Florida Public Service Commission

Dear Florida Public Service Commission:

As a Florida Power and Light (FPL) customer and Floridian, I am writing to respectfully request that you deny the FPL Woodford proposal and associated proposed guidelines that would allow FPL to charge its customers to get into the business of oil and gas production. This proposal is bad for FPL customers as well as Florida's environment and tourism-based economy.

FPL's request to use Advanced Cost Recovery to allow it to charge up to 750 million to its customers for oil and gas production is completely outside of the appropriate use of that provision, and really constitutes new law and policy beyond the scope and authorities of the Public Service Commission.

The FPL Woodford proposal will not protect its customers from fluctuating gas prices as those are based on market forces and cost of production well outside FPL's control. This proposal cannot guarantee the savings it promises to FPL customers and FPL is not experienced or knowledgeable in the oil and gas production, making this unacceptably financially risky to its customers like me.

Not only should the Woodford proposal be denied due to it being completely procedurally inappropriate and excessively financially risky, but it would set a dangerous negative precedent in allowing other utilities to follow suit and FPL to pursue other gas projects funded by its customers without having regulatory review and approval. This is completely unacceptable and we urge you to deny this proposal accordingly.

Thank you for your time and consideration of my input on this important decision and I am counting on you to protect Floridians by denying FPL's Woodford proposal.

Sincerely,

Andrea Wildnrt
