Dear Governor Crist and Public Service Commissioners:

As Florida residents, Florida Power and Light customers and a shareholder, we second the attached suggestion.

In fact, I will go a step further and request that the PSC and Florida legislators quickly find a way to make Feed-in-Tariffs a viable part of FPLs energy generation as has been already so successfully implemented in Gainesville, FL, cloudy Germany and now, Ontario, Canada - in just months! I was wondering where FPL, Progress Energy and Florida's government intended to get the Billions of \$ to fund, subsidize and loan guarantee new nuclear plants that Wall Street won't touch as too risky?

After this oil disaster from an energy source that promised they could handle mishaps, how on earth can we trust the nuclear industry? The truth is we do NOT need more dirty, hazardous and costly energy from big corporate centralized sources.

We can do what is already working to create JOBS, a thriving business community and a sustainable renewable plan to re-energize Florida with distributed solar power provided by customers from the grassroots up! I suggest you check out www.farenergy.org for more great ideas.

Dear Governor Crist and Public Service Commissioners,

I am writing with a suggestion regarding the disposition of the \$14M that FPL has been ordered to refund its customers. The lump sum would go a long way toward renewable energy advancement in the state as compared with the estimated \$0.14 per month refund to the individual customer. Would it be possible for FPL to survey their customers, through the normal monthly billing statements, whether they would be willing to donate their refunds to this cause?

Thank you for your consideration of my request,

Rhonda
