Re: Docket No. 090402-WS; Application for Increase in Water and Wastewater Rates in Seminole County by Sanlando Utilities Corporation.  
Our File No.: 30057.183

Dear Ms. Cole:

Enclosed for filing in the above-referenced docket is the response of Sanlando Utilities Corporation (the "Utility") to Staff's second data request dated March 10, 2010. Staff has requested the following information in order to complete its analysis in the above-referenced docket.

It is the Utility's burden to justify its requested costs. By letter dated November 22, 2007, pursuant to Rule 25-30.436(6), F.A.C., the Utility through counsel provided their final actual rate case expense incurred for Docket No. 060258-WS. The total rate case expense for WSC employees was \$32,503. In Order No. PSC-07-0205-PAA-WS, the Utility was allowed \$40,007 or 975 hours for WSC employees. In the current rate case, the Utility is requesting 2,200 total hours for WSC employees. This is a 226% increase in hours for WSC employee hours from 2006.

COM

1. Please explain what is so significant in this current rate case compared to Sanlando's last rate case causing the need for the 226% increase in WSC employee hours.

**RESPONSE:** There are a few significant factors in the current rate case, apart from inflation, that have contributed to the 226% increase in the amount for WSC employees. As Staff and Commission are aware, the issues involved in each rate case are unique. Some of the unique costs include the Utility's time in investigating and responding to Staff's October 13, 2009 letter regarding a potential show cause proceeding. The Utility had to acquire a bond to secure interim rates (which is more expensive than a corporate undertaking). Like in the previous rate case, the Office of Public Counsel ("OPC") has intervened, which suggests more requests for information and time spent responding thereto than in proceeding without OPC intervention.

The Utility is also more accurately capturing the costs associated with the rate case. Previously the Utility did not capture the time spent by the billing department (for implementing rate changes, prorating calculations, reviewing and mailing customer notices, etc.). This is demonstrating by a comparison of the Schedule B-10 filed in each docket. In Docket 060258-WS, the Utility's Schedule B-10 only included the activities of seven WSC employees and was limited in the rate case activities it listed. The Utility's Schedule B-10 in the current proceeding lists sixteen employees reflecting a broader range of rate case activities. The Utility is now able to include these activities with the time entry portion of JDE, and as a result, these costs are now being captured. The same is true of mailroom clerks and administrative assistants. Moreover, the Utility has also made an effort to perform all audit facilitation in house to minimize temporary and consultant services.

Lastly, the Utility would like to point out that these are estimates to complete the rate case. The 226% figure is a comparison of *actual* rate case expense and *estimated* rate case expense. Since the Utility is limited to its estimated rate case expense, it must make reasonable estimates based on what *may* happen given the history of the system's prior cases and current circumstances. Staff and the Commission will then analyze what *actually* happened in the docket when considering the amount of rate case expense to allow. In sum, the estimated rate case expense and actual rate case expense are based on completely distinct sets of assumptions and therefore are not reasonably comparable.

2. Again, by letter dated November 22, 2007, pursuant to Rule 25-30.436(6), F.A.C., the Utility through counsel provided their final actual rate case expense incurred for Docket No. 060258-WS. The total rate case expense for expenses and fees related to notices, mailings, and other was \$9,902. In Order No. PSC-07-0205-PAA-WS, the Utility was allowed \$16,249 for customer notices. At that time, there were four mailings for 10,108

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 3

---

customers. In the current rate case, the Utility has only 46 more customers, totaling 10,154 customers and only three mailings. The Utility is requesting \$20,063 for customer notices, postage, copies, and stock. There is only a half of a percent increase in the number of customers with only three mailings compared to four mailings in the last rate case. Please justify and provide documentation for the need of such a large increase in fees related to customer notices for this current rate case when the total for the 2006 rate case only amounted to \$9,902.

**RESPONSE:** The Utility made a calculation error in its rate case expense estimate. The Utility assumed four notices instead of three in its original estimate and inadvertently overlooked changing the number of notices when the update was provided. Additionally, the Utility took the average of the number of bills mailed to water customers throughout the course of the test year instead of Staff's 10,154 customer count.

The Utility calculated the \$17,520 as follows:

(Number of Total Bills from MFR Schedule E-3/12 months) = number of approximate notices to get mailed out\*4 notices\*the price of a stamp at the time of \$0.44 =  $(122,228/12)*4*0.44 = \$17,519.34$ .

The Utility calculated the \$2,143 as follows:

(Number of Total Bills from MFR Schedule E-3/12 months) = number of approximate notices to get mailed out\*4 notices\*the approximate price of envelope =  $(122,228/12)*4*0.0526 = \$2,143.06$ .

The Utility used four notices from the last rate case in its original estimate, not the three mentioned in Staff's Second Data Request. This is because at the outset of a rate case, the Utility must assume that four notices will be mailed. It should have updated this count to three notices when the Initial Customer Notice and Notice of Interim Rates were able to be combined. The Utility also unintentionally used the regular postage rate of \$0.44 per mailed item instead of the Utility's presorted rate at 0.357 per item mailed. The adjustment would be a reduction of \$6,644.41 for customer notices, postage (calculation follows) and a reduction of \$540.76 for customer notices, stock.

$$(10,154)*3*0.357 = \$10,874.93; \$17,519.34 - \$10,874.93 = \$6,644.41$$
$$(10,154)*3*0.0526 = \$1,602.30; \$2,143.06 - \$1,602.30 = \$540.76$$

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 4

---

Listed on MFR Schedules B-5 and B-6, the Utility reports adjusted total annual transportation expense of \$76,326 for water and \$59,727 for wastewater.

3. Please provide documentation for the following items relating to the 2008 test year transportation expenses:
  - (a) How much of those costs were for fuel?
  - (b) What were the total number of fuel gallons purchased?

**RESPONSE:** The Utility's MFRs recorded per books transportation expenses of \$84,081 for water and \$65,294 for wastewater. Of these amounts, \$99,520.41 was booked to the fuel account (object account 6215) of the Utility's books. The remaining adjustment of \$(13,777) is explained in the attached workpaper titled, "Sanlando Transportation Adjustment."

The Utility cannot determine the total gallons of fuel purchased for Sanlando Utility Corp. because Utilities, Inc. (the Utility's parent) utilized GE Capital Fleet to manage its entire fleet, but recently the Company has switched vendors. Customarily, Utilities, Inc. would receive the allocated amounts from a GE Fleet report along with their invoice. GE would provide an accounting of the costs by state cost center, which were then booked appropriately. Please see the attached GE Fleet invoices with division report in the attached item titled, "GE Fleet Invoices.pdf". At that point, the state cost center would allocate the costs based on ERC percentage. A breakout has been supplied for the November allocation in the included MS Excel file titled "Allocation Example.xlsx" to better illustrate the flow of the transportation costs (see enclosed data disc).

4. Regarding the Utility's Project Phoenix, please explain why the Utility decided to implement Project Phoenix as opposed to upgrading the Utility's Legacy billing system. Please provide any cost/benefit analyses associated with this decision.

**RESPONSE:** UI's legacy customer care and billing system was fully customized and no longer supported by the original sole source software vendor. The individual who developed the billing system was physically unable to maintain the system any longer. Consequently, there was an inability to upgrade the legacy system to meet current and future business requirements or to be assured that the billing system could provide reliable

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 5

---

performance. It was originally installed in 1987, and in the 20 years since, had received limited updates and revisions. The system had numerous weaknesses including:

- Customer and premise information were linked in one account. As residents moved and terminated service, the service order history at the original premise was purged making prior service activities unavailable for use by accounting, regulatory, and operations staff. This resulted in the permanent loss of valuable information.
- Field personnel did not have direct access to the legacy billing system. Instead, they were sent daily service orders, typically by fax transmission that was then carried into the field, notations made on it, then faxed back to Customer Service. The data was then entered and the service order closed. This process required service orders to pass through multiple hands in a time consuming process before the service order was completed. There was also a significant time lag between each step.
- Because the process was manually intensive, it led to untimely responses due to incomplete fax transmissions and other frequent delays. Service orders that were not promptly completed resulted in increased customer dissatisfaction and complaints with the process.
- As customers moved from one premises to another within a given service area, or from one subsidiary to another, they were issued a new account number with each new premises location. The legacy billing system did not offer a means of tracking specific customers and transferring payment information, service history, deposits and billed services (current balance) from one account to another in a seamless fashion.

CC&B allows the Utility to focus on either a customer, a premises or both. Field activity information at a premises is stored in the records indefinitely, allowing field personnel to retain prior history of past service issues at a specific location. This allows staff to analyze site-specific maintenance and repair activity as well as aggregate data from a larger area. This provides an opportunity to cost effectively determine whether to repair or replace equipment or lines at a premise or to address systemic or chronic problems throughout the neighborhood. In addition, CC&B automates field activities in many ways. A background process makes key decisions regarding the timing and distribution of field activity assignments. CC&B simplifies the uploading and downloading to hand-held devices. The system allows the field operators to complete field activities in a real time environment so that Customer Service Representatives ("CSRs") have the information available to them as soon as the order is completed.

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 6

---

The CC&B system has several other improvements when compared to the legacy system. For instance, the billing estimation function is improved. It now includes a three-tiered process that incorporates customer history from the previous year's consumption for the same time period, trends customer history for the last three to six months, and trends data from the customer's trend area (CIS Division) and trend class (Residential and Commercial). In addition to the billing estimation function, the system also provides for the automatic proration of billings based on number of days in a read period or bill period. This functionality has streamlined bill proration issues that handicapped the issuance of bills in the past.

CC&B also allows for the automated dispatching of Field Orders and Field Activities to operators for a more timely response to customer and service issues. The system allows for an efficient means of billing customers who have one account, but more than one premises. It offers the means to link one bill consumption data for separate water and reuse meters at the same premise. It offers a consumption history chart on each bill to illustrate the trailing 12 months' usage pattern.

CC&B allows CSRs to have access to more customer history and information to better answer customer questions by providing both a history of meter reads and a history of billings. In comparison, the Legacy system only held the previous twelve months' data. Field staff now has real time access to customer premise and service point information as well as meter data and meter readings.

The system allows account numbers to stay with the customer for life. This gives the Utility the ability to track a customer from location to location. The system produces randomly generated account numbers, which has reduced the number of misapplied payments caused by data entry errors. CC&B provides CSRs with an enhanced screen display that aids the CSRs in resolving customer account, service, and billing issues. The Legacy system required moving from one screen to another.

CC&B features an automatic collections and severance process which reduces input errors, and as a result accidental disconnections for a customer for non-payment have been greatly reduced. It supports multiple bill payment options and offers the opportunity to implement additional payment options for the benefit of the customers. And finally, updates to the system are real time with respect to the completion of field activities, customer payments, adjustments and customer information. Both CSRs and field staff are

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 7

---

able to terminate severance activity upon real time posting of payment resulting in fewer customers have their service cut off for non-payment.

There have been many advantages and improvements to Utilities, Inc. and its subsidiaries since the implementation of Project Phoenix, and there are many more that will be realized over time, but, at this point it is difficult to determine the quantifiable cost savings and benefits because the system is still being acclimated to all aspects of the Utility. Utilities, Inc. is developing a series of metrics to be used to assess and evaluate customer service activities.

5. How long was the Utility's Legacy billing system in service before being replaced by the Phoenix Project?

**RESPONSE:** The legacy billing system was in service for 21 years (1987 to 05/31/2008).

6. Please provide staff with the allocation percentages relating to the Phoenix Project for Miles Grant Water and Sewer Company, Wedgefield Utilities, Inc., and the North Carolina system before they were sold.

**RESPONSE:** The allocation percentages related to Project Phoenix would have been determined as of December 31, 2007. The system went live on December 2, 2007, and the closest allocation period would be the end of that December. Please see the attached file titled "December 2007 Allocations" for the allocation percentages for all companies regarding the costs for Project Phoenix (equally distributed based off of ERCs). Specifically, the percentages for Miles Grant Water and Sewer Company and Wedgefield Utilities, Inc. were 0.747% and 1.056%, respectively.

7. Please provide staff with the allocation percentages relating to the Phoenix Project for any other system divested by Utilities, Inc. since January of 2008.

**RESPONSE:** **RESPONSE:** The following companies have been sold since the implementation of Project Phoenix:

Ann Cole, Commission Clerk

Utilities, Inc. of Hutchinson Island	261	108	11/09/2009
Wedgefield Utilities, Inc.	247	69	11/18/2009

The attached allocation schedule titled "September 30 2009 Allocation Percentages" shows the ERCs as of September 30, 2009, and also includes any divestments the company has made above. If, however, Staff is requesting the ERC percentages at the time Project Phoenix went live, that information is supplied as part of the Utility's response to Item No. 6, above.

8. The following questions relate to the insurance solicitation (see attachment) that Utilities, Inc. has been mailing to its customers on behalf of Technology Insurance Company:
  - (a) Were the insurance solicitations mailed to all Utilities, Inc. customers in Florida or were they mailed to customers in other states as well?
  - (b) How often are the insurance solicitations mailed to Utilities, Inc. customers?
  - (c) To date, how many customers have signed up for the insurance?
  - (d) Does Utilities, Inc. receive any compensation from Technology Insurance Company? If so, how much?
  - (e) What are the expenses associated with mailing out the insurance solicitations?

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 9

---

- (f) How much administrative time does it take Utilities, Inc. to mail the insurance solicitations?
- (g) Which Utilities, Inc. employees prepare and mail the insurance solicitations?
- (h) What is the relationship between Utilities, Inc. and Technology Insurance Company?
- (i) If any of the Utilities, Inc. customers have a claim with Technology Insurance Company, who performs the repair work?

**RESPONSE:**

- (a) The insurance solicitations were mailed to all Utilities, Inc. customers in all states in which Utilities, Inc. provides service.
- (b) The solicitations are mailed by Home Service USA quarterly to Utilities, Inc. customers.
- (c) Eighty (80) customers of Sanlando Utilities Corporation have signed up for the service as of March 15, 2010.
- (d) Utilities, Inc. does not receive compensation from Technology Insurance Company ("TIC"). Instead, TIC's parent corporation, Home Service USA, pays Utilities, Inc. a percentage of premiums paid.
- (e) Utilities, Inc. does not incur any expenses with mailing out the solicitations.
- (f) Utilities, Inc. spends at most approximately one hour per month in administrative time in connection with Home Service USA's mailings.
- (g) Utilities, Inc. does not have any employees that prepare or mail the solicitations.
- (h) Utilities, Inc. has a contractual relationship with Home Service USA (the parent of TIC).
- (i) Home Service USA contracts a plumber or contractor to perform any necessary repair work. None of the work is performed by Utilities, Inc. employees.

RE: Quality of service concerns brought up at the February 23, 2010, Sanlando Utilities Corporation customer meeting and recent correspondence: (Customer James Millett, 3983 Lancashire Lane) Meter boxes at the Wekiva Hunt Club Condominiums are off grade and need to be addressed by the utility. Mr. Millett has also had difficulties with contacting an appropriate utility representative to plan for service visits, as well as obtaining customer support coordination over problems that may be the customer's responsibility. Staff has seen the condition of at least two meter boxes at Wekiva Hunt Club Condominiums that are significantly off grade.

9. Please answer the following questions relating to quality of service.
  - (a) What is the utility's policy concerning meter box locations?
  - (b) What is the Utility's policy in responding to customer concerns over leaks?
  - (c) What is the usual response time between a customer's call about leaks and the Utility's site visit in response to the call?
  - (d) Also, what is the Utility's policy regarding support given to customers to help reduce any additional costs for problems that may be the customer's responsibility?

RESPONSE:

- (a) The Utility typically places meter boxes at finished grade, within a Utility easement, often just outside the road right-of-way, and adjacent to the customer's lot line. In the case of Mr. Millett's concerns at the Wekiva Hunt Club Condominiums, two adjacent meter boxes were found to be above grade due to the growth of tree roots from an adjacent tree that pushed up the two boxes on one side. The two boxes were recently reset to finished grade after removing the conflict. A third meter box, not associated with the first two, was also found to be situated with the top sticking above the surrounding ground. This third meter box was also reset to grade recently. All of the other meter boxes in the complex are set up in banks of four that reflect the grouping of the condo buildings in groups of four. All of the other meter boxes were found to be at proper grade.

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 11

---

- (b) Whenever a customer contacts the Utility to report a water or sewer leak, it is customary to respond within one business day to investigate the report, determine the extent of the leak, and identify whether the Utility or customer has ownership of the problem. Customer calls are noted in CC&B based on the premise address for future reference.
- (c) The Utility normally responds to all reported leaks within one business day, if not sooner. If a leak is reported after normal business hours, on weekends, or on holidays, it is customary to respond within 24 hours. But also taking into consideration the description of the leak, its location, manpower constraints, or other pertinent factors, the Utility may delay a response to the next business day.
- (d) If the Utility's investigation indicates that a leak is the customer's responsibility, Utility personnel will communicate with the customer, either verbally or by door hanger, that the customer is responsible for making repairs. The Utility does not offer plumbing services and does not typically make repairs to customers' plumbing except in the case where Utility personnel may have to make repairs to the Utility's water or sewer infrastructure at the point of connection. If the leak is the Utility's responsibility, then repairs are done at that time or scheduled appropriately.

RE: In the Utility's February 5, 2010 response to Mr. Stein's correspondence concerning a leaking gate valve near the intersection of N. Marcy Drive and E.E. Williamson Road, the Utility indicated that it is making an effort to locate repair parts.

10. What is the current status of this valve? If it is still leaking, when will it be replaced or fixed?

RESPONSE: The gate valve located on the northwest corner of E.E. Williamson Road and N. Marcy Drive continues to leak. It is scheduled to be replaced on or about April 5, 2010. This coincides with the beginning of Seminole County School Board's scheduled spring break. The valve replacement will require a scheduled outage of Woodlands Elementary School in addition to approximately two dozen customers due to the configuration of the distribution system and the location of the nearest isolation valves. The school has been notified that an outage will occur. A boil water advisory will be issued to the school and affected customers due to the outage. Water samples will be collected and analyzed after the work is completed. The small amount of water lost in the intervening time period

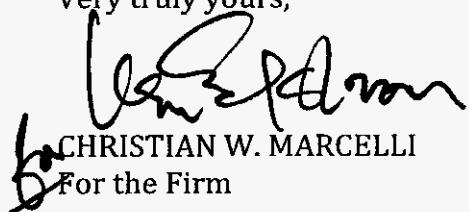

Ann Cole, Commission Clerk  
Office of Commission Clerk  
Florida Public Service Commission  
March 22, 2010  
Page 12

---

because of the leaking valve does not warrant an outage that would cause the elementary school to be without water service for an extended time period. The valve replacement will be done by Utility staff.

Should you or the Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

CHRISTIAN W. MARCELLI
