Ms. Ann Cole, Clerk  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

RECEIVED--FPSC  
13 SEP 25 PM 2:02  
COMMISSION  
CLERK

**Docket No. 130131-EI - Petition for approval of 2013-2015 storm hardening plan, pursuant to Rule 25-6.0342, F.A.C., by Florida Public Utilities Company.**

Dear Ms. Cole:

Enclosed, please find the original and 5 copies of Florida Public Utilities Company's responses to Commission Staff's First Data Requests in the referenced docket.

Thank you for your assistance with this filing. As always, please don't hesitate to contact me if you have any questions or concerns.

FLORIDA PUBLIC UTILITIES COMPANY'S RESPONSE  
STAFF'S FIRST DATA REQUEST  
TO FLORIDA PUBLIC UTILITIES COMPANY (NOS. 1 - 12)  
DOCKET NO. 130131-EI

RE: Docket No. 130131-EI –**Petition for approval of 2013-2015 storm hardening plan, pursuant to Rule 25-6.0342, F.A.C., by Florida Public Utilities Company..**

1. Please refer to page 4 of the updated storm hardening plan. If a pole is rejected and the corrective action is replacement, please explain what material the pole will be replaced with. For example, will FPUC replace a wooden pole with concrete, steel, wood, etc.?

**Response: Replacement of all distribution poles will be completed using wood poles unless there are mitigating circumstances which may, in certain situations, require the use of concrete poles. Mitigating circumstances may include prior woodpecker damage, guying limitations, aesthetics, pole loading, etc.**

2. Please refer to page 5 of the updated storm hardening plan. Please provide the cost savings for eliminating the random sampling pole inspection for the storm hardening plan?

**Response: For both electric divisions, there were approximately 5400 CCA poles inspected during the last three year plan cycle (2010-2012). The random sample size was initially established to be 1% which equates to 54 wooden CCA poles that were to be sampled. Elimination of the random sampling provides savings of approximately \$26 per pole which results in savings of approximately \$1,404 for the 2010 – 2012 inspection period.**

3. Please refer to page 8 of the updated storm hardening plan. Please provide the number of inspections of transmission structures, by year, from 2010-2012, and the projected number of inspections for 2013, 2014 and 2015.

**Response: FPU did not conduct any detailed transmission inspections during 2010 or 2011. Detailed inspections for the entire transmission system were conducted during 2012 and included the 95 – 138 KV structures and 220 – 69 KV structures included in the storm hardening plan. Based on the results of the 2012 inspections and the limited number of**

**transmission structures, there are no detailed inspections planned during the 2013 -2015 time period.**

4. Please refer to page 8 of the updated storm hardening plan. FPUC provides plans to replace 25 – 69 KV wood poles for 2013.

- a. Please provide the estimated costs for replacement in 2014 and 2015?
- b. What is the estimated time until all wooden transmission poles will be replaced with concrete or steel?

**Response:**

- a. **The average replacement cost of the 69 KV wood poles with concrete is approximately \$27,500 per pole. The exact number of 69 KV wood pole replacements planned for 2014 and 2015 is unknown at this time.**
- b. **At this time there are no plans to accelerate the replacement of the wooden transmission poles and the completion date has not been determined.**

5. Please refer to page 10 of the updated storm hardening plan. FPUC states “FPUC will continue to collect outage data for overhead and underground systems in order to evaluate the reliability indices associated with the two systems.”

- a. Please explain what data FPUC currently collects.
- b. Please provide all work papers and documents on this data.

**Response:**

- a. **FPUC utilizes an outage management system that collects data from each outage. This information is completed manually by the employee responding to the outage and includes such items as date, time, cause of outage, overhead/underground, etc. Outage information is then forwarded to the engineering department and is input into the Outage Management System.**
- b. **See Exhibit #SH2 for the information requested.**

6. Please refer to page 10 of the updated storm hardening plan. FPUC states that it plans to have personnel located at the county EOC on a 24 hour basis in the future.

- a. Please state when FPUC plans to follow through with this statement?
- b. Does this mean new employees will be hired in order to fulfill this role?
- c. If new employees are needed for this position, what are the estimated annual salaries for these positions?

**Response:**

- a. **The intent of this procedure is to have company personnel located at the County EOC on a 24 hour basis in the future but only during emergency situations.**
- b. **No. Since this is limited only to emergency situations, personnel from other divisions will be used to provide support to the County EOC.**
- c. **Not applicable.**

7. Please refer to page 12 of the updated storm hardening plan. Please explain in detail how these future installations of distribution facilities will exceed NESC requirements.

**Response: FPU utilizes the Pole Foreman software program to determine the pole and guying requirements at each location in which a new pole is installed. Input values for the Pole Foreman software requires the wind speed for each installation. The Northeast Florida Division uses a 130 MPH wind speed input value and the Northwest Florida Division uses a 120 MPH wind speed input value. These values exceed the NESC requirements of 60 MPH for distribution facilities.**

8. Please refer to page 12 of the updated storm hardening plan. Please explain what work has been completed around substations that will reduce the possibility of wind-blown debris.

**Response:** FPUC has continued the removal of trees around substations, where possible, and purchased property in 2012 which allowed the additional removal of trees. Significant upgrades in the substations have allow upgraded equipment with increased clearance to be installed which should minimize impact from wind borne debris in the substation. Routine inspections of the substations and removal of retired and scrap materials from substations ensure debris does not come from within the substations.

9. Please refer to page 13 of the updated storm hardening plan. Please provide an estimated completion date for projects planned for the 2013-2015 time period.

**Response:**

**2013**

**Malone Feeder #9752 – Estimated Completion 6/30/2014**

**Hartsfield Road Feeder #9922– Estimated Completion 12/31/2013**

**2014**

**Marianna Feeder #9512– Estimated Completion 12/31/2014**

**Laramore Road Feeder #9852– Estimated Completion 12/31/2014**

**Hospital Feeder #215– Estimated Completion 9/30/2014**

**2015**

**Marianna Feeder #9512– Estimated Completion 12/31/2015**

**Lovewood/Lancer Road Feeder #9872– Estimated Completion 12/31/2015**

**Sewage Plant Feeder #214– Estimated Completion 9/30/2015**

10. Please refer to page 14 of the updated storm hardening plan. Please provide the technical detail for section 6.1 when available.

**Response: The technical detail is not available at this time. When development is completed this will be provided.**

11. Please refer to page 15 of the updated storm hardening plan. Please provide the estimated time of completion and cost for each of the projects listed in 6.3.

**Response: See response to Item #9 for estimated completion dates. Estimated cost is shown below.**

**2013**

**Malone Feeder #9752 – Estimated Cost \$610,000**

**Hartsfield Road Feeder #9922– Estimated Cost \$75,000**

**2014**

**Marianna Feeder #9512– Estimated Cost \$175,000**

**Laramore Road Feeder #9852– Estimated Cost \$50,000**

**Hospital Feeder #215– Estimated Cost \$213,500**

**2015**

**Marianna Feeder #9512– Estimated Cost \$225,000**

**Lovewood/Lancer Road Feeder #9872– Estimated Cost \$65,000**

**Sewage Plant Feeder #214– Estimated Cost \$80,000**

12. Please complete the table below:

**Response: See Exhibit # SH1 for the information requested.**

Activity		Actual/Estimated Cost					
		2010	2011	2012	2013	2014	2015
8 Year Wooden Pole Inspection Program		\$84,362	\$148,304	\$131,854	\$116,738	\$155,000	\$160,000
10 Storm Hardening Initiatives							
1	A Three Year Vegetation Management Cycle for Distribution Circuits	\$753,902	\$758,108	\$678,748	\$821,682	\$870,000	\$870,000
2	An Audit of Joint-Use Attachment Agreements	\$0	\$0	\$0	\$0	\$0	\$0
3	A Six-Year Transmission Structure Inspection Program	\$0	\$0	\$151,800	\$0	\$0	\$0
4	Hardening of Existing Transmission Structures *	\$0	\$0	\$0	\$0	\$0	\$0
5	Transmission and Distribution GIS	\$0	\$0	\$0	\$0	\$0	\$0
6	Post-Storm Data Collection and Forensic Analysis	\$0	\$0	\$0	\$0	\$0	\$0
7	Collection of Detailed Outage Data Differentiating Between the Reliability Performance of Overhead and Underground Systems	\$0	\$0	\$0	\$0	\$0	\$0
8	Increased Utility Coordination with Local Governments	\$0	\$0	\$0	\$0	\$0	\$0
9	Collaborative Research on Effects of Hurricane Winds and Storm Surge	\$0	\$0	\$0	\$0	\$0	\$0
10	A Natural Disaster Preparedness and Recovery Program	\$0	\$0	\$0	\$0	\$0	\$0
Total		\$753,902	\$758,108	\$830,548	\$821,682	\$870,000	\$870,000
Any Other Key Elements or Proposed Initiatives							

\* - Hardening cost for existing transmission structures not included since these are capital expenditures.
