Re: Partial Response to PSC Staff's Data Request No. 13 dated April 5, 2013
Docket No. 130010 WS; Application for Increase in water rates in Lee County
and wastewater rates in Pasco County by Ni Florida, LLC

Dear Ms. Cole:

Enclosed for filing in the above-referenced docket is a supplemental response of Ni Florida, LLC ("Ni Florida") to Staff's first data requests dated April 5, 2013. Ni Florida is filing herewith its partial response to Request No. 13.

Request: In Order No. PSC-10-0168-PAA-SU in the last rate case, it was noted that the Utility's wastewater collection system in Pasco County had problems with elevated chloride concentrations. Pasco County had identified the Utility as a high chloride source and required it to meet 250 milligrams per liter (mg/l) chloride levels. The Commission determined that the overall quality of service was marginal in the last rate case, because the 250 mg/l chloride level had not yet been achieved. Has the Utility lowered the chloride levels to 250 mg/l or lower? Please provide all data updating the chloride situation at the Utility's Pasco Country wastewater system. This information should include the present chloride compliance status with Pasco County and a breakdown of all improvements made to reduce chloride levels, including dollars spent, since the last rate case. Also, please provide a breakdown of chloride testing results since the last rate case.

Response: Attached is a detailed spreadsheet of chloride readings at every pump station within Ni Florida's Pasco County service territory from 5/27/08 through 4/29/13 using both a stick sample and our newly installed composite samplers. The spreadsheet reflects the weekly chloride levels taken at four separate locations within the service territory.

FPSC-COMMISSION CLERK

RUTLEDGE ECENIA

Pursuant to agreement with PSC Staff, Ni Florida will supplement its formal response to the remaining issues in Request No. 13 on or before May 31, 2013, including a breakdown of all improvements made to the system to reduce chloride levels and the costs of those improvements.

Sincerely,

Martin P. McDonnell
