Ann Cole – Director – Office if Commission Clerk:

Renewable Choice Energy is certified to sell its Renewable Energy Certificates (RECs) by the Center for Resource Solutions' Green-e program. A REC is a tradable commodity representing 1 MWh of energy generated from a renewable source. As a part of the Renewable Choice reporting requirements to Green-e, this letter is to inform you of 2009-2010 REC purchases Renewable Choice Energy made from Okeelanta Generation Facility in South Bay. Renewable Choice Energy only purchased the RECs. Under rules for Green-e Certification, we have to notify the regulatory board that we purchased the following RECs.

Generator Name:	Okeelanta Generation Facility		
Number of RECs:	8,000	MWh	Period Generated: July – December 2009

Sincerely,

Byron Blankenhorn  
Director of Finance
