

PROGRESS ENERGY FLORIDA

DOCKET No. 110001-EI

GPIF Targets and Ranges for January through December 2012

**DIRECT TESTIMONY OF
ROBERT M. OLIVER**

September 1, 2011

DOCUMENT NUMBER: 0470

06330 SEP-1 =

FPSC - COMMISSION CLERK

- 1 Q. **What is the purpose of your testimony?**
- 2 A. The purpose of my testimony is to provide a recap of actual reward /
3 penalty for the period of January through December 2010 and also to
4 present the development of the Company's GPIF targets and ranges for
5 the period of January through December 2012. These GPIF targets and
6 ranges have been developed from individual unit equivalent availability and
7 average net operating heat rate targets and improvement/degradation
8 ranges for each of the Company's GPIF generating units, in accordance
9 with the Commission's GPIF Implementation Manual.
- 10
- 11 Q. **What GPIF incentive amount was calculated for the period January**
12 **through December 2010?**
- 13 A. PEF's calculated GPIF incentive amount for this period was a penalty of
14 \$2,980,090. Please refer to my testimony filed March 15, 2011 for the
15 details of how this incentive amount was calculated.
- 16
- 17 Q. **Do you have an exhibit to your testimony in this proceeding?**
- 18 A. Yes, I am sponsoring Exhibit No. ____ (RMO-1P) which consists of the
19 GPIF standard form schedules prescribed in the GPIF Implementation
20 Manual and supporting data, including unplanned outage rates, net
21 operating heat rates, and computer analyses and graphs for each of the
22 individual GPIF units. This 76-page exhibit is attached to my prepared
23 testimony and includes as its first page an index to the contents of the
24 exhibit.

1 **Q. Which of the Company's generating units have you included in the**
2 **GPIF program for the upcoming projection period?**

3 A. For the 2012 projection period, the GPIF program includes the following
4 units: Bartow Unit 4, Crystal River Units 4 and 5; and Hines Units 1
5 through 4. Combined, these units account for 82% of the estimated total
6 system net generation for the period. Bartow 4 was included even though
7 it has only 25 months of commercial history since it accounts for 19% of
8 generation.

9

10 **Q. Have you determined the equivalent availability targets and**
11 **improvement/degradation ranges for the Company's GPIF units?**

12 A. Yes. This information is included in the GPIF Target and Range Summary
13 on page 4 of my Exhibit No. ____ (RMO-1P).

14

15 **Q. How were the equivalent availability targets developed?**

16 A. The equivalent availability targets were developed using the methodology
17 established for the Company's GPIF units, as set forth in Section 4 of the
18 GPIF Implementation Manual. This includes the formulation of graphs
19 based on each unit's historic performance data for the four individual
20 unplanned outage rates (i.e., forced, partial forced, maintenance and
21 partial maintenance outage rates), which in combination constitute the
22 unit's equivalent unplanned outage rate (EUOR). From operational data
23 and these graphs, the individual target rates are determined through a
24 review of three years of monthly data points during the three year period.

1 The unit's four target rates are then used to calculate its unplanned outage
2 hours for the projection period. When the unit's projected planned outage
3 hours are taken into account, the hours calculated from these individual
4 unplanned outage rates can then be converted into an overall equivalent
5 unplanned outage factor (EUOF). Because factors are additive (unlike
6 rates), the unplanned and planned outage factors (EUOF and POF) when
7 added to the equivalent availability factor (EAF) will always equal 100%.
8 For example, an EUOF of 15% and POF of 10% results in an EAF of 75%.

9 The supporting tables and graphs for the target and range rates are
10 contained in pages 41-76 of my exhibit in the section entitled "Unplanned
11 Outage Rate Tables and Graphs."

12
13 **Q. Please describe the methodology utilized to develop the
14 improvement/degradation ranges for each GPIF unit's availability
15 targets?**

16 A. The methodology described in the GPIF Implementation Manual was used.
17 Ranges were first established for each of the four unplanned outage rates
18 associated with each unit. From an analysis of the unplanned outage
19 graphs, units with small historical variations in outage rates were assigned
20 narrow ranges and units with large variations were assigned wider ranges.
21 These individual ranges, expressed in term of rates, were then converted
22 into a single unit availability range, expressed in terms of a factor, using
23 the same procedure described above for converting the availability targets
24 from rates to factors.

1
2 **Q. Were adjustments made to historical unit availability to account for**
3 **significant anomalies in the historical period?**

4 A. No.

5
6 **Q. Have you determined the net operating heat rate targets and ranges**
7 **for the Company's GPIF units?**

8 A. Yes. This information is included in the Target and Range Summary on
9 page 4 of my Exhibit No. ____ (RMO-1P).

10
11 **Q. How were these heat rate targets and ranges developed?**

12 A. The development of the heat rate targets and ranges for the upcoming
13 period utilized historical data from the past three years, as described in the
14 GPIF Implementation Manual. A "least squares" procedure was used to
15 curve-fit the heat rate data within ranges having a 90% confidence level of
16 including all data. The analyses and data plots used to develop the heat
17 rate targets and ranges for each of the GPIF units are contained in pages
18 26-40 of my exhibit in the section entitled "Average Net Operating Heat
19 Rate Curves."

20
21 **Q. Were adjustments made to historical heat rates to account for**
22 **estimated net output changes associated with scrubber and SCR**
23 **installations?**

1 A. Yes. Historical heat rates for Crystal River units 4 and 5 were restated as
2 if the scrubbers and SCRs were in place during the historical data period
3 prior to the in-service dates of the scrubbers and SCRs.

4

5 **Q. Please describe the overall impact of the adjustment on the Crystal**
6 **River Units 4 and 5 heat rate targets.**

7 A. The adjustment raised the heat rate targets, making the targets higher
8 than if using the unadjusted historical average.

9

10 **Q. How were the GPIF incentive points developed for the unit availability**
11 **and heat rate ranges?**

12 A. GPIF incentive points for availability and heat rate were developed by
13 evenly spreading the positive and negative point values from the target to
14 the maximum and minimum values in case of availability, and from the
15 neutral band to the maximum and minimum values in the case of heat
16 rate. The fuel savings (loss) dollars were evenly spread over the range in
17 the same manner as described for incentive points. The maximum
18 savings (loss) dollars are the same as those used in the calculation of the
19 weighting factors.

20

21 **Q. How were the GPIF weighting factors determined?**

22 A. To determine the weighting factors for availability, a series of simulations
23 was made using a production costing model in which each unit's maximum
24 equivalent availability was substituted for the target value to obtain a new

1 system fuel cost. The differences in fuel costs between these cases and
2 the target case determine the contribution of each unit's availability to fuel
3 savings. The heat rate contribution of each unit to fuel savings was
4 determined by multiplying the BTU savings between the minimum and
5 target heat rates (at constant generation) by the average cost per BTU for
6 that unit. Weighting factors were then calculated by dividing each
7 individual unit's fuel savings by total system fuel savings.

8

9 **Q. What was the basis for determining the estimated maximum incentive
10 amount?**

11 A. The determination of the maximum reward or penalty was based upon
12 monthly common equity projections obtained from a detailed financial
13 simulation performed by the Company's Corporate Model.

14

15 **Q. What is the Company's estimated maximum incentive amount for
16 2012?**

17 A. The estimated maximum incentive for the Company is \$19,755,160. The
18 calculation of the estimated maximum incentive is shown on page 3 of my
19 Exhibit No. ____ (RMO-1P).

20

21 **Q. Does this conclude your testimony?**

22 A. Yes, it does.

Progress Energy Florida

PLANNED OUTAGE SCHEDULES

Progress Energy Florida
Period of: January 2012 - December 2012

<u>Plant/Unit</u>	<u>Planned Outage Dates</u>	<u>Reason for Outage</u>
Bartow 4	03/03 (0001) - 03/18 (2400)	Balance of Plant
Bartow 4	11/17 (0001) - 12/21 (2400)	Balance of Plant, Hot Gas Path A&B, Turbine Valve
Crystal River 5	10/06 (0001) - 11/09 (2400)	Balance of Plant, Turbine Valve, HP Turbine, Generator Rewind
Hines 1	03/17 (0001) - 04/02 (2400)	Balance of Plant, Combustion Inspection B
Hines 1	12/01 (0001) - 12/17 (2400)	Miscellaneous
Hines 2	03/31 (0001) - 04/13 (2400)	Balance of Plant
Hines 2	11/17 (0001) - 12/03(2400)	Miscellaneous
Hines 3	02/11 (0001) - 03/17 (2400)	Major Outage A, Balance of Plant, Turbine Valve
Hines 3	11/17 (0001) - 12/14 (2400)	Balance of Plant, Major Outage B
Hines 4	02/25 (0001) - 04/06 (2400)	Balance of Plant, Hot Gas Path B
Hines 4	11/03 (0001) - 11/18 (2400)	Miscellaneous
