Subject: PBC New Waste incinerator

Good morning. Who do I contact regarding the PSC decision for granting the go ahead for another waste to electricity power plan? I feel that the public, myself included, was left out of the debate on if we the citizens should have this. The whole concept of waste to power is against everything we have learned over the last 20 years of the last incinerator. Where will the incentive be to recycle and reuse our waste go? What will happen to the common sense

energy development like solar and renewables? The cost of this monster will be as much any other energy plant, cause pollution, and turn back years of growth in other technology. The construction jobs will be temporary and partly out of state.

Is it too late to stop the incinerator and give the citizens a second look at what we are getting and loosing and take public comment? Please forward this email to the proper people to read and contact me back on how I may weigh in on this mistake.

Thank you

Greg Paige
