Subject: Teco Approval

Dear Commissioner Skop,

Hello sir, my name is Greg Bo, I am a representative of Bo's Coating. (State roofing License # CCC1329245) We are a roofing company trying to assist our future customers, your citizens, with affordable, renewable, green, technology for their properties. The reason I am writing you Commissioner, is because as we all know with the economic struggles, Floridians are seeking financial incentives to assist them in updating their property for energy efficiency. One of the main ways we help Floridians in this matter is in the "Cool Roof" program, in which we have installed over three million

FPSC-COMMISSION CLERK

square feet for Florida's commercial and commercial residential properties in the last two years.

This letter is to request information concerning the status of Teco's (Tampa Electric) approval for their Energy-efficiency programs for their customers. According to Teco's web site (see below) they are awaiting the approval from the Florida Public Service Commission. Currently; we have several potential customers who are not updating their properties for energy efficiency because they are waiting on this approval to financially assist them in their endeavors. Furthermore, we also have employees that are out of work, because we too are waiting for these incentives to take affect to further pursue these jobs. If you could please contact and inform me as to the status of this approval, I would highly appreciate it. I know we are all trying to make Florida a greener and cleaner place for Americans, and also create and keep jobs. Please let me know what I personally can do to assist you in any way.

Also below is a link to a two minute presentation by secretary of energy Steven Chu which will better explain what we are doing.
