Subject: Solar incentives and efficiency goals

Hello,

I wanted to raise my concerns about the decision to reduce efficiency goals and solar programs designed to help the state and its residents.

The efficiency of solar is higher because there is far less loss in power produced at home than from the grid. If the argument is people should pay the full cost, the utilities should compensate those by helping initially fund, and compensate for power produced at home greater than that requiring infrastructure and power losses in the grid.

May I contact the governing body for the psc or further encourage these initiatives in some way?

The state has a vested interest in protecting the environment and setting examples for other states, and hopefully the world. Small efforts like those recently discontinued, send the wrong message when it comes to progress.

Thank you,
Bryan Smathers
Longwood, FL

Good morning Ruth,

It is duke energy.

Thank you,
Bryan

Dear Mr. Smathers:

Thank you for contacting the Florida Public Service Commission.

In order to process your request correctly we need to know the name your electric company.

You may send this information to me via e-mail at contact@psc.state.fl.us

Sincerely,

Ruth McHargue

Regulatory Program Administrator

Office of Consumer Assistance and Outreach Florida Public Service Commission

[1-800-342-3552](tel:1-800-342-3552)

contact@psc.state.fl.us

Note: Florida has a very broad public records law. Most written communications to or from state officials regarding state business are considered to be public records and will be made available to the public and the media upon request. Therefore, your e-mail message may be subject to public disclosure.
