Case Background

On January 13, 2010, Gulf Power Company (Gulf) filed a petition for approval of its standard interconnection agreement for non-export, parallel operators and associated tariff sheets 9.115-9.122. The non-export agreement, if approved, would be applied to customers that install and operate electric generators of 10 megavolt-amperes (MVA) or less that may operate in parallel with Gulf's distribution system (13.2 kV and less). These generators are used to offset all, or a portion, of the customer's electricity requirements or as back-up generation in the event of an electrical service outage. Finally, customers must ensure that the generators are in compliance with national safety standards, the National Electrical Code, state and local building codes, mechanical codes, and electric codes.
