Re: Docket No. 090402-WS; Application for Increase in Water and Wastewater Rates
in Seminole County by Sanlando Utilities Corporation.
Our File No.: 30057.183

Dear Ms. Cole:

This letter supplements the responses of Sanlando Utilities Corporation (the "Utility" or the "Company"); filed with the Clerk on February 16, 2010, in response to Staff's First Data Request dated January 26, 2010. Staff requested the following information to complete its review of the Utility's application:

17. On MFR Schedule B-7, page 2 of 2, the salaries have increased by \$232,612 or 55.56 percent for Accounts 601 and 603 since 2005. In prior Utilities, Inc. (UI) cases, UI cited customer growth and increased revenues as the justification for adding several new customer support employees, both in the state of Florida as well as positions in Northbrook, IL whose salaries were allocated to UI's subsidiaries.
 - (a) Due to the recent sale of UI systems (including, but not limited to, Miles Grant, Wedgefield, and a large subsidiary in North Carolina) which should cause a decline in UI's revenues please explain why no reductions to salaries have been made.
 - (b) Please provide all the Utility's support justifying its salary increases since 2005. At a minimum, please include in your response each employee's name, title, salary amount for all direct employees, gross salary amount and allocated salary amount for all indirect employees, and a detailed

description of the duties and responsibilities of all direct and allocated personnel employed in 2005 and those employed in 2008. Please include an explanation and a detailed support for any new direct or allocated salary employees and provide support for any salary increases from 2005 to 2008 for existing direct and allocated salary employees that are still employed by UI in 2008.

RESPONSE: As an initial matter, it should be noted that total salaries reflected on MFR Schedules B-7 and B-8 have decreased since the filing of the MFRs in this matter. Attached hereto is a schedule revising MFR Schedules B-7 and B-8, lines 1-3, with information current as of February 9, 2010. In support of these revised salaries, attached hereto are the workpapers supporting said salaries, including names, positions and employment details of all employees included in this filing.¹ Also attached hereto are the workpapers supporting the original salaries as reflected in the MFR Schedules B-7 and B-8, filed on September 30, 2009.²

Actual operator salaries have increased over the years. This increase is attributable to several reasons. First, the Company gives a standard cost of living increase to its employees on an annual basis. Second, the adjustment in 2008 has been annualized to account for full year salaries of all personnel allocated to the utilities. Annualizing is a normal practice in determining revenues and expenses for a full test year. Third, between 2003 and 2007, six new positions were created within the Company, including a regional vice president serving the Florida and South regions, a business manager serving the same, a cross connection specialist, an operator, and a part-time operator, all of whom are allocated to various Florida companies. These new employees alone account for much of the difference between 2005 and 2008. The Utilities' current annual operator expense is not unreasonable to efficiently run water and wastewater systems the size of Sanlando and UI's other Florida systems. In fact, if these were stand-alone systems, it would be difficult to run them efficiently and effectively for this amount of money. These companies benefit by being among a group of well-run systems in Florida.

Environmental, safety and regulatory requirements have increased significantly in recent years. Cross connection is a mandated DEP rule; the new cross connection specialist position reflects the requirements of this rule. The necessity of weekend

¹ A portion of these workpapers will be filed with a notice of intent to request confidential classification pursuant to Rule 25-22.006(3).

Page 3

checks, also mandated by the DEP, in order to maintain the Companies' operating permits fulfilled the need for more full time operators. All the positions currently held at our utilities help maintain the integrity and the efficient operating status of the plant. Finally, the Company created a regional vice president position ("RVP"), as well as a business manager and safety and compliance manager position.

Additionally, the leadership structure of UI has been streamlined to provide better service. Prior to the creation of the RVP, field operations staff all reported to the Regional Director ("RD"), who in turn reported directly to the chief operating officer ("COO") in Northbrook, IL, who had direct responsibility for operations in 15 states. The customer service staff reports through a different chain of command, and is now all kept at the WSC level. The size of operations in Florida, the wide area of responsibility for the COO, and the greater demands on the operating staff dictated the need for a leadership position with primary focus on the Florida region. The RVP position was created, and all Florida operations were consolidated into one functional area within the individual located in the regional office to direct and manage the increased demands at the local level. The business manager position was also created to assist the RVP in making strategic decisions for the respective region. Please note that the RVP and business manager position for Florida oversee both the Florida and South regions of the Company. The RVP and business manager duties include:

- Developing a strategic plan for the region which entails looking out long term at the supply, resources, and demand conditions and formulating plans to meet those needs.
- Establishing annual and long term goals and measures to focus operations on meeting the balanced needs of customers, regulators, shareholders, and employees.
- Establishing annual capital plans and operating budgets to improve the cost effectiveness of operations.
- Developing the business case and securing the resources from the parent company to meet the regional needs of the Florida and South regions.
- Bringing together field operations and customer service and providing the tools to improve the level of service to the customer.
- Providing additional resources and focus to regulatory compliance and safety within the organization.

The safety and compliance manager position was created to stay abreast of and to ensure compliance with the increasing local, state, and federal regulations governing the

Ann Cole, Commission Clerk
Office of Commission Clerk
Florida Public Service Commission

Page 4

delivery of safe and reliable water, wastewater, and reuse in both the Florida and South regions. The Company owns and manages over 400 water and wastewater facilities, well sites, and lift stations in the state. In addition, the position is responsible for employee safety and training. Given the level of responsibility and the importance of the duties, the safety and compliance manager reports directly to the RVP. Specific duties include:

- Developing and implementing new processes to ensure compliance with all regulations impacting company operations.
- Maintaining an understanding of all new regulations to determine the impact on the Company and developing plans to meet new or revised requirements.
- Monitoring all monthly tests and reports.
- Coordinating the development and distribution of the annual CCR reports and any customer notifications regarding water quality.
- Developing and implementing a cross connections control program state-wide in accordance with regulatory requirements.
- Serving as the primary point of contact for the regulatory agencies responsible for compliance and following up on any issues to ensure timely completion and closure.
- Performing local safety inspections and training.
- Providing reports to senior management to demonstrate compliance with company policies and environmental regulations.

The Company has been able to reduce its Florida office expense over the past four years due to more efficient practices and the combining of some positions. Also, the Florida office now performs many duties for the South region, as the office in Louisiana has closed. Therefore, certain regional costs, including Florida office salaries, are now allocated to the South region as well.

Corporate office salaries have increased over the years. However, there have been several needs of the Company that have required this increase. Generally speaking, Utilities, Inc. was in a growth period between 2003 and 2007. Total revenues in 2007 were \$107,492,665. Compared to 2003 total revenues of \$78,242,046, that represents growth of over \$29,250,000 (approximately 37%) in four years. In addition, the Corporate office was understaffed for a number of years, and due to the growth in the Company, the 2003 through 2008 time period was a good time to increase staffing to an adequate level to keep the corporate level of the business running efficiently. It is

Ann Cole, Commission Clerk
Office of Commission Clerk
Florida Public Service Commission
February 23, 2010
Page 5

important to note that while several new positions were created, the Company also terminated some positions, determining that these positions were not required for the Company to run its business in an effective manner. The new positions created include:

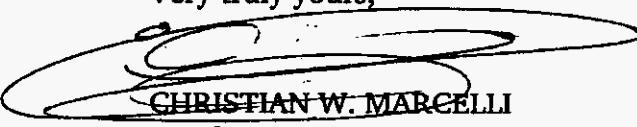

- Corporate operations director - reports to the COO, manages projects in the corporate office, and ensures that the maintenance in the corporate office is done, as well as making sure the office meets building code requirements, etc.
- Corporate customer service and billing manager - manages all billing in the new CC&B system, performs refunds, tracks A/R.
- A/P manager - with the increase in revenue comes increased expenses, an A/P manager was needed to oversee the A/P clerks and to ensure timely paying of bills, etc.
- Billing specialist - due to the increased customers, a second billing specialist was required to make rate changes, track customer billings, bill customers, etc.
- A/P clerks - increased Company expenses and growth required more A/P clerks to ensure that bills are paid on time.
- Capital projects accountant - position created to track capital projects, assist with budgeting; works directly with RDs, RVPs, business managers, and safety and compliance managers.
- Accounting managers - the Company's structure in accounting did not have a manager to oversee month end closings, accruals, various entries, etc; part of a new reporting structure in accounting.
- Fixed asset accountants - hired to track assets in the new accounting system, ensure correct depreciation rates, perform retirement and depreciation entries.
- Accounting and regulatory administrative assistant - assists these two departments with pulling invoices, photocopying, calling vendors, and other various duties upon request.
- Payroll manager - with the increase in employees, the need for a payroll manager surfaced.
- IT specialist - as the Company's headcount increased, an additional IT specialist was needed to address related issues.
- Safety coordinator - works directly with safety and compliance coordinators in the field to ensure regulatory requirements, necessary tariff changes, etc.

February 23, 2010
Page 6

-
- Tax accountant - specialized position created in order to help with tax returns, annual reports, deferred tax entries, and other accounting needs related to tax
 - Systems specialist - created to assist with specific IT systems needs, specifically Microsoft packages
 - Corporate counsel - created to help with general legal issues of a growing company and to work with attorneys in the states in which the Company operates. Also leads any lawsuits or legal issues the Company may have at any given point in time
 - Business development director - specifically in charge of seeking out acquisitions and divestments
 - Director of governmental affairs - part of the regulatory department, helps with relations with Commissions, consumer advocates, customers, and other Company employees; keeps up on rules and regulations affecting rate cases
 - Director of strategic planning - helps with streamlining expenses in operations, assists with budgeting and operations management
 - Operations analyst - assists with overall operations management.

Should you or the Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

CHRISTIAN W. MARCELLI

Total Salary and Benefit Increase since 2005 5.23%

While salaries and benefits have gone up since 2005, the total increase since 2005, based on the updated salary w/p, is only 5.23 overall%. Divestments and current employees were taken into account in both the original salary w/p, and the adjusted salary w/p. Please see both the original and updated salary workpapers supplied in response to the data request. Several new positions have been created since 2005. Please see the file showing all new positions.

The Company has also changed its allocation method to reflect an ERC allocation basis only, which has changed some of the percentages allocated to UI affiliates. Some companies have seen increases due this method; however several companies have also seen decreases.
