Case No. 1D14-0197
LT. NO. PSC-13-0675-FOF

Motion for an Extension of
Time to comply with Providing
Records/Report and Brief.

I had received no communication re: my cases and that they had been closed. I appreciate that they have been reopened however tardiness is now an issue.

I had inquired with the PSC Clerk's Office regarding the total completeness and accuracy of my Report/Record that was to be sent to the Court. I was informed that not one, but two amendments were made to my Record/Report.

It is essential that I examine what the Report/Record contains and what the Amendments were. At this late stage, I was advised that until a payment is made, the Record/Report will not be sent to the Court. I will request a copy of the index be sent to me for examination, to determine if the Records are complete and accurate.

This is essential to my cases, which will be presented to the Court. This will take time to facilitate.

Over time I have received over 30 thousand pages of documentation from the FPC, Duke Energy PSC legal Dept. and all other PSC departments including the Commission.

A lawyer from the PSC legal Dept. at first acknowledged it, then denied their existence. Even though I have this tremendous amount of material in my possession.

My idea is take hundreds of lawyers to disseminate this amount of material. A lot of this due to my questioning what certainly appeared to be deliberate inaccurate and continued billings calculated to cause problems by design.

In over 30 years, I have always paid my bills, when appeared reasonable, and only questioned that needed questioning and complaint. The records will show this.

I sought assistance from the Office of Public Counsel and was denied. He did make statements that considering the outrageous tactics and actions by the utilities and the PSC that I should take it to the newspapers for exposure.

He did give me inaccurate and misleading disinformation on how to proceed with my cases to the Court, as to the processes that would be involved. It turned out to be completely different from and contrary to what he subsequently said he was "sorry". He also took my actions through his secretary, which had I take would have eliminated any cases of which he was well aware.

a Senior investigator from the office of Public Counsel, whom I had spoken with and appraised of what was going on, stated that "they all hate you over there and are all working against you", he had full knowledge and information so as to make that statement a fact that I was well aware of.

I am a seventy five year old man with serious permanent health problems and injuries including an implanted defibrillator and powerful medications that have a detrimental effect on the system and activities with the resultant difficulty in dealing with all of this. A fact well known to these individuals parties.

I am also a retired Captain for a major unit in the way of past history and location of time to the worst kind of abuses, degrading hateful behavior and antics, hostility hate mongering slander and defamation promoted throughout the entire system, the utilities and the PSC, as deliberate acts.

All of this because I fought for my rights against the purposeful abuses continuing for charges and targeting by those using these monopolistic utilities to effect harm and damage, who can turn the screws in retaliation without question.

I had made **aware** that the GC sought to speak with Congressman (name) and Senate to obstruct my getting any assistance from them, through the use of slander defamatory and in effect making false statements reference to me. It was effective. This is also a violation of the Code of Professional Ethics of the P.C. Bar.

In another instance (one of many over the years) a proper examination of my property, was made by a Supervisor of the FPC to see why I was being excessively billed.

He could find nothing wrong to justify the excessive charges and so started to me verbally that he would write a report to that effect. After a long period of time, during which I received nothing and after my inquiry, it turns out that the FPC hierarchy did not like his original report and asked the Post office to remove it from my mail box, send it back to the Postal facility and then send it back to FPC, there they destroyed this report and replaced it with a benign completely different one.

It was admitted to by the Postal Manager, who stated that they could do anything they wanted to. If this had been done by any person, they would be subject to incarceration as it is an illegal act, regardless of who perpetrated it. The Post office, above all is ultimately aware of this.

These are just several examples of the abuses, antics and lies used to suppress, denigrate and eliminate my justifiable efforts to deal with it and correct it.

I wish to be certain that my records/reports contain all my responses to what has been done and what has occurred by the target my actions and abuse of power.

With all of this, it is essential that I am allowed an adequate period of time to comply with the Courts requirements, and to protect my cases, the true facts to be presented before the Court.

5
If the Appellee file an objection to
my request for an extension so as to
present the true facts and issues to the
Court, then, an advanced word of object
to this objection. Suppression and elimination
has always been their goal, reference my
cases and valid complaints.

In the interests of justice and fair.
I hope that such time will be granted
Thank you for your consideration.

Sincerely,
M. S. M.
