Re: Docket No. 100157-EG
Staff's First Data Request

Dear Ms. Fleming:

Enclosed are JEA's Responses to Staff's First Data Request (Nos. 1-18) in the above docket. I have also enclosed a disc with an electronic version of the excel spreadsheets referenced in JEA's responses.

If you have any questions, please give me a call.

Very truly yours,

HOPPING GREEN & SAMS, PA.

RESPONSES TO STAFF'S FIRST DATA REQUEST (NOS. 1-18)

DOCKET NO. 100157

PAGE 1

1. Please provide, on an individual program basis, the following tables and forms included in the Company's petition. Please provide an electronic copy in Excel (.xls file format).
 - a. Program Participation Values
 - b. Program & Individual Measure Savings @ the Meter
 - c. Program & Individual Measure Savings @ the Generator
 - d. PSC Form CE 1.1 (Financial Assumptions)
 - e. PSC Form CE 2.3 (Total Resource Cost Test)
 - f. PSC Form CE 2.4 (Participant Costs and Benefits)
 - g. PSC Form CE 2.5 (Rate Impact Measure Test).

Response to Data Request No. 1

Appendix DR-1a thru DR-1g and Attachment DR on the enclosed disk contains the completed table as requested.

2. Please provide, on an individual program basis, the cumulative projected savings over the period 2010 through 2019. As part of this response, please also provide the percentage of the Commission's Authorized Goals and the Company's proposed demand and energy savings met by the program. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 2

Appendix DR-2 and Attachment DR on the enclosed disk contains the completed table as requested.

3. Please provide, on an individual program basis, the cumulative net present value of expenditures required over the period 2010 through 2019. Please indicate the type of expenditure, separating them into categories including administrative, marketing, equipment, operations & maintenance, and incentives/rebates to customers. As part of this response, please also provide the percentage that each category represents of the total program expenditures. Indicate the first year rate impact of these expenditures, percentage of the total Energy Conservation Cost Recovery Clause for the first year of these expenditures, and any lost revenues associated with the program. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 3

FPPC-COMMISSION CLERK

RESPONSES TO STAFF'S FIRST DATA REQUEST (NOS. 1-18)

DOCKET NO. 100157

PAGE 2

Appendix DR-3 and Attachment DR on the enclosed disk contains the completed table as requested.

4. Please provide, on an individual program basis, the results of the E-TRC, E-RIM, and Participants Tests. Include the cumulative net present values of all benefits and costs. As part of this response, please provide the payback period for each program. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 4

E-RIM, E-TRC and related Participant Tests were not performed by JEA and therefore are not available. As previously stated in the Rebuttal Testimony of Richard J. Vento dated July 30, 2009 (Docket 080413-EG) "Greenhouse gases are not currently regulated at either the State or Federal level and there currently are no costs imposed on the emissions of greenhouse gases. While there is much speculation on the potential for greenhouse gas emissions regulation, JEA does not believe it is appropriate to establish DSM goals that would increase customer rates based on speculation related to yet-to-be defined potential regulations of emissions of greenhouse gases."

5. Please provide, for each program, a list of measures associated with that program. For programs with varying incentives by device or installation, please represent each as a separate 'measure' within the program. For Audit Programs, assume that any equipment provided or installed (such as Compact Fluorescent Light Bulbs) are a separate 'measure,'

Response to Data Request No. 5

Appendix DR-5 and Attachment DR on the enclosed disk contains a list of all measures with their respective programs.

6. Please provide, for each measure identified by the criteria above, the cumulative projected savings over the period 2010 through 2019. As part of this response, please also provide the percentage of the Commission's Authorized Goals and the Company's proposed demand and energy savings met by the measure. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 6

Appendix DR-6 and Attachment DR on the enclosed disk contains the completed table as requested.

7. Please provide, for each measure identified by the criteria above, the cumulative net present value of expenditures required over the period 2010 through 2019. Please indicate the type of expenditure, separating them into categories including administrative, marketing, equipment,

RESPONSES TO STAFF'S FIRST DATA REQUEST (NOS. 1-18)

DOCKET NO. 100157

PAGE 3

operations & maintenance, and incentives/rebates to customers. As part of this response, please also provide the percentage that each category represents of the total measure expenditures. Indicate the first year rate impact of these expenditures, percentage of the total Energy Conservation Cost Recovery Clause for the first year of these expenditures, and the lost revenues associated with the measure. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 7

Appendix DR-7 and Attachment DR on the enclosed disk contains the completed table as requested.

8. Please provide, for each measure identified by the criteria above, the results of the E-TRC, ERIM, and Participants Tests. Include the cumulative net present values of all benefits and costs. As part of this response, please also provide the payback period for each measure. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 8

E-RIM, E-TRC and related Participant Tests were not performed by JEA and therefore are not available. As previously stated in the Rebuttal Testimony of Richard J. Vento dated July 30, 2009 (Docket 080413-EG) "Greenhouse gases are not currently regulated at either the State or Federal level and there currently are no costs imposed on the emissions of greenhouse gases. While there is much speculation on the potential for greenhouse gas emissions regulation, JEA does not believe it is appropriate to establish DSM goals that would increase customer rates based on speculation related to yet-to-be defined potential regulations of emissions of greenhouse gases."

9. Please provide, for each measure identified by the criteria above, the incentive rate provided and the estimated customer equipment cost. Indicate the amount of non-recurring expenses by category, including administrative, equipment, and incentives/rebates to customers. As part of this response, please also provide the rate for recurring expenses by category. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 9

Appendix DR-9 and Attachment DR on the enclosed disk contains the completed table as requested.

10. Please complete the following table regarding the Company's Avoided Unit selected for purposes of program development and cost-effectiveness testing. Include the unit's seasonal capacity, technology type, primary fuel, and commercial in-service date. Please also provide financial data

RESPONSES TO STAFF'S FIRST DATA REQUEST (NOS. 1-18)

DOCKET NO. 100157

PAGE 4

sufficient to calculate the avoided cost of the unit, including its capital and operations & maintenance cost. In addition, please indicate the avoided energy rate utilized for energy savings in programs. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 10

For the purposes of program development, during the ten year period from 2010-2019 JEA did not have an avoided unit; therefore, there is no avoided unit information to enter into the table.

11. Please complete the following table regarding the Company's projected customer rates for non-fuel energy rates and demand that are utilized in the Company's cost-effectiveness tests. Please complete the table below and provide an electronic copy in Excel (.xls file format) with the hard copy response.

Response to Data Request No. 11

Appendix DR-11 and Attachment DR on the enclosed disk contains the completed table as requested.

12. Please complete the following table regarding the Company's estimations of line loss utilized in the estimation of generator savings. As part of this response, please indicate the values used for residential and commercial customers separately. Please complete the table below and provide an electronic copy in Excel (.As file format) with the hard copy response.

Response to Data Request No. 12

Appendix DR-12 and Attachment DR on the enclosed disk contains the completed table as requested.

13. Please describe how costs associated with CO₂ Emissions are included in the Company's cost-effectiveness tests. As part of this response, please provide the annual cost assumed per ton of carbon dioxide equivalent, and the projected emission rate per megawatt-hour. Please indicate if there is any difference between these values and the values provided in the Commission's review of numeric conservation goals dockets.

Response to Data Request No. 13

As previously stated in the Rebuttal Testimony of Richard J. Vento dated July 30, 2009 (Docket 080413-EG) "Greenhouse gases are not currently regulated at either the State or Federal level and there

RESPONSES TO STAFF'S FIRST DATA REQUEST (NOS. 1-18)

DOCKET NO. 100157

PAGE 5

currently are no costs imposed on the emissions of greenhouse gases. While there is much speculation on the potential for greenhouse gas emissions regulation, JEA does not believe it is appropriate to establish DSM goals that would increase customer rates based on speculation related to yet-to-be defined potential regulations of emissions of greenhouse gases." These costs were not included and therefore consistent with the numeric conservation goals docket.

- 14. Please describe how the savings from conducting energy audits are calculated. As part of this response, please provide the percentage difference between savings associated with any equipment provided or installed (such as Compact Fluorescent Light Bulbs), and other sources.**

Response to Data Request No. 14

The calculated savings for JEA's energy audits are included in our response to SACE's First Production Of Documents (Attachment POD-1). JEA does not claim any savings from any energy efficiency measures as part of the audit although we do recommend that customers look for the energy star label especially where no premium initial costs are incurred such as televisions and various other electronic products. JEA's main focus is education we strive to promote no cost conservation measures (behavioral) such as reduced water heater settings, washing with cold water, optimal HVAC thermostat settings, proper use of ceiling fans, use of the dishwasher's "manual dry" setting, optimal freezer/refrigerator temperature settings, management of plug (vampire) loads, management of computer, monitor & printer loads, management of lighting systems, use of a clothes line for manual drying where possible, proper use of shades & curtains to reduce cooling & heating loads and the cleaning of heat exchanger surfaces (refrigerator & AC) are encouraged.

- 15. Please explain or describe any tax rebates that may be available to customers during the 2010 through 2019 period for installation of any measures discussed in response to questions 6-9 above, including energy efficiency and customer-owned renewable generation. As part of this response, please include the associated program name, specific measure, and expiration dates as appropriate for each tax rebate, and whether the rebate was included in cost-effectiveness tests.**

Response to Data Request No. 15

The only known eligible tax credit for submitted measures is solar water heating & solar net metering. The tax credits (state & federal) were included during the initial screening process with Itron but they are not included in JEA's final program analysis because of their uncertainty and because our reasoning is not based on cost effectiveness. We are promoting solar based on the needs of our community.

RESPONSES TO STAFF'S FIRST DATA REQUEST (NOS. 1-18)

DOCKET NO. 100157

PAGE 6

16. Regarding photovoltaic panels for schools, please explain or describe the difference in ownership of the solar facility between this program and other customer-side renewable energy installations. Please indicate when ownership would be transferred to the school. Also, please discuss anticipated maintenance costs over the life of the photovoltaic panels.

Response to Data Request No. 16

Photovoltaic systems for schools are not in our proposed portfolio.

17. Please explain or describe the impact of other state or local programs that provide renewable generation to emergency shelters or other facilities that may offset, reduce the cost, or be an alternate source of funding for photovoltaic systems for schools designated as an emergency shelter.

Response to Data Request No. 17

Photovoltaic systems for schools are not in our proposed portfolio.

18. For each program for which modifications have been proposed in 2010, please describe the specific modification(s) made to the program and the reason for each modification. As part of this response, please provide the savings estimates associated with the program prior to the proposed modifications.

Response to Data Request No. 18

No prior goals for JEA, this is our first proposed portfolio.

DOCKET NO. 100157

PAGE 64

Appendix DR-11

| Retail Rates | |
|----------------------------------|-------|
| Non-Fuel Energy Rate (cents/kWh) | 5.33 |
| Escalation Rate | 1% |
| Commercial Rates | |
| Non-Fuel Energy Rate (cents/kWh) | 7.332 |
| Escalation Rate | 1% |
| Demand Rate (\$/kW/month) | 7.97 |
| Escalation Rate | 1% |

The escalation rates used in the economic model are estimated values. JEA does escalate rates until a cost of service study supports the need to so.
