Tallahassee, Florida 32399

Sterling Planet is authorized by the Center for Resource Solutions' Green-e Energy program to sell certain of its Renewable Energy Certificates (RECs)/renewable electricity as Green-e Energy Certified. A REC is a tradable commodity representing the environmental attributes of 1 MWh of electricity generated from a renewable source. As part of Sterling Planet's reporting requirement to Green-e Energy, this letter is to inform you of electricity generated by U.S. Sugar Clewiston Mill located in Clewiston, FL in CAL10 that was sold to Florida Power and Light. The electricity was provided to Florida Power and Light without the environmental attributes, while the associated RECs were purchased by Sterling Planet and then sold to a third party. Under the rules of Green-e Energy, Sterling Planet must notify relevant regulatory authorities that Sterling Planet sold the RECs associated with the generation for which Florida Power and Light purchased the power.

Generator: U.S. Sugar Clewiston Mill  
Number of RECs: 152,540  
Period Generated: CAL10  
Purchaser of RECs: Sterling Planet  
Purchaser of Power: Florida Power and Light

If you have any questions feel free to call me.

Sincerely,

Rob Henry  
Director, Renewable Energy Supply
