testimony concerning this matter; and (4) allow for such other purposes as the Commission may deem appropriate. This additional hearing is scheduled for one day. Any additional hearing dates may be announced by the Commission at the hearing. *Please note that the Thursday, April 15, 2010, additional hearing date has been rescheduled to Monday, May 3, 2010.*

The proceedings will be governed by the provisions of Chapter 120, F.S., Section 403.519, F.S., and Chapters 25-22 and 25-106, Florida Administrative Code (F.A.C.).

Under Section 403.519, F.S., the Commission is the sole forum for the determination of need for the proposed electrical power plant. In making its determination, the Commission must take into account the need for electric system reliability and integrity, the need for fuel diversity and supply reliability, the need for adequate electricity at a reasonable cost, and whether the proposed plant is the most cost-effective alternative available. In addition, the Commission must expressly consider any renewable energy sources and technologies or conservation measures taken by or reasonably available to GRU and GREC which might mitigate the need for the plant. The Commission may consider other matters within its jurisdiction which it deems relevant. The Commission's determination of need for the proposed plant shall create a presumption of public need and necessity. An order entered by the Commission pursuant to this hearing shall constitute final agency action and shall serve as the Commission's report required by section 403.507(4), F.S.

Only limited supplemental testimony relating to the need for the renewable energy electrical power plant will be heard at the May 3, 2010, additional hearing. Separate public hearings may be held before the Division of Administrative Hearings at a later date to consider environmental and other impacts of the proposed plant and associated facilities.

Members of the public who are not parties to the need determination proceeding will have an opportunity to present public testimony regarding the need for the proposed plant. All members of the public who wish to offer testimony should be present at the beginning of the hearing, 9:30 a.m., Monday, May 3, 2010. All witnesses will be sworn in and will be subject to cross-examination at the conclusion of their testimony. By providing public testimony, a person does not become a party to the proceeding. Anyone wishing to become a party to this need determination proceeding should file an appropriate petition pursuant to Rule 25-22.039, F.A.C., with the Office of the Commission Clerk at the address listed below. Copies of the petition should be sent by mail to all parties. Those wishing to intervene in these proceedings, unless appearing on their own behalf, must be represented by an attorney or other person who can be determined to be a qualified representative pursuant to Chapter 120, F.S., and Rule 28-106.106, F.A.C. Petitions for leave to intervene must be filed at least five (5) days before the final hearing, must conform with Rule 28-106.201(2), F.A.C., and must include allegations sufficient to demonstrate that the intervenor is entitled to participate in the proceeding as a matter of

constitutional or statutory right or pursuant to Commission rule, or that the substantial interests of the intervenor are subject to determination or will be affected through the hearing.

Written comments regarding the need for the expansion of the proposed plant and associated facilities may be sent to the Commission at the following address:

GENERAL LOCATION AND PROJECT DESCRIPTION

GRU and GREC LLC propose the construction of one new unit, to be known as the Gainesville Renewable Energy Center, which will consist of a nominal 100 megawatt (MW) net capacity steam unit designed to use clean woody biomass as its fuel supply. The plant will be located on GRU's existing Deerhaven Power Plant site within the City of Gainesville's corporate limits in Alachua County, Florida. The projected in-service date for the Gainesville Renewable Energy Center is December 1, 2013. The unit will be owned and operated by GREC LLC. GRU will receive power from the unit under a 30 year power purchase agreement with GREC LLC. All of the generation capacity from the unit will be committed to GRU for retail sale to its customers.
