BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for Expedited Review of Growth)   Docket No.
Code Denials by the Number Pooling Administrator)
for the Jacksonville exchange (San Marco))   Filed: October 16, 2012
_____)

PETITION FOR EXPEDITED REVIEW OF CODE DENIAL

BellSouth Telecommunications, Inc. d/b/a AT&T Florida ("AT&T Florida"),

pursuant to 47 C.F.R. § 52.15(g)(iv), Federal Communications Commission ("FCC")

Order FCC 00-104, and Florida Public Service Commission ("Commission") Order No.

PSC-01-1873-PCO-TL, petitions the Commission to review the Pooling Administrator's

("NeuStar") denial of AT&T Florida's requests for additional numbering resources in the

Jacksonville exchange. In support of this petition, AT&T Florida states:

PARTIES

1.   AT&T Florida is a limited liability company corporation organized and

formed under the laws of the State of Georgia and an incumbent local exchange company

("ILEC") authorized to provide local exchange telecommunications service and

intraLATA toll telecommunications service in the State of Florida.

2.   Neustar is an independent non-governmental entity, which is responsible

for administering and managing the numbering resources for requests in Non-Pooling

situations.

JURISDICTION

3.   The Commission has jurisdiction of this matter pursuant to Industry

Numbering Committees (INC) Number Pooling Guidelines Sections 3.7 and 12(c). This

provision provides that a carrier may challenge NeuStar's decision to deny numbering resources to the appropriate regulatory authority.

BACKGROUND AND REQUEST FOR RELIEF

4.   The Jacksonville exchange consists of eighteen (18) switching entities that utilize numbering resources: Arlington (JCVLFLARDS0), Atlantic (JCBHFLABRS0), Avenues (MNDRFLAVDS0), Beachwood (JCVLFLBWDS0), Clay Street (JCVLFLCLDS0), Ft. Caroline (JCVLFLFCDS0), Ft. George (FTGRFLMARS0), International Airport (JCVLFLIARS0), Lake Forest (JCVLFLLFDS0), Loretto (MNDRFLLODS0), Normandy (JCVLFLNODS0), Oceanway (JCVLFLOWDS0), Riverside (JCVLFLRV38E), San Jose (JCVLFLSJ73E), San Marco (JCVLFLSMDS0), San Pablo (JCBHFLSPRS0), Southpoint (JCVLFLJTRSA), and Wesconnett (JCVLFLWCDS0).

5.   On October 11, 2012, AT&T Florida requested additional numbering resources from NeuStar for the San Marco (JCVLFLSMDS0) switch. See Attachment 1. Specifically, AT&T Florida requested a single number block of 1,000 numbers to meet the request of a specific customer. Due to the customer's dialing patterns, the customer needs a specific block in the format of NPA NX4-0,6,7,8,9; NPA NX5-X; or NPA NX6-1,2,7,8,9. Since none of these combinations are available in the numbering pool, AT&T will need to request a full NXX code be opened to meet this request. The remaining 9 blocks will be used for the Jacksonville pool.

6.   At the time of the code request, the Jacksonville exchange had a MTE of 17.22 and a utilization of 59.15%, while the MTE for the San Marco (JCVLFLSMDS0) switch was -40.65 with a utilization of 86%.

2

7.   On October 11, 2012, NeuStar's automated number request system denied AT&T Florida's request for additional numbering resources because AT&T Florida had not met the utilization based criteria, notwithstanding the fact that AT&T Florida is unable to provide the numbering resources requested by the specific customer. See Attachment 1. Pursuant to Commission Order No. PSC-01-1973-PCO-TL, attached to this Petition is the MTE and utilization rate for each switch in the Jacksonville exchange and the customers contact information. See Attachment 2.

8.   As discussed above, both the FCC Order and the INC guidelines provide that state regulatory authorities have the power and authority to review NeuStar's decision to deny a request for numbering resources. See INC Number Pooling Guidelines Sections 3.7 and 12(c).

9.   Under its current procedures, NeuStar looks at the number of MTE and utilization for the entire rate center without exception, regardless of the reason for the request, customer impact or public interest impact. The current process is arbitrary and results in (1) decisions contrary to the public interest and welfare of consumers in Florida; and (2) decisions that do not necessarily promote the efficient use of telephone numbers.

10.   AT&T Florida requests that the Commission reverse NeuStar's decision to withhold numbering resources from AT&T Florida on the following grounds:

(a)   NeuStar's denial of numbering resources to AT&T Florida interferes with AT&T Florida's ability to serve its customers in Florida, and specifically interferes with AT&T Florida's ability to serve its customer identified in Attachment 2.

(b)   The MTE at the rate center level requirement is discriminatory against the incumbent LEC, since the ILEC is typically the only local service provider with multiple

switches in a rate center. The ILEC deploys multiple switches in a rate center in order to meet customer demand for telephone service. The new FCC rules for obtaining numbering resources both penalizes and discriminates against the ILECs for deploying multiple switches. AT&T Florida believes that it is patently unfair to require that the ILEC only get six (6) MTE in all the switches it has deployed in a rate center, when the CLECs, which have recently entered the local service market, have to meet the MTE requirement in only the single switch that they have deployed to serve their customers in a single rate center or even multiple rate centers.
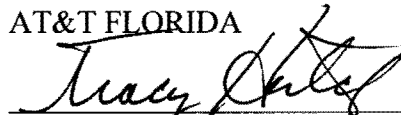

(c)   As a result of NeuStar's denial of AT&T Florida's request for additional numbering resources, AT&T Florida will be unable to provide telecommunications services to its customers as required under Florida law.

WHEREFORE, AT&T Florida requests:

1.   The Commission review the decision of NeuStar to deny AT&T Florida's request for additional numbering resources for the Jacksonville exchange; and

2.   The Commission direct NeuStar to provide the requested numbering resources for the Jacksonville exchange as discussed above.

Respectfully submitted this 16th day of October 2012.
