Subject: New municipal gas system

GS067 *effective 7-1-10*

Beaches Energy Services is a municipal Electric utility which will, as of this month, start selling natural gas to their first customer. They are in need of a company code so that will be able to receive a regulatory assessment fee form next January. Our safety engineers are already performing inspections on the company's pipeline construction. Would you please assign a Gas Safety Company code for this municipal gas company. They already have a electric utility code. All of the contact information is the same as for the electric company below.
