  
7 between that and what was used in this original  
8 calculation, we would come up with an additional 119  
9 employees. That's -- or, excuse me, 118 employees.  
10 That's over the 177 that was already built into the  
11 calculation. And that would produce \$6,527,000,  
12 roughly, additional expense that would not be incurred  
13 due to unfilled positions.

14 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

15 **COMMISSIONER SKOP:** So if the OPC rationale  
16 was applied, essentially that would result in a higher  
17 vacancy rate, thereby further reducing expenses by  
18 approximately \$6.5 million, is that correct?

19 **MR. PRESTWOOD:** That's correct.

20 **COMMISSIONER SKOP:** Thank you.

21 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

22 **COMMISSIONER STEVENS:** Good questions.

23 **CHAIRMAN ARGENZIANO:** All right. If there's  
24 no other questions on 100, we'll move to 101.

25 **MR. PRESTWOOD:** 101 was a productivity

1 adjustment proposed by south Florida. It basically used  
2 some statistics from the Bureau of Labor Statistics that  
3 were fairly broad, and applied those broad statistics to  
4 FP&L numbers. FP&L was able to show that they had  
5 already effectively built in productivity into their  
6 numbers, and that if you would have used this  
7 adjustment, you would be double-counting, and frankly,  
8 the south Florida adjustment really was not that well  
9 supported and not that specific to Florida Power &  
10 Light, and staff's recommendation is not to approve  
11 issue 101.

12 **CHAIRMAN ARGENZIANO:** Any comments, questions?

13 Okay, 102.

14 **MR. PRESTWOOD:** Issue 102 deals with staff  
15 positions for nuclear. Again, there was a proposal by  
16 south Florida in this area. It's staff's opinion that  
17 Florida Power & Light did a very good job of defending  
18 its reasoning and support for the number of positions  
19 that it needed for nuclear. And -- so the staff does  
20 not recommend that the reduction in number of employees  
21 for the nuclear business unit be adopted.

22 **CHAIRMAN ARGENZIANO:** Commissioner Skop?

23 **COMMISSIONER SKOP:** Thank you, Madam Chair.

24 I just want to -- in fairness to the company,  
25 on issue 102 I wholeheartedly endorse the staff

1 recommendation. FP&L's nuclear division as well as its  
2 power generation division, again, they have operational  
3 excellence. I think that they are doing the right  
4 things to generate electricity in the most  
5 cost-available manner for the ratepayers. So again, if  
6 I have any criticism in salaries, it will not be related  
7 to the operational areas of FP&L. So again, I'm in  
8 favor of 102, but I will be speaking strongly on issue  
9 103.

10 **CHAIRMAN ARGENZIANO:** Any other comments?

11 Okay, We're on 103.

12 **MR. PRESTWOOD:** 103 is a combination of some  
13 concessions made by the company itself with respect to  
14 salary and wages, as well as OPC's proposed adjustments.

15 First of all, FP&L proposed to eliminate the  
16 raises for its executives in -- and, of course, I'm only  
17 speaking to 2010 now, because any numbers for 2011 are  
18 moot, but in 2010, it withdrew the raises for its 42  
19 named executives, which amounted to \$757,000,  
20 approximately. It also reduced by 50 percent the  
21 incentive compensation for those executives, both  
22 long-term and short-term incentive compensation, and  
23 that amounted to approximately \$16,457,000. There's a  
24 little bit of difference about the way the numbers were  
25 calculated, the order they were calculated, I'll explain

1 in just a minute. If you looked at just the company  
2 numbers, they would be just slightly higher. I'll  
3 explain that difference.

4 OPC wanted to take that adjustment a step  
5 further. First of all, on incentive calculation -- on  
6 incentives for executives, they wanted to lower the  
7 incentives themselves before reducing it by 50 percent.  
8 The incentives had been calculated at a target rate of  
9 1.4 percent, or 140 percent of the target, and they  
10 wanted to lower that down to 1.0, or 100 percent of  
11 target level. That amounted to \$12,226,000. And then  
12 what was remaining they wanted to reduce by 50 percent,  
13 so that resulted in the \$15,282,000, additional dollars,  
14 to reduce incentive.

15 On top of that, OPC also recommended reducing  
16 incentive for the non-executives, and their first  
17 adjustment was to reduce the payout ratio. For  
18 non-executives, the company had used a 1.3 times the  
19 target rate, and they reduced that to 1.0 times, and  
20 then the remaining -- which accounted for \$2,123,000,  
21 approximately -- and then 50 percent of that they  
22 eliminated, which was \$3,538,000. The grant total of  
23 all of those adjustments amounted, for 2010, to  
24 \$33,927,000. So basically that's all of OPC's  
25 adjustment plus the executive raises added on top, if

1 you want to look at it that way. Calculated in a  
2 different order, you get the same answer except for the  
3 raises you need to throw on top of OPC's adjustment.  
4 And staff is recommending that that be made.

5 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

6 **COMMISSIONER SKOP:** Thank you, Madam Chair.

7 I guess I appreciate the staff recommendation  
8 on this issue, and this could be a little bit difficult  
9 for my two newer colleagues. Again, they were not at  
10 the evidentiary hearing. I'm sure that they thoroughly  
11 reviewed the transcript and the staff recommendation. I  
12 know that we had substantial discussion and analysis of  
13 compensation, for executive compensation, those at  
14 salary levels at or above \$165,000 per year.

15 I think that my concern with issue 103, and I  
16 want to be very clear, is the concern I have is in no  
17 way, form or fashion related to FP&L's operations, okay?  
18 Power generation, transmission, nuclear distribution, I  
19 have some issues with and I'm going to interrelate with  
20 this, but where I have my biggest concern is the  
21 non-operational support functions or shared services  
22 groups in the context of overlap, redundancy and  
23 compensation levels.

24 And again, the data that we have before us is  
25 confidential until such time as the First DCA renders an

1 order in the appeal, but generally speaking, in the  
2 marketing and communications group, you have at least  
3 one vice-president of marketing and communication, you  
4 at least have three directors of communications, you  
5 have a senior manager of marketing communication, and  
6 that's just at the director level; I don't know how many  
7 managers they have below that. But the issue I have  
8 there is that in light of hearing from FP&L's customers  
9 at all of the various service hearings, in light of, you  
10 know, having a vast service area, I understand they  
11 can't be everywhere at once, the service quality is  
12 adequate, but there are issues related to distribution,  
13 feeder lines, outages, large-scale outages at times that  
14 need attention.

15 And I'm looking at this and it seems to me  
16 that there is a tremendous amount of redundancy and  
17 excess compensation level at the non-operational level,  
18 and it would seem to me that if the company -- again,  
19 these function and services I guess to Witness Santos I  
20 asked, you know, what do they functions do, you know,  
21 part of the response in the record, and I can get to it  
22 specifically, you know, did they write press releases,  
23 do they talk to the media, again, to me, from an  
24 operational perspective, that is non-added value.

25 Certainly the company is entitled to get its

1 message out, and I appreciate that, but that doesn't  
2 address the issue of some of the things that we've heard  
3 from customers on the distribution side that are not  
4 being remedied. It seems to me that if you had -- you  
5 took some resources from these non- essential areas and  
6 dedicated those efforts on the operational side, we  
7 might not have heard the level of service quality  
8 complaints that we've heard at the service hearings and  
9 we continue to hear.

10 So again, when I see a bench of directors of  
11 communication stacked three deep, and, you know, I have  
12 a witness that really can't describe to me what they do,  
13 but certainly they do something, I have to look at that  
14 critically as an area of, you know, basically  
15 redundancy, overlap and -- in compensation issues, you  
16 know.

17 The regulatory affairs group, again, there's a  
18 lot of areas there, too. HR is in that function, but HR  
19 has a specific role, supporting not only the nuclear  
20 division, benefits and all that. So I'm really not  
21 going to address regulatory affairs and HR, but this  
22 market and communications group I think is far larger  
23 than it needs to be. If the company wants to get its  
24 message out and have a large marketing and communication  
25 group, then so be it, the shareholders can pay for that.

1 But I think it's inherently unfair -- again, it's not  
2 for me to manage the company, but again, when I'm  
3 looking at the salaries that I'm looking at that I can't  
4 really disclose, yeah, I've got a problem with that.

5 And so I would be looking to make a specific  
6 adjustment on issue 103 in relation -- in addition to  
7 the staff recommendation to address some of my concerns.  
8 I'm happy to pass the confidential documents around and  
9 you guys can take a look at it for yourself, but there  
10 was significant discussion at the evidentiary hearing.

11 I think, Mr. Prestwood, you know, it's kind of  
12 hard to discern what all these people do, and we really  
13 couldn't get answers, and again, I think that we need to  
14 exercise some good discretion and judgment when we're  
15 looking at the salaries at these levels, but when you  
16 have a bench stacked that deep in that functional  
17 support area, that, to me, doesn't add value on the  
18 operations side, and what the ratepayers care about is  
19 getting electricity and having it be reliable and  
20 affordable, not communications.

21 So again, I have some problems there, and I'll  
22 address those.

23 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

24 **COMMISSIONER STEVENS:** I did work through the  
25 testimony through DVDs, but I did not see the

1 confidential documents, so I don't know what type of  
2 number Commissioner Skop is looking at.

3 I had a question more along the lines of under  
4 A-3, I need a little help understanding the 50 percent  
5 of the remaining executive incentive compensation, why  
6 we went 50-50, and I might add on to Commissioner  
7 Skop's.

8 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

9 **COMMISSIONER SKOP:** Thank you, Madam Chair,  
10 just a point of -- Commissioner Stevens raised.

11 Again, I think what happened is that executive  
12 compensation certainly was at issue and hotly contested  
13 in the rate case, and I think that the 50 percent offer  
14 originated from FP&L during the evidentiary hearing as  
15 an attempt to appease the Commission and kind of -- I'm  
16 trying to think of the exact words, but I'll think of it  
17 in a second, because there was some -- they viewed such  
18 things, being bogged down in issues of aviation and  
19 compensation, as a distraction to their rate case. And  
20 I don't view it as a distraction, I review it as the  
21 purview of the state Commission to review every expense  
22 to ensure that it's reasonable and prudent before we  
23 approve it.

24 And so again, I think it's very critical that  
25 we take a look at these, and I appreciate the company's

1 concession to offer that up, but I do not in any way  
2 feel that -- it's the purview of the Commission to look  
3 at these costs, and they are not a distraction in my  
4 view.

5 **CHAIRMAN ARGENZIANO:** Commissioner Klement.

6 **COMMISSIONER KLEMENT:** Thank you, Madam Chair.

7 This gets into the area, I didn't see it  
8 mentioned specifically in this case as we did in  
9 Progress, the term *belt-tightening*. I didn't see also  
10 any specific reference to an overall employee salary  
11 increase percentage. Was there such? I couldn't find  
12 it.

13 **MR. PRESTWOOD:** Yes, Commissioner Klement.

14 The company had a merit increase of two percent for all  
15 employees, salary, non-salary, union and so forth,  
16 across the board.

17 **COMMISSIONER KLEMENT:** And executive? Salary  
18 is -- I'm sorry, go ahead.

19 **MR. PRESTWOOD:** I'm not sure that I'm -- the  
20 executive -- I'm not sure I can say that that was a  
21 two percent. They have what they call 42 named  
22 executives that they use. And then we had also asked  
23 for salary data for anybody that made, in total,  
24 including incentive compensation and so forth, over  
25 \$165,000. That's what they were referring to earlier

1 that we researched a lot.

2 But generally in our discovery we asked what  
3 were the merit increases, and the answer was two percent  
4 for bargaining, salaried and non- salaried. And I  
5 actually calculated that number, you know, just a rough  
6 number of what that meant in terms of dollars and cents,  
7 if you'll bear with me here. I believe it's  
8 approximately \$16 million is what that would have been.

9 **COMMISSIONER STEVENS:** I'm sorry, that's what  
10 the two percent is?

11 **MR. PRESTWOOD:** The two percent merit  
12 increase, yes, Commissioner. I'll put my hands on it  
13 here in a minute.

14 **CHAIRMAN ARGENZIANO:** Excuse me. Did we  
15 eliminate -- did this Commission vote to eliminate  
16 the -- it's a different case, but just out of curiosity,  
17 the incentive compensation on Monday?

18 **COMMISSIONER SKOP:** Basically, yes.

19 **CHAIRMAN ARGENZIANO:** They did?

20 **COMMISSIONER SKOP:** I think so.

21 **MR. PRESTWOOD:** Again, the number that I had  
22 calculated for 2010 as approximately 15 million, I'm  
23 sorry, I was off.

24 **CHAIRMAN ARGENZIANO:** Fifteen?

25 **MR. PRESTWOOD:** 15 million for the two percent

1 merit increase. That affected revenue requirements, I  
2 should say. That excludes any that would have been  
3 capitalized as part of construction projects and that  
4 sort of thing.

5 **CHAIRMAN ARGENZIANO:** Commissioner Edgar.

6 **COMMISSIONER EDGAR:** I appreciate it.

7 Can I just ask staff a clarifying question?  
8 And this morning already seems like a long time ago, let  
9 alone Monday, but on the decision that the Commission  
10 made on executive compensation, wasn't the decision to  
11 do a 50-50 split? I'm getting blank looks, so --

12 **MR. PRESTWOOD:** On Florida Power & Light?

13 **COMMISSIONER EDGAR:** No --

14 **CHAIRMAN ARGENZIANO:** No, on Monday.

15 **MR. PRESTWOOD:** I'm sorry.

16 **CHAIRMAN ARGENZIANO:** I'm just trying to  
17 clarify if the --

18 **COMMISSIONER EDGAR:** I thought I heard an  
19 answer that did not jibe with my memory, but like I  
20 said, Monday already seems like a long time ago.

21 I'm sorry, Michael.

22 **MR. WILLIS:** Are you indicating Progress?

23 **COMMISSIONER EDGAR:** Progress, yes.

24 **MR. WILLIS:** I believe it was 50-50.

25 **COMMISSIONER EDGAR:** Okay, that's what I

1 thought, and I thought I heard that question asked and I  
2 thought I heard an answer different from that, so I'm  
3 not trying to jump back and forth, but if an answer was  
4 given that didn't jibe with my memory, I wanted to  
5 clarify --

6 **CHAIRMAN ARGENZIANO:** I'd like to check on  
7 that, because I'm not sure --

8 **MR. WILLIS:** I will check on that. I'll have  
9 staff --

10 **CHAIRMAN ARGENZIANO:** I think the staff's -- I  
11 think the proposal was 50-50, but we eliminated it,  
12 that's what I remember. I may be wrong, but at this  
13 point now, let's just -- even though we're on a  
14 different case --

15 **COMMISSIONER EDGAR:** I'm ready to stick to  
16 this.

17 **MR. WILLIS:** I will find out for sure.

18 **COMMISSIONER EDGAR:** When a question came up  
19 about it, I wanted to make sure we had the best  
20 information.

21 **CHAIRMAN ARGENZIANO:** Does anybody else hear a  
22 high pitch?

23 **COMMISSIONER EDGAR:** Off and on, yes.

24 **CHAIRMAN ARGENZIANO:** Okay. I didn't know --  
25 oh, is it you? No, I think it's coming from here, just

1 in case it means anything.

2 Okay. Commissioner Skop.

3 **COMMISSIONER SKOP:** Yes, Madam Chair.

4 Again, my concern, again, you know, this case  
5 itself, I mean, you know, consistency and uniform  
6 outcomes is a good thing from the regulatory process,  
7 but from this case as it's before us today, I think that  
8 we need to focus on this case and what's appropriate on  
9 the merits, just to avoid any appellate issues.

10 **CHAIRMAN ARGENZIANO:** Absolutely, and the  
11 reason I asked is for a different issue, not that the  
12 merits of this case shouldn't be single, and they are.  
13 But just as I felt strongly on Monday, I feel the same  
14 way now, and I haven't even discussed it, I let you guys  
15 talk about it. I have a problem with the incentive  
16 compensation. I see it as the company had offered it at  
17 50 percent, is that correct?

18 **MR. PRESTWOOD:** Yes, Madam Chairman, they  
19 offered 50 percent of the executive -- of their  
20 executives, 50 percent of that salary -- or incentive  
21 compensation to be eliminated. They also offered to  
22 eliminate executive raises.

23 **CHAIRMAN ARGENZIANO:** Commissioner Skop?

24 **COMMISSIONER SKOP:** Thank you.

25 Mr. Prestwood, in relation to your last

1 statement when you mentioned eliminating raises, is this  
2 50 percent of the compensation or 50 percent of the  
3 raises, or is it just eliminate the raises and  
4 50 percent of the executive compensation?

5 **MR. PRESTWOOD:** They eliminated just 50  
6 percent of the incentive compensation and the executive  
7 raises, meaning the 42 named executives.

8 **COMMISSIONER SKOP:** But that was 50 percent  
9 and 50 percent, not just 50 percent and zero?

10 **COMMISSIONER STEVENS:** Fifty percent on the  
11 incentive compensation, 100 percent of the raises.

12 **COMMISSIONER SKOP:** Okay. Thank you.

13 **COMMISSIONER STEVENS:** And the 100 percent is  
14 the 757, number one?

15 **MR. PRESTWOOD:** Yes, Commissioner Stevens,  
16 it's 100 percent.

17 **COMMISSIONER STEVENS:** Thank you.

18 **MR. PRESTWOOD:** Yes, that's correct.

19 **COMMISSIONER SKOP:** Madam Chair, just on issue  
20 103, and again, I know staff is working through its  
21 recommendation in relation to OPC, and I'm looking to go  
22 a little bit beyond that and try and back it up with a  
23 position based on the record evidence, but in issue 103,  
24 did staff find any excess payroll costs related to the  
25 redundancy of positions?

1           **MR. PRESTWOOD:** No, Commissioner, not that we  
2 could absolutely say positively, "This is in fact  
3 redundant."

4           **COMMISSIONER SKOP:** And is that in fact  
5 because when I was questioning the witness on that line  
6 of question, we really couldn't get complete answers in  
7 terms of what these positions did, whether they were  
8 redundant or not or how many positions there were?

9           **MR. PRESTWOOD:** Yes, Commissioner.

10          **COMMISSIONER SKOP:** Okay. So it was a --  
11 basically not a lack of merit of redundancy, but just a  
12 lack that we couldn't extract the -- adduce the facts at  
13 the evidentiary hearing to either make a determination  
14 they were redundant or not redundant?

15          **MR. PRESTWOOD:** That's correct.

16          **COMMISSIONER SKOP:** Okay. So in the case  
17 where we cannot substantiate something, would it be  
18 appropriate that if the company has not proven up its  
19 case sufficiently to justify areas in which it has, you  
20 know, a communication group that has vice- presidents  
21 and at least three directors on top of other managers,  
22 that might be an area where the Commission would have  
23 the discretion to look at the level of compensation in  
24 relation to reasonableness and relation to redundancy  
25 and then make an informed decision as to whether

1 ratepayers should be asked to bear those non-operational  
2 support costs?

3 **MR. PRESTWOOD:** I would go so far as to say  
4 "might," Commissioner. We might need to hear from  
5 others on that, but there's certainly concern there,  
6 definitely concern about those positions and the number  
7 of them and so forth and so on. My concern is, you  
8 know, how much evidence we have to do something with it,  
9 so I would not rule out and say, no, the Commission has  
10 no discretion to do anything there. So --

11 **COMMISSIONER SKOP:** Okay. Also, too, from an  
12 evidentiary perspective, if the company does not provide  
13 sufficient evidence to prove that its costs are  
14 reasonably and prudently incurred, then it's the  
15 company's burden, it's not my burden to make that case?

16 **MR. PRESTWOOD:** I would agree with that.  
17 Normally if the company has been put on notice and --  
18 the company always has the burden of proof, so --

19 **COMMISSIONER SKOP:** Thank you.

20 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

21 **COMMISSIONER STEVENS:** Thank you, Madam Chair.  
22 I just want to make sure if I'm -- I want to ask  
23 Commissioner Skop if I'm going in the same direction  
24 he's going in on 103.

25 I'm looking at the incentive compensation of

1 15,282,736, and also the -- I believe there was raises  
2 of approximately \$15 million included in these numbers  
3 they're not -- that's not showing here. I believe we  
4 included two percent in those numbers.

5 **MR. PRESTWOOD:** That's correct, Commissioner.  
6 There's a two percent merit increase buried in the  
7 numbers that we made no adjustment for that is  
8 approximately \$15 million that relates to O&M expenses  
9 in the rate case; that is to say, you know, the part  
10 that would affect revenue requirement. It doesn't  
11 include capital and so forth.

12 **COMMISSIONER STEVENS:** Yes, sir. Thank you.  
13 And so I know those, too, but I don't know the number  
14 that you're looking at external to this information. Is  
15 that where you were going?

16 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

17 **COMMISSIONER SKOP:** Thank you, Madam Chair.

18 Yes, Commissioner Stevens, the staff -- the  
19 total staff recommended reduction is \$33,927,400 for the  
20 2010 test year as shown on page 341, and that embodies,  
21 again, the company's concession that they made at the  
22 evidentiary hearing because of the scrutiny they got  
23 over the executive salaries, as well as some other  
24 things.

25 Just for the record, I share, probably,

1 Commissioner Argenziano's view that, again, if we're  
2 looking at across the board two percent raise for the  
3 rank and file employee, that's not my concern. I think  
4 that that's a good thing and that's not something I want  
5 to take away, not only for the union-represented folks,  
6 but for the rank and file employees. But what concerns  
7 me is, again, the redundancy in the non-operational, and  
8 I want to emphasize non-operational support groups,  
9 where you have marketing and communications stacked  
10 three or more deep with directors and managers, and  
11 again, at the compensation levels I'm looking at, I've  
12 got the wrong day job.

13 So again, what I'm looking at doing is  
14 adopting the staff recommendation of the reduction of  
15 33,927,400, but an additional pointed reduction based on  
16 redundancy specifically in the marketing and  
17 communication group, but when you look at regulatory  
18 affairs, that's ripe to take a look at, too. But again,  
19 we need to support it with record evidence, and I think  
20 I can get to a number, I may need a minute or two to  
21 review my calculations, but I'm looking to make an  
22 additional adjustment over and above the recommendation  
23 of staff on issue 103.

24 **CHAIRMAN ARGENZIANO:** And, Commissioner Skop,  
25 are you recommending the elimination of the incentive --

1 executive incentive compensation?

2 **COMMISSIONER SKOP:** I would be open to  
3 building consensus with my colleagues on what the  
4 appropriate methodology is. I'm just not --

5 **CHAIRMAN ARGENZIANO:** That's what we did  
6 Monday, too, not that it's the same thing. I'm just  
7 saying, so you know --

8 **COMMISSIONER SKOP:** I'm not comfortable with  
9 the staff recommendation as it is. I think that the --  
10 it embodies some of the Public Counsel's recommendation,  
11 but again, the redundancies in the non-operational  
12 support group, I think that we've talked about being  
13 lean, the company again can engage in belt-tightening,  
14 but if I have to look at a perfect world on what's  
15 important, their core job function is providing  
16 electricity at reasonable and affordable and reliable to  
17 consumers, and, again, marketing and communications, I  
18 don't really know where that fits in in the grand scheme  
19 of things. I think it has some more important corporate  
20 role, but if they want to have that deep of a bench in  
21 marketing and communications, then their shareholders  
22 can pay for it. It's not fair to have the ratepayers do  
23 that.

24 **CHAIRMAN ARGENZIANO:** Are you asking to move  
25 on and come back to this?

1                   **COMMISSIONER SKOP:** Yes, Madam Chair.

2                   **CHAIRMAN ARGENZIANO:** Okay, let's do that, why  
3 don't we move on, and, Commissioner Skop, do you need a  
4 minute or two, do you want to --

5                   **COMMISSIONER SKOP:** I would need a minute or  
6 two, and then we could come back and move on and come  
7 back to this --

8                   **CHAIRMAN ARGENZIANO:** Why don't we take a  
9 five-minute recess?

10                   (Brief recess.)

11                   **CHAIRMAN ARGENZIANO:** Okay, We're going to  
12 start up again if everybody would grab their seats.  
13 And, Commissioner Skop, if you want, we can move on and  
14 then come back to this issue if you're not ready.

15                   **COMMISSIONER SKOP:** Yes, Madam Chair, thank  
16 you.

17                   **CHAIRMAN ARGENZIANO:** That's what we'll do.  
18 If we could move -- and was -- I did need to remind  
19 everyone that at six o'clock the doors lock you in. You  
20 can get out, but you can't get back in. So if you try  
21 to leave the building at six o'clock and want to come  
22 back in, make sure somebody is standing on the inside of  
23 the doorway to let you back in. And with that, let's  
24 move to issue 106.

25                   **MR. PRESTWOOD:** 106 deals with pension

1 expense. There was no adjustments proposed and no other  
2 parties opposed that, and staff is recommending that no  
3 adjustment be made.

4 **CHAIRMAN ARGENZIANO:** Commissioners, any  
5 comments?

6 Okay, let's move to 107. Commissioner Skop,  
7 just let me know when you are ready. Or, as a matter of  
8 fact, instead of going to 107, why don't we go back to  
9 issue 90, staff is ready on that, and then we might need  
10 a motion to reconsider issue 3.

11 Paul?

12 **MR. STALLCUP:** If you recall, issue 90 was  
13 asking the question if there were any adjustments  
14 necessary to FP&L's revenue forecast. Because of your  
15 decision on the load forecast issue earlier on issue 3,  
16 an adjustment is appropriate to reflect the OPC's  
17 recommended adjustments to the load forecast.

18 As you'll recall, we also noted there was a  
19 difference between two sets of numbers inside the briefs  
20 and in the rec. We went back and rechecked the record  
21 and found a third number, which is actually the right  
22 number. Both the company and OPC checked with their  
23 witnesses, and both the witnesses concur that the  
24 appropriate adjustment to 2010 revenues is \$36,969,000.

25 **CHAIRMAN ARGENZIANO:** Okay. We need to then

1 reconsider issue 3, is that correct?

2 **MS. BENNETT:** That's correct, it is a  
3 reconsideration. I probably need to add Mr. Stallcup  
4 said the parties agree that --

5 **CHAIRMAN ARGENZIANO:** They didn't agree on the  
6 issue, they agreed on the -- that that was the correct  
7 number.

8 **MS. BENNETT:** That that witness testified that  
9 that's the right number.

10 **CHAIRMAN ARGENZIANO:** Okay, thank you for  
11 clarifying that.

12 Do I have a motion to reconsider issue 3?

13 **COMMISSIONER SKOP:** So moved.

14 **CHAIRMAN ARGENZIANO:** A second?

15 **COMMISSIONER STEVENS:** Second.

16 **CHAIRMAN ARGENZIANO:** All in favor, say aye.

17 (Chorus of ayes.)

18 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

19 (No response.)

20 **CHAIRMAN ARGENZIANO:** We are now back on issue  
21 3.

22 **COMMISSIONER SKOP:** Madam Chair, I'd like to  
23 make the motion to adopt -- reject the staff  
24 recommendation on issue 3, adopting the OPC position  
25 with the corrected revenue requirement differential of

1 \$36,969,000. Is that correct, staff?

2 **MR. PRESTWOOD:** Yes.

3 **CHAIRMAN ARGENZIANO:** Any discussion?

4 **COMMISSIONER STEVENS:** Second.

5 **CHAIRMAN ARGENZIANO:** We have a second. Any  
6 discussion, any comments?

7 All those in favor, say aye.

8 (Chorus of ayes.)

9 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

10 (No response.)

11 **CHAIRMAN ARGENZIANO:** Show the motion adopted.  
12 And we are now back -- Commissioner Skop, are you ready  
13 to go back --

14 **COMMISSIONER SKOP:** Issue 90.

15 **CHAIRMAN ARGENZIANO:** You're ready to go back  
16 to issue 90. I'm sorry, we have to go back to 90,  
17 that's right, and then go back to either 103 or 107.

18 **COMMISSIONER SKOP:** And, staff, if they could  
19 please advise with the appropriate manner in which to  
20 style the motion for issue 90. Would it be just to note  
21 that it will change based on the Commission's decision  
22 on issue 3, or will it be to correct the number to the  
23 one I just mentioned?

24 **MR. STALLCUP:** Yes.

25 **COMMISSIONER SKOP:** Okay. Madam Chair, with

1 that in mind, I'd like to respectfully move to deny the  
2 staff recommendation on issue 90 --

3 **CHAIRMAN ARGENZIANO:** We'd need to -- did we  
4 vote on 90?

5 **MR. PRESTWOOD:** We have not voted on 90.

6 **CHAIRMAN ARGENZIANO:** So we don't need to  
7 reconsider a vote if we haven't done it. Thank you.

8 **COMMISSIONER SKOP:** Thank you, Madam Chair.  
9 Madam Chair, I would like to make the motion to deny the  
10 staff recommendation on issue 90, adopting the OPC  
11 position with the corrected number of \$36,969,000.

12 **COMMISSIONER STEVENS:** Second.

13 **CHAIRMAN ARGENZIANO:** Any discussion?

14 Hearing none, all in favor, say aye.

15 (Chorus of ayes.)

16 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

17 (No response.)

18 **CHAIRMAN ARGENZIANO:** The motion is adopted.

19 Now, Commissioner Skop, are you ready on 103,  
20 or if not, we can --

21 **COMMISSIONER SKOP:** We can go forward or we  
22 can go back there. I mean, ultimately I'm going to have  
23 to go get in the nitty-gritty of the confidentiality  
24 documents, so --

25 **CHAIRMAN ARGENZIANO:** Okay, then let's do

1 this. Let's move on with some of the smaller issues  
2 that we can take and get done and over with.

3 **COMMISSIONER SKOP:** One question: It might be  
4 helpful to my colleagues if staff were to pass out that  
5 confidential salary information if we have it available  
6 so people could see what I was talking about.

7 **MR. WILLIS:** We have that available, and while  
8 staff is passing that out, Commissioner Argenziano and  
9 Commissioner Edgar, you asked if I would find out for  
10 sure what happened on that issue in process, and I will  
11 tell you I have a copy of the transcript, and the  
12 transcript was to adopt Public Counsel's position down  
13 the line, and Public Counsel's position in that case was  
14 to remove the entire expense of incentive compensation  
15 for both short term and long term. What the adjustment  
16 actually did was remove three-fourths of the total  
17 amount, that's the portion that was in expense. They  
18 kind of left dangling what to do with the capitalized  
19 portion, and therefore that wasn't touched. It was  
20 basically three-fourths of the total expense.

21 **COMMISSIONER EDGAR:** That's helpful to me,  
22 thank you, because we're seeing all of one, half of  
23 another, which is where I got the 50, but -- so thank  
24 you, and we'll be ready to move on.

25 **CHAIRMAN ARGENZIANO:** All right. Commissioner

1 Skop.

2 **COMMISSIONER SKOP:** Madam Chair, with respect  
3 to Mr. Willis's comment, so will that be in light of  
4 -- will that be 75 percent of the total value of the  
5 number for that line item, if I've understood you  
6 correctly?

7 **MR. WILLIS:** What happened in the Progress  
8 case was the Commission voted to adopt OPC, which was  
9 75 percent of the compensation, incentive compensation.

10 **COMMISSIONER SKOP:** Okay, to remove that.  
11 Okay, thank you.

12 **COMMISSIONER STEVENS:** Madam Chair, if I  
13 understood, though, that was also the capitalized piece,  
14 and that's why it wasn't a hundred percent, is that --

15 **MR. WILLIS:** The 25 percent was the  
16 capitalized portion, which Public Counsel did not state  
17 what to do in their position, yes. They kind of left it  
18 dangling.

19 **COMMISSIONER STEVENS:** And here on item 103,  
20 we're just looking at O&M, we're not looking at O&M and  
21 capitalized, just O&M?

22 **MR. PRESTWOOD:** (INAUDIBLE).

23 **COMMISSIONER STEVENS:** Well, it says O&M.

24 **CHAIRMAN ARGENZIANO:** You might want to repeat  
25 it just to make sure.

1 Commissioner Stevens, would you --

2 **COMMISSIONER STEVENS:** We're just looking at  
3 O&M expenses on 103, correct, not O&M and capitalized?

4 **MR. PRESTWOOD:** Correct, we're just looking at  
5 O&M and some payroll taxes along with it, correct.

6 **CHAIRMAN ARGENZIANO:** Okay. So why don't we  
7 pick up on -- did we already move on 106? We're on 107,  
8 aren't we?

9 **MR. PRESTWOOD:** Yes, ma'am.

10 **CHAIRMAN ARGENZIANO:** Okay, 107. Commissioner  
11 Stevens, I'm sorry.

12 **COMMISSIONER STEVENS:** And you will probably  
13 answer this question when you go over it, but let me ask  
14 it first.

15 Staff recommends no adjustment, and I'm going  
16 to ask you why not, because the OP -- the Public Counsel  
17 had an adjustment.

18 **CHAIRMAN ARGENZIANO:** Which issue are you on?

19 **COMMISSIONER STEVENS:** 107, I'm sorry, 107.

20 Thank you.

21 **MR. PRESTWOOD:** Yeah, I -- we'll address that.  
22 107 deals with an insurance refund related to  
23 environmental insurance. This pertains to the period of  
24 1998 through 2007 that the company was paying and  
25 booking insurance expense. In 2007, it decided to

1       discontinue the insurance, as well as to relieve the  
2       insurance companies of any future liability. As a  
3       result of that, they received a refund for that period.  
4       So this is basically a prior period adjustment, you  
5       know, relating to years prior to the 2010 test year.

6               What OPC had recommended was to calculate  
7       this -- or to take this refund, bring it forward into  
8       2010 and amortize it over a five-year period; in other  
9       words, one-fifth of it would be in the year 2010. It  
10      really has nothing to do whatsoever with 2010 or even  
11      any year close to that. It was --

12             **COMMISSIONER STEVENS:** I understand it's a --

13             **CHAIRMAN ARGENZIANO:** Commissioner Stevens,  
14      please.

15             **COMMISSIONER STEVENS:** I understand that it's  
16      recorded as a prior period adjustment. When was it  
17      received?

18             **MR. PRESTWOOD:** 2008.

19             **COMMISSIONER STEVENS:** That's when the company  
20      received it?

21             **MR. PRESTWOOD:** Yes, sir.

22             **CHAIRMAN ARGENZIANO:** Okay, thank you.

23             **CHAIRMAN ARGENZIANO:** Commissioner Skop.

24             **COMMISSIONER SKOP:** Thank you, Madam Chair.

25             To Commissioner Stevens' concern, I think that

1 was an excellent point that was raised, I had the same  
2 concern, and it took convincing from staff to indicate  
3 when it was received and booked to convince me that the  
4 staff position would be the appropriate one over OPC.  
5 It was a timing issue, but not in the test year.

6 **CHAIRMAN ARGENZIANO:** Okay. Any other  
7 questions on 107? Thomas?

8 **COMMISSIONER STEVENS:** No, thank you.

9 **CHAIRMAN ARGENZIANO:** Okay, 108.

10 **MR. PRESTWOOD:** 108 has two parts. Again, it  
11 has the forecast update on the first part where --  
12 actually, excuse me, it just has one part, that is the  
13 forecast update. This relates to the Department of  
14 Energy.

15 Florida Power & Light, as well as all electric  
16 power companies that have nuclear facilities, have been  
17 paying to the Department of Energy for the storage of  
18 their spent nuclear fuel, which the Department of Energy  
19 has yet to do. They reached a settlement in March of  
20 2009, and the company chose to update their filing to  
21 reflect the benefit of that settlement, which was some  
22 cash inflows, as well as reimbursement for capital  
23 outlays and so forth. And really no party really  
24 opposed that update. South Florida had, earlier in  
25 their testimony, recommended using an earlier number and

1 bringing that forward into the test year, but the update  
2 that the company made in their rebuttal was the most  
3 current data, and staff feels that the most current and  
4 most accurate data is what should be used in the test  
5 year and recommends that adjustment.

6 **CHAIRMAN ARGENZIANO:** Any other questions?

7 Okay, 109.

8 **MR. PRESTWOOD:** 109 deals with affiliated  
9 interests for Florida Power & Light. It's a rather  
10 lengthy issue. Their -- and then also there's a  
11 forecast update for this one as well.

12 Basically the OPC witness first had proposed  
13 that the company adjust some of its specific -- or some  
14 of the drivers that it uses in its calculations to  
15 allocate costs out. FP&L updated its drivers and showed  
16 that some of those drivers went up, some of them went  
17 down, but in general there was very little change and so  
18 no adjustment was necessary for that. They also made an  
19 adjustment to -- let me back up.

20 For example, there are three primary methods  
21 for allocating the cost at FP&L to the affiliates.  
22 First, all the cost is recorded on FP&L, the utility  
23 company, and then it's allocated out to all of the  
24 affiliates and itself.

25 The first method is a direct charge method,

1 where there's a specific job that's being done for a  
2 specific utility that they can charge to that.

3 The second method is one where there's a pool  
4 of costs that's -- can be identified and can be  
5 allocated based on what they call a specific driver that  
6 relates to the activity being performed. The example I  
7 like to use, although it's not necessarily exactly what  
8 they do on their books, but IT, we have an IT group at  
9 the PSC, for example. A specific driver would be to  
10 allocate their cost based on a number of PCs that we  
11 have in the building, if we wanted to allocate our cost  
12 to each of the departments, and so forth.

13 And the third and final big pool of costs is  
14 one -- is a pool of costs that is really not  
15 identifiable to any particular function or driver, and  
16 that would be such things as preparing the annual  
17 report, budgeting, that type of stuff. FP&L, as well as  
18 a number of companies and a number of Commissions, have  
19 used what's called the Massachusetts formula as more or  
20 less a safe harbor or treatise, if you will, because  
21 there is no allocation formula that's perfect, there  
22 just simply isn't one, never will be. The Massachusetts  
23 formula has been found to be a reasonable method of  
24 allocating costs, and as long as companies used it and  
25 used it consistently and correctly, it was pretty much

1           accepted.

2                         In addition to wanting to update some of the  
3 drivers, which I've already discussed, which did not  
4 have a material impact, OPC wanted to pick out one piece  
5 that's allocated on the Massachusetts formula and change  
6 that, and that happened to be the group level  
7 executives, the group level executive salaries. They  
8 wanted to allocate that, rather than what the results  
9 were coming out of the Massachusetts formula, which was  
10 roughly 70 percent of Florida Power & Light, the  
11 utility, 30 percent to everybody else, very roughly, to  
12 simply 50-50. No basis for the 50-50, they just felt  
13 like 50-50 was a better allocation. And they also felt  
14 that the Massachusetts formula was really more of a  
15 size- based allocation formula, which it is, and that  
16 the non-regulated affiliates weren't getting -- paying  
17 for the full benefit they get for being associated with  
18 Florida Power & Light. If they weren't associated with  
19 Florida Power & Light, they wouldn't have so many  
20 benefits.

21                         Florida Power & Light said, look, as long as  
22 our association with these affiliates -- if we're able  
23 to share our costs that we would have to incur anyway if  
24 we were a stand-alone utility, and we can lower those  
25 costs to a point lower than it would be if we were on a

1 stand-alone basis, then our ratepayers, our customers,  
2 are better off than they would be otherwise, and the  
3 Massachusetts formula meets that objective.

4 So our problem was if you went in and adjusted  
5 just one single piece of the Massachusetts formula, then  
6 you no longer had that formula. You know, in short,  
7 it's either use it or don't use it, don't tamper with  
8 it. And that was really sort of our position, not  
9 because it was salaries that they were adjusting, but  
10 just because they were adjusting any part of it. We're  
11 not saying that the Massachusetts formula is the only  
12 way to do it, but if you're going to recommend another  
13 way, recommend a complete method, not just one little  
14 piece to achieve an adjustment that you might be trying  
15 to have. So we're recommending against that adjustment  
16 proposed by OPC.

17 Some other issues that were raised, first of  
18 all, FiberNet, which is a little bit different  
19 situation, FiberNet is FP&L's telecommunications  
20 company. It handles all the telecommunications for all  
21 the -- for FP&L as well as the non-regulated companies.  
22 It bills its cost out to FP&L and the non-regulated  
23 companies. A big part of that cost is a return on its  
24 investment, because it's a very capital-intensive  
25 company. And the return that it was using, return times

1 its investment, was higher than what the utility was  
2 earning, and OPC felt like that it should be -- that  
3 return should be no higher than what's allowed to the  
4 utility, and we agree. So we are recommending that  
5 OPC's adjustment for the billing from FiberNet to FP&L  
6 be accepted.

7 Now, we recognize -- and the return that they  
8 used was the return being recognized by OPC's witness --  
9 or being recommended by OPC's witness at the time. We  
10 recognize that in the end result that won't be the exact  
11 return that is used for FP&L in this case, but we think  
12 it will be close enough for this adjustment; that it's  
13 not that material, but it definitely shouldn't be higher  
14 than what the utility earns.

15 The other area dealt with the company that's  
16 called FP&L Energy Services. The two main issues there  
17 were, one, the OPC was saying that gas -- the gas  
18 contracts, FP&L Energy Services, among other things,  
19 sells natural gas to customers. It also sells  
20 energy-related products such as surge protection, home  
21 appliance warranties and that kind of stuff, or  
22 that kind of -- those kind of products. When it sold --  
23 when Florida Power & Light sold its gas business to FP&L  
24 Energy Services, there was -- OPC claimed there should  
25 have been a gain recognized on that and that that gain

1 should have been amortized over some period of time and  
2 recognized in FP&L for their ratepayers. That was an  
3 issue in the last rate case.

4 That issue went all the way through the  
5 rebuttal stage and that case was settled, and the  
6 settlement in that case clearly states that this  
7 settlement will settle all issues in this case. And  
8 that being one of them, we considered that issue  
9 settled, whatever the outcome was, and we didn't go any  
10 further than that once it was settled.

11 The other issue they raised was that --  
12 whether FP&L Energy Services was paying enough for the  
13 use of FP&L's bill. They do bill inserts in FP&L, using  
14 FP&L's bill, and according to the testimony, they do  
15 fully compensate FP&L for the use of their bill. That  
16 topic has been fairly litigated over the past several  
17 years, and I think it's been fairly well-established  
18 that the utility has a right to allow others to put  
19 their inserts in its bill as long as it's fully  
20 compensated for that service. So from a revenue  
21 requirement standpoint, I do not believe that we have an  
22 issue with FP&L Energy Services in this case. There's  
23 nothing really to adjust for.

24 So, in summary -- I told you it was a long  
25 issue -- we're recommending for the --

1                   **CHAIRMAN ARGENZIANO:** Okay. Sum it up, go  
2 ahead. Bring it in for a landing.

3                   **MR. PRESTWOOD:** I'm bringing it in for a  
4 landing, okay.

5                   In summary, we are recommending that the  
6 forecast data be accepted, no adjustment for the  
7 allocation drivers, no adjustment for the Massachusetts  
8 formula, no adjustment for FP&L Energy Services, no --  
9 accept OPC's adjustment for the FiberNet charges to  
10 FP&L, and no adjustment for the power monitoring  
11 revenue, which I didn't even mention because it was just  
12 a misunderstanding of what that item was.

13                   **CHAIRMAN ARGENZIANO:** Thank you very much  
14 for -- I'm sorry, did I cut you off?

15                   **MR. PRESTWOOD:** No, you didn't.

16                   **CHAIRMAN ARGENZIANO:** Thank you, it was  
17 extremely thorough, and I really do appreciate that.  
18 That sounds funny, but I really mean that. Sometimes a  
19 thorough explanation really helps to understand when  
20 there's so many issues there.

21                   Commissioner Skop.

22                   **COMMISSIONER SKOP:** Thank you, Madam Chair,  
23 and this may be one of those issues I may need to break  
24 out along with issue 119 to vote on separately.

25                   **CHAIRMAN ARGENZIANO:** On 109?

1                   **COMMISSIONER SKOP:** 109 and 119, I may need to  
2 take those up separately, depending on  
3 consensus-building.

4                   I generally agree with the staff  
5 recommendation as articulately presented by Mr.  
6 Prestwood. I want to have a few comments in passing.

7                   The, as Mr. Prestwood properly stated, the  
8 issue on the sale of assets, again, that seemed to be  
9 something that is precluded from us looking at further  
10 by virtue of the 2005 settlement agreement, as  
11 Mr. Prestwood alluded to, so I think that we're barred  
12 on an issue preclusion basis from revisiting that, so I  
13 think that that's the proper legal result.

14                   As to FP&L Energy Services providing -- you  
15 know, offering products to FP&L's customers, you have  
16 the affiliate offering products through FP&L's bill  
17 inserts and FP&L processes the cost of that on its bill,  
18 and, you know, we can get into the whole issue of  
19 whether there's cross-subsidization or not, or whether  
20 it's really a level playing field to the extent that if  
21 competitors wanted to offer some more product offerings  
22 along the same line to directly compete with FP&L,  
23 would they be allowed to do so. I know GEICO and maybe  
24 Discover Card or whoever else they put inserts in for,  
25 that's fine.

1           But the issue that I have, and again, this is  
2 the issue -- and I'm very familiar with the case law  
3 that Mr. Prestwood tried to allude to, it's the GTE  
4 case, 642 So.2d 545, you know, it speaks to the standard  
5 of review and the standard of fairness there. That is  
6 not my concern with these products.

7           As we've heard from Representative Sands, who  
8 came to appear before the Commission, as we've heard  
9 from others, when consumers are offered these products  
10 they think they're being offered the products by FP&L,  
11 so there's an issue of customer confusion. The  
12 products -- at evidentiary hearing, we discussed those  
13 at length. Wasn't a whole lot of transparency there as  
14 to what the profit margins were, but I think it's  
15 probably safe to assume they're very high profit margin  
16 offerings; otherwise, I don't think FP&L would be  
17 willing to tarnish or compromise the goodwill of its  
18 corporate name in the instance of offering such products  
19 through its affiliates.

20           My concern is that for the most part, based on  
21 the record evidence, these products could be construed  
22 as predatory and illusory, and I have that concern, and  
23 I know that Mr. Prestwood stated that this is a revenue  
24 requirement issue and not an issue that we can really  
25 kind of do something about, but I would like to ask

1 Mr. Prestwood, what is the appropriate remedy for the  
2 Commission -- and again, we might be able to amend a  
3 motion onto this issue to spin this off for  
4 consideration in a separate proceeding to address the  
5 appropriateness of FP&L Energy Services offering such  
6 products through FP&L, in light of the customer  
7 confusion issues, in light of the concerns expressed by  
8 state representatives, in light of the fact that the  
9 Attorney General's Office has had to get involved and  
10 engaged in settlements over some of these product  
11 offerings in light of significant consumer concerns, I  
12 mean, that we discussed in the evidentiary -- I don't  
13 want to rehash the obvious.

14 I'm unhappy with these product offerings  
15 because I feel they're predatory and illusory to FP&L's  
16 customers, and I think that we have -- from a regulatory  
17 perspective, we certainly regulate FP&L. Now, as regard  
18 to its affiliate, I'd feel much more comfortable if its  
19 affiliate would just sit there and paid 44 cents and  
20 mailed its own offerings out and it could do business  
21 the way it wants to, but the way it's trying to do, it's  
22 piggybacking off FP&L's billing system and accounting  
23 system to generate unregulated affiliate revenue.

24 But the issue I have gets to, is this  
25 something appropriate that FP&L should be offering to

1 its customers, because for the most part, some of these  
2 warranties really have a lot of exclusions and  
3 limitations, and if you look at the fine print, I have  
4 some serious concerns on that, and that may be an issue  
5 -- I guess what I'm torn with is typically the Attorney  
6 General's Office has previously gotten involved, but  
7 again, there's a statutory consumer protection provision  
8 that specifically excludes other agencies from having  
9 jurisdiction if the PSC has jurisdiction, and I think  
10 that we do, in terms of the fact that we regulate FP&L.

11 So what's the appropriate measure in your  
12 mind, Mr. Prestwood? Because again, my frustration is  
13 the marketing people are off doing their own thing and  
14 it's become a source of frustration for me, whether it  
15 be Sunshine Energy or this case, and again, I think I've  
16 reached my limit, and we need to protect FP&L's  
17 customers.

18 **CHAIRMAN ARGENZIANO:** And you're asking for --

19 **COMMISSIONER SKOP:** Mr. Prestwood, yes,  
20 recommendation.

21 **MR. PRESTWOOD:** And I think you've mentioned  
22 it, I think a separate investigation, separate docket,  
23 to look into the business practices between Florida  
24 Power & Light and its subsidiary, the cost-sharing and  
25 arrangement there, and, you know, have all parties the

1 ability to, you know, participate in that docket and  
2 pursue some of these issues in much further depth than  
3 what we were able to in light of this case where we were  
4 looking at strictly revenue requirement issues.

5 **COMMISSIONER SKOP:** Well, like I say, it's  
6 unfortunate that it's necessary that we may need to go  
7 there, but we may have to. I think it would be a lot  
8 easier for the company to stipulate in a cease and  
9 desist from offering such offerings, or do it a  
10 different way, but I'm not comfortable with the current  
11 structure. It gives my great concern. I think that,  
12 again, the record evidence that is in the transcript  
13 speaks to the complaints that have come in and some of  
14 the issues that have arisen from these offerings, and  
15 again, I think that we have a duty to look out for the  
16 ratepayers, and again, I'm uncomfortable with this and I  
17 may need to style a motion or vote against the issue if  
18 it's not the will of the Commission to --

19 **CHAIRMAN ARGENZIANO:** What is your desire as  
20 of right now for this issue?

21 **COMMISSIONER SKOP:** I'd move to approve staff  
22 recommendation with the amendment that we create a -- on  
23 Commission's own motion to initiate another -- a docket  
24 to investigate the relationship on the appropriateness  
25 of the affiliate offering these products to FP&L

1 customers.

2 **CHAIRMAN ARGENZIANO:** There's a motion.

3 **COMMISSIONER STEVENS:** I'll second that

4 motion.

5 **CHAIRMAN ARGENZIANO:** Any discussion,

6 questions?

7 All those in favor of the motion, indicate by

8 aye.

9 (Chorus of ayes.)

10 **CHAIRMAN ARGENZIANO:** All those opposed, same

11 sign.

12 (No response.)

13 **CHAIRMAN ARGENZIANO:** Show the motion adopted,

14 and we can move on to -- I forgot where we were.

15 **COMMISSIONER SKOP:** I think 116-A.

16 **CHAIRMAN ARGENZIANO:** 116-A, thank you.

17 **MR. PRESTWOOD:** 116-A -- issue 116-A relates  
18 to sales of individual assets to and from Florida Power  
19 & Light from affiliates. OPC had recommended that this  
20 be treated in a manner similar to which you would treat  
21 when you sell an entire system where you recognize a  
22 purchase price adjustment and a gain and so forth and  
23 amortize that over some period of time. These are  
24 individual assets that are recognized typically when you  
25 sell them as salvage, and accounted for, and we believe

1 the company's followed the uniform system of accounts  
2 and that no adjustment is necessary. That's our  
3 recommendation.

4 **COMMISSIONER STEVENS:** Madam Chair?

5 **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

6 **COMMISSIONER STEVENS:** And I understand taking  
7 the full depreciation and the transfer, but there's also  
8 this gain on sales, so I'm back to the help me  
9 understand why we don't agree with the Public Counsel's  
10 position. Help me better understand that.

11 **MR. PRESTWOOD:** Uniform system of accounts for  
12 individual accounts and assets is set up in a manner  
13 that we depreciate it over the life of the plant. We  
14 incorporate in that depreciation the cost of removal at  
15 the end of its life, and we also incorporate into that  
16 salvage, and then we adjust those rates, I think we said  
17 earlier today every five years, to account for changes  
18 that are occurring.

19 **COMMISSIONER STEVENS:** So it would be caught  
20 in those calculations?

21 **MR. PRESTWOOD:** Yes, Commissioner, and that's  
22 exactly right. These sales are nothing more -- they're  
23 small, relatively small assets and they should be just  
24 treated as salvage for the most part.

25 **COMMISSIONER SKOP:** Thank you.

1                   **CHAIRMAN ARGENZIANO:** Commissioner Skop.

2                   **COMMISSIONER SKOP:** Thank you, Madam Chair.

3 Commissioner Stevens had the same question. It took  
4 substantial discussion with staff to get a better  
5 appreciation of that, and I'm comfortable with the staff  
6 recommendation as it was explained to me.

7                   **CHAIRMAN ARGENZIANO:** Anything else?

8                   **COMMISSIONER STEVENS:** No, ma'am.

9                   **CHAIRMAN ARGENZIANO:** Okay. Now, Commissioner  
10 Skop, you wanted to separate 119. Are you ready to go  
11 on that one?

12                   **COMMISSIONER SKOP:** I'm ready to go on it. We  
13 can proceed, and I may just be willing to make a motion,  
14 and if not, I'll vote in the negative, but if staff will  
15 introduce the issue, I'll be prepared to make a motion.

16                   **CHAIRMAN ARGENZIANO:** Let's go to 119.

17                   **MR. PRESTWOOD:** Okay. Issue 119 deals with  
18 requiring Florida Power & Light to notify the Commission  
19 when it plans to transfer its assets from Florida Power  
20 & Light to a new separate subsidiary for its New England  
21 division. Our recommendation for this is that -- and it  
22 was OPC's recommendation that that be denied. We  
23 believe that it's important that the Commission do be  
24 informed of these entries before they're made and so  
25 forth and so on; however, in this docket, we don't

1 believe that it's appropriate to deal with it, because  
2 it's not a revenue requirement issue.

3 **CHAIRMAN ARGENZIANO:** Commissioner Skop.

4 **COMMISSIONER SKOP:** Thank you, Madam Chair.

5 With respect to staff recommendation, I  
6 respectfully disagree with staff. Just to -- without  
7 going into a whole lengthy history, the FP&L NED assets  
8 basically were created to benefit the unregulated  
9 company, and it's like a holding company, so it's a  
10 whole host of issues associated with that, but I would  
11 prefer, and at the appropriate time would respectfully  
12 move to deny the staff recommendation on this issue and  
13 adopt the OPC position in its place, ordering an  
14 independent appraisal by the rule.

15 **CHAIRMAN ARGENZIANO:** Okay. Any -- so there's  
16 a -- you just made a motion. Any discussion or a second  
17 on the motion?

18 **COMMISSIONER STEVENS:** Second.

19 **CHAIRMAN ARGENZIANO:** Second on the motion.

20 Any discussion, questions? Commissioner  
21 Stevens.

22 **COMMISSIONER STEVENS:** I find this similar to  
23 the discussions we had just a second ago I believe on  
24 116-A. Do we want to put a dollar floor on your  
25 recommendation, or is it any assets?

1           **COMMISSIONER SKOP:** Commissioner Stevens, with  
2 respect to the issue in issue 119-A, I think that the  
3 assets in the FP&L NED division, they're looking at  
4 spinning that off into a separate subsidiary and not  
5 having it in the regulated operations where it's kind of  
6 like a square plug in a round hole, so they're looking  
7 at a solution based on previous concerns I raised.

8           In 116-A, I think that sale -- gain on sale  
9 had already occurred, I think this has not yet occurred,  
10 so that's why I think having the independent appraisal  
11 might be required. I'm not so sure what the floor of  
12 that -- of the assets would be, but I think they're in  
13 excess of \$30 million.

14           **COMMISSIONER STEVENS:** And -- that's where I  
15 was going. I don't want to see something for 50 grand.

16           **COMMISSIONER SKOP:** Right, I understand. I  
17 think they're -- staff, if you could elaborate, but I  
18 think they're in -- it's safe to say they're in excess  
19 of \$30 million for the NED assets. Anyone got some  
20 clarification on that?

21           **CHAIRMAN ARGENZIANO:** And by the way, is the  
22 court reporter doing okay? Do you need a break?

23           **THE COURT REPORTER:** I'm fine, thank you.

24           **CHAIRMAN ARGENZIANO:** Thank you. Okay.

25           **COMMISSIONER SKOP:** Put it this way: I know

1 that they attempted through an issue that we -- that I  
2 had great exception with, and we ultimately denied, to  
3 basically raise capital in the amount of \$30 million on  
4 the regulated side that they were going to send to the  
5 NED division that has absolutely nothing to do with  
6 Florida operations for FP&L customers. So I think that  
7 the OPC position is reasonable.

8 **CHAIRMAN ARGENZIANO:** Are you comfortable  
9 knowing it's not a \$50,000 --

10 **COMMISSIONER STEVENS:** I am.

11 **CHAIRMAN ARGENZIANO:** Okay. All right. Then  
12 we have a motion and a second. Do we have a second?

13 **COMMISSIONER KLEMENT:** Yet.

14 **CHAIRMAN ARGENZIANO:** All right. They're all  
15 meshing together now. Okay. Any further discussion?

16 Hearing none, all those in favor, say aye.

17 (Chorus of ayes.)

18 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

19 (No response.)

20 **CHAIRMAN ARGENZIANO:** Show the motion adopted.  
21 And now we are on 121, thank you.

22 **MS. GARDNER:** Commissioners, Betty Gardner of  
23 Commission staff. Issue 121 is basically a fallout of  
24 issue 42, "What adjustment, if any, should be made to  
25 the fossil dismantlement accrual?" Staff recommends an

1 increase to the system and a provision for dismantlement  
2 by \$3,147,274, which includes the solar, and the retail  
3 annual accrual should be increased by \$2,640,568.

4 **CHAIRMAN ARGENZIANO:** Questions?

5 **COMMISSIONER STEVENS:** No, ma'am.

6 **CHAIRMAN ARGENZIANO:** Okay. 122.

7 **MR. PRESTWOOD:** Issue 122 is rate case expense  
8 and the proper amortization period. The company  
9 initially forecasted a rate case expense of 3,657,000  
10 and requested it to be amortized over three years. They  
11 updated this forecast during the case, and it -- to be  
12 over a million dollars more than the original forecast;  
13 however, they did not request that that additional  
14 moneys to be included in the revenue requirement.

15 Staff is recommending that we use the original  
16 forecast. However, we reduced that by \$450,000, which  
17 represents the overtime that the company pays to  
18 salaried employees for their work during the rate case,  
19 on the rate case; and we are also recommending that the  
20 amortization period be extended from three to four  
21 years, which is consistent with the Commission's actions  
22 in several of the last rate cases in terms of the  
23 amortization period.

24 **CHAIRMAN ARGENZIANO:** Commissioners?

25 **COMMISSIONER STEVENS:** I'm fine with this.

1                   **CHAIRMAN ARGENZIANO:** Okay. 124.

2                   **MR. PRESTWOOD:** 124, issue 124, FP&L has  
3 requested to add additional loadings to the energy  
4 conservation cost recovery clause. We are recommending  
5 that this be disapproved. We see no need to add  
6 additional costs into that clause, lead these costs into  
7 base rates.

8                   **COMMISSIONER STEVENS:** I agree with staff.

9                   **CHAIRMAN ARGENZIANO:** Any comments? Okay. If  
10 none, let's move on to 125.

11                   **MR. PRESTWOOD:** 125 is essentially the same  
12 issue, adding loadings, it's just a different clause.  
13 They wanted to add additional loadings into the capacity  
14 cost recovery clause, and again, staff is recommending  
15 not to allow this.

16                   **COMMISSIONER STEVENS:** I agree with staff.

17                   **CHAIRMAN ARGENZIANO:** Okay. On 126 we may  
18 need to separate depending on -- on a separate vote. So  
19 staff, do you want to -- Commissioner Skop, did you have  
20 a comment?

21                   **COMMISSIONER SKOP:** Yeah. On 126, I had a  
22 little bit of heartburn, too, the way I was able -- and  
23 I'll let staff introduce the issue, but I had -- I was  
24 trying to get a better handle on where those costs  
25 should line up, and talking to my aide, who used to be

1 the Commission's fuel expert, he basically convinced me,  
2 along with staff, that 126 is putting the costs in the  
3 right place. I was very skeptical, but better minds  
4 prevailed in that one. So --

5 **COMMISSIONER STEVENS:** Madam Chair?

6 **CHAIRMAN ARGENZIANO:** That's not any insult to  
7 Bill, but that's your opinion. Sorry. Commissioner  
8 Stevens. I'm just fooling with you.

9 **COMMISSIONER STEVENS:** I also had some  
10 questions on this, and staff talked to me, and I  
11 appreciate their response and I agree with staff on this  
12 issue.

13 **CHAIRMAN ARGENZIANO:** Well, I'm uncomfortable,  
14 so, staff, do you want to talk to me? Because I'm  
15 like -- I want to know about being able to look at the  
16 prudence, the prudence issue --

17 **MR. PRESTWOOD:** Okay. Issue 126 deals with  
18 hedging costs related to fuel and the fuel adjustment  
19 clause. In this issue, we are -- the company is  
20 proposing to move cost from the fuel adjustment clause  
21 back into base rates, and that is because the fuel  
22 adjustment clause is primarily for the cost of fuel  
23 itself. Hedging is basically salaries, it's people that  
24 do the work of hedging fuel costs and contracts and so  
25 forth. It's more of an administrative function.

1           And staff -- the company as well as staff  
2 believes this really belongs back in base rates. That  
3 way, the fuel adjustment clause is really dealing with  
4 the fluctuation of fuel costs and not dealing with  
5 year-to-year salary increases and so forth that the  
6 hedging staff group deal with. So --

7           **CHAIRMAN ARGENZIANO:** Commissioner Skop.

8           **COMMISSIONER SKOP:** Actually, I may have to go  
9 the other way on this one. I need to get a little bit  
10 more clarification, because I think that staff said  
11 something just there. I understand that the salaries  
12 are more of a base rate -- excuse me, a rate base  
13 component, but as far as reviewing the prudence of  
14 hedging costs that my colleague, Chairman Argenziano,  
15 raised, I can see that point, because, again, that's  
16 come up in the annual fuel clause proceeding and there's  
17 been the hedging plan and guidelines that the  
18 Commission's approved and, you know, so we're taking a  
19 look at that, and I look at OPC's position and they're  
20 saying that maybe they ought to be in the same place.

21           So how do you -- you know, I understand the  
22 head count issue and the salary issue, but that doesn't  
23 go to prudence, you know, the transaction cost, the  
24 hedging, what they're doing, whether they're following  
25 the plans. If we just hide that in the rate base, how

1 are you going to be able to look at that on an annual  
2 basis?

3 **MR. PRESTWOOD:** With all due respect, I look  
4 at it the other way. I tend to not favor -- favor less  
5 costs being put into the adjustment clauses because  
6 they're not automatic, although they get less scrutiny  
7 each year, and increases, decreases, so forth, are  
8 passed on through the fuel adjustment clause, whereas if  
9 they're left in base rates, it basically requires a rate  
10 case to change those costs. So, you know, if staff  
11 receives raises, bonuses, et cetera, and they're higher  
12 than they were the year -- this year when we established  
13 base rates, then they have to come back in to recover  
14 those costs. If they're in the fuel adjustment clause,  
15 they're passed on.

16 **COMMISSIONER SKOP:** Okay. Well, let's talk  
17 about it a little bit more.

18 I can understand that the head count would be  
19 pretty much a fixed cost, and so we know that is, and  
20 that component of hedging cost might be appropriate, or  
21 more appropriately included in the rate base. What  
22 about the transaction cost related to hedging, gains or  
23 losses on hedging, where is all that picked up?

24 **MR. PRESTWOOD:** That's in fuel.

25 **COMMISSIONER SKOP:** That stays in fuel, is

1 that what you're telling me, that stays in fuel?

2 **MR. PRESTWOOD:** Yeah. This is the --

3 **MR. WILLIS:** Commissioner, that is correct,  
4 that stays in fuel.

5 **COMMISSIONER SKOP:** So the prudence of that  
6 can still be reviewed.

7 **MR. WILLIS:** The prudence of what they do in  
8 hedging stays in fuel.

9 **COMMISSIONER SKOP:** Okay. Then I'm  
10 comfortable with this.

11 **MR. PRESTWOOD:** This is the incremental  
12 hedging cost --

13 **COMMISSIONER STEVENS:** It's the difference  
14 between incremental and the actual.

15 **CHAIRMAN ARGENZIANO:** Okay, gotcha. Okay.  
16 That helped tremendously. Thank you.

17 **MR. PRESTWOOD:** And I failed to mention that  
18 there's also another one of those forecast update in  
19 this adjustment as well, too, so -- which we also are  
20 recommending be adopted.

21 **CHAIRMAN ARGENZIANO:** Okay. Commissioners?  
22 Okay, let's move on, then, to 128.

23 **MR. PRESTWOOD:** 128 would normally be a  
24 fallout issue, but there is also a forecast update  
25 that's made part of this. We are -- this particular

1 forecast update is different from the rest of the ones  
2 that we've been talking about. For the most part, the  
3 forecast updates have really been corrections to the  
4 filing that came to the attention of the company as they  
5 went through and made their adjustments.

6 This particular adjustment is -- has to do  
7 with insurance. It's called NEL insurance. It deals  
8 with nuclear liability. During the case, the company  
9 got some information that they may not be receiving what  
10 is equivalent of a dividend in future years. It's  
11 speculation at this point, in our opinion, whether they  
12 will or they won't. It's certainly not a known item,  
13 and we don't recommend that this particular forecast  
14 item be accepted. We think this is an attempt to  
15 actually update the forecasted data. And the rest of  
16 the issue is a fallout.

17 **CHAIRMAN ARGENZIANO:** Okay. Commissioner  
18 Skop?

19 **COMMISSIONER SKOP:** Madam Chair, I would just  
20 suggest if my colleagues are comfortable, we can go  
21 through from issue 91 and start trying to make some of  
22 the motions, and I think that would leave us with issue  
23 103, but maybe we can leave the fallout issues for the  
24 end.

25 **COMMISSIONER STEVENS:** Could you --

1           **CHAIRMAN ARGENZIANO:** Hang on.

2           **COMMISSIONER STEVENS:** If I could,  
3 Commissioner?

4           **CHAIRMAN ARGENZIANO:** Commissioner Stevens.

5           **COMMISSIONER STEVENS:** Thank you. I would be  
6 okay with going through 97, but I'd like to hold 100 and  
7 103 for sure.

8           **COMMISSIONER SKOP:** Absolutely.

9           **COMMISSIONER STEVENS:** Okay.

10          **CHAIRMAN ARGENZIANO:** And are you talking  
11 about going past where we are now --

12          **COMMISSIONER SKOP:** No.

13          **CHAIRMAN ARGENZIANO:** -- and taking these --  
14 okay, let's do that, then.

15          **COMMISSIONER SKOP:** Why don't we just get the  
16 initial ones?

17          **CHAIRMAN ARGENZIANO:** Okay.

18          **COMMISSIONER SKOP:** Move to approve the staff  
19 recommendation for issue 91, 92, 93, 94, 95, 96 and 97,  
20 noting that part B of those items, if they exist, may be  
21 moot.

22          **COMMISSIONER STEVENS:** Second.

23          **CHAIRMAN ARGENZIANO:** Any discussion? All in  
24 favor, say aye.

25                 (Chorus of ayes.)

1                   **CHAIRMAN ARGENZIANO:** Opposed, same sign.

2                   (No response.)

3                   **CHAIRMAN ARGENZIANO:** Show that approved.

4                   Commissioner Skop.

5                   **COMMISSIONER SKOP:** Okay. I think that brings

6 us to issue 100, which we may want to take up

7 separately if --

8                   **CHAIRMAN ARGENZIANO:** Yes, we are going to

9 hold on 100.

10                  **COMMISSIONER SKOP:** Are we going to move

11 beyond that for like one oh --

12                  **CHAIRMAN ARGENZIANO:** Yes.

13                  **COMMISSIONER SKOP:** All right. So I'd then

14 move to approve the staff recommendation on issues 101

15 and 102, noting that part B of those may be moot also,

16 if it's applicable.

17                  **COMMISSIONER STEVENS:** Second.

18                  **CHAIRMAN ARGENZIANO:** Any discussion? All

19 those in favor, say aye.

20                  (Chorus of ayes.)

21                  **CHAIRMAN ARGENZIANO:** Opposed, same sign.

22                  (No response.)

23                  **CHAIRMAN ARGENZIANO:** Show that approved.

24 Let's move on. Commissioner Skop, do you have a motion?

25                  **COMMISSIONER SKOP:** Motion would be then to

1 approve the staff recommendations on issue 106, 107 and  
2 108, noting that again if there is part B and it's  
3 applicable, it may be moot.

4 **CHAIRMAN ARGENZIANO:** Okay.

5 **COMMISSIONER STEVENS:** Second.

6 **CHAIRMAN ARGENZIANO:** Any discussion? All  
7 those in favor, indicate aye.

8 (Chorus of ayes.)

9 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

10 (No response.)

11 **CHAIRMAN ARGENZIANO:** The motion is adopted.  
12 Okay.

13 **COMMISSIONER SKOP:** And then I believe that  
14 takes us to 116-A, move to approve staff recommendation  
15 on 116-A.

16 **COMMISSIONER STEVENS:** Second.

17 **CHAIRMAN ARGENZIANO:** Any discussion? All  
18 those in favor, say aye.

19 (Chorus of ayes.)

20 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

21 (No response.)

22 **CHAIRMAN ARGENZIANO:** Approved. And if we can  
23 go to, if you want to, 121 --

24 **COMMISSIONER SKOP:** 121, okay. Move to  
25 approve the staff recommendation on issues 121, 122,

1 124, 125, 126, and we'll stop at 126 for now.

2 **COMMISSIONER STEVENS:** Second.

3 **CHAIRMAN ARGENZIANO:** Any discussion? All in  
4 favor, say aye.

5 (Chorus of ayes.)

6 **CHAIRMAN ARGENZIANO:** Opposed, same sign.

7 (No response.)

8 **CHAIRMAN ARGENZIANO:** Show that approved. And  
9 now do -- Commissioner Stevens, do you want to go back  
10 to 100 now?

11 **COMMISSIONER STEVENS:** At the pleasure of the  
12 Chair.

13 **COMMISSIONER SKOP:** I need to ask staff in  
14 terms of -- that's why I stopped at 128, because do  
15 changes in salary and employee benefits under 100 and  
16 103 impact issue 128?

17 **MR. PRESTWOOD:** Yes.

18 **CHAIRMAN ARGENZIANO:** Okay, so that's a good  
19 place to stop.

20 (Transcript continues in sequence with  
21 Volume 2.)
