Hello Mike,

Our funding for this year is very limited so we cannot pay to connect many folks this year. Next year's funding starts July 2011 (hopefully we will be funded) and we should move forward with connections at that time.

I was just notified that Alturas Elementary School has some PWS type problems they will have to address. What is the cost to provide service to them? Not sure exactly what size meter will be needed but I guess a 2" meter.

I will check with them to see if they will accept a connection.

Thank you,

Charles

Dear Charles,

Using the list of names you emailed to me, My manager and I did a street by street, address by address inspection of the utility and found the following:

Name and address with water line adjacent or across the street that can be connected:

1. patrick frankenburger- 2205 oak dr.
2. alturas elementary school- corner of central & 4th.
3. fulton-cole-620 oak dr.
4. josefa cavazos-2190 oak dr.
5. andrew talley- 2621 oak dr.
6. john serdenski-2900 oak dr.
7. r.e. stevens-3150 central ave
8. lou & cindy stevens-3150 central ave.
9. martha underwood-3102 central ave.
10. ted serdynski-2195 oak dr.
11. jeanie tilley-3190 central ave
12. carl hielscher-2555 oak ave
13. current resident-2120 hurley
14. merlin or evelyn hielscher-125 magnolia

the following customers can be hooked up with a main line extension of 90' or less.

1. paul warren-2984 central
2. nick mauel-2980 central
3. allen voight-3070 central
4. john byrd-2920 central
5. sara popoca-2890 central ave
6. bonnie lynn-2940 central ave
7. mike riddle-2970 central ave.
8. tim griner-3101 central ave.
9. scott barnes-2960 central
10. ellie& brenda mole-2990 central ave.
11. john allen smith-3040 central ave
12. wanda young-2905 central.

I hope this helps. Of course I am a utility owner who is always willing to hook up new customers. please let me know how we can get this done.

Charles, I spoke with the folks at Polk county schools regarding hooking up the Alturas school to our system and they want to proceed with doing so. What do you want me to do next? Please advise.

That sounds good. I would suggest to have the contractor bid on removing all equipment and the a separate bid for removing everything except the carbon filter system (the 2 large filter tanks and all piping that connects them). Depending on what they bid to remove the filter system we may have our filter contractor remove the system. The equipment we will not touch is the pressure tank chlorinator and any other system type equipment.

Thanks

Charles

Hi Charles, I am having a contractor prepare a bid for you. As soon as I recieve the bid I will forward it to you. We just didnt know about the existing equipment that is currently on site.

Should I have the contractor submit a bid for removal of the existing equipment on a seperate bid?

let me know your preference.

Mike Smallridge

Mr. Smallridge,

We never received details about the connection. From what you sent I assume the County is paying for all costs for the connection. We can only pay if we have details and issue a Purchase order before the work is done.

Our filter contractor can remove the existing filtration system after the connection is made or depending on details we may be able to hire someone else (Your contractor?) to remove it. Again, we can only assist if we know of what is going on before the work is done.

Thank you,

Charles

Hi David,

I meet with the contractor doing the work to hook up the alturas School and he wanted me to ask you if he needed to make removing the current equipment that is on site a part of his bid or do you guys handle that internally? we are unsure as to owns the equipment or if it is leased or rented?

Please let me know when you can and the contractor can finish his bid.

Thanks

Hello Mike,

The attached shows a total cost but it also lists things that are not included. It looks like the work estimate is for the waterline work and the GAC tank removal.

We need an estimate that shows all costs required for the complete new water service. We would also like to see the cost breakdown for the work listed.

Thank you,

Charles
