In re: Examination of the outage and replacement fuel/power costs associated with the CR3 steam generator replacement project, by Progress Energy Florida, Inc.

---

DOCKET NO. 100437-EI  
Submitted for Filing: January 9, 2012

**PROGRESS ENERGY FLORIDA, INC.'S JANUARY 9, 2012 STATUS REPORT**

Pursuant to Order PSC 11-0352-PCO-EI, Progress Energy Florida, Inc. ("PEF") files its January 9, 2012 status report in this docket and states as follows:

1. In Order PSC 11-0352-PCO-EI, the Commission stated that:

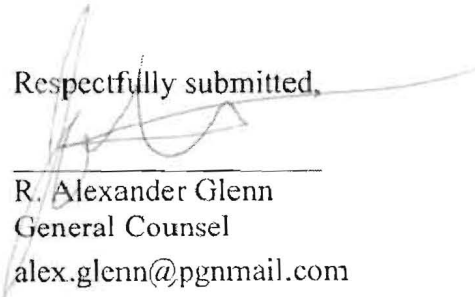

PEF shall file status reports regarding its analysis of the engineering reports, costs, and schedule for completion of the repair, along with updated information regarding the decision to repair versus retire CR3, in accordance with the controlling dates set forth in Section IX of this Order.

PEF shall file status reports regarding the repair of the containment building in accordance with the controlling dates set forth in Section IX of this Order.

2. Following on PEF's November 15, 2011 status update to the Commission, PEF continues to analyze and refine information related to the engineering, costs, and schedule for the CR3 repair and expects to continue this analysis through the first quarter of 2012. Specifically, PEF has received responses to its request for proposals for repair contractors and is currently in the process of analyzing those responses. PEF expects to complete its analysis of these responses by March of 2012. Accordingly, PEF will file a supplement to this status report in March of 2012 detailing this analysis and providing the Commission with further details on the repair analysis.
3. PEF has also taken appropriate actions to maintain the CR3 containment in a safe condition pending further analysis of the engineering, costs, and schedule for the repair.

Since PEF's November, 2011 status update, the physical condition of the CR3 containment has not changed and PEF will continue to update the Commission with any material information that may develop.

Respectfully submitted,

---
