Message Body: The time has come to rein in the utility companies. Allowing utilities to pre bill customers for building a plant is crazy and isn't allowed in any other business. Caving in on energy saving is criminal and now to even consider letting them frack for natural gas is lunacy. when is enough going to be enough? Elected officials are supposed to serve their constituents not big business. Florida has become the laughing stock of the country, please stand up and put a stop to this.

Mr. Thomas Lewis  
[tklewis64@verizon.net](mailto:tklewis64@verizon.net)

Dear Mr. Lewis:

The Governor's office forwarded a copy of your email regarding Duke Energy Florida (DEF) to the Florida Public Service Commission (PSC). The PSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the PSC. The PSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond to you.

We will add your comment to the correspondence side of Docket Nos. 130200-EI regarding DEF's numeric conservation goals and 1400009-EI regarding DEF's nuclear cost recovery.

If you have any questions or concerns please call Ellen Plendl at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Randy Roland  
Regulatory Program Administrator  
Florida Public Service Commission

Subject: Please oppose nuclear cost recovery requests

Re: Docket 130009

Please suspend further approval of nuclear cost recovery, as is being considered under Docket 130009. I am a (Florida Power and Light / Duke Energy) ratepayer that has watched my bill creep further upwards, just as the cost of these new nuclear projects has been pushed ever higher and the completion dates pushed ever further into the future. And now the speculative nature of these plans has unfolded as Duke has cancelled both the Crystal River and Levy County reactor projects. Though I think it's best for those projects to be cancelled sooner than later, what's in store now for FPL customers given the proposed Turkey Point reactor project?

Florida's ratepayers need Commissioners that stand up for the public's interests in addition to the needs of the utilities, not just one that "decides what's best" for the public and agrees with whatever bad recommendations the PSC staff offers up. We need more transparency and more consumer protections in these proceedings.

Thank you,

Nicolaas Van vonno

**Subject:** Duke Energy

Your story on the 'advantageous rate change' is not applicable to residential customers and they told me that they will be crediting acct a mere \$5.51 per month starting Jan 2015. This is still unacceptable. I am tired of monopolies on the utility companies; we should be allowed to choose who services our homes.

I had to quit work to stay home as I am my 84y/o mother's caregiver 24/7, so we are living off her income. There are so many people in Florida that live on only Social Security or Disability and sometimes that is nothing. Rates should be considered on the state's income levels, not by politicians or special interest groups.

They even raised my meter surge protection rate and the Homewire basic service rate, they make enough off of the energy charge and fuel charges. This is gouging the customers.

Time for changes and remove the monopoly and let customers have a choice and then these companies would be more competitive.

Thanks  
Sincerely,  
Mary Beth Schepper

Comments:

Could you please explain to me why taxpayers should pay anything to fund an enterprise of a for-profit utility? Why doesn't Duke Energy pay for it's own facilities out of it's own profits? Please explain why I have to pay for their plants when they can afford to pay their executives millions. How are you doing what's best for taxpayers? It seems like you're doing what's best for Duke Energy. Please enlighten me.

September 30, 2014

Chairman Art Graham  
Florida Public Service Commission  
2540 Shumard Oak Blvd.  
Tallahassee, FL 32399-0850

Dear Chairman Graham,

I write this letter today urging the Public Service Commission to refund the \$54 million collected by Duke Energy from the Nuclear Cost Recovery Fee for the Levy County nuclear power plant. This issue is of great importance to the residents of Pinellas County, and the Public Service Commission should strongly support the desires of those residents.

The constituents in my district feel that they have been treated unjustly by Duke Energy, and also by the Public Service Commission. This questions the integrity of our framework because Florida residents feel that their interests are not being represented.

I have announced that I plan to file legislation for the 2015 session that will require regulations on utility providers, as well as create accountability for their actions. I feel that the residents of our community have been mistreated, and want to prevent future occurrences such as this.

This is an opportunity for the Public Service Commission to demonstrate that it operates on behalf of the residents of Pinellas County, as well as the entire State of Florida. I urge the Commission to review all pertinent information related to this specific affair, and to make a decision based upon the best interests of the consumer and not the utility providers.

Kindest Regards,

Representative Kathleen Peters  
State Representative, District 69

September 29, 2014

Chairman Art Graham  
Florida Public Service Commission  
2540 Shumard Oak Blvd.  
Tallahassee, FL 32399-0850

Dear Chairman Graham,

This letter is in regards to the upcoming October 2<sup>nd</sup> hearing by the Public Service Commission to determine whether or not Duke Energy must refund \$54 million collected from the Nuclear Cost Recovery Fee for the Levy County nuclear power plant. This is a matter of great importance to the ratepayers in the Tampa Bay area, and the Public Service Commission must take action in support of those ratepayers.

I have spoken to many constituents in my district who feel that the Public Service Commission has not done enough to correct the inequity of revenue raised by the Nuclear Cost Recovery Fee for power plants that will never be built. The integrity of the regulatory framework is called into question when ratepayers feel that their interests are not being represented.

I have called for more competition in the energy market so that consumers have choices. The American economy is not built on monopolies. Enterprising individuals who compete with each other to provide affordable goods and services for consumers build our economy. Unfortunately, Florida allows monopolies to dominate our energy market in Florida and this should stop.

History has shown us that far too often regulated monopolies end up controlling the regulators. The Public Service Commission now has an opportunity to demonstrate that the interests of ratepayers in the Tampa Bay area take priority over regulated monopolies.

Page 2  
September 29, 2014

I stand with the voices of my constituents in urging the Commission to stand against the recent decision of their staff and side with the ratepayers who deserve compensation for fees paid to build a power plant that will never exist. I expect the Commission to review all policy decisions that relate to the Nuclear Cost Recovery Fee with the highest scrutiny.

Kind regards,

**10/1/2014**

Chairman Art Graham  
Florida Public Service Commission  
2540 Shumard Oak Blvd.  
Tallahassee, FL 32399-0850

Dear Chairman Graham,

Today I write this letter in regards to the Public Service Commission hearing to take place tomorrow to determine whether or not Duke Energy ratepayers will be responsible for paying the Nuclear Cost Recovery Fee for the Levy County nuclear power plant which was proposed for construction but never built. This issue is of the utmost importance to ratepayers in the Tampa Bay area that have been unfairly affected by this fee.

I am very concerned for the low income and middle class families that were affected the most and may continue to suffer greatly as a result of Duke Energy's billing practices. They feel as if not enough is being done to correct the inequity caused by the Nuclear Cost Recovery Fee and have become increasingly frustrated with recent actions taken by Duke Energy.

Throughout history in the U.S. there have been companies that held monopolies and had failed to be regulated since their regulating agency failed to stand up and represent the public they were charged with protecting. Tomorrow the Commission has the power to protect its ratepayers from the Nuclear Cost Recovery Fee, and I implore they use this power to show that the interests of the ratepayers take precedence over the utility providers.

One goal of the Public Service Commission is to "Provide appropriate regulatory oversight to protect consumers." I stand with my constituents and urge the Commission to stand with the consumers they are tasked with protecting by providing the needed regulatory oversight. Ratepayers should not be stuck with a bill for a power plant that will never be built.

Sincerely,

Representative Darryl Rouson  
State Representative, District 70

## STATE OF FLORIDA

**PAM BONDI  
ATTORNEY GENERAL**

October 1, 2014

Art Graham  
Chairman  
Florida Public Service Commission  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399

Dear Mr. Graham:

I am writing to express my deep concerns over the Public Service Commission (the "Commission") staff's recent recommendation to side with Duke Energy to withhold \$54 million in credits rightfully due to its customers. Tomorrow's meeting of the Commission presents an opportunity to do what is in the best interest of those customers who have been shouldering the burden of the \$54 million for a nuclear plant project that will never come to fruition. They deserve a refund now, rather than awaiting the resolution of Duke's litigation with Westinghouse Electric Company.

The Commission staff's recent recommendation fails to consider the reality that these customers have been left on the hook for a failed project through no fault of their own. Duke needs to do the right thing and credit its rate payers now. As the Office of Public Counsel and others have argued in the Commission proceedings an "order directing the credit is both necessary under the nuclear cost recovery rule and appropriately signals to Duke that it is the utility's responsibility to retrieve these funds for its customers."

I strongly urge the Commission to rule in favor of Duke customers. In the meantime, my office will be meeting with legislators to determine whether new legislation is necessary to ensure that situations like this do not arise again.

Sincerely,

Pam Bondi  
Attorney General

## JOINT COMMITTEE:

Joint Legislative Auditing Committee

## SENATOR WILTON SIMPSON

18th District

September 26, 2014

Chairman Art Graham  
Public Service Commission  
Capital Circle Office Center  
2540 Shumard Oak Boulevard  
Tallahassee, FL 32399-0850

Chairman Graham,

Earlier this week, the staff of the Public Service Commission released recommendations relating to *Docket No. 140009-EI – Nuclear cost recovery clause*. Even though Duke Energy has confirmed that the costs in question will never be incurred for the Levy project, staff recommended against immediately returning \$54 million to the consumers. This is unacceptable. The citizens of the State of Florida should be refunded their hard earned money. Staff's suggestion that consumers wait until pending litigation is resolved shows a disconnect with reality and how this situation affects the lives of Florida's families.

The stance staff has taken directly conflicts with the opinions of the Florida Retail Federation, the Florida Industrial Power Users Group, PCS Phosphate and the state Office of Public Counsel. These groups have come together to advocate for consumers. I join them in their public support for Florida's consumers. If the staff's recommendation carries more weight than common sense, please accept this letter as my commitment to file legislation to address this issue.

Regards,  
Wilton Simpson

**Subject:** Representatives of the people!

To the Public Service Commission;

A simple reminder when perusing information regarding the "people whom you represent." Please keep in mind that to represent a population means to consider the "majority of that population" and at any time, in accordance with the rules of an appointed official in our great state, that majority must be identified and accounted for in all matters of vote.

Therefore, I urge you to search your common knowledge, when contemplating any decisions that affect that populations future in any manner whatsoever; and unless you can demonstrate that you have indeed represented the majority of that population in full fairness and in all matters regarding their future, than you are deemed incapable of your positional duties and therefore, no longer suitable to represent said population. It's really rather simple. Place the well being of the majority first.

Sincerely, R. Joseph Hatin  
Student

**Subject:** Duke energy

To whom it may concern,

The billing cycle scam is really the last straw. Duke energy should be sued for fraud as well as the Commission for aiding and abetting.

Why the rate payer must pay for a failed nuclear power plant is beyond comprehension.

It would be nice to lose all your money in Las Vegas and go oops I didn't mean to lose it and have the casino give it back. I just don't think that would ever happen. LOL

But in your cosy little world, that seems to be the reality.

The Commission is nothing more than a bunch of political hacks.

PS. I can now see why there is no real support for solar energy in the sunshine state. Duke and the Commission have such a sunny deal together. The rate payer certainly shouldn't be allowed to rain on your parade.

Florida rate payer

#### COMPLAINT INFORMATION

Complaint: Other Complaint against Duke Energy Florida, Inc. d/b/a Duke Energy

Details:

I have lived in my house for 11 years and the last 2 years have been horrendous when it comes to my electric bill. Duke energy came in and raised our rates under the guise of prepaying for a new, more efficient nuclear plant that would lower the cost of everyone's electric bill. They collected Billions in pre build money and now have decided to not build the said plant, nor return our money. Yet, despite all that my bill still goes up year over year. I am fed up with it. I do not want to use Duke Energy anymore. I will go buy myself a generator and pay for natural gas to run my home. Oh, wait that's right I have to stay connected to these criminals by state law!!! I want something done. This is getting out of hand and I am tired of paying \$600 a month for half the electric I used a year ago.

Steve Hammons

Mr. Jorge Andino  
[jandino59@yahoo.com](mailto:jandino59@yahoo.com)

Dear Mr. Andino:

The Governor's office forwarded a copy of your E-mail to the Florida Public Service Commission (FPSC) regarding Duke Energy Florida (DEF). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service.

I will add your comments to the correspondence side of Docket No. 140009-EI regarding your position on the nuclear cost recovery.

If you have any questions or concerns please contact Ms. Ellen Plendl at 1-800-342-3552 or by fax at 1-800-511-0809.

Sincerely,

Randy Roland  
Regulatory Program Administrator  
Florida Public Service Commission

To: Governor Rick Scott  
Subject: Duke Energy

From: Jorge Andino <[jandino59@yahoo.com](mailto:jandino59@yahoo.com)>

County: Pinellas

Zip Code: 34688

Phone Number: 727-741-7238

Message Body: Sir,

I am sending this email because I am disappointed with the commission you appointed to look out for the people of Florida. I don't know of any business that is allowed to charge their customers for services not rendered. Here is Duke again trying to stiff us out of more money instead of doing their moral obligation for the people of this great state. If they are allowed to charge me any amount of money for building anything on my dime I will not be voting for you again. I hope you use your influence to avoid a repeat of the last fiasco. When they did not build the plant they had promised.

Thanks,

Jorge A Andino

COMPLAINT INFORMATION

Complaint: Other Complaint against Duke Energy Florida, Inc. d/b/a Duke Energy

Details:

Please be advised that the charges for electric from Duke Electric are outrageous as they stand without any additional plants being added with the subsequent fees it would generate.

Duke Electric should be investigated with regard to consumer costs charged. They have enjoyed a ridiculous profit while the consumer is being held up by a company which is interested in anything but the electric customer.

Comments:

Is it the case that FPL continues to seek rate increases to offset the cost of nuclear reactors or facilities when such have not been approved by the Feds yet (based apparently on numbers that FPL cannot substantiate)? If so, what do you plan to do with respect to yet another requested rate increase?

Complaint: Improper Billing against Florida Power & Light Company

Details:

FPL has requested a rate increase for PROPOSED NUCLEAR ENERGY PLANT. NOT AN ACTUAL PLANT BUT A PROPOSED plant. So they are wanting us to pay for something does not exist. Is this for real? Or is it a cover up to increase their bribe budget. I am already paying \$6-8/kwh for electricity because you have allowed this corrupt, unethical company to double bill me for the production and distribution of electricity and I have to pay \$7.57 for the privilege of buying my electricity from a company I dont want to do business with but since they have a monopoly I have no choice.

So why not approve a PROPOSED NON-EXISTENT BUDGET for nuclear waste cleanup? After all we know that will come if FPL is allowed to build nuclear plants.

Better idea. Dont build a nuclear plant! Then an increase will not necessary and nuclear waste clean up will not be a problem and FPL WILL STOP POLLUTING OUT EARTH. What a concept. Putting mother earth and customers before big business.

Details:

I believe that F.P.L.,s request for more money to build a nuclear power plant is reprehensible, and irresponsible. Please do not give them any more money to build nuclear power plants ever. If the customers of F.P.&L. need more electricity let them build solar panels and wind farms and if feasible the underwater turbines to harness clean technology.

June 27, 2014

Art Graham, Chairman  
Florida Public Service Commission  
2540 Shumard Oak Blvd.  
Tallahassee, FL 32399-0850

Subject: Florida Power & Light Co.  
Turkey Point Units 6 & 7  
Power Plant Siting  
Application No. PA 03-45A3

Dear Mr. Graham:

The purpose of this letter is to report a precondition to the construction of a specific segment of the eastern transmission lines associated with Florida Power & Light Company's (FPL) Turkey Point Units 6 & 7 project.

The Public Service Commission is being notified of this precondition due to its role in approving preconstruction work, preconstruction purchases, and the commencement of construction activities under sections 366.93(3)(c)-(e), Florida Statutes.

According to a stipulation volunteered by FPL on July 18, 2013, during the certification hearing, and formalized by the Power Plant Siting Board in its Final Order on Certification, FPL may not build any portion of its proposed Davis-Miami transmission line until the U.S. Nuclear Regulatory Commission (NRC) issues its license for Turkey Point Units 6 & 7. This precondition appears on page 4 of the Final Order on Certification:

However, FPL voluntarily stipulated that it would not commence construction of the Davis-Miami portion of the eastern transmission line prior to the NRC approval. FPL's stipulation is part of the evidence in the certification hearing; and the Siting Board grants certification of the Project "as described in the Site Certification Application and in the evidence presented at the certification hearing." (RO at page 326). **Thus, FPL cannot build its proposed Davis-Miami transmission line, or any portion of it, under this PPSA certification, unless the NRC license for the Turkey Point Units 6 and 7 is issued.** (Emphasis added).

VM/mh  
466250

This stipulation was made at an administrative hearing held pursuant to the requirements of the Power Plant Siting Act:

MS. RAEPPLE [Counsel for FPL]: “To clear up confusion, this is actually a matter that was addressed repeatedly, clearly, in Mr. Scroggs’ testimony, but I think it’s gotten a little confusing, so I want to offer a stipulation. **Florida Power & Light will stipulate that it will not build its proposed Davis-Miami transmission line** as specified for the Turkey Point 6 & 7 project or any portion of it under any Power Plant Siting Act certification issued by the siting board following this certification hearing **unless all other regulatory approvals for the Turkey Point 6 & 7 project are issued.**”

THE COURT: “Okay. That would be the NRC?”

MS. RAEPPLE: “**That would include the NRC, yes.**”  
Hearing transcript vol. 14, 1938:14-1939:14 (emphasis added).

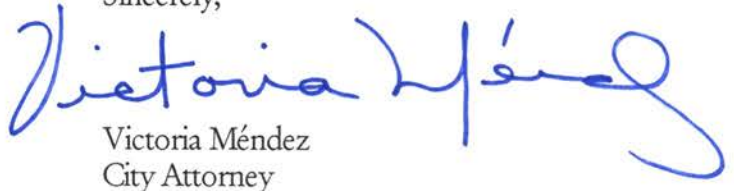

The Davis-Miami transmission line will run through the jurisdictions of several local governments – including the City of Miami, Coral Gables, South Miami, and Pinecrest – and will terminate in the Miami substation at S.W. 2<sup>nd</sup> Avenue, north of the Miami River.

In light of FPL’s binding stipulation, the City of Miami respectfully requests that the Public Service Commission deny any petitions for approval to begin preconstruction or construction work on the Davis-Miami transmission line until the NRC issues its approval for the Turkey Point Units 6 & 7 project. Moreover, no construction work should begin on the western corridor since this project was appealed to the Third District Court of Appeal.

Attached, please find: 1) an excerpt from the Power Plant Siting Board’s Final Order on Certification that formalizes this precondition, 2) the page of testimony in which the above-quoted stipulation appears, 3) a map depicting the proposed route of the Davis-Miami transmission line, 4) an excerpt from a report commissioned by FPL which describes the proposed Davis-Miami transmission line, 5) an excerpt from the transcript of a Florida Cabinet meeting where the Department of Environmental Protection’s General Counsel stated that this stipulation is a condition of certification, and 6) the first page of the City of Miami’s notice of appeal.

If you have any questions, please feel free to contact me at [vmendez@miamigov.com](mailto:vmendez@miamigov.com) or 305-416-1800.

Sincerely,

Victoria Méndez  
City Attorney

obtaining the state site certification under the PPSA is separate from the NRC approval process. The ALJ found, and the Siting Board agrees, that certification under the PPSA is not dependent on prior NRC approval; moreover, neither the Siting Board nor any other state agency has any jurisdiction to regulate nuclear safety matters. (RO ¶ 16).

However, FPL voluntarily stipulated that it would not commence construction of the Davis-Miami portion of the eastern transmission line prior to the NRC approval.<sup>4</sup> FPL's stipulation is part of the evidence in the certification hearing; and the Siting Board grants certification of the Project "as described in the Site Certification Application and in the evidence presented at the certification hearing." (RO at page 326). Thus, FPL cannot build its proposed Davis-Miami transmission line, or any portion of it, under this PPSA certification, unless the NRC license for the Turkey Point Units 6 and 7 is issued.

Additionally, the determination whether there is the need for the additional power in a particular market area – a predicate to the initiation of the entire power plant siting process – is wholly outside the jurisdiction of the Siting Board. It is a decision made by the Florida Public Service Commission ("PSC"). On April 11, 2008, the PSC issued its affirmative need determination for the FPL Project, which found that South Florida had the "need for electric system reliability and integrity; the need for fuel diversity and supply reliability; the need for base load generating capacity; the need for adequate electricity at a reasonable cost . . . . In making its determination of need, the PSC also found that there are no renewable energy sources and technologies or conservation measures reasonably available to FPL which might mitigate the need for Units 6 and 7." (RO ¶ 6).

---

<sup>4</sup> See Hearing Transcript Volume XIV, pages 1938-1939.

Page 1937

1 MR. CUNNINGHAM: And I'm not doing this to  
2 surprise anyone, but it occurred to us that, in  
3 the public comment session last night, several  
4 members of the public, including those supporting  
5 the FPL project, mentioned issues that really  
6 relate to what we would call radiological safety,  
7 health and safety, and we anticipate that could  
8 come up again tonight. I don't know.  
9 I wanted to reiterate a point I made in my  
10 opening statement that I think is a matter of  
11 settled law, that under federal statutes and the  
12 Nuclear Regulatory Commission, under the atomic  
13 energy act, basically preempts that area relating  
14 to radiological safety. I wanted to offer to your  
15 Honor, just to the extent this kept coming up and  
16 how you might think about it, the final order of  
17 the siting board along with the administrative law  
18 judge's recommended order in the relatively recent  
19 Levy nuclear siting project case, and the siting  
20 board and ALJ recognized that preemption.  
21 I'm not arguing a motion, I just wanted --  
22 it's a little bit hard to find this through the  
23 normal routes, so I wanted you to have it if you  
24 will accept it.  
25 THE COURT: All right. I assume that

Page 1938

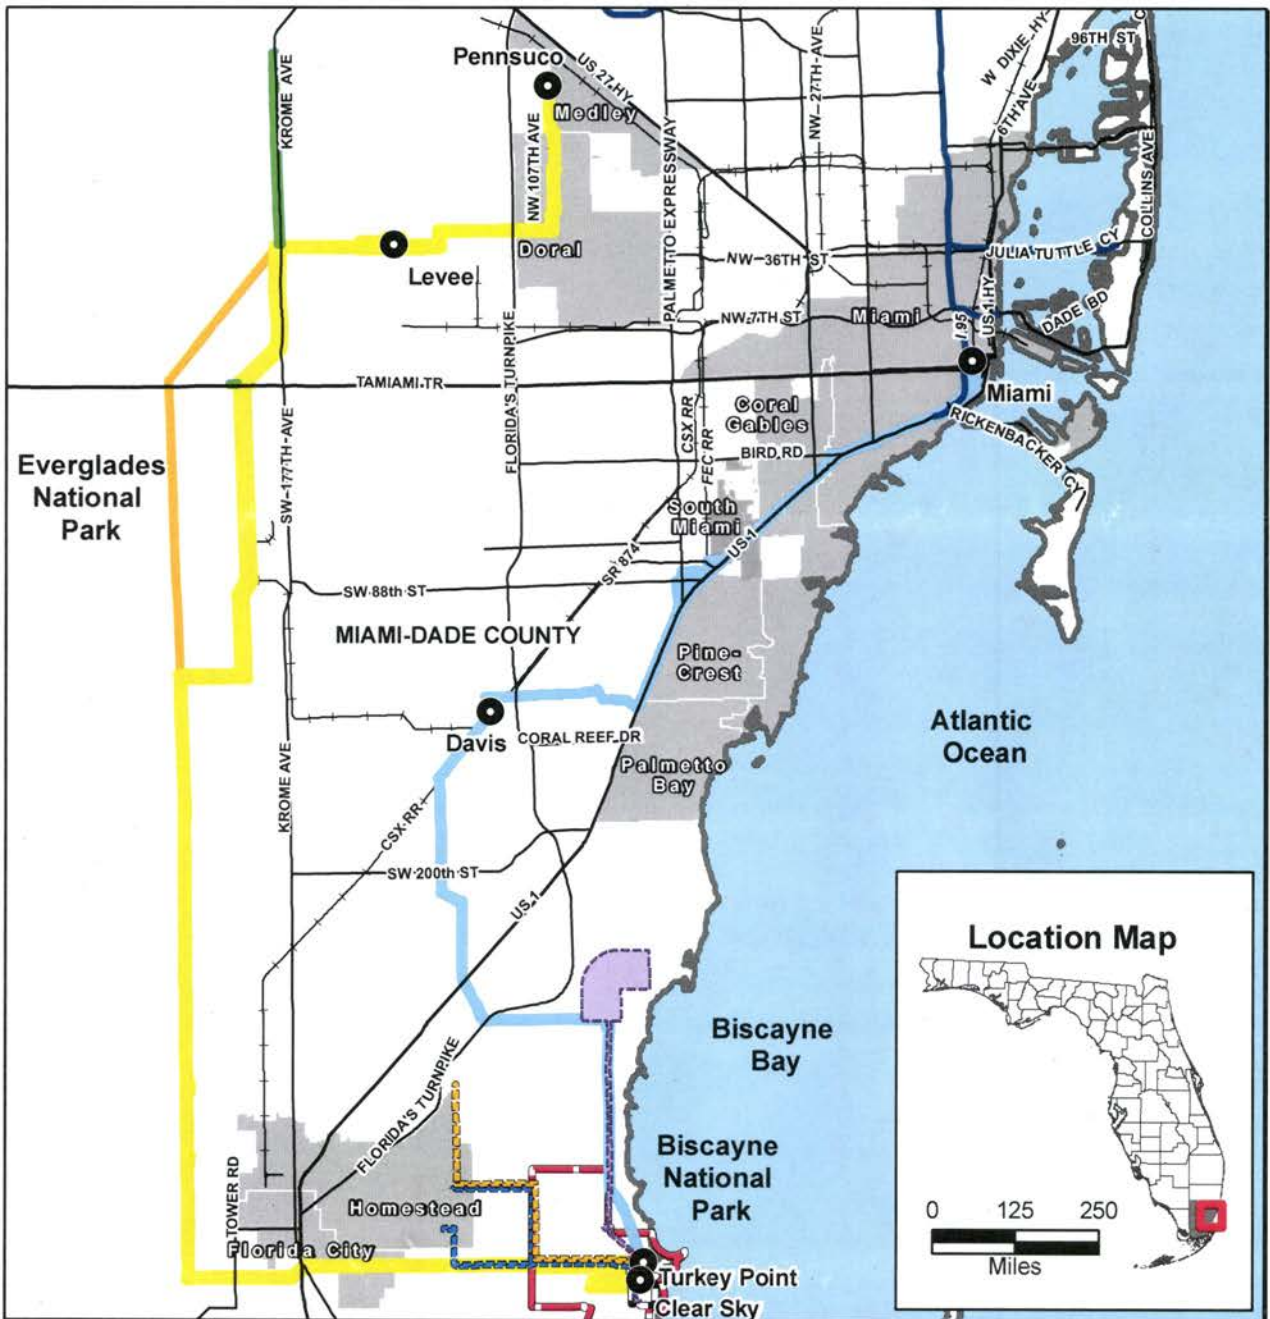

1 probably some of the witnesses are going to talk  
2 about it anyway, but --  
3 MR. CUNNINGHAM: I'm not going to object  
4 to or say anything about that. It's not easy to  
5 find, that's why I'm offering this, if I may.  
6 MS. HERNANDEZ: Coral Gables has no  
7 objection, if I could get a copy of it.  
8 MR. CUNNINGHAM: I think we have five  
9 copies here.  
10 MS. HERNANDEZ: And I think that you were  
11 just mentioning, so you wouldn't be crossing 20  
12 people.  
13 MR. CUNNINGHAM: Yes, or objections.  
14 MS. RAEPPLE: I have a preliminary matter.  
15 To clear up confusion, this is actually a matter  
16 that was addressed repeatedly, clearly, in  
17 Mr. Scroggs' testimony, but I think it's gotten a  
18 little confusing, so I want to offer a  
19 stipulation.  
20 Florida Power & Light will stipulate that  
21 it will not build its proposed Davis-Miami  
22 transmission line as specified for the Turkey  
23 Point 6 & 7 project or any portion of it under any  
24 Power Plant Siting Act certification issued by the  
25 siting board following this certification hearing

Page 1939

1 unless all other regulatory approvals for the  
2 Turkey Point 6 & 7 project are issued.  
3 THE COURT: Okay. That would be the NRC?  
4 MS. RAEPPLE: That would include the NRC,  
5 yes.  
6 THE COURT: Any, I guess, other counsel  
7 would stipulate or agree to that representation by  
8 FPL?  
9 MS. HERNANDEZ: We accept that  
10 stipulation, thank you.  
11 MS. MENDEZ: Could you just read it one  
12 more time? I'm sorry, I want to make sure I  
13 absorb it.  
14 (Off the record.)  
15 THE COURT: We will go back on.  
16 Are there any other preliminary matters?  
17 Okay, Ms. Mendez.  
18 MS. MENDEZ: Thank you, your Honor.  
19 May I approach the witness? And, counsel,  
20 for the record, this is Miami 50, the hardening  
21 plan.  
22 CONTINUING CROSS EXAMINATION  
23 BY MS. MENDEZ:  
24 Q. Mr. Hronec, do you recognize this document  
25 that I handed you? Do you want a copy? I'm sorry, I

Page 1940

1 don't know if you have it there.  
2 Mr. Hronec, I've handed you what's been  
3 marked as City of Miami 50. Do you recognize this  
4 document?  
5 A. Yes, I believe I do.  
6 Q. What is this document?  
7 A. It's a document made up of a 7 or 8-page  
8 letter to the Public Service Commission entitled  
9 "Approval of Florida Power & Light Company's  
10 2013-2015 storm constructability plan filed in  
11 compliance with Rule 25-6.0342, Florida  
12 Administrative Code," and then attached to the letter  
13 is the plan submitted by Florida Power & Light with  
14 the letter.  
15 Q. Is this FPL's hardening plan submitted to  
16 the Public Service Commission, I'm sorry?  
17 A. I assume so. The cover letter indicates  
18 there's seven copies of this particular plan being  
19 submitted to the PSC.  
20 Q. In your role or duties with Florida Power &  
21 Light, do you ever -- do you or anyone from your team  
22 have the opportunity to review this documentation  
23 with regard to your design and transmission line  
24 siting process?  
25 A. I personally do not have the opportunity

Appendix A	Typical Cross Sections
Appendix B	Route Maps
Appendix C	FPL Preferred Route Photos
Appendix D	Detailed Summary of Cost

## 1.0 Project Description

Florida Power & Light Company (FPL) has identified a need to construct a 230 kilovolt (kV) transmission line connection between the Miami substation and the Davis substation, both in Miami-Dade County. A significant portion of this line is proposed to be constructed as an overhead facility along the Metrorail/Busway Corridor paralleling US1, within the FPL East Preferred Corridor. One end of the line will terminate in the Miami substation at SW 2<sup>nd</sup> Avenue north of the Miami River. An underground circuit is planned to exit the Miami Substation and cross under the Miami River to an underground riser structure located on the south side of the river, likely near SW 5<sup>th</sup> Street and SW 3<sup>rd</sup> Avenue. The overhead line is assumed to begin here and extend southward for approximately 15 miles to the Falls Shopping Center where the line would then move westward within the existing FPL transmission line corridor (as described in the Turkey Point Units 6 & 7 Site Certification Application - SCA). The study corridor for this report ends within this existing corridor, near SW 131<sup>st</sup> Street. In the SCA, the Study Corridor is referred to as the FPL East Preferred Corridor, in the area between the Miami Substation and the intersection of US1 and SW 131<sup>st</sup> Street.

FPL assembled a project team (Project Team) of specialists in transmission design, environmental planning, system planning, real estate, and construction, to initiate the studies necessary to determine a study area, identify a permissible corridor and meet the utility's reliability and constructability criteria. The FPL Project Team has included POWER Engineers, Inc. to assist in the analysis of the selected East Preferred Corridor, to prepare a conceptual overhead transmission line design and potential routing within that corridor.

The primary purpose of this report is to provide a description of a potential overhead route alignment within the study corridor based on known 2013 conditions, identify known constructability concerns along that route and present a cost estimate for that route alignment. The majority of the study corridor follows the existing Metrorail/ Busway/ US 1 Corridor.

Section 2 of this report describes the project requirements which include right-of-way, design, construction and safety requirements.

Section 3 of this report discusses the potential overhead routing along the FPL East Preferred Corridor.

Section 4 of this report provides a summary of the cost assumptions, project risks and estimated costs.

1 MR. LEOPOLD: Thank you, General Bondi. And  
2 it's an honor to be acting as your lawyer today.

3 ATTORNEY GENERAL BONDI: Thank you.

4 MR. LEOPOLD: So with respect to Mr. Garner's  
5 comments, DEP -- what we did in our draft final  
6 order is we recognized a ruling of the ALJ which  
7 specifically says that all stipulations made on the  
8 record are incorporated as conditions of  
9 certification to the recommended order. And,  
10 you know, our draft order incorporates by reference  
11 the Judge's recommended order.

12 So we actually agree with Mr. Garner that it  
13 is a requirement of the DEP draft final order, if  
14 entered by the Siting Board, and our language  
15 simply highlights the most contentious issue with  
16 respect to the NRC licensing process which still  
17 has a long ways to go and hasn't been concluded  
18 yet.

19 With respect to your question about the EMF,  
20 DEP separately regulates electromagnetic  
21 frequencies; and this project, as proposed, is well  
22 within and below the human health standards that  
23 DEP has for EMF.

24 Any additional questions?

25 GOVERNOR SCOTT: Any other questions?
