Re: Miscellaneous Tariff Revisions; Docket No. 140000

Dear Ms. Stauffer:

We attach on behalf of Tampa Electric Company for administrative approval copies of the following tariff sheets in both standard and legislative formats:

## MISCELLANEOUS TARIFF REVISIONS

Tariff Sheet Number	Proposed Changes/Comments
5.300	The boundaries of the network are being revised to exclude Tampa International Airport. The network facilities at the airport have been replaced with UCD facilities as a result of expansion at the airport and compliance with certain DSH airport security requirements not available through the network facilities.
6.010	Update the Index of Rate Schedules to reflect the Temporary Service name change to Construction Service.
6.020	Update the Rate Schedules to reflect the Temporary Service (TS) name change to Construction Service (CS).
8.070	Corrected the Basic Service Charge for SBF at sub-transmission voltage to reflect the currently approved charge of \$1,015 .

Thank you for your assistance in connection with this matter.

Sincerely,

James D. Beasley

Cable limiters may be omitted in certain cases with the approval of the Company. The customer's conduit must enter the vault or handhole at a point specified by the Company and wall openings shall be repaired to the Company's satisfaction. Metallic conduit shall terminate in the vault or handhole with an insulated grounding bushing and non-metallic conduit shall terminate with an end-bell fitting.

The designated boundaries of the network area in downtown Tampa is defined as follows:

The Interstate on the north; Morgan Street to Cass Street, Cass Street to Jefferson Street, Jefferson Street to Zack Street, Zack Street to Governor Street, and Governor Street to Whiting Street on east; Whiting Street on the south; and the Hillsborough River on the west.

When at the Company's option, the customer requests network service based on location and load, and the customer makes an appropriate contribution in aid of construction, the following shall apply:

Where, in the Company's judgment, the customer's location or load requires the expansion of the underground network system, the following shall apply:

- 1) Network transformer vaults shall be located on the customer's property. The required vault space as determined by the Company shall be provided by the customer inside the building structure or adjacent to the structure. Ingress and egress for the Company to operate and maintain the vault shall be provided by the customer to the satisfaction and requirements of the Company by means of a properly executed and recorded easement. The vault area will be secured by a Company lock, and only authorized Company personnel shall enter.
- 2) Transformer vault structures shall be constructed and maintained by the customer at his expense. The construction of the vault shall be to no less than the Company's minimum vault requirements for flammable liquid filled network transformers. The Company shall have the right to inspect for compliance with no less than minimum vault requirements at all times during construction.
