**Re: Docket No. 140186-WU - Application of Brevard Waterworks, Inc. for Staff Assisted Rate Case in Brevard County – Revised Request for Purchased Water Pro Forma Adjustment**

Dear Commission Clerk,

Brevard Waterworks, Inc. (BWI) hereby submits its revised request for a Pro Forma Purchased Water Adjustment in the above referenced docket in the Staff Assisted Rate Case (SARC).

Subsequent to its original filing, BWI analyzed the purchased water received from Brevard County. Two significant changes will affect BWI's purchased water expenses. The first is an additional increase in purchased water expense which went into effect on January 1, 2015. On December 17, 2013 the Brevard County Board of County Commissioners adopted Resolution No. 13-229 (attached). This Resolution increased the county's rates and charges for both 2014, as well as for the current year 2015. In BWI's original request for a Pro Forma Adjustment, the utility only calculated the increase for the year 2014, and not prospectively for 2015. Since the Commission is not scheduled to take a final vote on the SARC request until mid to late year of 2015, the historic expense is not representative of the actual purchased water expenses that are now in effect in 2015.

The second significant change is in how Brevard County now charges BWI for purchased water at its Oakwood subdivision. Previous to 2014, the County charged BWI for the compound 4" water meter by adding the two consumption amounts recorded on both the 4" and ¾" meter and invoiced this amount as one consumption amount. Beginning in January 2014, Brevard County began issuing two separate bills for the 4" compound water meter. The County has instituted a tiered consumption gallonage rate structure. As demonstrated in Resolution 13-229, the inclining gallonage tiers for the 4" meter and the ¾" meter vary significantly. Approximately forty-four percent (44%) of the water billed for the Oakwood subdivision is billed at the lower ¾" tiered blocks. As a result, BWI is invoiced at higher amounts in 2014 and 2015 than was previously billed in 2013. To take this change in billing into consideration, BWI believes it is more appropriate to analyze the actual 12 months invoices for 2014 and apply the new increase in rates for 2015. The test year expenses do not reflect (a) the change in billing from Brevard; and (b) the increase in rates as of 1/1/2015.

In addition, BWI respectfully requests that no excessive unaccounted for water adjustment be made to the purchased water expense. In its letter dated December 9, 2014 (Document No. 06672-14), BWI demonstrated that the capital costs to replace the aging infrastructure would far outweigh the benefits for any such replacement. Rule 25-30.4325(10), Florida Administrative Code states:

(10) To determine whether an adjustment to plant and operating expenses for excessive unaccounted for water will be included in the used and useful calculation, the

**Commission will consider** all relevant factors, including whether the reason for excessive unaccounted for water during the test period has been identified, whether a solution to correct the problem has been implemented, or **whether a proposed solution is economically feasible.** (emphasis added)

As a result, BWI has attached Revised Rate Base Schedule 1-A, NOI Schedules 3-A and 3-C. The appropriate pro forma purchased water adjustment was calculated to be **\$10,393**, with no adjustment for excessive unaccounted for water.

Please find attached Brevard Waterworks, Inc. (BWI) documentation for the purchased water pro forma adjustment contained on Schedule 3-C.
