

BEFORE THE
FLORIDA PUBLIC SERVICE COMMISSION

In the Matter of:

DOCKET NO. 150007-EI

ENVIRONMENTAL COST RECOVERY
CLAUSE.

PROCEEDINGS: HEARING

COMMISSIONERS
PARTICIPATING: CHAIRMAN ART GRAHAM
COMMISSIONER LISA POLAK EDGAR
COMMISSIONER RONALD A. BRISÉ
COMMISSIONER JULIE I. BROWN
COMMISSIONER JIMMY PATRONIS

DATE: Monday, November 2, 2015

TIME: Commenced at 1:18 p.m.
Concluded at 1:24 p.m.

PLACE: Betty Easley Conference Center
Room 148
4075 Esplanade Way
Tallahassee, Florida

REPORTED BY: LINDA BOLES, CRR, RPR
Official FPSC Reporter
(850) 413-6734

1 APPEARANCES:

2 JAMES D. BEASLEY, J. JEFFRY WAHLEN, ASHLEY M.
3 DANIELS, ESQUIRES, Ausley & McMullen, Post Office Box
4 391, Tallahassee, Florida 32302, appearing on behalf of
5 Tampa Electric Company.

6 JEFFREY A. STONE, RUSSELL A. BADDERS, STEVEN
7 R. GRIFFIN, ESQUIRES, P.O. Box 12950, Pensacola, Florida
8 32591-2950, appearing on behalf of Gulf Power Company.

9 DIANNE M. TRIPLETT, ESQUIRE, 299 First Avenue
10 North, St. Petersburg, Florida 33701; and MATTHEW R.
11 BERNIER, ESQUIRE, 106 East College Avenue, Suite 800,
12 Tallahassee, Florida 32301-7740; appearing on behalf of
13 Duke Energy Florida, Inc.

14 JOHN T. BUTLER, R. WADE LITCHFIELD, and MARIA
15 J. MONCADA, ESQUIRES, 700 Universe Boulevard, Juno
16 Beach, Florida 33408-0420, appearing on behalf of
17 Florida Power & Light Company.

18 JON C. MOYLE, JR., and KAREN PUTNAL, ESQUIRES,
19 Moyle Law Firm, P.A., 118 North Gadsden Street,
20 Tallahassee, Florida 32301, appearing on behalf of
21 Florida Industrial Power Users Group.

1 APPEARANCES (Continued):

2 J.R. KELLY, PUBLIC COUNSEL; CHARLES REHWINKEL,
3 DEPUTY PUBLIC COUNSEL; and PATRICIA CHRISTENSEN,
4 ASSOCIATE PUBLIC COUNSEL, ESQUIRES, Office of Public
5 Counsel, c/o The Florida Legislature, 111 West Madison
6 Street, Room 812, Tallahassee, Florida 32399-1400,
7 appearing on behalf of the Citizens of the State of
8 Florida.

9 JAMES W. BREW, and OWEN J. KOPON, ESQUIRES,
10 Xenopoulos & Brew, P.C., 1025 Thomas Jefferson
11 Street, NW, Eight Floor, West Tower, Washington,
12 DC 20007, appearing on behalf of White Springs
13 Agricultural Chemicals, Inc. d/b/a PCS Phosphate
14 - White Springs.

15 CHARLES W. MURPHY, ESQUIRE, Florida Public
16 Service Commission, 2540 Shumard Oak Boulevard,
17 Tallahassee, Florida 32399-0850, appearing on behalf of
18 the Florida Public Service Commission.

19 MARY ANNE HELTON, ESQUIRE, Advisor to the
20 Commission, 2540 Shumard Oak Boulevard, Tallahassee,
21 Florida 32399-0850, appearing as advisor to the Florida
22 Public Service Commission.

1 APPEARANCES (Continued):

2 CHARLIE BECK, General Counsel, Florida Public
3 Service Commission, 2540 Shumard Oak Boulevard,
4 Tallahassee Florida, appearing as General Counsel to the
5 Florida Public Service Commission.

P R O C E E D I N G S

1
2 **CHAIRMAN GRAHAM:** All right. Good afternoon,
3 everybody. We will call this clause hearing to order,
4 the 2015 clause hearing. Let the record show it is
5 Monday, November the 2nd, and it's probably about
6 three minutes after 1:00.

7 Staff, if I can get you to read the
8 notice, please.

9 **MS. MAPP:** By notice issued October 2nd, 2015,
10 this time and place was set for a hearing in the
11 following dockets: Docket No. 150001-EI, 150002-EG,
12 150003-GU, 150004-GU, and 150007-EI. The purpose of the
13 hearing was set out in the notice.

14 **CHAIRMAN GRAHAM:** All right. Seeing that we
15 have five dockets in front of us, let's take
16 appearances.

17 **MR. BUTLER:** John Butler appearing on behalf
18 of Florida Power & Light Company. With me, Maria
19 Moncada, and also enter an appearance for Wade
20 Litchfield. We are in the 01, 02, and 07 dockets.

21 **MR. BERNIER:** Good afternoon, Matt Bernier on
22 behalf of Duke Energy Florida in the 01, 02, and
23 07 dockets. I'd also like to enter an appearance for
24 Dianne Triplett in those same dockets, and John Burnett
25 in the 01 docket.

1 **CHAIRMAN GRAHAM:** Thank you.

2 **MR. BEASLEY:** Good afternoon, Commissioners.
3 James D. Beasley of the law firm of Ausley & McMullen on
4 behalf of Tampa Electric Company in the 01, 02, and 07
5 dockets. I would also like to enter an appearance for
6 J. Jeffrey Wahlen and Ashley M. Daniels of the same
7 firm.

8 **MR. BADDERS:** Good afternoon. Russell Badders
9 on behalf of Gulf Power Company in the 01, 02, and 07
10 dockets. And I'd like to also enter an appearance for
11 Jeffery A. Stone and Steven R. Griffin in the same
12 dockets.

13 **MS. KEATING:** Good afternoon. Beth Keating
14 with the Gunster Law Firm here today on behalf of FPUC
15 in the 01, 02, and 03 dockets. I'm also here for
16 Florida City Gas in the 03 docket. And in the 04 docket
17 I'm here for FPU, FPU Fort Meade, Indiantown,
18 Chesapeake, and Florida City Gas.

19 **MR. HORTON:** Norman H. Horton, Jr., appearing
20 on behalf of Sebring Gas Company in the 04 docket.

21 **MR. MOYLE:** Jon Moyle with the Moyle Law Firm
22 appearing on behalf of the Florida Industrial Power
23 Users Group, FIPUG. I'd also like to enter an
24 appearance for Karen Putnal who is with our firm, and we
25 will be in the 01, 02, and 07 dockets.

1 **MR. BREW:** Good afternoon. James Brew of the
2 firm of Stone, Mattheis, Xenopoulos & Brew for White
3 Springs Agricultural Chemicals/PCS Phosphate. We're in
4 the 01, 02, and 07 dockets. And I also like to note an
5 appearance for Owen Kopon.

6 **MR. WRIGHT:** Good afternoon, Mr. Chairman,
7 Commissioners. Robert Scheffel Wright and John T.
8 LaVia, III, with the Gardner Law Firm on behalf of the
9 Florida Retail Federation in the 001 docket. Thank you.

10 **MR. REHWINKEL:** Good afternoon, Commissioners.
11 Charles Rehwinkel, J. R. Kelly, Patty Christensen and
12 Erik Sayler with the Office of Public Counsel in the
13 01 docket. The same appearances except for Mr. Sayler
14 in the 02, 03, 04, and 07 dockets.

15 **MS. MAPP:** Kyesha Mapp for staff in the
16 03 docket; Suzanne Brownless, Danijela Janjic, and John
17 Villafrate for the 01 docket; Lee Eng Tan and Bianca
18 Lherisson for the 02 docket; Leslie Ames and Kelly
19 Corbari for the 04 docket; and Charles Murphy for the 07
20 docket.

21 Staff would also like to note that Peoples
22 Gas System and St. Joe's Gas Company has been
23 excused from this hearing in the 03 and the 04
24 dockets.

25 **MS. HELTON:** Mary Anne Helton. I'm here as

1 your advisor in the all of the dockets.

2 **MR. BECK:** And Charlie Beck, General Counsel.

3 * * * * *

4 **CHAIRMAN GRAHAM:** We will go to Docket
5 No. 7.

6 **MR. MURPHY:** Commissioners, there are proposed
7 stipulations on all issues. All parties either agree or
8 take no position on the proposed stipulations that are
9 before the Commission today. In this respect, 11A is
10 nuanced because OPC has reached an agreement with Gulf
11 regarding how to handle Plant Scholz but takes no
12 position on the remainder of that issue. In light of
13 the stipulation, neither Gulf nor OPC wishes to pursue
14 its respective requests for official recognition.

15 If the Commission decides that a bench
16 decision is appropriate, staff recommends that the
17 proposed stipulation for all issues on pages
18 26 through 35 of the Prehearing Order should be
19 approved by the Commission. Again, as indicated in
20 the Prehearing Order, all parties either support or
21 do not oppose the proposed stipulations.

22 **CHAIRMAN GRAHAM:** Commissioners, time to ask
23 questions, comments, concerns, motions.

24 Commissioner Edgar.

25 **COMMISSIONER EDGAR:** Thank you, Mr. Chairman.

1 At this time I'm prepared to move that we approve the
2 proposed stipulations for Issues 1 through 13 for this
3 docket.

4 **CHAIRMAN GRAHAM:** It's been moved and
5 seconded, Issues 1 through 13. Any further discussion?
6 Seeing none, all in favor, say aye.

7 (Vote taken.)

8 Any opposed? By your action, you've
9 approved the motion.

10 Okay. Staff, prefiled testimony.

11 **MR. MURPHY:** Staff asks that the prefiled
12 testimony of all witnesses be entered into the record at
13 this time as though read. Mr. Badders has an errata
14 sheet for Gulf Witness Vick that should be included in
15 this record, and has been provided to the court reporter
16 and the other parties.

17 **CHAIRMAN GRAHAM:** We will move the prefiled
18 testimony of all witnesses into the record as though
19 read. And restate what you said about the errata sheet.

20 **MR. MURPHY:** It should be included with the
21 testimony in the record.

22 **CHAIRMAN GRAHAM:** Okay. We will do that as
23 well.

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**
2 **FLORIDA POWER & LIGHT COMPANY**
3 **TESTIMONY OF RANDALL R. LABAUVE**
4 **DOCKET NO. 150007-EI**
5 **JULY 31, 2015**

6

7 **Q. Please state your name and address.**

8 A. My name is Randall R. LaBauve and my business address is 700
9 Universe Boulevard, Juno Beach, Florida 33408.

10 **Q. By whom are you employed and in what capacity?**

11 A. I am employed by Florida Power & Light Company ("FPL") as Vice
12 President of Environmental Services.

13 **Q. Have you previously testified in this docket or in predecessor**
14 **dockets?**

15 A. Yes.

16 **Q. Have you prepared or caused to be prepared under your**
17 **direction, supervision or control an exhibit in this proceeding?**

18 A. Yes, I have. My exhibit RRL-2 provides the summary and executive
19 summary from 40 CFR Parts 257 and 261 of the Federal Register of
20 the Environmental Protection Agency's ("EPA") Final Rule for Disposal
21 of Coal Combustion Residuals from Electric Utilities.

22 **Q. What is the purpose of your testimony in this proceeding?**

1 A. The purpose of my testimony is to present for Commission review and
2 approval FPL's request for recovery through the Environmental Cost
3 Recovery Clause ("ECRC") of a new environmental project, the Coal
4 Combustion Residuals Disposal Project ("the CCR Disposal Project").
5 Additionally, my testimony provides an update on the status of the
6 CWA 316(b) Rule.

7

8 **Coal Combustion Residuals Disposal Project**

9

10 **Q. Please describe the environmental law or regulation requiring the**
11 **CCR Disposal Project.**

12 A. On April 17, 2015, the EPA published in the Federal Register a final
13 rule to regulate the disposal of coal combustion residuals ("CCR") as
14 solid waste under subtitle D of the Resource Conservation and
15 Recovery Act ("RCRA"). This rule establishes minimum criteria for the
16 safe disposal of CCR in landfills and surface impoundments. The rule
17 is self-implementing with an effective date of October 19, 2015. A
18 copy of the summary and executive summary of the final CCR disposal
19 rule from the Federal Register is included as Exhibit RRL-2 to my
20 testimony.

21 **Q. What are coal combustion residuals ("CCR")?**

22 A. CCR are generated from the combustion of coal, including solid fuels
23 classified as anthracite, bituminous, subbituminous, and lignite, for the

1 purpose of generating steam to power a generator to produce
2 electricity or electricity and other thermal energy by electric utilities and
3 independent power producers. CCR includes fly ash, bottom ash,
4 boiler slag, and flue gas desulfurization materials. A description of the
5 types of CCR can be found in the proposed rule (see 75 FR 35137).

6 **Q. What are the requirements of the final CCR Disposal rule?**

7 A. The EPA is finalizing national minimum criteria for existing and new
8 CCR landfills and existing and new CCR surface impoundments and
9 all lateral expansions consisting of location restrictions, design and
10 operating criteria, groundwater monitoring and corrective action,
11 closure requirements and post-closure care, and recordkeeping,
12 notification, and internet posting requirements.

13 **Q. Please briefly describe the minimum criteria of the final CCR**
14 **Disposal rule.**

15 A. The minimum criteria required by the final rule and a brief description
16 of each are as follows:

- 17 • Location Restrictions – This criteria establishes five location
18 restrictions relating to placement of CCR above the uppermost
19 aquifer, in wetlands, within fault areas, in seismic impact zones,
20 and in unstable areas. Units that do not meet these restrictions can
21 retrofit or make appropriate engineering demonstrations to meet
22 this criteria. The final rule requires owners or operators of existing
23 CCR units that cannot make the required demonstrations to close,

- 1 while owners or operators of new CCR units and all lateral
2 expansions who fail to make the required demonstrations are
3 prohibited from placing CCR in that unit.
- 4 • Liner Design – This criteria is intended to help prevent
5 contaminants in CCR from leaching from the CCR unit and
6 contaminating groundwater.
 - 7 • Structural Integrity Requirements - To help prevent the damages
8 associated with structural failures of CCR surface impoundments,
9 the final rule establishes structural integrity criteria for new and
10 existing surface impoundments and all lateral expansions.
 - 11 • CCR Unit Operation – This criteria includes particulate air
12 emissions criteria for all CCR units, run-on and run-off water
13 controls for CCR landfills, hydrologic and hydraulic capacity
14 requirements for CCR surface impoundments and periodic
15 inspection requirements for all CCR units. These criteria were
16 established to prevent health and environmental impacts from CCR
17 units.
 - 18 • Groundwater Monitoring and Corrective Action – This criteria
19 requires an owner or operator of a CCR unit to install a system of
20 monitoring wells and conduct periodic monitoring. Also included
21 are specific procedures for sampling these wells, methods for
22 analyzing the groundwater data collected to detect the presence of
23 hazardous constituents (e.g., toxic metals), and other monitoring

1 parameters (e.g., pH, total dissolved solids) released from the units.
2 The final rule establishes a groundwater monitoring program
3 consisting of detection monitoring, assessment monitoring and
4 corrective action.

5 • Closure and Post-Closure Requirements – This criteria requires all
6 CCR units to close in accordance with specified standards and to
7 monitor and maintain the units for a period of time after closure,
8 including the groundwater monitoring and corrective action
9 programs. This criteria was included to ensure the long-term safety
10 of closed CCR units. Closure of a CCR unit must be completed
11 either by leaving the CCR in place and installing a final cover
12 system or through removal of the CCR and decontamination of the
13 CCR unit. The final rule establishes timeframes to initiate and
14 complete closure activities, and authorize owners or operators to
15 obtain time extensions due to circumstances beyond the facility's
16 control. Owners and operators are required to prepare closure and
17 post-closure care plans describing these activities.

18 • Record Keeping, Notification, and Internet Posting Requirements -
19 The final rule requires the owner or operator of CCR units to record
20 certain information in the facility's operating record. In addition,
21 owners and operators are required to provide notification to States
22 and/or appropriate Tribal authorities when the owner or operator

1 places information in the operating record, as well as to maintain a
2 publicly accessible internet site for access to this information.

3 • Severability – The EPA intends that the provisions of this rule be
4 severable. In the event that any individual provision or part of this
5 rule is invalidated, the EPA intends that this would not render the
6 entire rule invalid, and that any individual provisions that can
7 continue to operate will be left in place.

8 **Q. How will the final CCR Disposal rule impact FPL?**

9 A. The final rule applies to the following:

- 10 • Owners and operators of new and existing landfills and new and
11 existing surface impoundments, including all lateral expansions of
12 landfills and surface impoundments, that dispose or otherwise
13 engage in solid waste management of CCR generated from the
14 combustion of coal at electric utilities and independent power
15 producers.
- 16 • CCR units located off-site that receive CCR for disposal from
17 electric utilities' or independent power producers' facilities.
- 18 • Certain inactive CCR surface impoundments (i.e., units not
19 receiving CCR after the effective date of the rule) at active electric
20 utilities' or independent power producers' facilities, regardless of
21 the fuel currently used at the facility to produce electricity (e.g. coal,
22 natural gas, oil), if the CCR unit still contains CCR and liquids.

23

1 Based on the above applicability criteria, the final rule will apply to
2 Plant Scherer and St. John's River Power Park ("SJRPP"), in which
3 FPL has an ownership interest. The Plant Scherer ash impoundment
4 is an unlined unit for disposal of ash that cannot be beneficially reused.
5 This unit will require additional engineering demonstrations to show
6 compliance with the location restrictions and final rule's performance
7 criteria. If the demonstrations are not made, or indicate that the
8 impoundment does not meet any of the new performance criteria, early
9 closure of the impoundment and development of a new waste storage
10 unit will be required.

11

12 SJRPP utilizes an unlined landfill for the storage of CCR that cannot be
13 beneficially used. The final rule requires an engineering demonstration
14 that SJRPP is not on an unstable formation and meets the final rule's
15 performance criteria for groundwater protection. Failure to meet the
16 new performance criteria will require closure or retrofit of SJRPP with
17 liners.

18 **Q. Please describe FPL's proposed activities associated with the**
19 **CCR Disposal Project.**

20 A. FPL, along with the operating agents Georgia Power Corporation
21 ("GPC") for Plant Scherer and SJRPP, will initiate the necessary
22 actions to meet the new design and performance requirements of the
23 final rule. At both Plant Scherer and SJRPP a new groundwater

1 monitoring and corrective action plan will be developed and additional
2 groundwater monitoring wells will be installed over the next two years.
3 Over the next three years both Plant Scherer and SJRPP must
4 conduct a number of engineering evaluations to meet the
5 demonstrations required for continued use of the impoundment and
6 landfills. The engineering evaluations include safety factor
7 assessments, location evaluations, development of a new closure plan
8 design, and identification and design of new storage facilities that will
9 be needed at the time the unlined units are closed.

10

11 The development of the closure and post-closure care plan is required
12 to be completed by October, 2016. In the event the engineering
13 studies (to be completed by October, 2018) determine that the
14 impoundment or landfills at either SJRPP or Plant Scherer do not meet
15 the design or performance standards, closure will be initiated within six
16 months in accordance with the post-closure care plan.

17 **Q. What is FPL's projected capital investment costs associated with**
18 **the CCR Disposal Project?**

19 A. FPL's preliminary estimate for its ownership share of capital
20 investment costs associated with the CCR Project for both Plant
21 Scherer and SJRPP combined is approximately \$8 million. Proposed
22 activities include engineering studies, plan development, CCR
23 transport system modifications, groundwater monitoring well design,

1 monitoring well installation and periodic monitoring, and new CCR
2 waste management unit design. In the event the ash impoundment at
3 Plant Scherer is forced to enter preliminary closure requiring
4 conversion to full dry ash management and construction of dry ash
5 storage, FPL's ownership share of associated costs are projected to be
6 \$42 million.

7 **Q. What are FPL's projected O&M costs associated with the CCR**
8 **Disposal Project?**

9 A. FPL and its operating agents for Plant Scherer and SJRPP do not
10 anticipate O&M costs to begin until at least 2023. At that time, O&M
11 costs are anticipated for post-closure care, maintenance, and
12 monitoring. Actual expenses will be dependent on the design of the
13 post-closure plan to be developed under the final rule.

14 **Q. How will FPL ensure that the costs incurred for the CCR Disposal**
15 **Project are prudent and reasonable?**

16 A. For each of its co-owned coal plants, FPL will exercise its contractual
17 right under its operating agreements to review and approve contracts
18 greater than specific dollar thresholds defined in the agreements to
19 ensure that each facility is operated in a manner consistent with
20 prudent utility practices.

21 **Q. Is FPL recovering the costs of these activities through any other**
22 **mechanism?**

23 A. No.

CWA 316(b) Rule Status Update

Q. What is the current status of the CWA 316(b) Rule?

A. On October 14, 2014, the final 316 (b) Rule for Existing Facilities (“Final Rule”) became effective.

Q. What is the implementation schedule for the Final Rule?

A. The Florida Department of Environmental Protection (“FDEP”) has chosen to integrate the timeline for the completion and submittal of studies and reports required by the Final Rule into the renewal cycle of the affected facilities’ National Pollutant Discharge Elimination System (“NPDES”) permits. Required studies and reports for facilities whose current NPDES permits expire after July 14, 2018 are due upon submittal of the next NPDES permit renewal application. For facilities with NPDES permits expiring before July 14, 2018, required studies and reports are due to be submitted no later than 180 days prior to the expiration of the facility’s permit (i.e. with the permit renewal application).

The FDEP will determine the Best Technology Available (“BTA”) to minimize adverse environmental impacts at each facility as part of the next permit renewal for that facility, and implement compliance schedules for any required activity to achieve BTA in the renewal permit. The new requirements could result in new capital construction,

1 operational changes, or other modes of compliance to meet the permit
2 requirements.

3 **Q. What are FPL's cost estimates for the required studies to**
4 **determine BTA for FPL's affected facilities?**

5 A. FPL's current O&M cost estimates for the completion of studies and
6 reports for all FPL facilities is approximately \$3.7 million. Required
7 activities resulting from these reports will be completed over the 2015-
8 2021 timeframe during the permit renewal process for each facility.

9 **Q. Does FPL anticipate that there will be further court challenges to**
10 **the Final Rule?**

11 A. Yes. Rule challenges by environmental groups are almost certain as
12 the Final Rule does not require closed-cycle cooling for minimizing
13 entrainment mortality. The environmental groups participated in
14 litigation against the EPA with the previous 316 (b) Phase II Rule
15 issued in 2004, asserting that closed-cycle cooling should be BTA. As
16 with the Final Rule, the prior rule also did not consider closed-cycle
17 cooling to be BTA in all cases. Regardless of the outcome of any
18 challenge to the Final Rule, FPL must proceed with the required
19 studies until such time as the Final Rule is stayed or a decision is
20 made by the Second Circuit Court of Appeals that would negate the
21 requirements of the Final Rule.

22 **Q. Has FPL initiated a new activity required by the Final Rule?**

1 A. Yes. FPL has installed a temporary barrier fence in front of the coarse
2 bar screens and the intake canal of the Cape Canaveral Energy Center
3 (“CCEC”) to address the impingement of horseshoe crabs.

4 **Q. Please briefly describe the situation that is requiring this activity**
5 **at the CCEC.**

6 A. Condition I.C.8 of the CCEC State Industrial Waste Water Permit
7 (“IWW”) FL0001473, issued on February 11, 2011, requires the CCEC
8 to comply with the FDEP’s Best Professional Judgment for
9 implementing the Final Rule and requires the development of a plan to
10 return live fish, shellfish, and other aquatic organisms collected or
11 trapped on the plant intake screens to their natural habitat. Horseshoe
12 crabs are included in the definition of shellfish.

13

14 In early 2014, an unusually large number of horseshoe crabs were
15 being impinged on the coarse bar screens in front of the individual plant
16 intake wells at the CCEC, resulting in an elevated mortality rate.

17

18 On July 16, 2014, FPL submitted an email to the FDEP proposing, in
19 order to comply with permit conditions contained in the CCEC’s IWW
20 permit and the Final Rule, to construct a barrier to direct horseshoe
21 crabs away from the intake area. In that note, FPL stated that it was
22 seeking concurrence that “...such barrier or some other means of
23 protection for the Horseshoe Crab is appropriate and necessary under

1 the CCEC permit conditions and CWA 316 (b)". On July 21, 2014, the
2 FDEP responded that, "From an NPDES permit perspective, this
3 measure appears to be appropriate for meeting the requirements of the
4 NPDES permit" and directed FPL to work with the Florida Fish and
5 Wildlife Conservation Commission ("FWC") and other agencies to
6 come up with a solution to reduce the number of impinged horseshoe
7 crabs at the CCEC. In response, FPL installed a temporary barrier
8 fence at the entrance to the intake canal, which has been moderately
9 successful in reducing the number of horseshoe crabs being impinged.
10 FPL is manually returning those impinged horseshoe crabs to the
11 Indian River.

12 **Q. What further steps are required at the CCEC to remain in**
13 **compliance with the State IWW Permit and the Final Rule?**

14 A. In order to comply with the FDEP's BTA, in July, 2015, FPL met with
15 the FWC and other state and federal agencies to propose a
16 modification to the design and location of the current barrier fence to
17 further improve its effectiveness in preventing horseshoe crabs from
18 entering the intake area. The new permanent barrier design will be
19 constructed of concrete rather than wire and will be significantly more
20 effective in reducing the ability of the horseshoe crabs to climb over the
21 current temporary fence. Additionally, the new barrier location will
22 prevent horseshoe crabs from being entrapped in the fuel oil barge
23 unloading area prior to entering the intake canal so they will have less

1 of an opportunity to get beyond the barrier. FPL will remove the
2 temporary barrier fence upon completion of the installation of the
3 permanent concrete barrier.

4

5 Should the modified barrier design and location not achieve an
6 adequate reduction (i.e. BTA as determined by the regulatory
7 agencies) in horseshoe crab impingement mortality, FPL will work with
8 the regulatory agencies to determine a more effective solution, such as
9 a return system where horseshoe crabs are removed from the plant
10 intakes and immediately returned to the water instead of being
11 manually relocated.

12 **Q. What are FPL's actual and projected costs associated with this**
13 **activity?**

14 A. In 2014 FPL incurred \$37,191 of O&M expenses associated with the
15 engineering study resulting in the temporary barrier fence. FPL is
16 projecting to spend approximately \$231,000 in additional O&M
17 expenses for inspection of the temporary fence and relocation of any
18 horseshoe crabs that become impinged before the installation of the
19 permanent concrete barrier is completed.

20

21 FPL intends to begin engineering and permitting of the permanent
22 concrete barrier in 2015 with construction likely in 2016. FPL's capital

1 investment costs for the concrete barrier are projected to be
2 approximately \$0.5 million.

3 **Q. Does this conclude your testimony?**

4 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
FLORIDA POWER & LIGHT COMPANY
TESTIMONY OF RANDALL R. LABAUVE
DOCKET NO. 150007-EI
AUGUST 31, 2015

Q. Please state your name and address.

A. My name is Randall R. LaBauve and my business address is 700 Universe Boulevard, Juno Beach, Florida 33408.

Q. By whom are you employed and in what capacity?

A. I am employed by NextEra Energy, Inc. (“NEE”) as Vice President of Environmental Services.

Q. Have you previously testified in this docket?

A. Yes.

Q. What is the purpose of your testimony in this proceeding?

A. The purpose of my testimony is to present the Commission with updates on FPL’s Greenhouse Gas Reduction (“GHG”) Project, an additional activity associated with FPL’s Manatee Temporary Heating System Project at the Cape Canaveral Energy Center (“CCEC”) and an update to the Turkey Point Cooling Canal Monitoring Plan (“TPCCMP”) Project.

Q. Have you prepared or caused to be prepared under your direction, supervision or control an exhibit in this proceeding?

A. Yes. I am sponsoring the following exhibits:

- 1 • RRL-3 – Letter from United States Fish and Wildlife Service
- 2 ("USFWS") requiring action for manatee protection at the CCEC
- 3 • RRL-4 – Proposed conceptual changes to the manatee heating
- 4 system at the CCEC

5

6 **GHG Reduction Project Update**

7

8 **Q. Please provide an update on FPL’s GHG Reduction Project.**

9 A. In FPL’s Environmental Cost Recovery actual/estimated true-Up testimony

10 for the period January 2014 through December 2014, I provided an update

11 on the status of FPL’s GHG Reduction Project. At that time the

12 Environmental Protection Agency (“EPA”) had recently proposed its GHG

13 performance standards for existing power plants, referred to as the Clean

14 Power Plan (“CPP”). The draft CPP rule proposed that all of FPL’s existing

15 fossil fuel fired power plants would be subject to the rule requirements with

16 the exception of its peaking combustion turbines. In the draft rule, the

17 EPA established an interim goal for Florida (2020 – 2029 average) of 794

18 lb. CO₂/MWh with a final goal of 740 lb. CO₂/MWh by 2030. The EPA

19 calculated Florida’s 2012 baseline emission rate for existing units at 1,221

20 lb. CO₂/MWh, which would require a more than 36% reduction to achieve

21 the EPA’s 2030 goal for the state of Florida.

22

23 The EPA based those limits on what was defined as Best System of

24 Emission Reduction (“BSER”) for affected units. The EPA applied this

1 BSER requirement on an electric generation system-wide basis, with the
2 goal of achieving a 30% system-wide reduction in GHG emissions in 2030
3 using a 2005 year baseline. The EPA's four main building blocks for BSER
4 and their associated emission reduction assumptions were:

- 5 1. Increase fuel efficiency of coal fired power plants by 6%.
- 6 2. Increase dispatch of existing Natural Gas Combined Cycle units to
7 achieve a 70% capacity factor, proportionately reducing coal, oil and
8 natural gas steam generation.
- 9 3. Include non-emitting generation in the calculation of state emission
10 rates including new nuclear, 6% of existing nuclear generation, and
11 existing and new development of renewable generation.
- 12 4. Reduction of electric consumption (and hence generation) through
13 energy efficiency and demand side management by 1.5% annually
14 through 2030.

15
16 On August 3, 2015 the EPA issued its final CPP rule for existing sources
17 along with a proposed Federal Implementation Plan ("FIP") and Model
18 Trading rules.

19 **Q. What changes did the final CPP rule make to the proposed rule?**

20 A. While the EPA has not yet published the final CPP rule in the Federal
21 Register, the Pre-Publication Rule as signed by the EPA Administrator
22 contains several major changes that will result in a final nation-wide CO₂
23 reduction of 32%, in contrast with the 30% reduction in the proposed CPP
24 rule. The final CPP rule adjusts the state specific targets for reductions,

1 timing for compliance by affected sources, and the building block
2 approach that the EPA had included in the proposed CPP rule. As a
3 result of corrections made to the baseline data, and the changes to the
4 methodology that the EPA used in establishing its BSER approach, the
5 interim and final goals for states changed in the final CPP rule. While
6 several states have revised standards that are more restrictive, the EPA's
7 approach under the final CPP rule resulted in a relaxation of Florida's
8 standards with an interim goal of 1,023 lb/MWh and a final goal of 919
9 lb/MWh. Additionally, to address concerns raised by the industry
10 regarding the state's interim goal, the EPA's final CPP rule provides for
11 the step-wise implementation schedule to begin in 2022, two years later
12 than originally proposed.

13

14 The final CPP rule provides states with three compliance deadlines: 2022–
15 2024, 2025–2027, and 2028–2029, with lower targets for each successive
16 step until reaching the 2030 final goal. The final CPP rule also changes
17 the EPA's building block approach by eliminating proposed building block
18 4 (energy efficiency) from the state target setting requirements. The final
19 CPP rule also reduces the assumed energy efficiency improvements at
20 existing coal-fired power plants in building block 1 from a nation-wide
21 factor of 6% to a regional specific factor of 4.3% for the Eastern
22 interconnection (this applies to units in Florida and Georgia, among other
23 states).

24

1 Other changes include step-wise increases in the assumed use of natural
2 gas combined cycle units on a regional basis in lieu of state wide
3 increases, and crediting only incremental and new renewable and nuclear
4 generating units for use by states in achieving their targets. To incentivize
5 new renewable and energy efficiency projects, the EPA created an early
6 action incentive program that is available for projects built after the state
7 submits its State Implementation Plan (“SIP”) for approval. Emission
8 Reduction Credits from these early action incentive projects can be used
9 to offset CO₂ emissions occurring after the 2022 compliance start date of
10 the rule. The EPA’s final CPP rule also provides states with an option of
11 meeting a mass (i.e., total ton) limit for fossil generating units and provides
12 a model cap-and-trade rule that states can adopt in their rule
13 implementation plans.

14 **Q. Is FPL developing its strategy to comply with the final CPP rule**
15 **requirements?**

16 A. Yes. FPL is reviewing the final CPP rule but will not know what additional
17 compliance requirements will be needed until Florida proposes a SIP or
18 the EPA imposes a FIP, should the state not submit an approvable SIP.
19 FPL has reviewed its recent fossil fleet CO₂ emissions and concluded that
20 the current system-wide rate is lower than the EPA’s final 2030 target for
21 Florida. However, should the EPA or the DEP require FPL to meet a more
22 stringent rate, further emission reductions that would occur as a result of
23 adding new nuclear generation and renewables may be necessary.

24

1 **Q. Does FPL intend to submit comments or otherwise engage the EPA**
2 **and the DEP on development of the proposed FIP rule that was**
3 **released with the final CPP rule, as well as Florida's plans to**
4 **implement the final CPP rule?**

5 A. Yes. FPL is actively participating with industry groups including the Edison
6 Electric Institute, the Clean Energy Group, and the Class of '85 Regulatory
7 Response Group to provide comments to the EPA's proposed FIP rule
8 and seek clarification on various aspects of the final CPP rule. FPL also
9 plans to work closely with the DEP in the development of its state plan and
10 associated state rule development to implement the final CPP rule. FPL is
11 aware that several states and industry petitioners have filed legal
12 challenges to certain aspects of the final CPP rule including the EPA's
13 authority to regulate GHGs from existing units under §111(d), its proposed
14 BSER for states and affected units, and its proposed options that may
15 allow new units to be included within the final CPP rule.

16

17 **CCEC Manatee Temporary Heating System Update**

18

19 **Q. Please briefly describe the current status of the manatee heating**
20 **system at the CCEC.**

21 A. FPL is subject to specific and continuing legal requirements to provide a
22 warm water refuge for endangered manatees at the CCEC. Specific
23 Condition 13 of the CCEC's State Industrial Wastewater Facility Permit
24 Number FL0001473, issued on February 24, 1999, states that the CCEC

1 must submit a Manatee Protection Plan (“MPP”) with each subsequent
2 permit application. The current MPP, previously approved by the Florida
3 Fish and Wildlife Conservation Commission (“FWC”) and the USFWS, is
4 dated August 8, 2000. In order to comply with this MPP during the CCEC
5 modernization project, FPL installed a temporary manatee heating system
6 to provide a warm water refuge for manatees while the plant was shut
7 down for the modernization project, as directed by correspondence from
8 USFWS dated June 24, 2008. This system uses an area adjacent to the
9 CCEC intake canal, which of course was not in operation when the plant
10 was shut down for the modernization project. In order to maximize the
11 efficiency of the manatee heating system, FPL installed a divider wall that
12 restricted the heated water to a limited portion of the intake canal and
13 hence reduced the amount of water that needed to be heated.

14
15 Originally, FPL expected that the manatee heating system would only be
16 needed during the time that CCEC was shut down for the modernization
17 project. However, because of the large number of manatees that utilize
18 the CCEC as a warm-water refuge during winter months and the relatively
19 low ambient water temperatures during the manatee season at this
20 location, FPL has kept the manatee heating system operational to serve
21 as a back-up in case the entire CCEC plant needs to shut down for an
22 outage during future manatee seasons. Per the MPP, manatee season
23 runs from November 15 to March 31 each year. As I have explained in

1 prior testimony on the MPP, the obligation to maintain a warm-water
2 refuge continues even when the CCEC is shut down.

3 **Q. Have there been any new developments that impact environmental**
4 **compliance requirements for the manatee heating system at the**
5 **CCEC?**

6 A. Yes. Since the modernization of CCEC was completed in 2013 and the
7 intake canal is now back in use, FPL has had to notify the FWC of 17
8 manatee carcasses that have been retrieved from the CCEC intake wells.
9 The USFWS and FWC were able to determine that some of the manatees
10 died prior to entering the intake canal. It is quite likely that these
11 manatees were impacted by the Unusual Mortality Event (“UME”) that took
12 place in the Indian River Lagoon (“IRL”) in the 2012-13 timeframe. During
13 this UME, a much larger number of manatees than normal died in the IRL
14 of undermined causes. However, for the remaining manatees, it was not
15 possible to determine if they had died prior to appearing in the wells. It is
16 possible that plant operations may have caused or contributed to the
17 death of some of these manatees.

18
19 The MPP states that in order for the CCEC to comply with Tasks 25 and
20 251 of the USFWS Florida Manatee Recovery Plan, FPL shall develop a
21 plan and procedures addressing potential manatee impacts. In addition,
22 in correspondence dated August 24, 2015, which is provided as Exhibit
23 RRL-3, the USFWS has informed FPL that the impingement of
24 compromised manatees in the intake wells could be considered as “takes”

1 under the Endangered Species Act of 1973 (16 U.S.C. § 1531 et seq) and
2 has directed FPL to take action to develop a solution to preclude future
3 takes.

4 **Q. What action does FPL plan to take to address this issue at the**
5 **CCEC?**

6 A. In early 2015, FPL retained a consultant to propose options to address the
7 reduction of manatee impingement. FPL met with the FWC and the
8 USFWS during the May-August 2015 time frame to discuss strategies to
9 reduce potential future impacts. FPL concluded that the divider wall
10 installed in the intake canal to limit the volume of heated water required for
11 the manatee heating system had the unintended effect of increasing the
12 velocity of water entering the intake canal by about 50%, once the intake
13 canal went back into operation. Based on evaluation of the proposed
14 options and considering input received at the meetings with USFWS, FPL
15 believes the most cost-effective solution is to move the “manatee heating
16 area” away from the intake wells at the end of the intake canal and thus
17 allow the divider wall to be removed. Exhibit RRL-4 provides a conceptual
18 drawing of the proposed relocated manatee heating area. By removing
19 the divider wall, the velocity of the intake water will be reduced to a rate
20 lower than the original plant intake water velocity, thus substantially
21 reducing the likelihood of manatee impingement.

22 **Q. Has FPL estimated the costs for these additional activities at the**
23 **CCEC?**

1 A. Based on preliminary in-house estimates, FPL believes total O&M costs
 2 associated with the relocation of the manatee heating area will be in the
 3 \$1.5 million to \$2 million range. FPL plans to retain a contractor via the
 4 bid process to design, permit, and implement the relocation of the
 5 manatee heating area at the CCEC. FPL anticipates the engineering,
 6 construction and relocation will be completed by November 15, 2016 (i.e.
 7 the start of the 2016-17 manatee season).

8
 9 **Turkey Point Cooling Canal Monitoring Plan Project**

10
 11 **Q. What is the current status of FPL’s TPCCMP Project?**

12 A. FPL continues to conduct the monitoring and reporting requirements of the
 13 TPCCMP, including data collection and publication of periodic reports.
 14 Additionally, beginning in 2014 and continuing in 2015, FPL has
 15 undertaken activities to deliver new sources of water and remove
 16 sediment, both directed at reducing the salinity of the CCS. These
 17 activities address salinity reduction requirements in the Administrative
 18 Order (“AO”) issued by the DEP. During 2015, four water delivery
 19 activities are expected to be completed, including the development and
 20 installation of three wells east of the CCS (PW-1, SW-1, and SW-2) that
 21 will provide additional water to the CCS, and the installation of pumps and
 22 pipelines to deliver excess stormwater from the L-31 canal. Sediment
 23 removal is being conducted in the CCS, to redistribute the water flow more
 24 evenly. Improving the water flow in turn improves the efficiency of the

1 CCS heat exchange, reducing water temperature and hence evaporation
 2 rates in the CCS. A lower evaporation rate contributes to lowering salinity,
 3 because evaporation concentrates the salt content in the CCS. The
 4 sediment removal also improves the hydraulic connection between the
 5 CCS and underlying groundwater, supporting the overall salinity reduction
 6 effort.

7 **Q. What TPCCMP activities does FPL plan to undertake in 2016?**

8 A. FPL expects to undertake the following TPCCMP activities in 2016:

- 9 • FPL will continue to conduct the monitoring and reporting requirements
 10 of the TPCCMP, including data collection and publication of periodic
 11 reports.
- 12 • FPL plans to continue to pump water from the three wells completed in
 13 2015 and also anticipates being able to receive excess stormwater
 14 from the L-31 canal.
- 15 • The permits that allow for the use of the excess stormwater from the L-
 16 31 contain a number of requirements that FPL is obligated to execute,
 17 including ground and surface water sampling as well as administrative
 18 requirements to monitor and document water flow from the L-31 canal,
 19 which will need to be addressed in 2016.
- 20 • FPL plans to install the Upper Floridan Aquifer wells at Turkey Point,
 21 once the administrative challenge to that work is resolved.
- 22 • FPL plans to continue the CCS sediment removal.

23 **Q. What are FPL’s cost projections for these 2016 TPCCMP activities?**

24

- 1 A. FPL projects that it will incur \$28.0 million in O&M and \$6.8 million in
2 capital costs in 2016.
- 3 **Q. Does this conclude your testimony?**
- 4 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
FLORIDA POWER & LIGHT COMPANY
TESTIMONY OF TERRY J. KEITH
DOCKET NO. 150007- EI
APRIL 1, 2015

Q. Please state your name and address.

A. My name is Terry J. Keith and my business address is 9250 West Flagler Street, Miami, Florida, 33174.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (“FPL”) as Director, Cost Recovery Clauses in the Regulatory & State Governmental Affairs Business Unit.

Q. Have you previously testified in this or predecessor dockets?

A. Yes, I have.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present for Commission review and approval the Environmental Cost Recovery Clause (“ECR”) final true-up amount associated with FPL’s environmental compliance activities for the period January 2014 through December 2014.

Q. Have you prepared or caused to be prepared under your direction, supervision or control an exhibit in this proceeding?

- 1 A. Yes, I have. My Exhibit TJK-1 contained in Appendix I consists of nine
2 forms.
- 3 • Form 42-1A reflects the final true-up for the period January 2014 through
4 December 2014.
 - 5 • Form 42-2A provides the final true-up calculation for the period.
 - 6 • Form 42-3A provides the calculation of the interest provision for the
7 period.
 - 8 • Form 42-4A provides the calculation of variances between actual and
9 actual/estimated costs for O&M Activities.
 - 10 • Form 42-5A provides a summary of actual monthly costs for the period
11 for O&M Activities.
 - 12 • Form 42-6A provides the calculation of variances between actual and
13 actual/estimated costs for Capital Investment Projects.
 - 14 • Form 42-7A provides a summary of actual monthly costs for the period
15 for Capital Investment Projects.
 - 16 • Form 42-8A provides the calculation of depreciation expense and return
17 on capital investment for each capital investment project. Pages 39
18 through 42 provide the beginning of period and end of period depreciable
19 base by production plant name, unit or plant account and applicable
20 depreciation rate or amortization period for each Capital Investment
21 Project.
 - 22 • Form 42-9A presents the capital structure, components and cost rates

1 relied upon to calculate the rate of return applied to capital investments
2 and working capital amounts included for recovery through the ECR for
3 the period.

4 **Q. What is the source of the data that you present by way of testimony or**
5 **exhibits in this proceeding?**

6 A. Unless otherwise indicated, the data are taken from the books and records of
7 FPL. The books and records are kept in the regular course of FPL's
8 business in accordance with generally accepted accounting principles and
9 practices, and with the provisions of the Uniform System of Accounts as
10 prescribed by this Commission.

11 **Q. Please explain the calculation of the net true-up amount.**

12 A. Form 42-1A, entitled "Calculation Of The Final True-up Amount" shows the
13 calculation of the net true-up for the period January 2014 through December
14 2014, an under-recovery of \$3,164,408, which FPL is requesting to be
15 included in the calculation of the ECR factors for the January 2016 through
16 December 2016 period.

17

18 The actual end-of-period under-recovery for the period January 2014 through
19 December 2014 of \$1,979,488 (shown on Form 42-1A, Line 3) minus the
20 actual/estimated end-of-period over-recovery for the same period of
21 \$1,184,920 (shown on Form 42-1A, Line 6) results in the net true-up under-
22 recovery for the period January 2014 through December 2014 (shown on
23 Form 42-1A, Line 7) of \$3,164,408.

1 **Q. Have you provided a schedule showing the calculation of the end-of-**
2 **period true-up?**

3 A. Yes. Form 42-2A, entitled "Calculation of Final True-up Amount," shows the
4 calculation of the end-of-period true-up for the period January 2014 through
5 December 2014. The end-of-period true-up shown on Form 42-2A, lines 5
6 plus 6 is an under-recovery of \$1,979,488. Additionally, Form 42-3A shows
7 the calculation of the interest provision of \$96, which is applicable to the end-
8 of-period true-up under-recovery of \$1,979,584.

9 **Q. Is the true-up calculation consistent with the methodology approved by**
10 **this Commission for other cost recovery clauses?**

11 A. Yes, it is. The calculation of the true-up amount follows the procedures
12 established by this Commission as set forth on Commission Schedule A-2
13 "Calculation of the True-Up and Interest Provisions" for the Fuel Cost
14 Recovery Clause.

15 **Q. Are all costs listed in Forms 42-4A through 42-8A attributable to**
16 **environmental compliance projects approved by the Commission?**

17 A. Yes, they are.

18 **Q. How did actual expenditures for January 2014 through December 2014**
19 **compare with FPL's actual/estimated projections as presented in**
20 **previous testimony and exhibits?**

21 A. Form 42-4A shows that total O&M project costs were \$1,102,795, or 4.1%
22 higher than projected and Form 42-6A shows that total capital investment

1 project costs were \$480,529 or 0.2% lower than projected. Individual project
2 variances are provided on Forms 42-4A and 42-6A. Return on capital
3 investment, depreciation and taxes for each capital project for the period
4 January 2014 through December 2014 are provided on Form 42-8A, pages
5 12 through 38.

6 **Q. Please explain the reasons for the significant variances in O&M and**
7 **capital investment projects.**

8 A. FPL's variance explanations address variances of greater than approximately
9 10% from the actual/estimated projections for a project and/or greater than
10 approximately \$50,000, referring to these as "significant". The significant
11 variances in FPL's 2014 expenses relate to the following projects:

12

13 O&M Variance Explanations

14

15 **Project 1. Air Operating Fees**

16 Project expenditures were \$47,879 or 37.6% lower than previously projected.

17 The variance is primarily due to lower than projected fossil plant emissions
18 which reduced fees.

19

20 **Project 3a. Continuous Emission Monitoring Systems (CEMS)**

21 Project expenditures were \$350,448 or 34.6% lower than previously
22 projected. The variance is primarily due to the following reasons:

23

- Replacement of the CEMS umbilical at the Ft. Myers plant was

1 delayed due to timing in the delivery of required materials. The
2 installation is now planned to occur in 2015. Additionally,
3 replacement of umbilicals in the short (bypass) stacks was not
4 required.

- 5 • Lower than projected use of oil at the Martin and Manatee plants
6 resulted in lower than expected costs for oil sample analyses.
- 7 • Fewer repairs were required at the Sanford plant due to a reduction in
8 the frequency of system leaks resulting from equipment modifications
9 to remove defective permeation dryers.

10

11 **Project 5a. Maintenance of Stationary Above Ground Fuel Storage**
12 **Tanks**

13 Project expenditures were \$698,685 or 23.3% lower than previously
14 projected. The variance is primarily due to fewer than expected mechanical
15 tank repairs on the Manatee fuel oil storage tank (PMT-1371B) as well as the
16 Martin Unit 1 metering tank (PMR M1). During internal and external
17 inspections it was determined that there was no need to make these repairs.
18 In addition, a contractor inadvertently charged his time to Project #23 –
19 SPCC, which should have been charged to Project #5 – Maintenance of
20 Stationary Above Ground Fuel Storage Tanks. A correction and adjustment
21 was completed in February 2015.

22

23

1 **Project 13. RCRA Corrective Action**

2 Project expenditures were \$8,000 or 35.1% lower than previously projected.

3 The variance is primarily due to a delay by the Florida Department of
4 Environmental Protection (“FDEP”) to grant closure of the diesel spill sites
5 using administrative controls (deed restrictions). As a result, FPL cannot yet
6 develop the additional documentation necessary for closure.

7

8 **Project 17a. Disposal of Non-Containerized Liquid Waste**

9 Project expenditures were \$391 or 61.2% higher than previously projected
10 primarily due to unanticipated maintenance on ash press equipment.

11

12 **Project 19a. Substation Pollutant Discharge Prevention and Removal –**
13 **Distribution**

14 Project expenditures were \$487,806 or 23.0% lower than previously
15 projected. The variance is primarily due to delays in obtaining equipment
16 clearances (i.e., de-energize equipment), which resulted in a lower than
17 projected number of transformers being repaired during 2014.

18

19 **Project 19b. Substation Pollutant Discharge Prevention and Removal –**
20 **Transmission**

21 Project expenditures were \$730,667 or 29.9% lower than previously
22 projected. The variance is primarily due to delays in obtaining equipment
23 clearances (i.e., de-energize equipment), which resulted in a lower than

1 projected number of transformers being repaired in 2014.

2

3 **Project 22. Pipeline Integrity Management**

4 Project expenditures were \$120,808 or 24.5% lower than previously
5 projected. The variance is primarily due to a delay in the completion of port
6 construction activities by the Port Authority, which resulted in delayed dock
7 unloading pit work at the Port of Palm Beach necessary to allow vessels to
8 unload fuel oil. Without the ability to receive a vessel, the TMR-30 Pipeline
9 could not be on-line for the planned pipeline inspection. The pipeline
10 inspection requires the inspection tool to be propelled down the pipeline as
11 an oil cargo is received and conveyed to the Martin Fuel Terminal.

12

13 **Project 23. Spill Prevention, Control & Countermeasures – SPCC**

14 Project expenditures were \$94,471 or 8.0% lower than previously projected.
15 The variance is primarily due to lower than projected engineering costs for
16 containment at the Martin site. This was partially offset by a contractor
17 inadvertently charging his time to project #23 – SPCC, which should have
18 been charged to project #5 - Maintenance of Stationary Above Ground Fuel
19 Storage Tanks. A correction and adjustment was completed in February
20 2015.

21

22 **Project 24. Manatee Reburn**

23 Project expenditures were \$137,307 or 41.9% lower than previously

1 projected. The variance is primarily due to fewer than anticipated repairs to
2 the Manatee reburn system as a result of lower than projected use of fuel oil.

3

4 **Project 28. CWA 316(b) Phase II Rule**

5 Project expenditures were \$271,995 or 59.0% lower than previously
6 projected. The variance is primarily due to the FDEP revising its
7 implementation schedule after the 316(b) Existing Rule became effective on
8 October 14, 2014. The projected expenditures are expected to be incurred
9 in 2015 or later.

10

11 **Project 30. HBMP**

12 Project expenditures were \$2,573 or 10.9% higher than previously projected.
13 The variance is primarily due to an increase in the monthly monitoring cost
14 adjusted for the annual cost of living adjustment by the vendor.

15

16 **Project 31. CAIR**

17 Project expenditures were \$56,355 or 1.1% lower than previously projected.
18 The variance is primarily due to lower than projected costs for the 800 MW
19 cycling project at the Martin plant. Lower chemical costs and reduced water
20 treatment costs resulted from the purchase of equipment in lieu of equipment
21 lease expenses. In addition, a reduction in ammonia costs at Plant Scherer
22 Unit 4 resulted from improved tuning of the SCR ammonia injection system
23 for NOx control that was partially offset by higher than projected limestone

1 costs for SO₂ removal compliance requirements that resulted from burning
2 coals with higher than originally estimated sulfur content. FPL also had lower
3 than projected legal expenses, which resulted from the Supreme Court's
4 decision on the challenge of the Environmental Protection Agency's ("EPA")
5 final Cross State Air Pollution Rule ("CSAPR").

6
7 **Project 32. BART**

8 Project expenditures were \$6,000 or 100.0% lower than previously projected.
9 The variance is due to planned consultant work that was no longer needed
10 following the EPA's acceptance of the FDEP's Regional Haze and BART
11 State Implementation Plan.

12
13 **Project 33. MATS Project**

14 Project expenditures were \$312,096 or 21.6% higher than previously
15 projected. The variance is primarily due to baghouse overhaul costs that
16 were not included in the 2014 projections. The overhaul of the baghouse
17 included the replacement of bags for collection of mercury sorbent,
18 maintenance of mechanical and air pulse jet systems, and maintenance of
19 the sorbent storage silo.

20
21 **Project 35. Martin Plant Drinking Water System Compliance**

22 Project expenditures were \$9,389 or 31.1% higher than previously projected.
23 The variance is primarily due to an increase in monthly charges to clean the

1 nano-scale filters on the potable water system. Additionally, the annual fee to
2 provide 40 cubic feet of activated carbon for the potable water plant was
3 inadvertently excluded from original projections.

4

5 **Project 38. Space Coast Next Generation Solar Energy Center**

6 Project expenditures were \$22,976 or 10.1% lower than previously projected.
7 The variance is primarily due to a delay in the replacement of fans that had
8 begun to fail at the sister site of Desoto, but fortunately have not failed at
9 Space Coast. Currently, FPL believes replacement will take place at the end
10 of the fans' life cycle. In addition, staffing was reduced during the first six
11 months.

12

13 **Project 39. Martin Next Generation Solar Energy Center**

14 Project expenditures were \$71,035 or 1.8% lower than previously projected.
15 The variance is a result of fewer than expected seal failures on the heat
16 transfer pumps. Failures were reduced in the second half of 2014 by
17 increasing pump speed on startup, which reduced the amount of friction the
18 seals experience.

19

20 **Project 40. Greenhouse Gas Reduction Program**

21 Project expenditures were \$19,988 or 69.3% lower than previously projected.
22 The variance is primarily a result of not incurring planned consultant costs for
23 analysis of the EPA's Clean Power Plan from existing fossil-fueled electric

1 generating units until after 2014. FPL had anticipated the use of an outside
2 consultant to analyze and assist FPL in the preparation of rule comments,
3 but decided not to pursue this option and instead participated through
4 industry groups.

5
6 **Project 42. Turkey Point Cooling Canal Monitoring Plan**

7 Project expenditures were estimated to be \$4,225,507 or 264.5% higher than
8 previously projected. As a Condition to the Site Certification for the Units 3
9 and 4 Extended Power Uprate (2008), the South Florida Water Management
10 District (“SFWMD”) required that FPL establish an extensive Cooling Canal
11 System (“CCS”) monitoring program to collect data regarding the interaction
12 of hyper-saline CCS water and the surrounding groundwater. This project
13 was approved to recover costs incurred in connection with the monitoring
14 program, including any corrective measures that might be required as a
15 result of it.

16
17 Based on the data collected under this monitoring program, the FDEP, in
18 consultation with SFWMD and Miami Dade County (“MDC”), developed a
19 draft Administrative Order (“AO”) that was first shared with FPL for comments
20 in the Summer of 2014 and Fall of 2014. The draft and, ultimately, the final
21 AO that was issued by the FDEP on December 23, 2014, directed FPL to
22 reduce salinity in the CCS and identified a series of potential measures that
23 FPL could include in its Salinity Management Plan. One of those potential

1 measures is the use of storm water from the nearby L-31E Canal, when and
2 if it is available during the wet season (generally, from June – October).
3 When available, storm water is an exceptionally cost-effective means of
4 salinity reduction because it is much less saline than other potentially
5 available sources of water.

6
7 FPL became aware in September of 2014 of a limited window of opportunity
8 to make use of this cost-effective source of low salinity water (the L-31E
9 Canal), with the next potential opportunity not available until June 2015 at the
10 earliest. FPL worked with the FDEP, SFWMD and MDC to obtain approvals
11 to pump L-31E Canal water into the CCS between September 26 and
12 October 15, 2014. This initiative was extremely positive, reducing average
13 salinity in the CCS from 87 parts per thousand to less than 75 parts per
14 thousand in just 20 days.

15

16 **Project 45. 800 MW Unit ESP**

17 Project expenditures were \$246,831 or 33.8% lower than previously
18 projected. The variance is primarily due to less run time on fuel oil than
19 originally planned at the Manatee plant. In addition, at the Martin plant there
20 were no maintenance costs in 2014. Any equipment failures were covered
21 under warranty.

22

23

1 **Project 46. St. Lucie Cooling Water Discharge Monitoring**

2 Project expenditures were \$53,625 or 13.5% lower than previously projected.

3 The variance is primarily due to a delay in sampling, which was originally
4 scheduled for December of 2014 and delayed until January 2015 due to
5 weather constraints. The variance is also partially attributed to lower than
6 originally estimated contracted project manager costs.

7

8 **Project 48. Industrial Boiler MACT**

9 Project expenditures were \$6,536 or 65.4% lower than previously projected.

10 The variance is a result of lower than originally estimated contractor costs for
11 the EPA required energy assessment of the Martin Terminal fuel oil heaters.

12

13 **Project 49. Thermal Discharge Standards**

14 Project expenditures were \$49,557 or 26.3% lower than previously projected.

15 The variance is primarily due to the delayed release of Indian River seagrass
16 coverage data because of a lack of agency funding for subcontractors and
17 project support. In turn, the delayed availability of the data delayed
18 completion of the study report for the Cape Canaveral plant. As a result,
19 some expenses previously projected to be incurred in 2014 will be incurred in
20 2015.

21

22

23

1 **Project 50. Steam Electric Effluent Guidelines Revised Rules**

2 Project expenditures were \$85,302 or 568.7% higher than previously
3 projected. The variance is primarily due to FPL's portion of the cost of
4 studies conducted by Georgia Power Company for Plant Scherer to assess
5 the compliance costs that will be incurred due to the various revised steam
6 effluent guidelines. The operating agent did not provide FPL with a cost
7 estimate for these studies until the fourth quarter of 2014 so there was no
8 amount included in either the original 2014 projections or the
9 actual/estimated true up for this project.

10

11 **Project 51. Gopher Tortoise Relocation Project**

12 Project expenditures were \$12,213 or 42.1% lower than previously projected.
13 The variance is due to lower than projected gopher tortoise relocations at the
14 Martin, Manatee and Sanford sites.

15

16 **Project 52. Numeric Nutrient Criteria Water Quality Standards in**
17 **Florida**

18 Project expenditures were \$1,248 or 98.5% lower than previously projected.
19 The variance is primarily due to the fact that estimates were based on a
20 worst case scenario in which multiple plants may have had to perform
21 biological and effluent monitoring and change the types of chemicals used
22 and discharged from power plant operations to alter the amount of nutrients
23 (i.e. nitrogen and/or phosphorus) present in the effluent. To date, the State

1 of Florida has not implemented the final Numeric Nutrient Criteria rule. Final
2 rule implementation will occur in 2015. The FDEP is creating a process and
3 schedule for rule compliance.

4 5 Capital Variance Explanations

6 7 **Project 5b. Maintenance of Stationary Above Ground Fuel Storage** 8 **Tanks**

9 Project depreciation and return on investment were \$61,617 or 6.4% lower
10 than previously projected. The variance is primarily attributed to a change in
11 the in-service date of upgrades to the fuel storage tank at the Martin site.
12 This work, which includes upgrading the tank's roof and installation of a
13 secondary containment anchorage system has been delayed until 2015.

14 15 **Project 21. St. Lucie Turtle Nets**

16 Project depreciation and return on investment were \$156,319 or 56.0% lower
17 than previously projected. The variance is primarily attributed to a change in
18 the in-service date of the installation of the permanent turtle net barrier
19 structure from October 2014 to January 2015.

20 21 **Project 31. CAIR**

22 Project expenditures were \$110,197 or 0.2% lower than previously projected.
23 The variance is primarily due to credits received from Georgia Power

1 Company for plant common construction costs for the Flue Gas
2 Desulfurization (“FGD”) Selective Catalytic Reduction (“SCR”) pollution
3 control devices installed on Scherer Unit 4 to comply with the Georgia Multi-
4 Pollutant rule and the CAIR.

5

6 **Project 36. Low-Level Radioactive Waste Storage**

7 Project depreciation and return on investment were \$321,127 or 28.1% lower
8 than previously projected. The variance is primarily due to a change in the
9 in-service date of the construction of the low-level radioactive storage facility
10 at the Turkey Point plant from September 2014 to January 2015.

11

12 **Project 45. 800 MW Unit ESP**

13 Project depreciation and return on investment were \$205,737 or 1.0% higher
14 than previously projected. The variance is primarily due to a construction
15 change order for crane mat removal, restoration and re-sequencing of work
16 due to a repair of a fire line rupture; partially offset by the shift of milestone
17 achievements and other construction related cash flow to 2015. The
18 increase affected beginning plant balance thus increasing the return
19 calculation and depreciation expense.

20

21 **Q. Does this conclude your testimony?**

22 A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
FLORIDA POWER & LIGHT COMPANY
TESTIMONY OF TERRY J. KEITH
DOCKET NO. 150007-EI
JULY 31, 2015

Q. Please state your name and address.

A. My name is Terry J. Keith, and my business address is 9250 West Flagler Street, Miami, Florida, 33174.

Q. By whom are you employed and in what capacity?

A. I am employed by Florida Power & Light Company (“FPL” or “the Company”) as Director, Cost Recovery Clauses in the Regulatory Affairs Department.

Q. Have you previously testified in this docket?

A. Yes, I have.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present for Commission review and approval the Actual/Estimated True-up associated with FPL’s environmental compliance activities for the period January 2015 through December 2015.

Q. Have you prepared or caused to be prepared under your direction, supervision or control an exhibit in this proceeding?

A. Yes, I have. My exhibit TJK-2 consists of nine forms, PSC Forms 42-1E through 42-9E, included in Appendix I.

- Form 42-1E provides a summary of the Actual/Estimated True-up

- 1 amount for the period January 2015 through December 2015.
- 2 • Forms 42-2E and 42-3E reflect the calculation of the Actual/Estimated
3 True-up amount for the period.
- 4 • Forms 42-4E and 42-6E reflect the Actual/Estimated O&M and Capital
5 cost variances as compared to original projections for the period.
- 6 • Forms 42-5E and 42-7E reflect jurisdictional recoverable O&M and
7 Capital project costs for the period.
- 8 • Form 42-8E (pages 12 through 38) reflects return on capital
9 investments and depreciation by project. Pages 39 through 41
10 provide the beginning of period and end of period depreciable base by
11 production plant name, unit or plant account and applicable
12 depreciation rate or amortization period for each Capital Investment
13 Project.
- 14 • Form 42-9E provides the capital structure, components and cost rates
15 relied upon to calculate the revenue requirement rate of return applied
16 to capital investments and working capital amounts included for
17 recovery for the period January 2015 through December 2015.

18 **Q. Please explain the calculation of the Environmental Cost Recovery**
19 **Clause (“ECRC”) Actual/Estimated True-up amount you are requesting**
20 **this Commission to approve.**

21 A. The Actual/Estimated True-up amount for the period January 2015 through
22 December 2015 is an under-recovery, including interest, of \$37,619,712

1 (Appendix I, Page 2, line 5 plus line 6). This Actual/Estimated True-up
2 amount consists of actual data for January 2015 through June 2015 and
3 revised estimates for July 2015 through December 2015, compared to
4 original projections for the same periods.

5 **Q. Are all costs listed in Forms 42-1E through 42-8E attributable to**
6 **environmental compliance projects previously approved by the**
7 **Commission?**

8 A. All costs listed in Forms 42-1E through 42-8E are associated with
9 environmental compliance projects that have been previously approved by
10 the Commission, with the exception of Coal Combustion Residuals Disposal
11 Project (“the CCR Disposal Project”). This project is presented for
12 Commission review and approval in the direct testimony of FPL witness
13 Randall R. LaBauve, included in this filing.

14 **Q. How do the Actual/Estimated project expenditures for January 2015**
15 **through December 2015 compare with original projections?**

16 A. Form 42-4E (Appendix I, Page 4) shows that total O&M project costs were
17 \$40,408,027 higher than projected, while Form 42-6E (Appendix I, Page 8)
18 shows that total capital investment project costs were \$745,686 lower than
19 projected. Individual project variances are provided on Forms 42-4E and 42-
20 6E. Return on Capital Investment and Depreciation for each project for the
21 Actual/Estimated period are provided on Form 42-8E (Appendix I, Pages 12
22 through 38).

1 Explanations for components of the project variances are provided below.

2

3 **O&M Project Variances**

4

5 **Project 1. Air Operating Permit Fees**

6 Project expenditures were \$284,412 or 101.3% higher than previously
7 projected. Actual fuel consumption for both gas and oil for 2014 (used
8 for 2015 projections) was significantly higher than original projections,
9 which is the primary driver for the cost variance. Additionally, state-
10 required emissions costs per ton increased slightly.

11 **Project 5a. Maintenance of Stationary Above Ground Fuel Storage Tanks**

12 Project expenditures were \$71,024 or 3.2% higher than previously
13 projected. The variance is primarily due to the API internal inspection
14 of the Martin Unit 2 metering tank, which was not originally budgeted.

15 FPL is implementing the use of a new work management system to
16 improve the budgeting process in order to avoid reoccurrences of
17 similar issues. In addition, work performed in 2014 at the Manatee
18 Terminal was inadvertently charged to the SPCC project. A correcting
19 entry was made in February of 2015.

20

21 Project increases were partially offset by lower than projected costs
22 resulting from competitive bidding associated with the painting of the

1 tanks at Ft. Myers Units 1 and 2. The increase was also partially
2 offset by lower than projected costs associated with the API internal
3 inspection of Tank 902 at the Port Everglades plant. Costs
4 associated with tank cleaning were included as part of lease
5 termination activities and therefore were not incurred as part of
6 inspection costs.

7 **Project 17a. Disposal of Non-Containerized Liquid Waste**

8 Project expenditures were \$62,369 or 96.0% lower than previously
9 projected. The variance is primarily due to lower than projected
10 processing of ash at the Martin site, resulting from reduced operation
11 at Units 1 and 2.

12 **Project 19a. Substation Pollutant Discharge Prevention and Removal -
13 Distribution**

14 Project expenditures were \$705,847 or 38.9% higher than previously
15 projected. The variance is primarily due to obtaining more equipment
16 clearances (i.e., de-energize equipment) than expected, which in turn
17 facilitated a higher than projected number of transformers being
18 repaired during 2015.

19 **Project 19b. Substation Pollutant Discharge Prevention and Removal -
20 Transmission**

21 Project expenditures were \$554,316 or 29.9% lower than previously
22 projected. The variance is primarily due to delays in obtaining

1 equipment clearances (i.e., de-energize equipment), which in turn
2 resulted in a lower than projected number of transformers being
3 repaired in 2015.

4 **Project 21. St. Lucie Turtle Nets**

5 Project expenditures were \$110,000, whereas no expenditures were
6 projected. The variance is due to costs incurred for inspections and
7 cleaning to remove algae and jellyfish buildup on the net that caused
8 water velocity increases. An increase in water velocity can trap turtles
9 on the net, cause injury and impair their safety.

10 **Project 22. Pipeline Integrity Management**

11 Project expenditures were \$466,270 or 120.0% higher than previously
12 projected. The variance is primarily due to deferral of planned smart
13 pig inspections of both Martin pipelines from 2014 to 2015 due to the
14 following:

- 15 • To pig the 18” pipeline, FPL needs approximately 200,000 bbls
16 of excess room at the plant tank to accommodate oil used
17 during pigging. Due to the lower price of natural gas versus the
18 price of No. 6 oil, the plant did not burn oil and as a result,
19 there was insufficient capacity available at the plant tank to
20 support pigging the line.
- 21 • For the Martin 30” pipeline, there was a delay in the completion
22 of port construction activities by the Port Authority, which
23 resulted in delaying dock unloading pit work at the Port of Palm

1 Beach required to allow vessels to unload fuel oil. Without the
2 ability to receive a vessel, the Martin terminal 30" pipeline
3 could not be online for planned inline inspection which was
4 scheduled in 2014 and was rescheduled in 2015.

5 **Project 23. SPCC – Spill Prevention, Control & Countermeasures**

6 Project expenditures were \$281,195 or 23.3% lower than expected,
7 because work associated with the Maintenance of Stationary Above
8 Ground Fuel Storage Tanks project was inadvertently charged to the
9 SPCC project in 2014. A correcting entry was made in February
10 2015. Additionally, there was a staffing reduction of one full time and
11 one part time position and an open position has not been filled.

12 **Project 27. Lowest Quality Water Source**

13 Project expenditures were \$26,443 or 16.3% lower than previously
14 projected. The variance is primarily due to reduced water supply from
15 our source due to pump issues and the inability to run the water
16 treatment system during unit reliability outages of Sanford Unit 4 and
17 5 that required switchgear de-energizations needed for preventative
18 maintenance. LQWS usage is anticipated to increase in the coming
19 months due to improvements to that system and as a result of
20 increased water usage in the summer months due to increased unit
21 dispatch. Use of the LQWS, when feasible, is required as a condition
22 of the Water Use Permit in compliance with St Johns Water
23 Management District rules. Cooling pond water at the Sanford Plant

1 is considered LQWS and its use is required to the extent possible,
2 rather than aquifer water. The purpose of the permit limitations for
3 use of aquifer water are for the conservation of higher quality water
4 taken from the environment.

5 **Project 28. CWA 316 (b) Phase II Rule**

6 Project expenditures were \$453,555 or 40.3% lower than previously
7 projected. The variance is primarily due to the Florida Department of
8 Environmental Protection's decision to delay the initiation of the
9 compliance requirement until the beginning of the 2015 NPDES
10 permit cycles. Actual compliance-related activities (i.e. strategy
11 development, agency meetings and required studies) commenced for
12 all plants in June 2015. Original estimates assumed that many of the
13 plants' studies would commence in 2014.

14 **Project 30. HBMP**

15 Project expenditures were \$5,000 or 22.2% higher than previously
16 projected. The variance is primarily associated with replacement of
17 gauges at each station on the Little Manatee River, which was not
18 included in original projections.

19 **Project 31. Clean Air Interstate Rule ("CAIR") Compliance**

20 Project expenditures were \$209,864 or 4.3% lower than previously
21 projected. This was primarily the result of anticipated but not incurred
22 legal and consultant expenses to challenge the provisions of the

1 EPA's Cross State Air Pollution Rule ("CSAPR"). Following the U.S.
2 Court of Appeals' July 28, 2015 decision to remand to EPA the
3 portions of the rule that affect Florida, FPL did not challenge the
4 CSAPR and therefore did not or will not incur in 2015 any associated
5 expenses. Additionally, costs associated with the Martin 800 MW
6 Cycling Project were lower than projected as a result of lower than
7 anticipated water treatment costs.

8 **Project 33. MATS Project**

9 Project expenditures were \$275,909 or 11.6% higher than previously
10 projected. The variance is primarily due to higher than originally
11 estimated consumption of powder-activated carbon due to increased
12 unit operation. This is partially offset by less than originally estimated
13 environmental/legal support services required for MATS compliance.

14 **Project 35. Martin Plant Drinking Water System Compliance**

15 Project expenditures were \$38,609 or 146.2% higher than previously
16 projected. The variance is primarily due to the Nano filtration
17 membrane which includes housing, end caps and retaining ring
18 needing to be replaced in 2015 rather than 2016 as originally
19 projected. In addition, there was an increase in vendor charges for
20 monthly cleaning and yearly carbon change-out not previously
21 forecasted.

22

1 **Project 39. Martin Next Generation Solar Energy Center**

2 Project expenditures were \$143,212 or 4.1% higher than previously
3 projected. The variance is a result of the unplanned installation of
4 support brackets at the ball joint locations within the Solar Field
5 Loops. The Martin Solar Team identified that a design modification of
6 the ball joints to include a new support bracket would reduce the
7 stress on the joints and is projected to avoid a majority of the
8 mechanical failures of the joints.

9 **Project 41. Manatee Temporary Heater System**

10 Project expenditures were \$35,902 or 10.8% lower than previously
11 projected. The variance is primarily due to lower than originally
12 projected costs for removal of the manatee thermal barrier wall that
13 was installed as part of the Port Everglades Energy Center Manatee
14 Heater project.

15 **Project 42. Turkey Point Cooling Canal Monitoring Plan**

16 Project expenditures were \$39,906,782 higher than previously
17 projected. These costs are the result of multiple activities related to
18 monitoring and addressing salinity issues within the Cooling Canal
19 System (“CCS”) and surrounding groundwater at Turkey Point. The
20 variance is primarily due to costs that are being incurred in 2015
21 related to compliance with requirements to manage the hypersaline
22 condition that has occurred in the system in recent years. FPL did not

1 have enough information to project these compliance costs in 2014,
2 when the 2015 projections for this project were prepared.

3
4 Based on the data FPL has collected pursuant to the CCS monitoring
5 plan, the FDEP, in consultation with the South Florida Water
6 Management District (“SFWMD”) and Miami Dade County (“MDC”),
7 issued a final administrative order (“AO”) on December 23, 2014; well
8 after FPL had filed its 2015 ECRC projections on August 22, 2014.
9 The AO directs FPL to achieve a substantial reduction in CCS salinity
10 within four years and identifies a series of potential measures that
11 FPL could include in the Salinity Management Plan (“SMP”) that FPL
12 must file with the FDEP outlining how it will do so. Under the AO,
13 measures to achieve salinity reduction include: a) delivering new
14 sources of water to the CCS to reduce hyper-salinity, and b)
15 conducting CCS maintenance activities to restore CCS design
16 conditions that will assist in managing salinity. Administrative
17 challenges to the AO are presently pending and so FPL has not yet
18 submitted its SMP. However, owing to the short period of time that
19 FPL will have to achieve the required salinity reductions once the
20 challenges are resolved, FPL has begun taking actions to deliver new
21 sources of water to the CCS and restore the CCS design conditions,
22 two measures that will play a core role in the SMP. FPL does not
23 believe that it could meet the AO’s timetable without getting started

1 now (in 2015) with implementation of those measures.

2 In order to deliver new sources of water to the CCS, FPL is incurring
3 costs for monitoring saline water wells, costs for re-installation and
4 permitting of a piping system to deliver local excess storm water (i.e.,
5 continuation of the L31-E Canal activity that was also conducted in
6 2014), and costs related to pursuing authorizations for six Upper
7 Floridan Aquifer (“UFA”) wells authorized by an FDEP Site
8 Certification Modification issued December 23, 2014. It should be
9 noted that the Site Certification for the UFA wells is also under
10 administrative challenge. Costs in this category account for
11 \$6,906,782 (or 17%) of the \$39.9 million variance.

12

13 In order to restore CCS design conditions, FPL is conducting
14 maintenance dredging in the CCS. This dredging will restore design
15 flow distribution and connectivity between the CCS and surrounding
16 groundwater. Modeling performed for FPL to evaluate its AO
17 compliance strategy shows that restoring the design flow distribution,
18 thereby reducing overall CCS temperatures and evaporation rates,
19 and re-establishing connectivity between the CCA and groundwater
20 are essential to creating conditions in which the lower salinity levels
21 required by the AO are realistically achievable. Moreover, the
22 dredging will enable the CCS to better manage salinity during low
23 rainfall periods, thereby allowing FPL to maintain the targeted annual

1 average salinity level required by the AO when rainfall is low. Costs in
2 this category account for the remaining \$33.0 million (or 83%) of the
3 \$39.9 million variance.

4 **Project 45. 800 MW ESP**

5 Project expenditures were \$313,393 or 22.5% lower than previously
6 projected. The variance is primarily due to lower than projected run
7 time on fuel oil than originally planned at the Manatee plant. At the
8 Martin plant, the original budget included four employees charging the
9 project for the entire year but only two employees are currently
10 charging the project and the other two employees were hired in July.
11 This reduces the payroll forecast for 2015. In addition, there was a
12 reduction in maintenance costs because of new equipment and
13 warranty coverage.

14 **Project 46. St. Lucie Cooling Water Discharge Monitoring**

15 Project expenditures were \$158,823 or 58.4% lower than previously
16 projected. The FDEP did not require St. Lucie to perform the last
17 round of data collection, which resulted in lower than originally
18 projected fieldwork and project management costs.

19 **Project 49. Thermal Discharge Standards**

20 Project expenditures were \$29,357 or 72.4% higher than previously
21 projected. The variance is primarily due to the delayed submittal of
22 the Thermal Plans of Study for both the Cape Canaveral and Riviera

1 Beach plants. The delays for submitting both studies to the FDEP
2 were attributable to a lack of agency funding for subcontractors and
3 project support for the agencies. As a result of the delays, some
4 expenses projected to be incurred in 2014 were instead incurred in
5 2015.

6 **Project 50. Steam Electric Effluent Guidelines**

7 Project expenditures were \$395,234, whereas no expenditures were
8 projected. The variance is primarily due to invoices associated with
9 FPL’s portion of the cost of studies conducted by Georgia Power
10 Company for Plant Scherer to assess compliance costs that will be
11 incurred in anticipation of the implementation of the Steam Electric
12 Guidelines Revisions. This revised rule is anticipated to be released in
13 September 2015. The operating agent did not provide FPL with a
14 cost estimate for these studies until the fourth quarter of 2014 after
15 FPL had filed its 2015 projections.

16 **Project 51. Gopher Tortoise Relocations**

17 Project expenditures were \$35,000 or 145.8% higher than previously
18 projected. The increase was due to higher than projected gopher
19 tortoise relocations at the Manatee sites.

20 **Project 52. Numeric Nutrient Criteria Water Quality Standards in Florida**

21 Project expenditures were \$38,000, whereas no expenditures were
22 projected. The variance is due to additional expenditures for the Ft.

1 Myers plant due to the FDEP revisiting the Total Maximum Daily Load
 2 (“TMDL”) for the Caloosahatchee River, as well as the
 3 commencement of implementation of the Numeric Nutrient Criteria
 4 (“NNC”) for fresh waters. Additionally, consulting expenditures for
 5 assistance in verification of compliance with existing Waste Load
 6 Allocations for the plant as part of the Indian River Lagoon TMDL
 7 were incurred at FPL’s Cape Canaveral Plant. NPDES permit
 8 applications for both plants are due in 2015 and this information will
 9 be submitted as part of the renewal process.

10

11

Capital Project Variances

12

13 Project 8b. Oil Spill clean-up/Response Equipment

14 Project depreciation and return on investment were \$23,712 or 15.4%
 15 lower than previously projected. The variance is primarily due to
 16 greater than anticipated retirement of corporate oil spill response
 17 equipment at the Manatee site and less than anticipated new
 18 equipment needing to be purchased.

19 Project 21. St. Lucie Turtle Nets

20 Project depreciation and return on investment were \$107,478 or
 21 12.3% lower than previously projected. The variance is primarily
 22 attributed to lower vendor implementation costs than originally

1 projected due to favorable contractual terms.

2 **Project 22. Pipeline Integrity Management**

3 Project depreciation and return on investment were \$41,498 or 11.6%
4 lower than previously projected. The initial projection included the
5 depreciation and return on investment for the replacement of TMR 18”
6 pipeline block valve actuators as part of the Pipeline Integrity
7 Management Project. Subsequently, it was determined that the
8 original actuators were part of the base pipeline project and thus the
9 costs for the replacement of the valve actuators, and associated
10 depreciation and return on investment, should be treated consistently
11 (base rate capital).

12 **Project 23. Spill Prevention, Control and Countermeasures**

13 Project depreciation and return on investment were \$170,803 or
14 10.2% lower than previously projected. The variance is primarily
15 attributed to a change in the in-service date of the installation of the
16 collection basin at Turkey Point from December 2015 to June 2016.

17 **Project 31. Clean Air Interstate Rule (“CAIR”) Compliance**

18 Project depreciation and return on investment were \$655,691 or 1.1%
19 lower than previously projected. The variance is primarily due to a
20 reduction in the allocation of Plant Scherer costs for common facility
21 equipment capital additions to Unit 4.

22

1 **Project 33. MATS**

2 Project depreciation and return on investment were \$52,986 or 0.5%
3 lower than previously projected. The variance is primarily due to a
4 reduction in the allocation of Plant Scherer costs for common facility
5 equipment to Unit 4.

6 **Project 39. Martin Next Generation Solar Energy Center**

7 Project depreciation and return on investment were \$288,268 or 0.6%
8 lower than previously projected. The variance is primarily due to the
9 result of placing the preheaters into service in 2014 and the
10 unitization/retirements of that project occurring in January 2015 upon
11 final close-out of the work order. The retirement unit was not identified
12 until close out of the work order resulting in timing differences.

13 **Project 42. Turkey Point Cooling Canal Monitoring Plan**

14 Project depreciation and return on investment were \$257,399 or
15 58.8% higher than previously projected. The variance is primarily
16 attributed to the addition of two water wells that went into service in
17 June 2015, and six monitoring wells and five monitoring stations
18 expected to go into service in September 2015 that were not reflected
19 in the original projection. This was partially offset by a change in the
20 in-service dates of the Upper Floridan Aquifer ("UFA") and saline
21 water wells at Turkey Point. The UFA wells, which were originally
22 expected to be in service in December 2015, have been delayed to

1 2016 pending the outcome of administrative challenge.

2 **Project 45. 800 MW Unit ESP**

3 Project depreciation and return on investment were \$569,690 or 2.4%
4 higher than previously projected. The variance is primarily due to an
5 actual in-service date for the Martin Unit 2 ESP in December 2014 vs.
6 the originally estimated in-service date of February 2015. This earlier
7 in-service date resulted in higher than estimated depreciation
8 expense and return on investment.

9 **Q. Does this conclude your testimony?**

10 A. Yes, it does.

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**
2 **FLORIDA POWER & LIGHT COMPANY**
3 **TESTIMONY OF TERRY J. KEITH**
4 **DOCKET NO. 150007-EI**
5 **AUGUST 31, 2015**

6
7 **Q. Please state your name and address.**

8 A. My name is Terry J. Keith and my business address is 9250 West Flagler Street,
9 Miami, Florida, 33174.

10 **Q. By whom are you employed and in what capacity?**

11 A. I am employed by Florida Power & Light Company (“FPL” or “the Company”) as
12 Director, Cost Recovery Clauses in the Regulatory Affairs Department.

13 **Q. Have you previously testified in this docket or any other predecessor**
14 **dockets?**

15 A. Yes, I have.

16 **Q. What is the purpose of your testimony in this proceeding?**

17 A. The purpose of my testimony is to present for Commission review and approval
18 FPL’s Environmental Cost Recovery Clause (“ECRC”) projections for the
19 January 2016 through December 2016 period.

20 **Q. Is this filing by FPL in compliance with Order No. PSC-93-1580-FOF-EI,**
21 **issued in Docket No. 930661-EI?**

22 A. Yes. The costs being submitted for the projected period are consistent with that
23 order.

1 **Q. Have you prepared or caused to be prepared under your direction,**
2 **supervision or control an exhibit in this proceeding?**

3 A. Yes. Exhibit TJK-3 provides the calculation of FPL's proposed ECRC factors for
4 the period January 2016 through December 2016. Exhibit TJK-3 includes PSC
5 Forms 42-1P through 42-8P, which are provided in Appendix I.

6 **Q. Are all costs listed in Forms 42-1P through 42-8P attributable to**
7 **environmental compliance projects previously approved by the**
8 **Commission?**

9 A. Yes, with the exception of estimated costs associated with Coal Combustion
10 Residuals Disposal Project ("the CCR Disposal Project"). FPL petitioned the
11 Commission in this docket on July 31, 2015 to approve the CCR Disposal Project
12 for ECRC recovery.

13 **Q. Please describe Form 42-1P.**

14 A. Form 42-1P (Appendix I, Page 1) provides a summary of projected
15 environmental costs being requested for recovery for the period January 2016
16 through December 2016. Total environmental requirements, adjusted for
17 revenue taxes, are \$270,559,175 (Appendix I, Page 1, Line 5) and include
18 \$229,580,392 of environmental project jurisdictional revenue requirements for
19 the January 2016 through December 2016 period (Appendix I, Page 1, Line 1c)
20 increased by the actual/estimated true-up under-recovery of \$37,619,712 for the
21 January 2015 through December 2015 period (Appendix I, Page 1, Line 2), and
22 increased by the final true-up under-recovery of \$3,164,408 for the January 2014
23 through December 2014 period (Appendix I, Page 1, Line 3).

24

1 **Q. Please describe Forms 42-2P and 42-3P.**

2 A. Form 42-2P (Appendix I, Pages 2 and 3) presents the environmental project
3 O&M costs for the projected period along with the calculation of total
4 jurisdictional costs for these projects, classified by energy and demand. FPL is
5 projecting total jurisdictional O&M costs of \$51,623,952 for the period January
6 2016 through December 2016.

7

8 Form 42-3P (Appendix I, Pages 4 and 5) presents the depreciation expense and
9 return on capital investment associated with FPL's environmental projects for the
10 projected period. Form 42-3P also provides the calculation of total jurisdictional
11 costs for these projects, classified by energy and demand. FPL is projecting total
12 jurisdictional capital depreciation expense and return on investment of
13 \$177,956,440 for the period January 2016 through December 2016.

14

15 The method of classifying costs presented in Forms 42-2P and 42-3P is
16 consistent with Order No. PSC-94-0393-FOF-EI for all projects.

17 **Q. Please describe Form 42-4P.**

18 A. Form 42-4P (Appendix I, Pages 6 through 36) presents the calculation of
19 depreciation expense and return on capital investment for each project for the
20 projected period.

21 **Q. Please describe Form 42-5P.**

22 A. Form 42-5P (Appendix I, Pages 37 through 109) provides the description and
23 progress of approved environmental projects included in the projected period.

24

1 **Q. Please describe Form 42-6P.**

2 A. Form 42-6P (Appendix I, Page 110) calculates the allocation factors for demand
3 and energy at generation. The demand allocation factors are calculated by
4 determining the percentage each rate class contributes to the average of the
5 twelve monthly system peaks. The energy allocators are calculated by
6 determining the percentage each rate class contributes to total kWh sales, as
7 adjusted for losses.

8 **Q. Please describe Form 42-7P.**

9 A. Form 42-7P (Appendix I, Page 111) presents the calculation of the proposed
10 2016 ECRC factors by rate class.

11 **Q. Please describe Form 42-8P.**

12 A. Form 42-8P (Appendix I, Page 112) presents the capital structure, components
13 and cost rates relied upon to calculate the revenue requirement rate of return
14 applied to capital investments and working capital amounts included for recovery
15 through the ECRC for the period January 2016 through December 2016. Per
16 Order No. PSC-12-0425-PAA-EU issued on August 16, 2012, FPL is using the
17 capital structure and cost rates from the May 2015 Earnings Surveillance Report.

18 **Q. Does this conclude your testimony?**

19 A. Yes, it does.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

THOMAS G. FOSTER

ON BEHALF OF

DUKE ENERGY FLORIDA

DOCKET NO. 150007-EI

April 1, 2015

Q. Please state your name and business address.

A. My name is Thomas G. Foster. My business address is 299 First Avenue North, St. Petersburg, FL 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Duke Energy Business Services, LLC, as Director, Rates and Regulatory Planning.

Q. What are your responsibilities in that position?

A. I am responsible for regulatory planning and cost recovery for Duke Energy Florida (DEF or the Company). These responsibilities include: regulatory financial reports and analysis of state, federal and local regulations and their impact on DEF. In this capacity, I am also responsible for DEF's True-up, Estimated/Actual and Projection filings in the Environmental Cost Recovery Clause (ECRC).

1 **Q. Please describe your educational background and professional experience.**

2 A. I joined DEF on October 31, 2005 as a Senior Financial Analyst in the Regulatory
3 group. In that capacity I supported the preparation of testimony and exhibits
4 associated with various dockets. In late 2008, I was promoted to Supervisor
5 Regulatory Planning. In 2012, following the merger with Duke Energy Corporation
6 (Duke Energy), I was promoted to my current position. Prior to working at Duke
7 Energy I was the Supervisor in the Fixed Asset group at Eckerd Drug. In this role I
8 was responsible for ensuring proper accounting for all fixed assets as well as various
9 other accounting responsibilities. I have 6 years of experience related to the
10 operation and maintenance of power plants obtained while serving in the United
11 States Navy as a Nuclear Operator. I received a Bachelor of Science degree in
12 Nuclear Engineering Technology from Thomas Edison State College. I received a
13 Masters of Business Administration with a focus on finance from the University of
14 South Florida and I am a Certified Public Accountant in the State of Florida.

15

16 **Q. Have you previously filed testimony before this Commission in connection**
17 **with DEF's ECRC?**

18 A. Yes.

19

20 **Q. What is the purpose of your testimony?**

21 A. The purpose of my testimony is to present for Commission review and approval
22 DEF's actual true-up costs associated with environmental compliance activities for
23 the period January 2014 - December 2014.

24

1 **Q. Are you sponsoring any exhibits in support of your testimony?**

2 A. Yes. I am sponsoring Exhibit No.____ TGF-1, that consists of nine forms, and
3 Exhibit No.____ TGF-2, that provides details of five capital projects by site.

4

5 Exhibit No.____ TGF-1 consists of the following:

- 6 • Form 42-1A: Final true-up for the period January 2014 - December 2014.
- 7 • Form 42-2A: Final true-up calculation for the period.
- 8 • Form 42-3A: Calculation of the interest provision for the period.
- 9 • Form 42-4A: Calculation of variances between actual and actual/estimated
10 costs for O&M Activities.
- 11 • Form 42-5A: Summary of actual monthly costs for the period for O&M
12 Activities.
- 13 • Form 42-6A: Calculation of variances between actual and actual/estimated
14 costs for Capital Investment Projects.
- 15 • Form 42-7A: Summary of actual monthly costs for the period for Capital
16 Investment Projects.
- 17 • Form 42-8A, pages 1-18: Calculation of return on capital investment,
18 depreciation expense and property tax expense for each project recovered
19 through the ECRC.
- 20 • Form 42-9A: DEF's capital structure and cost rates.

21

22 Exhibit No.____ TGF-2 consists of detailed support for the following capital
23 projects:

- 24 • Pipeline Integrity Management (Capital Program Detail (CPD), pages 2-3)

- 1 • Above Ground Storage Tank Secondary Containment (CPD, pages 4-9)
- 2 • Clean Air Interstate Rule (CAIR) Combustion Turbines (CTs)(CPD, pages
- 3 10-13)
- 4 • CAIR-Crystal River Units 4 & 5 (CPD, pages 14-15)
- 5 • Thermal Discharge Permanent Cooling Tower (CPD, pages 16-17)

6 These exhibits were developed under my supervision and they are true and
7 accurate.

8

9 **Q. What is the source of the data that you will present in testimony and exhibits**
10 **in this proceeding?**

11 A. The actual data is taken from the books and records of DEF. The books and
12 records are kept in the regular course of DEF's business in accordance with
13 generally accepted accounting principles and practices, provisions of the Uniform
14 System of Accounts as prescribed by Federal Energy Regulatory Commission, and
15 any accounting rules and orders established by this Commission.

16

17 **Q. What is the final true-up amount DEF is requesting for the period January**
18 **2014 - December 2014?**

19 A. DEF requests approval of an over-recovery amount of \$12,764,024 for the year
20 ending December 31, 2014. This amount is shown on Form 42-1A, Line 1.

21

22 **Q. What is the net true-up amount DEF is requesting for the period January 2014**
23 **- December 2014 to be applied in the calculation of the environmental cost**
24 **recovery factors to be refunded/recovered in the next projection period?**

1 A. DEF requests approval of an over-recovery of \$1,419,043 reflected on Line 3 of
2 Form 42-1A, as the adjusted net true-up amount for the period January 2014 -
3 December 2014. This amount is the difference between an actual over-recovery
4 amount of \$12,764,024 and an actual/estimated over-recovery of \$11,344,981 for
5 the period January 2014 - December 2014, as approved in Order PSC-14-0643-
6 FOF-EI.

7

8 **Q. Are all costs listed on Forms 42-1A through 42-8A attributable to**
9 **environmental compliance projects approved by the Commission?**

10 A. Yes.

11

12 **Q. How did actual O&M expenditures for January 2014 - December 2014**
13 **compare with DEF's actual/estimated projections as presented in previous**
14 **testimony and exhibits?**

15 A. Form 42-4A shows a total O&M project variance of \$1,902,944 lower than
16 projected. Individual O&M project variances are on Form 42-4A. Explanations
17 associated with variances are contained in the direct testimonies of Jeffrey Swartz,
18 Patricia Q. West, and Corey Zeigler.

19

20 **Q. How did actual capital recoverable expenditures for January 2014 - December**
21 **2014 compare with DEF's estimated/actual projections as presented in**
22 **previous testimony and exhibits?**

23 A. Form 42-6A shows a total capital investment recoverable cost variance of \$208,084
24 higher than projected. Individual project variances are on Form 42-6A. Return on

1 capital investment, depreciation and property taxes for each project for the period
2 are provided on Form 42-8A, pages 1-18. Explanations associated with variances
3 are contained in the direct testimonies of Michael Delowery, Mr. Swartz and Ms.
4 West.

5

6 **Q: What effect does the Cross-State Air Pollution Rule (CSAPR) have on the**
7 **ECRC?**

8 A. As further explained in the direct testimony of Ms. West, the CSAPR became
9 effective on January 1, 2015. The CSAPR establishes new NO_x annual and
10 seasonal programs and a new SO₂ trading program (Florida is only subject to the
11 NO_x seasonal program). NO_x and SO₂ emission allowances under the current
12 Clean Air Interstate Rule (CAIR) cannot be used to satisfy the CSAPR.

13

14 In Order No. PSC-11-0553-FOF-EI, dated December 7, 2011, the Commission
15 authorized DEF to establish a regulatory asset to recover the costs of its remaining
16 unusable CAIR NO_x allowances over three (3) years with a return on the
17 unamortized investment. As of December 31, 2014, DEF's investment in CAIR
18 NO_x emission allowances is \$10.3 million (system) as shown on line 1d of Form
19 42-8A, page 5. Consistent with Order No. PSC-11-0553-FOF-EI, DEF is treating
20 these costs as a regulatory asset and will amortize them over three (3) years
21 beginning January 1, 2015 until fully recovered by December 31, 2017, with a
22 return on the unamortized investment.

23

24

1 The CAIR used Acid Rain program (Title IV of the Clean Air Act) allowances to
2 comply with the SO₂ emission portion of the rule. DEF expects to use its
3 remaining SO₂ emission allowances to comply with the existing Acid Rain program
4 even though the CAIR is no longer in effect.

5

6 **Q. Does this conclude your testimony?**

7 **A. Yes.**

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

THOMAS G. FOSTER

ON BEHALF OF

DUKE ENERGY FLORIDA

DOCKET NO. 150007-EI

July 31, 2015

Q. Please state your name and business address.

A. My name is Thomas G. Foster. My business address is 299 First Avenue North,
St. Petersburg, FL 33701.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A. Yes, I provided direct testimony on April 1, 2015.

Q: Has your job description, education, background and professional experience changed since that time?

A. No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present, for Commission review and approval, Duke Energy Florida's (DEF) actual/estimated true-up costs associated with environmental compliance activities for the period January 2015 through

1 December 2015. I also explain the variance between 2015 actual/estimated cost
2 projections versus original 2015 cost projections for emission allowances
3 (Project 5).

4

5 **Q. Have you prepared or caused to be prepared under your direction,**
6 **supervision or control any exhibits in this proceeding?**

7 A. Yes. I am sponsoring the following exhibits:

8 1. Exhibit No. __TGF-3, which consists of PSC Forms 42-1E through 42-
9 9E; and

10 2. Exhibit No. __TGF-4, which provides details of capital projects by site.

11 These exhibits provide detail on DEF's actual/estimated true-up capital and
12 O&M environmental costs and revenue requirements for the period January
13 2015 through December 2015.

14

15 **Q. What is the actual/estimated true-up amount for which DEF is requesting**
16 **recovery for the period of January 2015 through December 2015?**

17 A. The 2015 actual/estimated true-up is an under-recovery, including interest, of
18 \$779,602 as shown on Form 42-1E, line 4. This amount is added to the final
19 2014 true-up over-recovery of \$1,419,043 as shown on Form 42-2E, Line 7a,
20 resulting in a net over-recovery of \$639,441 as shown on Form 42-2E, Line 11.
21 The calculations supporting the 2015 actual/estimated true-up are on Forms 42-
22 1E through 42-8E.

23

1 **Q. What capital structure, components and cost rates did DEF rely on to**
2 **calculate the revenue requirement rate of return for the period January**
3 **2015 through December 2015?**

4 A. The capital structure, components and cost rates relied on to calculate the
5 revenue requirement rate of return for the period January 2015 through
6 December 2015 are shown on Form 42-9E. This form includes the derivation of
7 debt and equity components used in the Return on Average Net Investment,
8 lines 7 (a) and (b), on Form 42-8E. Form 42-9E also cites the source and
9 includes the rationale for using the particular capital structure and cost rates.

10

11 **Q. How do actual/estimated O&M expenditures for January 2015 through**
12 **December 2015 compare with original projections?**

13 A. Form 42-4E shows that total O&M project costs are estimated to be \$2.2 million
14 higher than originally projected. This form also lists individual O&M project
15 variances. Explanations for these variances are included in the direct
16 testimonies of Garry Miller, Jeffrey Swartz and Patricia Q. West, except for
17 Emission Allowances which is below.

18

19 **Emissions Allowances (Project 5) – O&M**

20 SO₂ and NO_x expenses are estimated to be approximately \$1.5 million higher
21 than originally projected. This increase is primarily attributable to unusable
22 NO_x emission allowances due to the expiration of the Clean Air Interstate
23 Rule (CAIR) on December 31, 2014. CAIR was replaced by the Cross-State

1 Air Pollution Rule (CSAPR) on January 1, 2015, as explained in my April 1,
2 2015 direct testimony. Consistent with Order No. PSC-11-0553-FOF-EI,
3 DEF is treating the costs associated with the unusable NOx emission
4 allowances as a regulatory asset and amortizing it over three (3) years,
5 beginning January 1, 2015, until fully recovered by December 31, 2017, with
6 a return on the unamortized investment.

7
8 **Q. How do estimated/actual capital recoverable costs for January 2015**
9 **through December 2015 compare with DEF's original projections?**

10 A. Form 42-6E shows that total recoverable capital costs are estimated to be
11 approximately \$676k higher than originally projected. This form also lists
12 individual project variances. The return on investment, depreciation expense
13 and property taxes for each project for the actual/estimated period are provided
14 on Form 42-8E, pages 1 through 19. Explanations for these variances are
15 included in the direct testimonies of Michael Delowery, Mr. Miller, Mr. Swartz
16 and Ms. West.

17
18 **Q: Does DEF seek to change the ECRC factors established for 2015 for the**
19 **recovery of Coal Combustion Residual (CCR) compliance costs?**

20 A: DEF does not seek to change the ECRC factors established in 2014 in Order No.
21 PSC-14-0643-FOF-EI. The Company proposes to include costs incurred in
22 2015 in the actual/estimated true-up balance. The Company will include
23

1 program costs projected for 2016 and beyond in the appropriate projection
2 filings.

3

4 **Q: How will CCR compliance costs be allocated to rate classes?**

5 A: DEF proposes that capital and O&M costs associated with the CCR compliance
6 program be allocated to rate classes on an energy basis.

7

8 **Q. Does this conclude your testimony?**

9 A. Yes.

10

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

THOMAS G. FOSTER

ON BEHALF OF

DUKE ENERGY FLORIDA, LLC.

DOCKET NO. 150007-EI

August 31, 2015

Q. Please state your name and business address.

A. My name is Thomas G. Foster. My business address is 299 First Avenue North,
St. Petersburg, FL 33701.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A: Yes. I provided direct testimony on April 1, 2015 and July 31, 2015.

Q. Has your job description, education, background or professional experience changed since that time?

A: No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to present, for Commission review and approval, Duke Energy Florida, LLC’s (“DEF” or “Company”) calculation of

1 revenue requirements and Environmental Cost Recovery Clause (“ECRC”)
2 factors for customer billings for the period January 2016 through December
3 2016. My testimony also addresses capital and O&M expenses for DEF’s
4 environmental compliance activities for the year 2016.

5
6 **Q. Have you prepared or caused to be prepared under your direction,**
7 **supervision, or control any exhibits in this proceeding?**

8 A. Yes. I am sponsoring the following exhibits:

- 9 1. Exhibit No. __ (TGF-5), which consists of PSC Forms 42-1P through 42-
10 8P; and
11 2. Exhibit No. __ (TGF-6), which provides details of capital projects.

12 The individuals listed below are co-sponsors of Forms 42-5P pages 1-4 and 6-22
13 as indicated in their direct testimony. I am sponsoring Form 42-5P page 5.

- 14 • Ms. West will co-sponsor Forms 42-5P pages 1-4, 6 and 8-19.
15 • Mr. Swartz and Ms. West will co-sponsor Form 42-5P page 7.
16 • Mr. Delowery will co-sponsor Form 42-5P page 20.
17 • Mr. Swartz will co-sponsor Form 42-5P page 21.
18 • Mr. Miller will co-sponsor Form 42-5P page 22.

19

20 **Q. Please summarize your testimony.**

21 A. My testimony supports the approval of an average ECRC billing factor of 0.182
22 cents per kWh which includes projected jurisdictional capital and O&M revenue
23 requirements for the period January 2016 through December 2016 of

1 approximately \$69.4 million associated with a total of 18 environmental
2 projects, and a true-up over-recovery provision of approximately \$0.6 million
3 from prior periods. My testimony also supports that projected environmental
4 expenditures for 2016 are appropriate for recovery through the ECRC.

5

6 **Q. What is the total recoverable revenue requirement for the period January**
7 **2016 through December 2016?**

8 A. The total recoverable revenue requirement including true-up amounts and
9 revenue taxes is approximately \$68.8 million as shown on Form 42-1P line 5 of
10 Exhibit No. __ (TGF-5).

11

12 **Q. What is the total true-up to be applied for the period January 2016 through**
13 **December 2016?**

14 A. The total true-up applicable to this period is an over-recovery of approximately
15 \$0.6 million. This amount consists of the final true-up over-recovery of
16 approximately \$1.4 million for the period January 2014 through December
17 2014, and an estimated true-up under-recovery of approximately \$0.8 million for
18 the current period of January 2015 through December 2015. The detailed
19 calculation supporting the 2015 estimated true-up was provided on Forms 42-1E
20 through 42-8E of Exhibit No. __ (TGF-3) filed with the Commission on July 31,
21 2015.

22

23

1 **Q. Are all the costs listed on Forms 42-1P through 42-7P attributable to**
2 **environmental compliance programs previously approved by the**
3 **Commission?**

4 A. Yes, except for the Coal Combustion Residual Program (Project 18) for which
5 DEF is seeking approval for recovery in this Docket. The following ECRC
6 programs were previously approved by the Commission:

7
8 The Substation and Distribution System Programs (Project 1 & 2) were
9 previously approved in Order No. PSC-02-1735-FOF-EI.

10
11 The Pipeline Integrity Management Program (Project 3) and the Above Ground
12 Tank Secondary Containment Program (Project 4) were previously approved in
13 Order No. PSC-03-1348-FOF-EI.

14
15 The recovery of sulfur dioxide (SO₂) Emission Allowances (Project 5) was
16 previously approved in Order No. PSC-95-0450-FOF-EI, however, the costs
17 were moved to the ECRC docket from the Fuel docket beginning January 1,
18 2004 at the request of Staff to be consistent with the other Florida investor
19 owned utilities.

20
21 As explained in my July 31, 2015 direct testimony, DEF has unusable NOx
22 emission allowances due to the expiration of the Clean Interstate Rule (“CAIR”)
23 on December 31, 2014. CAIR was replaced by the Cross-State Air pollution

1 Rule on January 1, 2105. Consistent with Order No. PSC-11-0553-FOF-EI,
2 DEF is treating the costs associated with unusable NOx emission allowances as
3 a regulatory asset and amortizing it over three (3) years, beginning January 1,
4 2015, until fully recovered by December 31, 2017, with a return on the
5 unamortized investment.

6

7 The Phase II Cooling Water Intake 316(b) Program (Project 6) was previously
8 approved in Order No. PSC-04-0990-PAA-EI.

9

10 DEF's Integrated Clean Air Compliance Plan (Project 7) was approved by the
11 Commission as a prudent and reasonable means of complying with the Clean
12 Air Interstate Rule and related regulatory requirements in Order No. PSC-07-
13 0922-FOF-EI.

14

15 The Arsenic Groundwater Standard Program (Project 8), Sea Turtle Lighting
16 Program (Project 9) and Underground Storage Tanks Program (Project 10) were
17 previously approved in Order No. PSC-05-1251-FOF-EI.

18

19 The Modular Cooling Tower Project (Project 11) was previously approved in
20 Order No. PSC-07-0722-FOF-EI.

21

22

23

1 The Crystal River Thermal Discharge Compliance Project (Project 11.1) and
2 Greenhouse Gas Inventory and Reporting Project (Project 12) were previously
3 approved in Order Nos. PSC-08-0775-FOF-EI.

4

5 The Mercury Total Maximum Loads Monitoring Program (Project 13) was
6 previously approved in Order No. PSC-09-0759-FOF-EI.

7

8 The Hazardous Air Pollutants (HAPs) ICR Program (Project 14) was previously
9 approved in Order No. PSC-10-0099-PAA-EI.

10

11 The Effluent Limitations Guidelines ICR Program (Project 15) was previously
12 approved in Order No. PSC-10-0683-PAA-EI.

13

14 The National Pollutant Discharge Elimination System (NPDES) Program
15 (Project 16) was previously approved in Order No. PSC-11-0553-FOF-EI.

16

17 The Mercury & Air Toxic Standards (MATS) Program (Project 17) which
18 replaces Maximum Achievable Control Technology (MACT) was previously
19 approved in Order Nos. PSC-11-0553-FOF-EI, PSC-12-0432-PAA-EI and PSC-
20 14-0173-PAA-EI.

21

22

23

1 **Q. What capital structure, components and cost rates did DEF rely on to**
2 **calculate the revenue requirement rate of return for the period January**
3 **2016 through December 2016?**

4 A. DEF used the capital structure, components and cost rates consistent with the
5 language in Order No. PSC-12-0425-PAA-EU. As such, DEF used the rates
6 contained in its May 2015 Earnings Surveillance Report Weighted Average Cost
7 of Capital. These rates are shown on Form 42-8P, Exhibit No. ___(TGF-5).
8 Form 42-8P includes the derivation of debt and equity components used in the
9 Return on Average Net Investment, Form 42-4P lines 7a and b.

10

11 **Q. Have you prepared schedules showing the calculation of the recoverable**
12 **O&M project costs for 2016?**

13 A. Yes. Form 42-2P of Exhibit No. ___ (TGF-5) summarizes recoverable
14 jurisdictional O&M cost estimates for these projects of approximately \$44.2
15 million.

16

17 **Q. Have you prepared schedules showing the calculation of the recoverable**
18 **capital project costs for 2016?**

19 A. Yes. Form 42-3P of Exhibit No. ___ (TGF-5) summarizes recoverable
20 jurisdictional capital cost estimates for these projects of approximately \$25.2
21 million. Form 42-4P pages 1 through 16 shows detailed calculations of these
22 costs.

23

1 **Q. Have you prepared schedules providing progress reports for all**
2 **environmental compliance projects?**

3 A. Yes. Form 42-5P pages 1 through 22 of Exhibit No. __ (TGF-5) provide a
4 description, progress summary and recoverable cost estimates for each project.

5
6 **Q. What are the total projected jurisdictional costs for environmental**
7 **compliance projects for the year 2016?**

8 A. The total jurisdictional capital and O&M costs to be recovered through the
9 ECRC are approximately \$69.4 million. The costs are calculated on Form 42-1P
10 line 1c of Exhibit No. __ (TGF-5).

11
12 **Q. Please describe how the proposed ECRC factors are developed.**

13 A. The ECRC factors are calculated on Forms 42-6P and 42-7P of Exhibit No.
14 __ (TGF-5). The demand component of class allocation factors is calculated by
15 determining the percentage each rate class contributes to monthly system peaks
16 adjusted for losses for each rate class which is obtained from DEF's load research
17 study filed with the Commission in July 2015. The energy allocation factors are
18 calculated by determining the percentage each rate class contributes to total
19 kilowatt-hour sales adjusted for losses for each rate class. Form 42-7P presents the
20 calculation of the proposed ECRC billing factors by rate class.

21
22 **Q. What are DEF's proposed 2016 ECRC billing factors by the various rate**
23 **classes and delivery voltages?**

- 1 A. The calculation of DEF's proposed ECRC factors for 2016 customer billings is
 2 shown on Form 42-7P in Exhibit No. __ (TGF-5) as follows:

RATE CLASS	ECRC FACTORS 12CP & 1/13AD
Residential	0.184 cents/kWh
General Service Non-Demand @ Secondary Voltage @ Primary Voltage @ Transmission Voltage	0.181 cents/kWh 0.179 cents/kWh 0.177 cents/kWh
General Service 100% Load Factor	0.178 cents/kWh
General Service Demand @ Secondary Voltage @ Primary Voltage @ Transmission Voltage	0.180 cents/kWh 0.178 cents/kWh 0.176 cents/kWh
Curtable @ Secondary Voltage @ Primary Voltage @ Transmission Voltage	0.173 cents/kWh 0.171 cents/kWh 0.170 cents/kWh
Interruptible @ Secondary Voltage @ Primary Voltage @ Transmission Voltage	0.175 cents/kWh 0.173 cents/kWh 0.172 cents/kWh
Lighting	0.173 cents/kWh

1 **Q. When is DEF requesting that the proposed ECRC billing factors be**
2 **effective?**

3 A. DEF is requesting that its proposed ECRC billing factors be effective with the
4 first bill group for January 2016 and continue through the last bill group for
5 December 2016.

6

7 **Q. Does this conclude your testimony?**

8 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

MICHAEL R. DELOWERY

ON BEHALF OF

DUKE ENERGY FLORIDA

DOCKET NO. 150007-EI

April 1, 2015

Q. Please state your name and business address.

A. My name is Michael Delowery. My current business address is 400 South Tryon Street, Charlotte, NC 28202.

Q: By whom are you employed and in what capacity?

A: I am employed by Duke Energy, Inc. (Duke Energy or the Company) as Vice President of Project Management and Construction.

Q: What are your responsibilities in that position?

A: I am the senior manager responsible for oversight of new power plant construction and retrofit of existing fossil and hydro-electric power plants for Duke Energy, including the Anclote Gas Conversion Project.

Q: Please describe your educational background and professional experience.

1 A: I obtained my Bachelor of Science degree in Mechanical Engineering from
2 Drexel University. I have over 23 years of power industry experience. I joined
3 Duke Energy in May 2011 as General Manager responsible for potential repair
4 of the CR3 containment building. In August 2014, I was appointed to my
5 current position. Prior to Duke Energy, I worked for Florida Power & Light
6 (FP&L) where I held various management positions including Project Director
7 of the St. Lucie Nuclear Power Plant Extended Power Uprate, Maintenance
8 Director, Project Director of the St. Lucie Nuclear Power Plant Steam
9 Generators and Reactor Head Replacement Projects, and Manager of Projects.
10 Prior to FP&L, I held a number of positions at Exelon, and completed a
11 rotational assignment with the Institute of Nuclear Power Operations as a senior
12 evaluator of equipment reliability for domestic and international nuclear power
13 stations.

14

15 **Q. Have you previously filed testimony before this Commission in connection**
16 **with DEF's Environmental Cost Recovery Clause (ECRC)?**

17 A. Yes.

18

19 **Q. What is the purpose of your testimony?**

20 A. The purpose of my testimony is to provide an update on the Mercury and Air
21 Toxics Standards (MATS) - Anclote Gas Conversion Project (Project 17.1) and
22 to explain material variances between actual and actual/estimated project
23 expenditures for the period January 2014 – December 2014.

1

2 **Q. What is the total estimated cost for the MATS – Anclote Gas Conversion**
3 **Project (Project 17.1)?**

4 A. Consistent with my August 22, 2014 projection testimony in Docket No.
5 140007-EI, the total estimated project cost is \$137 million.

6

7 **Q. Did the Anclote Gas Conversion Project meet its targeted in-service dates**
8 **and total estimated cost?**

9 A. Yes, Unit 1 and Unit 2 gas conversions went in service on July 13, 2013 and
10 December 2, 2013, respectively. Unit 1 and Unit 2 Force Draft (FD) fan
11 modification work was completed on May 22, 2014 and November 17, 2014,
12 respectively. Total actual project cost as of 2014 year end is approximately
13 \$134 million.

14

15 **Q. How did actual project expenditures for the period January 2014 –**
16 **December 2014 compare to actual/estimated projections for the Anclote**
17 **Gas Conversion Project?**

18 A. The Anclote Gas Conversion capital variance is \$783,497 or 2% lower than
19 projected due to earlier than expected completion of Unit 2 FD fan work on
20 November 17, 2014 versus the projected completion date of December 15, 2014.

21

22 **Q. Does this conclude your testimony?**

23 A. Yes.

1 BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
2 DIRECT TESTIMONY OF
3 MICHAEL R. DELOWERY
4 ON BEHALF OF
5 DUKE ENERGY FLORIDA
6 DOCKET NO. 150007-EI
7 July 31, 2015
8

9 **Q. Please state your name and business address.**

10 A. My name is Michael Delowery. My current business address is 400 South
11 Tryon Street, Charlotte, NC 28202.
12

13 **Q. Have you previously filed testimony before this Commission in Docket No.**
14 **150007-EI?**

15 A: Yes, I provided direct testimony on April 1, 2015.
16

17 **Q: Has your job description, education, background and professional**
18 **experience changed since that time?**

19 A: No.
20

21 **Q. What is the purpose of your testimony?**

22 A. The purpose of my testimony is to provide an update on the Mercury and Air
23 Toxics Standards (MATS) - Anclote Gas Conversion Project (Project 17.1).

1 **Q. What costs does DEF expect to incur in 2015 in connection with the MATS**
2 **– Anclore Gas Conversion Project (Project 17.1)?**

3 A. DEF estimates 2015 capital costs of approximately \$509k for the Anclore Gas
4 Conversion project for site/warranty support, completion of punch list items,
5 document control/record management and contract close-out.

6

7 **Q. Please explain the variance between the actual/estimated project**
8 **expenditures and original projections for the MATS – Anclore Gas**
9 **Conversion Program (Project 17.1) for the period January 2015 through**
10 **December 2015.**

11 A. Capital expenditures for the Anclore Gas Conversion project are estimated to be
12 \$314k less than originally projected due to earlier than expected completion of
13 Unit 2 Force Draft (FD) fan work in November 2014 versus December 2014.

14

15 **Q. Does this conclude your testimony?**

16 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

MICHAEL R. DELOWERY

ON BEHALF OF

DUKE ENERGY FLORIDA, LLC.

DOCKET NO. 150007-EI

August 31, 2015

Q. Please state your name and business address.

A. My name is Michael Delowery. My business address is 400 South Tryon Street,
Charlotte, NC 28202.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A. Yes. I provided direct testimony on April 1, 2015 and July 31, 2015.

Q. Has your job description, education, background or professional experience changed since that time?

A. No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to provide estimates of costs that will be incurred in 2016 for the Mercury and Air Toxics Standards (MATS) - Anclote

1 Gas Conversion Project (Project 17.1)

2

3 **Q. Have you prepared or caused to be prepared under your direction,**
4 **supervision or control any exhibits in this proceeding?**

5 **A.** Yes. I am co-sponsoring the following portion of Exhibit No. ___ (TGF-5) to
6 Thomas G. Foster's direct testimony:

7 • 42-5P page 20 of 22 - MATS - Anclote Gas Conversion

8

9 **Q. What costs do you expect to incur in 2016 in connection with the MATS –**
10 **Anclote Gas Conversion Project (Project 17.1)?**

11 **A.** Duke Energy Florida, LLC does not expect any costs in 2016. The project is
12 complete and in-service.

13

14 **Q. Does this conclude your testimony?**

15 **A.** Yes.

16

17

18

19

20

21

22

23

1 BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

2 DIRECT TESTIMONY OF

3 GARRY MILLER

4 ON BEHALF OF

5 DUKE ENERGY FLORIDA

6 DOCKET NO. 150007-EI

7 July 31, 2015

8

9 **Q. Please state your name and business address.**

10 A. My name is Garry Miller. My business address is 400 South Tryon Street, Charlotte,
11 NC 28202.

12

13 **Q. By whom are you employed?**

14 A: I am employed by Duke Energy, Inc. as Senior Vice President – Ash Basin Strategic
15 Action Team (“ABSAT”)- Engineering.

16

17 **Q: What are your responsibilities in that position?**

18 A: I am on interim assignment in the Ash Basin Strategic Team. My responsibilities are
19 strategic planning to close Duke Energy ash basins, including development of strategic
20 plans, vetting those plans with the applicable regulators, and working with ABSAT
21 Project Management on action plans to implement the strategic plans.

1 **Q: Please describe your educational background and professional experience.**

2 A: I have Bachelor of Science degree in Nuclear Engineering from North Carolina State
3 University. I also have a Master's degree in Mechanical Engineering from North
4 Carolina State University. I have over 30 years of experience in the nuclear industry.
5 My experience involves engineering and maintenance experience at Duke Energy's
6 nuclear plants and the corporate office for nuclear operations. I have held Engineering
7 Manager positions at the Brunswick Nuclear Plant and Robinson Nuclear Plant. I was
8 also the Chief Engineer for the Nuclear Generation Group ("NGG") for Progress Energy.
9 Additionally, I was the Maintenance Manager at the Harris Nuclear Plant. I also hold a
10 BWR/SRO (senior reactor operation) certification. Prior to the merger, I was the Vice
11 President - Nuclear Engineering for Progress Energy. After the merger with Duke
12 Energy, I became Duke Energy's Senior Vice President of Nuclear Engineering. In
13 March of 2014, I began my current interim role as Senior Vice President - ABSAT –
14 Engineering.

15

16 **Q. What is the purpose of your testimony?**

17 A. The purpose of my testimony is to explain Duke Energy Florida's ("DEF" or the
18 "Company") proposed compliance activities and related costs associated with the new
19 Coal Combustion Residual ("CCR") Rule for which the Company seeks recovery under
20 the Environmental Cost Recovery Clause ("ECRC").

21

22 **Q: Please summarize the CCR Rule.**

23 A: The CCR rule was published in the Federal Register on April 17, 2015, and is effective
24 on October 17, 2015. The rule regulates the disposal of CCR as non-hazardous solid

1 waste, and contains new requirements for CCR landfills and CCR surface
2 impoundments. It also specifies implementation timelines for compliance. The
3 compliance deadlines for CCR vary, with compliance obligations required as early as
4 October 17, 2015. Compliance timeframes for specific CCR requirements are addressed
5 later in this testimony. The rule is self-implementing, meaning that affected facilities
6 must comply with the new regulations irrespective of whether the rule is adopted by the
7 State of Florida. Even if the state adopts the rule and incorporates its criteria into the
8 state's solid waste management program, the federal rule remains in place as an
9 independent set of criteria that must be met.

10

11 The CCR rule applies to new and existing CCR landfills and surface impoundments,
12 including lateral expansions of CCR units. In addition, the rule applies to electric
13 utilities' and independent power producers' *inactive* CCR surface impoundments (those
14 not receiving CCR on or after the effective date of the rule) regardless of the fuel
15 currently used at the facility to produce electricity if the inactive impoundment contains
16 CCR and liquids. If an inactive surface impoundment closes within three years after the
17 rule was published in the Federal Register, either by closure in place or clean closure, it
18 is excluded from further regulation. Inactive CCR surface impoundments that do not
19 close within this timeframe are regulated in the same manner as existing CCR surface
20 impoundments and subject to all rule requirements, including location restriction and
21 groundwater monitoring. The CCR rule does not apply to inactive landfills - i.e.
22 landfills that ceased receiving CCR prior to the effective date of the rule.

23

1 Key aspects of the CCR rule include:

2

3 1) Location Restrictions – New landfills, including lateral expansions of existing units,
4 and all surface impoundments, including inactive surface impoundments, are subject to
5 location restrictions regarding the placement of CCR units above the uppermost aquifer,
6 in wetlands, within fault areas, in seismic impact zones, and in unstable areas. By
7 October 2018, DEF must perform a location restriction assessment for each landfill and
8 surface impoundment subject to the CCR rule. CCR units must meet the conditions for
9 operating in a location restriction area; units that do not meet the conditions must cease
10 receipt of CCR and, in the case of landfills, commence closure.

11

12 2) Liner Design Criteria – New CCR landfills, new lateral expansions of CCR landfills,
13 and new CCR surface impoundments must have a bottom composite liner, with the
14 upper component consisting of a geomembrane liner and the lower component
15 consisting of at least a two-foot layer of compacted soil meeting a specified hydraulic
16 conductivity design standard. Unlined CCR surface impoundments must cease the
17 receipt of CCR and commence closure if it is determined during groundwater monitoring
18 that releases from these impoundments exceed applicable groundwater protection
19 standards. The rule does not include a mandatory liner retrofit requirement for existing,
20 unlined CCR surface impoundments.

21

22 3) Surface impoundment Structural Integrity Requirements – CCR surface
23 impoundments are subject to structural integrity requirements that include: undertaking
24 hazard potential assessments, meeting slope erosion standards, maintaining

1 impoundment construction records, and undertaking structural stability and safety factor
2 assessments. If a surface impoundment does *not* meet specified dam safety factor
3 structural stability assessment requirements by October 17, 2016, it must cease receipt of
4 CCR within 6 months and commence closure.

5

6 4) Groundwater Monitoring & Corrective Action – All CCR landfills and CCR surface
7 impoundments that are subject to the CCR rule are subject to groundwater monitoring,
8 and if necessary, corrective action requirements. Within two years of the CCR rule
9 effective date, all existing CCR landfills and existing CCR surface impoundments
10 (subject to the rule) must have installed groundwater monitoring systems and
11 groundwater detection monitoring program initiated.

12

13 5) Closure & Post-Closure Care – The CCR rule contains closure and post-closure
14 monitoring plan requirements for new and existing CCR landfills and active and inactive
15 CCR surface impoundments. The rule sets closure standards for closure in place or
16 closure through removal of CCR and decontamination of the CCR unit (clean closure).
17 The CCR rule states that landfills must complete closure within six months of
18 commencement, and surface impoundments must complete closure within five years of
19 commencement. The rule also requires closed units to comply with certain post-closure
20 care requirements.

21

22 6) Recordkeeping, Notification & Internet Posting Obligations – Because the CCR rule
23 is self-implementing, the CCR rule contains extensive recordkeeping , notice, and
24 internet posting requirements that must be met by October 17, 2015 to demonstrate

1 compliance with the rule. These items are intended to provide information to the states
2 and public to continually gauge the compliance status of regulated facilities with the
3 rule's self-implementing requirements.

4

5 **Q: How does the CCR rule impact DEF's facilities?**

6 A: The rule has specific compliance impacts on the ash landfill, the Flue Gas
7 Desulfurization ("FGD") lined blowdown ponds, and the temporary gypsum storage pad
8 at the Crystal River ("CR") site. No other DEF operating sites are impacted by the CCR
9 rule.

10

11 **Q: What are the CCR rule compliance activities and associated costs for which DEF is**
12 **seeking recovery?**

13 A: Ash Landfill

14 DEF has contracts with two engineering firms to study CR ash landfill stability and ash
15 placement. One firm will perform a geotechnical study of the ash landfill including
16 surveys, field inspections, ash sampling and engineering calculations to determine
17 landfill stability. The other firm will compile and review historical ash placement and
18 testing documents, and develop a process and related procedures to address future ash
19 placement requirements at Crystal River. Total estimated O&M costs for engineering
20 firm work is \$104k. Groundwater monitoring will also be required for the ash landfill,
21 Flue Gas Desulfurization ("FGD") blowdown ponds (i.e., CCR surface impoundments),
22 and potentially the gypsum storage pad to comply with the CCR rule. The extent and
23 cost of groundwater monitoring for the ash landfill, FGD blowdown ponds and gypsum
24 storage pad are being assessed; DEF will provide an update in its 2016 Projection Filing.

1

2 Temporary Gypsum Pad

3 Effective October 17, 2015, the temporary gypsum pad at CR will be subject to CCR
4 requirements. Efforts are underway to address fugitive dust mitigation at the CCR
5 gypsum stack-out; upon completion, the CR temporary gypsum pad will no longer be
6 subject to the CCR rule's compliance requirements as a CCR landfill. Total estimated
7 2015 costs for the addition of a dust control system is \$1.5M.

8

9 FGD Blowdown Ponds

10 The CR FGD Blowdown Ponds are subject to the CCR rule, and a definitive assessment
11 and action plan is being developed. The ponds must also be classified as to hazard
12 potential to determine if an Emergency Action Plan ("EAP") is needed to comply with
13 the CCR rule (see EAP below). As addressed above, groundwater monitoring will also
14 be required for the FGD Blowdown Ponds along with weekly inspections, based on the
15 results of the liner assessments required by the rule. DEF estimates that the predicate
16 assessments required by the rule to ascertain if remediation is required will cost
17 approximately \$200k in 2015.

18

19 Emergency Action Plan

20 An EAP outlines the notification and remediation process in the event of a dam breach
21 or any event that could impact the environment or public safety at a DEF operating site.
22 An EAP is required per the CCR rule if a surface impoundment is classified as
23 "significant hazard" or "high hazard" potential. DEF is in the process of determining if

1 the CCR rule requires an EAP for the CR FGD Blowdown Ponds. DEF estimates costs
2 of \$24k to develop an EAP.

3

4 Vegetation Management & Inspection Work

5 The CCR rule requires increased vegetation management and inspection work at the CR
6 site. Vegetative cover must be no more than six inches above the face of an
7 embankment. The CCR rule requires that the time between inspections at landfills and
8 surface impoundments may not exceed every 7 days, and requires annual inspections of
9 both by an independent party. Moreover, additional weekly and monthly inspections
10 performed by internal personnel are required for surface impoundments. More frequent
11 mowing will be necessary to comply with the 6 inch requirement. Incremental costs
12 required to comply with these requirements are estimated at \$64k for July – December
13 2015.

14 Additional capital costs in 2015 to comply with the vegetation management
15 requirements are \$100k.

16

17 **Q: Are there any other CCR rule compliance activities and costs for which DEF**
18 **expects to seek recovery?**

19 A: DEF is currently evaluating the CCR rule to determine operating and cost impacts, and
20 expects to incur compliance costs in 2015 and beyond. However, the full extent of
21 compliance activities and associated costs cannot be determined until further analysis
22 and assessments of the CCR rule are complete. DEF will provide an update on its CCR
23 program in its 2016 Projection Filing.

24

1 **Q: Do DEF's expected CCR compliance activity costs meet the recovery criteria**
2 **established by Order No. 94-044-FOF-EI?**

3 A: Yes. The proposed CCR program meets the recovery for ECRC cost recovery
4 established by Order No. PEC-94-0044-FOF-EI in that:

- 5 a) All expenditures will be prudently incurred after April 13, 1993;
6 b) The activities are legally required to comply with a governmentally imposed
7 environmental regulation enacted, became effective, or whose effect was triggered
8 after the Company's last test year which rates are based; and
9 c) None of the expenditures are being recovered through some other cost recovery
10 mechanism or through base rates.

11

12 **Q. Does this conclude your testimony?**

13 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

GARRY MILLER

ON BEHALF OF

DUKE ENERGY FLORIDA, LLC.

DOCKET NO. 150007-EI

AUGUST 31, 2015

Q. Please state your name and business address.

A. My name is Garry Miller. My business address is 400 South Tryon Street,
Charlotte, NC 28202.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A: Yes. I provided direct testimony on July 31, 2015.

Q. Has your job description, education, background or professional experience changed since that time?

A: No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to provide an update on Duke Energy Florida LLC's ("DEF" or "Company") proposed compliance activities and related 2016 estimated costs associated with the Coal Combustion Residual ("CCR") Rule for

1 which the Company seeks recovery under the Environmental Cost Recovery
2 Clause (“ECRC”).

3

4 **Q. Have you prepared or caused to be prepared under your direction,
5 supervision or control any exhibits in this proceeding?**

6 A. Yes. I am co-sponsoring the following portion of Exhibit No. __ (TGF-5) to
7 Thomas G. Foster’s direct testimony:

- 8 • 42-5P page 22 of 22 – Coal Combustion Residual Rule

9

10 **Q. Has DEF’s 2015 expected CCR Rule compliance strategy changed?**

11 A: Yes. Expected CCR compliance activities associated with the temporary
12 gypsum pad and additional capital costs to comply with vegetation management
13 requirements as explained in my July 31, 2015 direct testimony in the instant
14 Docket have changed.

15

16 Efforts to address fugitive dust mitigation at the CCR gypsum stack-out
17 continue to be underway. At completion, the Crystal River (“CR”) temporary
18 gypsum pad will not be subject to CCR compliance requirements as a CCR
19 landfill. DEF estimated \$1.5M of capital expenditures in 2015 for the addition
20 of a permanent dust control system. Based on further analysis, DEF will be
21 unable to complete the permanent solution by October 19, 2015. DEF will
22 employ a temporary dust mitigation solution while the permanent solution is
23 constructed. The permanent solution is expected to be in-service by October
24 2016. DEF estimates O&M costs for a temporary fugitive dust mitigation

1 system of \$75k and \$250k in 2015 and 2016, respectively. Total estimated 2016
2 capital costs for a permanent dust control system at the CCR gypsum stack-out
3 by October 2016 are \$2.1 million. Additionally, DEF has determined that
4 vegetation management compliance can be achieved without spending the
5 \$100k of capital included in the July 31, 2015 Filing.

6

7 **Q: What are the CCR rule compliance activities and associated costs for which**
8 **DEF is seeking recovery in 2016?**

9 A: Ash Landfill

10 Various maintenance and repair work is required for the CR ash landfill such as
11 fixing ruts and animal burrows, vegetation management, erosion repairs, and
12 other activities to ensure compliance with the CCR rule. Total estimated O&M
13 costs are \$150k.

14

15 Temporary Gypsum Pad

16 Total estimated costs for temporary and permanent dust control systems are
17 \$325k in O&M and \$2.1M in capital, as explained above. In addition, \$875k of
18 O&M costs are estimated to dredge the gypsum basin. DEF also expects to
19 spend \$100k in O&M costs for ash/gypsum handling and disposal to comply
20 with CCR rule requirements.

21

22 Flue Gas Desulfurization (“FGD”) Blowdown Ponds

23 As addressed in my July 31, 2015 direct testimony, groundwater monitoring is
24 required for the FGD blowdown ponds along with weekly assessments based on

1 the results of liner assessments required by the rule. DEF estimates \$1.8M of
2 capital costs for engineering, including sampling, analysis, and reporting, and
3 drilling wells.

4

5 Emergency Action Plan (“EAP”)

6 No 2016 costs are projected for development of an EAP.

7

8 Vegetation Management & Inspection Work

9 Total estimated O&M costs for increased vegetation management at the CR ash
10 landfill, percolation ponds and FGD Blowdown Ponds are \$200k. Incremental
11 O&M costs for system owner to perform CCR inspections and coordinate CCR
12 compliance activities and requirements are \$154k.

13

14 **Q. Are there any other CCR rule compliance activities and costs for which**
15 **DEF expects to seek recovery in 2016?**

16 A. DEF continues to evaluate the CCR rule to determine operating and cost
17 impacts, and expects to incur costs in 2016 and beyond. However, the full
18 extent of compliance activities and associated costs cannot be determined until
19 further analysis and assessments of the CCR rule are complete. As these
20 analyses and assessments are completed and additional compliance activities
21 and costs become known, DEF will update the Commission and provide the
22 costs for recovery, as appropriate, in later ECRC filings.

23

24

1 **Q. Does this conclude your testimony?**

2 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
DIRECT TESTIMONY OF
JEFFREY SWARTZ
ON BEHALF OF
DUKE ENERGY FLORIDA
DOCKET NO. 150007-EI
July 31, 2015

Q. Please state your name and business address.

A. My name is Jeffrey Swartz. My business address is 299 First Avenue North, St. Petersburg, FL 33701.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A: Yes, I provided direct testimony on April 1, 2015.

Q: Has your job description, education, background and professional experience changed since that time?

A: No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain material variances between 2015 actual/estimated cost projections and original 2015 cost projections for environmental compliance costs associated with FPSC-approved environmental

1 programs under my responsibility. These programs include the CAIR/CAMR
2 Crystal River (CR) Program (Project 7.4) and Mercury & Air Toxics Standards
3 (MATS) – Crystal River 1&2 Program (Project 17.2).

4

5 **Q. How do actual/estimated O&M project expenditures compare with original**
6 **projections for the CAIR/CAMR Crystal River (CR) Program (Project 7.4)**
7 **for the period January 2015 through December 2015?**

8 A. O&M expenditures are expected to be \$661k higher than originally projected.
9 This variance is primarily driven by a \$710k decrease in CAIR/CAMR CR
10 Project 7.4 – Base offset by a \$1.4 million increase in CAIR/CAMR CR Project
11 7.4 – Energy.

12

13 **Q. Please explain the variance between actual/estimated O&M project**
14 **expenditures and original projections for the CAIR/CAMR CR Program**
15 **(Project 7.4 – Base) for the period January 2015 through December 2015.**

16 A. The \$710k decrease is due to lower than projected base routine project costs.

17

18 **Q. Please explain the variance between the actual/estimated O&M project**
19 **expenditures and original projections for the CAIR/CAMR Crystal River**
20 **Program (Project 7.4 – Energy) for the period January 2015 through**
21 **December 2015.**

22 A. The \$1.4 million increase is primarily attributable to a \$2.7 million increase in
23 ammonia expense due to a higher ammonia price and a \$1.4 million higher
24 hydrated lime expense driven by a switch in product type to comply with sulfur

1 trioxide (SO₃) emissions air permit limits, partially offset by \$1.3 million in
2 lower limestone expense due to less consumption and \$1.2 million in lower
3 gypsum expense as a result of lower disposal volume and reduced sales expense.

4

5 **Q. Please explain the variances between the actual/estimated capital project**
6 **expenditures and original projections for the CAIR/CAMR Crystal River**
7 **Program (Project 7.4) for the period January 2015 through December**
8 **2015?**

9 A. Capital expenditures are expected to be \$124k higher than originally projected
10 primarily due to a shift in spending from 2014 to 2015 in order to align with the
11 City of Crystal River reclaimed water reuse project timeline.

12

13 **Q: Please explain the variance between actual/estimated capital project**
14 **expenditures and original projections for the MATS – CR 1&2 Program**
15 **(Project 17.2) for the period January 2015 through December 2015.**

16 A: Capital expenditures are expected to be \$4.2 million higher than originally
17 projected due to an additional project related to the Unit 1 electrostatic
18 precipitator (ESP). Performance testing with western bituminous coals in
19 October 2014 revealed higher than expected duct opacity and particulate matter
20 (PM) emissions from Unit 1. Following unit inspections and extensive
21 modeling, a decision was made in November 2014 to replace and upgrade the
22 Unit 1 ESP power supplies and internal components in order to achieve PM
23 emission targets considered in the original compliance study. This work was

1 implemented during the spring 2015 outage, and further testing with western
2 coals is planned for summer 2015 to assess the new performance levels.

3

4 **Q: Is the MATS – CR1&2 Program on schedule to meet its target in-service
5 date and total estimated costs?**

6 A: The MATS-CR1&2 Program is on schedule to meet the targeted in-service date
7 of April 2016 as stated in Order PSC-14-0173-PAA-EI. Total estimated costs
8 are expected to increase from \$28 million to \$33 million primarily as a result of
9 the Unit 1 ESP project referenced in the variance explanation above.

10

11 **Q. Does this conclude your testimony?**

12 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

JEFFREY SWARTZ

ON BEHALF OF

DUKE ENERGY FLORIDA

DOCKET NO. 150007-EI

April 1, 2015

Q. Please state your name and business address.

A. My name is Jeffrey Swartz. My business address is 8202 W. Venable St,
Crystal River, FL 34429.

Q. By whom are you employed and in what capacity?

A. I am employed by Duke Energy Florida (DEF or the Company) as Vice
President –Fossil/Hydro Operations Florida.

Q. What are your responsibilities in that position?

A. As Vice President of DEF’s Fossil/Hydro organization, my responsibilities
include overall leadership and strategic direction of DEF’s power generation
fleet. My responsibilities include strategic and tactical planning to operate and
maintain DEF’s non-nuclear generation fleet; generation fleet project and
addition recommendations; major maintenance programs; outage and project
management; generation facilities retirement; asset allocation; workforce

1 planning and staffing; organizational alignment and design; continuous business
2 improvement; retention and inclusion; succession planning; and oversight of
3 numerous employees and hundreds of millions of dollars in assets and capital
4 and O&M budgets.

5

6 **Q. Please describe your educational background and professional experience.**

7 A. I earned a Bachelor of Science degree in Mechanical Engineering from the
8 United States Naval Academy in 1985. I have 14 years of power plant and
9 production experience at Duke Energy in various managerial and executive
10 positions in fossil steam, combustion turbine and nuclear plant operations. I
11 also managed new construction and O&M projects. I have extensive contract
12 negotiation and management experience. My prior experience includes nuclear
13 engineering and operations experience in the United States Navy, and project
14 management, engineering, supervisory and management oversight experience
15 with a pulp, paper and chemical manufacturing company.

16

17 **Q. Have you previously filed testimony before this Commission in connection**
18 **with DEF's Environmental Cost Recovery Clause (ECRC)?**

19 A. Yes.

20

21 **Q. What is the purpose of your testimony?**

22 A. The purpose of my testimony is to explain material variances between actual and
23 actual/estimated project expenditures for environmental compliance costs

1 associated with DEF's Integrated Clean Air Compliance Program (Project 7.4)
2 and Mercury & Air Toxics Standards (MATS) – CR 1&2 (Project 17.2) for the
3 period January 2014 - December 2014.

4

5 **Q. How do actual O&M expenditures for January 2014 - December 2014**
6 **compare with DEF's actual/estimated projections for the Clean Air**
7 **Interstate Rule/Clean Air Mercury Rule (CAIR/CAMR) Crystal River**
8 **Program (Project 7.4)?**

9 A. The CAIR/CAMR Crystal River O&M variance is \$56,104 or .2% higher than
10 projected. This variance is primarily attributable to \$115,741 lower than
11 expected costs for CAIR Crystal River Project 7.4 – Base and \$171,498 higher
12 than expected costs for CAIR Crystal River Project 7.4 - Energy.

13

14 **Q: Please explain the variance between actual project expenditures and**
15 **actual/estimated projections for the CAIR Crystal River Project – Base for**
16 **January 2014 - December 2014?**

17 A: O&M costs for CAIR Crystal River Project – Base were \$115,741 or 1% lower
18 than projected. This variance is primarily driven by a \$270 thousand decrease in
19 labor due to lower burden rates offset by a \$198 thousand increase due to a
20 change in strategy to comply with FDEP wastewater permit requirements and
21 \$52 thousand of expected maintenance work not completed in 2014.

22

23

1 **Q. Please explain the variance between actual project expenditures and the**
2 **actual/estimated projections for the CAIR Crystal River Project – Energy**
3 **for the period January 2014 - December 2014?**

4 A. O&M costs for reagents and by-products were \$171,498 or 1% higher than
5 projected. This variance is primarily attributable to \$1.5 million higher
6 ammonia expense due to a higher than projected ammonia price; \$680 thousand
7 higher hydrated lime expenses due to more consumption than expected; \$830
8 thousand lower gypsum expense as a result of less than expected disposal
9 volume and reduced sales expense; and \$1.1 million lower limestone expense
10 driven by milder weather and unscheduled outages.

11

12 **Q. How did actual O&M expenditures for January 2014 - December 2014**
13 **compare with DEF's actual/estimated projections for the MATS – CR 1&2**
14 **Project (Project 17.2)?**

15 A. The MATS – CR 1&2 O&M variance is \$1 million or 18% lower than projected
16 due to a reduced scope of work in 2014 for the Unit 1 Flue Gas Redistribution
17 and MATS Related Plant Testing projects. This work will be completed in the
18 second quarter of 2015.

19

20

21

22

23

1 **Q. How did actual capital expenditures for January 2014 - December 2014**
2 **compare with DEF's actual/estimated projections for the MATS – CR 1&2**
3 **Project (Project 17.2)?**

4 A. The MATS – CR 1&2 capital variance is \$523,175 or 8% higher than projected
5 as a result of materials purchased for a Unit 1 electrostatic precipitator project.
6 Due to vendor lead times, these materials were ordered in December 2014 for
7 installation in 2nd Quarter 2015.

8

9 **Q. Does this conclude your testimony?**

10 A. Yes.

11

12

13

14

15

16

17

18

19

20

21

22

23

1 BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
2 DIRECT TESTIMONY OF
3 PATRICIA Q. WEST
4 ON BEHALF OF
5 DUKE ENERGY FLORIDA
6 DOCKET NO. 150007-EI
7 April 1, 2015
8

9 **Q. Please state your name and business address.**

10 A. My name is Patricia Q. West. My business address is 299 First Avenue North,
11 St. Petersburg, FL 33701.
12

13 **Q. By whom are you employed and in what capacity?**

14 A. I am employed by Duke Energy Florida (DEF or the Company) as Director
15 Environmental Field Support – Florida.
16

17 **Q. What are your responsibilities in that position?**

18 A. Currently, my responsibilities include managing the work of environmental
19 professionals who are responsible for environmental, technical, and regulatory
20 support during the development and implementation of environmental
21 compliance strategies for regulated power generation facilities and electrical
22 transmission and distribution facilities in Florida.
23

24 **Q. Please describe your educational background and professional experience.**

1 A. I obtained my Bachelor of Arts degree in Biology from New College of the
2 University of South Florida in 1983. I was employed by the Polk County Health
3 Department between 1983 and 1986 and by the Florida Department of
4 Environmental Protection (FDEP) from 1986 - 1990. At the FDEP, I was
5 involved in compliance and enforcement efforts associated with petroleum
6 storage facilities. I joined Florida Power Corporation in 1990 as an
7 Environmental Project Manager and then held progressively more responsible
8 positions through the merger with Carolina Power and Light, and more recently
9 through the merger with Duke Energy in my role as the Director Environmental
10 Field Support – FL.

11

12 **Q. Have you previously filed testimony before this Commission in connection**
13 **with DEF's Environmental Cost Recovery Clause (ECRC)?**

14 A. Yes.

15

16 **Q. What is the purpose of your testimony?**

17 A. The purpose of my testimony is to explain material variances between the actual
18 and actual/estimated project expenditures for environmental compliance costs
19 associated with DEF's Pipeline Integrity Management (PIM) Program (Project
20 3), Cooling Water Intake – 316(b) (Project 6 & 6a), Clean Air Interstate
21 Rule/Clean Air Mercury Rule (CAIR/CAMR) – Peaking (Project 7.2), Arsenic
22 Groundwater Standard (Project 8), and Mercury & Air Toxics Standards
23 (MATS) – Crystal River Units 4 & 5 (CR 4&5) (Project 17) for the period

1 January 2014 - December 2014. I also provide an update of the Cross State Air
 2 Pollution Rule (CSAPR) and its impact on DEF’s emission allowances.
 3 In addition, I am sponsoring Exhibit No. __ (PQW-1), DEF’s review of the
 4 efficacy of its Integrated Clean Air Compliance Plan and retrofit options in
 5 relation to expected environmental regulations.

6

7 **Q. How did actual O&M expenditures for January 2014 - December 2014**
 8 **compare with DEF’s actual/estimated projections for the PIM Project**
 9 **(Project 3)?**

10 A. The PIM O&M variance is \$136,374 or 33% lower than projected due to the
 11 Florida Department of Transportation (FDOT) deferment of the 2014 pipeline
 12 protection project at Gandy Blvd until 2015.

13

14 **Q. How did actual O&M expenditures for January 2014 - December 2014**
 15 **compare with DEF’s actual/estimated projections for the Cooling Water**
 16 **Intake - 316(b)Project (Project 6 & 6a)?**

17 A. The Cooling Water Intake - 316(b) variance is \$28,570 or 26% lower than
 18 projected due to the method used to allocate costs to analyze 316(b) compliance
 19 strategies at each affected Duke generating site. Duke intends to implement a
 20 consistent 316(b) compliance approach across its entire fleet of regulated units.

21

22

23

24

1 **Q. How did actual O&M expenditures for January 2014 - December 2014**
2 **compare with DEF's actual/estimated projections for the CAIR/CAMR –**
3 **Peaking Project (Project 7.2)?**

4 A: The CAIR/CAMR – Peaking variance is \$10,061 or 22% lower than projected
5 due to December 2014 invoices inadvertently charged to non-ECRC projects.
6 This error was corrected in January 2015.

7

8 **Q. How did actual O&M expenditures for January 2014 - December 2014**
9 **compare with DEF's actual/estimated projections for the Arsenic**
10 **Groundwater Standard Project (Project 8)?**

11 A. The Arsenic Groundwater Monitoring variance is \$1,969 or 22% higher than
12 projected due to consultant costs to evaluate monitoring data and prepare a
13 report documenting the evaluation in compliance with the FDEP Consent Order
14 No. 09-3463C. The Consent Order was issued by the FDEP for exceedance of
15 the arsenic groundwater limit when EPA lowered the arsenic maximum
16 contaminant level from 50 ppb to 10 ppb.

17

18 **Q. How did actual O&M expenditures for January 2014 - December 2014**
19 **compare with DEF's actual/estimated projections for the MATS – CR 4&5**
20 **Project (Project 17)?**

21 A. The MATS – CR 4&5 O&M variance is \$81,039 or 31% higher than projected
22 due to an increase in scope of the Mercury Characterization Study and
23 completion in December 2014 instead of January 2015.

24

1 **Q. How did actual capital expenditures for January 2014 - December 2014**
2 **compare with DEF's actual/estimated projections for the MATS – CR 4&5**
3 **Project (Project 17)?**

4 A. The MATS – CR 4&5 capital variance is \$106,923 or 28% lower than projected
5 primarily due to lower than expected spend on the installation of particulate
6 matter (PM) continuous emission monitoring systems (CEMS). Additionally,
7 PM CEMS correlation testing was delayed from November 2014 to March 2015
8 to allow for sufficient communication with the FDEP regarding regulatory
9 requirements associated with the testing.

10

11 **Q. In Order No. PSC-10-0683-FOF-EI issued in Docket No. 100007-EI on**
12 **November 15, 2010, the Commission directed DEF to file as part of its**
13 **ECRC true-up testimony a yearly review of the efficacy of its Plan D and**
14 **the cost-effectiveness of DEF's retrofit options for each generating unit in**
15 **relation to expected changes in environmental regulations. Has DEF**
16 **conducted such a review?**

17 A. Yes. DEF's yearly review of the Integrated Clean Air Compliance Plan is
18 provided as Exhibit No. __ (PQW-1).

19

20 **Q. Please summarize the conclusions of DEF's review of its Integrated Clean**
21 **Air Compliance Plan.**

22 A: DEF installed emission controls contemplated in its Integrated Clean Air
23 Compliance Plan on time and within budget. The Flue Gas Desulfurization (wet
24 scrubbers) and Selective Catalytic Reduction systems on CR 4&5 have enabled

1 DEF to comply with Clean Air Interstate Rule (CAIR) requirements and will
2 continue to be the cornerstone of DEF's integrated air quality compliance
3 strategy. DEF is confident that the Integrated Clean Air Compliance Plan, along
4 with compliance strategies under development, will enable it to achieve and
5 maintain compliance with applicable regulations, including MATS, in a cost
6 effective manner. DEF continues to evaluate additional MATS compliance
7 options and other regulatory developments affecting fossil-fired electric
8 generating units. The results of the analyses performed to date are included in
9 my Exhibit No. __ (PQW-1).

10

11 **Q. What is the history and status of CSAPR?**

12 A. The EPA adopted the CSAPR to replace the CAIR by publication in the Federal
13 Register in August 2011. The CSAPR establishes state-level annual and
14 seasonal SO₂ and NO_x emissions allowance requirements that were effective
15 January 1, 2012. Under CSAPR, the State of Florida is no longer required to
16 comply with annual emission requirements, only ozone seasonal limits. In
17 Order No. PSC-11-0553-FOF-EI, the Commission established a regulatory asset
18 to allow DEF to recover the costs of its remaining CAIR NO_x allowance
19 inventory over a three (3) year amortization period. However, on December 30,
20 2011, the D.C. Circuit Court of Appeals stayed the CSAPR leaving the CAIR in
21 effect until it completed its review of CSAPR. Consequently, DEF continued to
22 maintain its NO_x allowance inventory in order to comply with the CAIR. In
23 August 2012, the D.C. Circuit Court of Appeals vacated the CSAPR and
24 directed the EPA to continue administering the CAIR program. The EPA

1 subsequently appealed this decision to the U.S. Supreme Court. In April 2014,
2 the U.S. Supreme Court overturned the D.C. Circuit Court's ruling and
3 remanded the case back to the lower court for further action. In June 2014, the
4 EPA requested that the court lift the CSAPR stay and allow it to be implemented
5 under a revised schedule. This request was granted in October 2014 and the
6 CSAPR went into effect on January 1, 2015 replacing the CAIR program.
7 Additional CSAPR litigation is ongoing. Oral argument was held on February
8 25, 2015, before the D.C. Circuit Court.

9

10 **Q. When does compliance with the CSAPR become effective for Florida?**

11 A. The CSAPR replaces the CAIR starting January 1, 2015. The effective
12 compliance date for Florida is May 1, 2015, the beginning of the ozone season.

13

14 **Q. Can emission allowances previously issued to DEF under CAIR and/or the
15 Acid Rain Program be used to comply with the CSAPR?**

16 A. No. The Acid Rain Program is a separate statutory program with different
17 compliance requirements, and the CSAPR is a replacement for the CAIR
18 program, meaning that the Acid Rain Program continues in effect. As of
19 January 1, 2015, the NO_x emission allowances under the CAIR have no value;
20 however, DEF will continue to use its SO₂ emission allowances to comply with
21 the Acid Rain Program.

22

23

1 **Q. Are the number of emission allowances allocated to Florida's emission units**
2 **under the CSAPR similar to the CAIR program?**

3 A. No. The allowances provided to Florida's emission units under the CSAPR are
4 about one-half of the amounts previously allocated under the CAIR. This is not
5 expected to cause significant issues meeting required compliance levels as
6 emissions levels in the state have continued to decrease over the past several
7 years.

8
9 **Q. Does this conclude your testimony?**

10 A. Yes.

11

12

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION
DIRECT TESTIMONY OF
PATRICIA Q. WEST
ON BEHALF OF
DUKE ENERGY FLORIDA
DOCKET NO. 150007-EI
July 31, 2015

Q. Please state your name and business address.

A. My name is Patricia Q. West. My business address is 299 First Avenue North,
St. Petersburg, FL 33701.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A: Yes, I provided direct testimony on April 1, 2015.

Q: Has your job description, education, background and professional experience changed since that time?

A: No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to explain material variances between 2015 actual/estimated cost projections and original 2015 cost projections for environmental compliance costs associated with FPSC-approved programs

1 under my responsibility. These programs include the Substation Environmental
2 Investigation, Remediation and Pollution Prevention Program (Project 1 & 1a),
3 Distribution System Environmental Investigation, Remediation and Pollution
4 Prevention Program (Project 2), Pipeline Integrity Management (PIM) (Project
5 3), Above Ground Secondary Containment (Project 4), Phase II Cooling Water
6 Intake – 316(b) (Project 6), CAIR/CAMR - Peaking (Project 7.2), Best
7 Available Retrofit Technology (BART) (Project 7.5), Arsenic Groundwater
8 Standard (Project 8), Sea Turtle Coastal Street Lighting Program (Project 9),
9 Underground Storage Tanks (Project 10), Modular Cooling Towers (Project 11),
10 Thermal Discharge Permanent Cooling Tower (Project 11.1), Greenhouse Gas
11 Inventory and Reporting (Project 12), Mercury Total Daily Maximum Loads
12 Monitoring (Project 13), Hazardous Air Pollutants Information Collection
13 Request (ICR) Program (Project 14), Effluent Limitation Guidelines ICR
14 Program (Project 15), National Pollutant Discharge Elimination System
15 (NPDES) (Project 16) and Mercury and Air Toxics Standards (MATS) – Crystal
16 River (CR) 4&5 (Project 17) for the period January 2015 through December
17 2015.

18
19 **Q: Please explain the variance between actual/estimated project expenditures**
20 **and original projections for Substation Environmental Investigation,**
21 **Remediation and Pollution Prevention Program (Projects 1 & 1a) for the**
22 **period January 2015 through December 2015.**

23 A: O&M expenditures for substation system program are estimated to be \$405k
24 lower than originally projected. This variance is in part due to remediation work

1 delays at the Consolidated Rock, Holder and Kenneth City substations.
2 Consolidated Rock remediation is delayed due to restricted access by the
3 property owner. Work will begin once this issue is resolved. Holder
4 remediation is postponed until 2016 when breaker replacement work can be
5 completed. Kenneth City remediation is rescheduled to 2016 when the existing
6 control house is demolished and rebuilt.

7

8 **Q: Please explain the variance between actual/estimated project expenditures**
9 **and original projections for Distribution System Environmental**
10 **Investigation, Remediation and Pollution Prevention Program (Project 2)**
11 **for the period January 2015 through December 2015.**

12 A: O&M expenditures for the distribution system program are estimated to be \$42k
13 or 265% higher than originally projected due to costs to remove additional
14 impacted soil at the three remaining sites. Original projections were based on
15 performing groundwater monitoring at two of these sites; however, groundwater
16 concentrations at these sites increased or did not improve over the past year.
17 Consequently, DEF stopped groundwater monitoring and developed plans to
18 remove additional impacted soil underneath building foundations and storm
19 water infrastructure.

20

21 **Q: Please explain the variance between actual/estimated project expenditures**
22 **and original projections for Cooling Water Intake – 316(b) (Project 6 & 6a)**
23 **for the period January 2015 through December 2015.**

24

1 A: O&M expenditures for Cooling Water Intake – 316(b) are expected to be \$43k
2 or 14% lower than originally projected as methods used to allocate costs to
3 analyze 316(b) compliance strategies at each affected Duke Energy generating
4 site were adjusted to reflect present configurations and operations. Duke Energy
5 intends to implement a consistent 316(b) approach across its entire fleet of
6 regulated units which focuses on full compliance with applicable 316(b)
7 requirements through the development of facility specific strategic plans. These
8 plans will include all applicable submittal requirements; targeted entrainment
9 and impingement compliance options; compliance schedules; identification of
10 decision and agency milestones; risk assessments; and implementation plans
11 with key activities and timelines.

12
13 **Q: Please explain the variance between actual/estimated project expenditures**
14 **and original projections for Arsenic Groundwater Standard (Project 8) for**
15 **the period January 2015 through December 2015.**

16 A: O&M expenditures for Arsenic Groundwater Standard are expected to be \$23k
17 or 144% higher than originally projected due to consultant costs to evaluate the
18 source of arsenic exceedances and issue a summary report in compliance with
19 FDEP Consent Order No. 09-3463C executed on November 21, 2011. The
20 Consent Order was issued by the FDEP for exceedance of the arsenic
21 groundwater limit when the EPA lowered the arsenic maximum containment
22 level from 50 ppb to 10 ppb.

23
24

1

2 **Q: Please explain the variance between actual/estimated project expenditures**
3 **and original projections for Sea Turtle – Coastal Street Lighting Program**
4 **(Project 9) for the period January 2015 through December 2015.**

5 A: Capital expenditures for the Sea Turtle – Coastal Street Lighting Program are
6 estimated to be \$3k or 92% lower than originally projected. No new street
7 lighting has been required in Franklin County, the City of Mexico Beach in Bay
8 County, or Gulf County as DEF is in compliance with sea turtle ordinances.
9 Also, the Don Cesar lighting project is delayed from 2014 until late 4th quarter
10 2015 due to scheduling conflicts.

11

12 **Q: Please explain the variance between actual/estimated project expenditures**
13 **and original projections for NPDES (Project 16) O&M for the period**
14 **January 2015 through December 2015.**

15 A: O&M expenditures for NPDES are expected to be \$54k or 20% lower than
16 originally projected due to lower than expected 316(a) thermal study costs at the
17 Anclote and Bartow stations.

18

19 **Q: Please explain the variance between actual/estimated project expenditures**
20 **and original projections for NPDES (Project 16) capital for the period**
21 **January 2015 through December 2015.**

22 A: Capital expenditures for NPDES project are expected to be \$86k or 275% lower
23 than originally projected primarily due to a vendor reimbursement payment.

24

1 **Q: Please explain the variance between actual/estimated project expenditures**
2 **and original projections for MATS – CR4&5 (Project 17) O&M for the**
3 **period January 2015 through December 2015.**

4 A: O&M expenditures for MATS – Crystal River Units 4&5 (CR4&5) are expected
5 to be \$153k higher than originally projected. This variance is primarily driven
6 by the addition of a temporary chemical injection system to control mercury
7 emissions, and the cancellation of preliminary engineering for a fuel additive
8 system to improve mercury oxidation. This change in compliance strategy
9 resulted from a mercury characterization study performed in December 2014
10 that identified mercury re-emission as the root cause of elevated emissions in
11 2014.

12
13 **Q: Please explain the variance between actual/estimated project expenditures**
14 **and original projections for MATS – CR4&5 (Project 17) capital for the**
15 **period January 2015 through December 2015.**

16 A: Capital expenditures for MATS – CR4&5 are expected to be \$1.3 million higher
17 than originally projected. This variance is driven by the installation of
18 continuous emission monitoring systems (CEMS) for mercury monitoring,
19 compliance demonstration and feedback to the re-emission control system. DEF
20 determined that continuous monitoring was necessary following elevated
21 emissions in the second half of 2014 and a characterization study completed in
22 December 2014.

23
24

1 **Q: Please provide an update of Best Available Retrofit Technology (BART)**
2 **regulations.**

3 A: In 2012, DEF worked with the FDEP to develop and finalize specific BART
4 permits to address SO₂ and NO_x requirements for Crystal River Units 1&2 (CR
5 1&2). The FDEP subsequently submitted to the EPA a revised State
6 Implementation Plan (SIP) containing unit-specific BART determinations for
7 CR1&2. The SO₂ and NO_x BART permits for these units require installation of
8 dry flue gas desulfurization (FGD) and selective catalytic reduction by
9 December 31, 2017, or alternatively, the discontinuation of the use of coal in
10 these units by December 31, 2020. On April 30, 2013, DEF provided notice to
11 the FDEP that it had decided to cease burning coal in CR1&2 by December 31,
12 2020. The EPA formally approved FDEP's revised SIP in August 2013.

13

14 With regard to particulate matter (PM) and opacity emissions, the revised BART
15 requirements for these parameters contained in the previously issued air
16 construction permit (Air Permit No. 0170004-017-AC) became effective on
17 January 1, 2014. The provisions of the air construction permit were
18 incorporated into a revised Title V Operating Permit (Permit No. 0170004-043-
19 AV) effective on June 22, 2014. The revised Title V permit also contains an
20 updated / revised version of the Compliance Assurance Monitoring Plan,
21 incorporating provisions required by the terms of the PM BART air construction
22 permit.

23

24

1 The actions / decisions noted above are expected to fulfill DEF's obligations
2 under the BART regulations for the remaining life of CR1&2.

3

4 **Q: Please provide an update of 316(b) regulations.**

5 A: The 316(b) rule became effective October 15, 2014 to minimize impingement
6 and entrainment of fish and aquatic life drawn into cooling systems at power
7 plants and factories. There are seven impingement options. Entrainment
8 compliance is site specific (mesh screen or closed-cycle cooling). Litigation of
9 the 316(b) rule is in process.

10

11 The regulation primarily applies to facilities that commenced construction on or
12 before January 17, 2002, and to new units at existing facilities that are built to
13 increase the generating capacity of the facility. All facilities that withdraw
14 greater than 2 million gallons per day from waters of the U.S. and where 25% of
15 the withdrawn water is used for cooling purposes are subject to the regulation.

16

17 Per the final rule, required 316(b) studies and information submittals will be tied
18 to NPDES permit renewals. For permits that expire within 45 months of the
19 effective date of the final rule, certain information must be submitted with the
20 renewal application. Other information, including field study results, will be
21 required to be submitted pursuant to a schedule included in the re-issued NPDES
22 permit.

23

24

1 For NPDES permits that expire more than 45 months from the effective date of
2 the rule, all information, including study results, is required to be submitted as
3 part of the renewal application.

4

5 DEF is currently evaluating the 316(b) rule to determine potential study
6 requirements, operating and cost impacts to its generating stations.

7

8 **Q: Please provide an update on Carbon Regulations recently proposed by the**
9 **EPA.**

10 A: Existing Units – The EPA plans to regulate CO₂ emissions from existing fossil
11 fuel-fired units under the President’s Climate Action Plan announced in June
12 2013. The EPA published proposed guidelines on June 18, 2014. The comment
13 period ended December 1, 2014. The EPA is targeting mid-summer 2015 for a
14 final rule.

15

16 Murray Energy and other parties challenged the EPA’s authority to implement
17 the proposed Clean Power Plan under the Clean Air Act. On June 9, 2015, the
18 D.C. Circuit Court of Appeals dismissed the challenge on the grounds that the
19 rule is not yet final. As a result, the EPA can proceed to finalize the rule, which
20 is expected in August. The rule is currently under review by the Office of
21 Management and Budget.

22

23

24

1 New Units – The EPA proposal establishes stringent CO₂ limits on new coal-
2 fired units effectively eliminating them. The EPA expects to issue a final rule
3 this summer.

4

5 DEF does not expect to incur ECRC costs in 2015 related to Carbon
6 Regulations.

7

8 **Q: Please provide an update on the Cross State Air Pollution Rule (CSAPR).**

9 A: On October 23, 2014, the D.C. Circuit Court lifted the stay of the CSAPR which
10 establishes state-level annual and seasonal SO₂ and NO_x emission allowance
11 requirements. The CSAPR replaced the Clean Air Interstate Rule (CAIR) on
12 January 1, 2015. Under the CSAPR, the State of Florida is no longer required to
13 comply with annual emission requirements, only ozone seasonal limits. The
14 CSAPR requirements took effect in Florida on May 1, 2015, the beginning of
15 the ozone season.

16

17 As explained in my April 1, 2015 direct testimony, NO_x emission allowances
18 under CAIR have no value; however, DEF will continue to use its SO₂ emission
19 allowances to comply with the Acid Rain Program. As explained in Mr. Geoff
20 Foster's April 1, 2015 direct testimony, DEF is treating its unused NO_x costs as
21 a regulatory asset amortizing it over three years beginning January 1, 2015
22 through December 31, 2017, with a return on the unamortized investment,
23 consistent with Order no. PSC-11-0553-FOF-EI.

24

1 **Q: Please provide an update on the Coal Combustion Residual (CCR) Rule.**

2 A: As explained further in the direct testimony of Mr. Garry Miller, the CCR rule
3 was published in the Federal Register on April 17, 2015 and is effective on
4 October 17, 2015. The rule has specific compliance impacts on the ash landfill,
5 gypsum storage pad and FGD lined blowdown ponds at the Crystal River site.
6 Although the full range of compliance activities and costs are still being
7 evaluated, DEF's planned 2015 compliance activities and their associated cost
8 projections are provided by Mr. Miller.

9

10 **Q: Please provide an update on the Mercury and Air Toxics Standards**
11 **(MATS) Rule.**

12 A: On June 29, 2015, the U. S. Supreme Court ruled that it was unreasonable for
13 EPA to refuse to consider costs in determining that regulation of electric
14 generating units was "appropriate and necessary" under Clean Air Act section
15 112. The Court remanded the case back to the D.C. Circuit Court of Appeals for
16 further proceedings consistent with its opinion. The MATS rule will remain in
17 effect pending additional action by the D.C. Circuit; therefore, a decision is not
18 expected to impact the implementation of DEF's MATS compliance plan until
19 further proceedings are completed.

20

21 **Q: Please provide an update on the National Ambient Air Quality Standards**
22 **(NAAQS).**

23 A: The EPA set new 1-hour health-based NO₂ and SO₂ standards in 2010. In mid-
24 2013, the EPA finalized SO₂ non-attainment designations for two small areas in

1 Florida outside DEF's service territory. The EPA deferred making any other
2 designations until late 2017. On April 24, 2014, the EPA released a proposed
3 rule that will establish requirements for additional ambient air quality
4 monitoring and/or modeling that will be used for future area designations.

5
6 The EPA was to have completed a review of the ozone NAAQS in 2013. On
7 April 29, 2014, the District Court of the Northern District of California ruled in
8 favor of a schedule proposed by the Sierra Club requiring the EPA to issue a
9 proposed rule no later than December 1, 2014, and a final rule no later than
10 October 1, 2015. The EPA has proposed to revise the current standard of 75
11 parts per billion (ppb) to within a range of 65 to 70 ppb.

12
13 **Q: Please provide an update on the Steam Effluent Limitation Guidelines**
14 **(ELG).**

15 A: On April 8, 2014, the EPA acknowledged the need to closely coordinate this
16 rule, which regulates waste streams from power plants, with the CCR rule,
17 which regulates landfills and ash basins. The deadline for the EPA to issue the
18 final Steam Effluent Limitations Guidelines was extended to September 30,
19 2015.

20
21 **Q: Please provide an update on the Waters of the United States (WOTUS)**
22 **Rule.**

23 A: On May 27, 2015, the EPA issued a final rule that defines the scope of waters
24 protected under the Clean Water Act (CWA). The rule was published in the

1 Federal Register on June 29, 2015. Among other things, the WOTUS Rule
2 clarifies the characteristics of water streams, wetlands and other waters to which
3 the CWA applies. DEF is in the process of analyzing the new rule requirements
4 and potential impacts and compliance options at its operational sites, and
5 expects to incur compliance costs in 2015. However, the full extent of
6 compliance activities and associated costs cannot be determined as DEF has not
7 had sufficient opportunity to determine the rule's impacts on affected facilities
8 and compliance alternatives. DEF will provide an update on its WOTUS
9 program in the 2016 Projection Filing, and DEF will include any compliance
10 costs incurred in 2015 in the 2015 Final True-Up balance.

11

12 **Q. Does this conclude your testimony?**

13 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

PATRICIA Q. WEST

ON BEHALF OF

DUKE ENERGY FLORIDA, LLC.

DOCKET NO. 150007-EI

August 31, 2015

Q. Please state your name and business address.

A. My name is Patricia Q. West. My business address is 299 1st Avenue North, St. Petersburg, FL 33701.

Q. Have you previously filed testimony before this Commission in Docket No. 150007-EI?

A: Yes. I provided direct testimony on April 1, 2015 and July 31, 2015.

Q: Has your job description, education, background or professional experience changed since that time?

A: No.

Q. What is the purpose of your testimony?

A. The purpose of my testimony is to provide estimates of the costs that will be incurred in 2016 for Duke Energy Florida LLC's ("DEF" or "Company") Substation Environmental Investigation, Remediation and Pollution Prevention

1 Program (Project 1 & 1a), Distribution Environmental Investigation,
 2 Remediation and Pollution Prevention Program (Project 2), Pipeline Integrity
 3 Management (“PIM”) Program (Project 3), Above Ground Storage Tanks
 4 (“AST”) Program (Project 4), Phase II Cooling Water Intake 316(b) Program
 5 (Project 6), CAIR/CAMR Continuous Mercury Monitoring System (“CMMS”)
 6 Program (Projects 7.2 & 7.3), Best Available Retrofit Technology (“BART”)
 7 Program (Project 7.5), Arsenic Groundwater Standard Program (Project 8), Sea
 8 Turtle – Coastal Street Lighting Program (Project 9), Underground Storage
 9 Tanks (“UST”) Program (Project 10), Modular Cooling Towers (Project 11),
 10 Thermal Discharge Permanent Compliance (Project 11.1), Greenhouse Gas
 11 Inventory and Reporting (Project 12), Mercury Total Maximum Loads
 12 Monitoring (“TMDL”) (Project 13), Hazardous Air Pollutants (“HAPs”)
 13 Information Collection Request (“ICR”) (Project 14), Effluent Limitation
 14 Guidelines ICR (Project 15), National Pollutant Discharge Elimination System
 15 (“NPDES”) Program (Project 16), and Mercury & Air Toxics Standards
 16 (“MATS”) Program – Crystal River Units 4 & 5 (“CR4&5”) (Project 17).

17
 18 **Q. Have you prepared or caused to be prepared under your direction,**
 19 **supervision or control any exhibits in this proceeding?**

20 **A.** Yes. I am co-sponsoring the following portions of Exhibit No. __ (TGF-5) to
 21 Thomas G. Foster’s direct testimony:

- 22 • 42-5P page 1 of 22 – Substation Environmental Investigation,
- 23 Remediation and Pollution Prevention Program

24

- 1 • 42-5P page 2 of 22 - Distribution System Environmental Investigation,
- 2 Remediation and Pollution Prevention Program
- 3 • 42-5P page 3 of 22 – PIM
- 4 • 42-5P page 4 of 22 - AST
- 5 • 42-5P page 6 of 22 - Phase II Cooling Water Intake
- 6 • 42-5P page 7 of 22 – Clean Air Interstate Rule (“CAIR”)
- 7 • 42-5P page 8 of 22 – BART
- 8 • 42-5P page 9 of 22 - Arsenic Groundwater Standard
- 9 • 42-5P page 10 of 22 – Sea Turtle – Coastal Street Lighting Program
- 10 • 42-5P page 11 of 22 - UST
- 11 • 42-5P page 12 of 22 - Modular Cooling Towers
- 12 • 42-5P page 13 of 22 - Thermal Discharge Permanent Cooling Tower
- 13 • 42-5P page 14 of 22 - Greenhouse Gas Inventory and Reporting
- 14 • 42-5P page 15 of 22 - Mercury TMDL
- 15 • 42-5P page 16 of 22 - HAPs ICR
- 16 • 42-5P page 17 of 22 - Effluent Limitation Guidelines ICR Program
- 17 • 42-5P page 18 of 22 - NPDES
- 18 • 42-5P page 19 of 22 - MATS – CR4&5

19

20 **Q. What costs does DEF expect to incur in 2016 for the Substation**
21 **Environmental Investigation, Remediation and Pollution Prevention**
22 **Program (Project 1 & 1a)?**

1 A. DEF estimates \$1.1 million of O&M costs at 19 sites for the Substation
2 Environmental Investigation, Remediation and Pollution Prevention Program.
3 These costs also include institutional controls and report writing activities for
4 various substations.

5

6 **Q. What costs does DEF expect to incur in 2016 for the Distribution System
7 Environmental Investigation, Remediation and Pollution Prevention
8 Program (Project 2)?**

9 A. DEF estimates \$3k of O&M costs to complete remediation of one remaining site
10 for the Distribution System Investigation, Remediation, and Pollution
11 Prevention Program (Project 2).

12

13 **Q. What costs does DEF expect to incur in 2016 for the PIM Program (Project
14 3)?**

15 A. DEF estimates \$696k of O&M costs for the Pipeline Integrity Management
16 Program to comply with PIM regulations (49 CFR Part 195). These costs
17 include general program management and oversight of the performance of
18 program activities.

19

20 **Q. What costs does DEF expect to incur in 2016 for the AST Program (Project
21 4)?**

22 A. DEF does not expect any costs. The Florida Department of Environmental
23 Protection (“FDEP”) is expected to issue amendments to its AST rule. DEF
24 continues to engage with the FDEP in the rulemaking process, but it is unclear

1 what potential impacts the proposed rule amendments will have on DEF's
2 operational sites, and to what extent compliance options will be available and
3 ultimately pursued. The FDEP expects to conduct a public workshop later this
4 year, and final AST rule revisions could be adopted by the Summer of 2016.
5 DEF cannot estimate its compliance costs until the AST revisions are final.
6 DEF will provide the Commission with its estimated compliance costs in its next
7 available filing once the rule is final.

8

9 **Q. What costs does DEF expect to incur in 2016 for the Phase II Cooling**
10 **Water Intake Program (Project 6)?**

11 A. DEF estimates \$440k of O&M costs for the Phase II Cooling Water Intake
12 Program to evaluate compliance with the 316(b) rule.

13

14 **Q. What costs does DEF expect to incur in 2016 for the CAIR/CAMR Program**
15 **(Project 7.2)?**

16 A. DEF estimates \$134k of O&M costs for the CAIR/CAMR Program for data
17 acquisition system maintenance of combustion turbine units and 40 CFR 75,
18 Appendix E, Section 2.2 air emissions compliance testing. This regulation
19 requires the Company to perform air emissions testing to reset correlation curves
20 every 20 quarters and must be performed on all of its Predictive Emissions
21 Monitoring Systems.

22

23 **Q: What costs does DEF expect to incur in 2016 for the BART Program**
24 **(Project 7.5)?**

1 A: DEF does not expect any costs.

2

3 **Q. What costs does DEF expect to incur in 2016 for the Arsenic Groundwater**
4 **Standard Program (Project 8)?**

5 A. At present, DEF does not expect to incur any costs; however the regulatory path
6 for the satisfactory conclusion of the Arsenic Groundwater Standard Program is
7 still being negotiated with the FDEP. Any final agreements may include future
8 additional work or components that are unknown at this time but may result in
9 compliance costs in 2016.

10

11 **Q. What costs does DEF expect to incur in 2016 for the Sea Turtle – Coastal**
12 **Street Lighting Program (Project 9)?**

13 A. DEF estimates \$450 and \$750 in O&M and capital costs, respectively, for the
14 Sea Turtle – Coastal Street Lighting Program to ensure compliance with sea
15 turtle ordinances in Franklin, Gulf and Pinellas Counties, and the City of Mexico
16 Beach.

17

18 **Q. What costs does DEF expect to incur in 2016 for the Underground Storage**
19 **Tanks Program (Project 10)?**

20 A. DEF does not expect any costs. However, the FDEP continues to evaluate the
21 EPA's federal UST revisions to ensure consistency with state and federal rules.
22 It is unclear how long the FDEP will have its amended UST rule on hold. DEF
23 cannot estimate its compliance costs until the UST revisions are final. DEF will

1 provide the Commission with its estimated compliance costs in its next available
2 filing once the rule is final.

3

4 **Q. What costs does DEF expect to incur in 2016 for the Modular Cooling
5 Tower (Project 11)?**

6 A. DEF does not expect any costs.

7

8 **Q. What costs does DEF expect to incur in 2016 for the Thermal Discharge
9 Permanent Cooling Tower (Project 11.1)?**

10 A. DEF does not expect any costs.

11

12 **Q. What costs does DEF expect to incur in 2016 for the Greenhouse Gas
13 Inventory and Reporting Program (Project 12)?**

14 A. DEF does not expect any costs.

15

16 **Q. What costs does DEF expect to incur in 2016 for the Mercury TMDL
17 Program (Project 13)?**

18 A. DEF does not expect any costs.

19

20 **Q. What costs does DEF expect to incur in 2016 in for the HAPs ICR Program
21 (Project No. 14)?**

22 A. DEF does not expect any costs.

23

24

1 **Q. What costs does DEF expect to incur in 2016 for the Effluent Limitation**
2 **Guidelines ICR Program (Project No. 15)?**

3 A. DEF does not expect any costs.
4

5 **Q. What costs does DEF expect to incur in 2016 for the NPDES Program**
6 **(Project No. 16)?**

7 A. DEF estimates \$60k of O&M costs for whole effluent toxicity (“WET”) testing
8 at DEF stations with NPDES permits..
9

10 **Q. What O&M costs does DEF expect to incur in 2016 for the MATS Program**
11 **– CR4&5 (Project No. 17)?**

12 A. DEF estimates O&M costs of approximately \$529k for CR4&5 MATS
13 compliance. This estimate includes contractor costs for maintenance and quality
14 assurance of Appendix K sorbent trap monitoring systems, particulate matter
15 (“PM”) continuous emissions monitoring systems (“CEMS”), and mercury
16 CEMS, as well as chemical costs for the mercury re-emission control systems.
17

18 **Q. What capital costs does DEF expect to incur in 2016 for the MATS**
19 **Program – CR4&5 (Project No. 17)?**

20 A. DEF does not expect any expenditures in 2016.
21
22
23
24

1 **Q. Is DEF requesting recovery of costs for any new environmental programs?**

2 A. Yes. DEF seeks approval of its Coal Combustion Residual Program as
3 discussed in my July 31, 2015 direct testimony, and direct testimonies of Geoff
4 Foster and Garry Miller in this Docket.

5
6 **Q. Please provide an update on the EPA's carbon dioxide regulations.**

7 A: Existing Units – The EPA issued its final “Clean Power Plan” emission
8 guidelines on August 3, 2015. The final rule contains significant changes from
9 the proposed version, including a less-stringent emissions goal for Florida and a
10 change in the start of the interim compliance period to 2022. In addition, the
11 EPA issued a proposed federal implementation plan (FIP) for the Clean Power
12 Plan, which EPA would impose on states that do not submit sufficient state
13 plans. Initial state plans are due September 6, 2016, and states may request a 2-
14 year extension to September 2018.

15
16 Murray Energy and other parties challenged the EPA's authority to implement
17 the proposed Clean Power Plan under the Clean Air Act. On June 9, 2015, the
18 D.C. Circuit Court of Appeals dismissed the challenge on the grounds that the
19 rule was not yet final. The challenge is likely to be re-filed after the final Clean
20 Power Plan is published in the *Federal Register*.

21
22 New Units – The final New Source Performance Standards (NSPS) for new,
23 modified and reconstructed units were issued August 3, 2015. They contain a
24 less-restrictive emission limit for coal-fired boilers, increasing to 1,400 lbs.

1 CO₂/MWh from the proposed level of 1,100 lbs. CO₂/MWh. The EPA assumed
2 a lower level of carbon capture and storage (CCS) for the revised limit. In
3 addition, the EPA asserts that the limit can be achieved without CCS by co-
4 firing with natural gas. The final limit of 1,000 lbs. CO₂/MWh for natural gas-
5 fired combustion turbines did not change from the proposal.

6

7 **Q. Does this conclude your testimony?**

8 A. Yes.

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

DIRECT TESTIMONY OF

COREY ZEIGLER

ON BEHALF OF

DUKE ENERGY FLORIDA

DOCKET NO. 150007-EI

April 1, 2015

Q. Please state your name and business address.

A. My name is Corey Zeigler. My business address is 299 First Avenue North, St. Petersburg, Florida 33701.

Q. By whom are you employed and in what capacity?

A. I am employed by Duke Energy Florida (DEF or the Company) as Manager Environmental Health and Safety for Transmission and Distribution.

Q. What are your responsibilities in that position?

A. Currently, my responsibilities include providing oversight and subject matter expert resources to the Transmission and Distribution Business Units for managing Environmental Health and Safety (EH&S) compliance.

1 **Q. Please describe your educational background and professional experience.**

2 A. I received a Bachelor of Science degree in General Business Administration and
3 Management from the University of South Florida. Prior to my current EH&S
4 Manager role, I was the Environmental Permitting and Compliance Manager for
5 Energy Delivery. I have 24 years of experience in the utility industry holding
6 various operational, supervisor, and managerial roles at DEF.

7

8 **Q. Have you previously filed testimony before this Commission in connection
9 with DEF's Environmental Cost Recovery Clause (ECRC)?**

10 A. Yes.

11

12 **Q. What is the purpose of your testimony?**

13 A. The purpose of my testimony is to explain material variances between actual and
14 actual/estimated project expenditures for environmental compliance costs
15 associated with DEF's Substation Environmental Investigation, Remediation,
16 and Pollution Prevention Program (Project 1 & 1a) for the period January 2014 -
17 December 2014.

18

19 **Q. How did actual O&M expenditures for January 2014 - December 2014
20 compare with DEF's actual/estimated projections for the Substation System
21 Program (Project 1 & 1a)?**

22

1 A. The Substation System Program variance is \$897,068 or 31% lower than
2 projected. This variance is primarily due to delays at Consolidated Rock,
3 Holder, and Windermere transmission substations, and lower than estimated
4 costs for remediation work at Central Florida. Consolidated Rock remediation is
5 delayed due to restricted access by the property owner. Work will begin once
6 this issue is resolved. Holder remediation is deferred to 2016 until breaker
7 replacement work scheduled for October 2015 is complete. At Windermere,
8 some regrading was anticipated in 2014, however, ongoing construction at that
9 substation continues. This construction work is scheduled for completion at the
10 end of March 2015 at which time remediation can resume.

11

12 **Q. Does this conclude your testimony?**

13 A. Yes.

14

15

16

17

18

19

20

21

22

23

1 **BEFORE THE PUBLIC SERVICE COMMISSION**2 **PREPARED DIRECT TESTIMONY**3 **OF**4 **PENELOPE A. RUSK**

5
6 **Q.** Please state your name, address, occupation and employer.

7
8 **A.** My name is Penelope A. Rusk. My business address is 702
9 North Franklin Street, Tampa, Florida 33602. I am
10 employed by Tampa Electric Company ("Tampa Electric" or
11 "company") in the position of Manager, Rates in the
12 Regulatory Affairs Department.

13
14 **Q.** Please provide a brief outline of your educational
15 background and business experience.

16
17 **A.** I received a Bachelor of Arts degree in Economics from
18 the University of New Orleans in 1995, and I received a
19 Master of Arts degree in Economics from the University of
20 South Florida in Tampa in 1997. I joined Tampa Electric
21 in 1997, as an Economist in the Load Forecasting
22 Department. In 2000, I joined the Regulatory Affairs
23 Department, where I have assumed positions of increasing
24 responsibility in the areas of fuel and capacity cost
25 recovery. I have accumulated 18 years of electric utility

1 experience working in the areas of load forecasting, cost
 2 recovery clauses, as well as project management and rate
 3 setting activities for wholesale and retail rate cases.
 4 My duties include managing cost recovery for fuel and
 5 purchased power, interchange sales, capacity payments,
 6 and FPSC-approved environmental projects.

7

8 **Q.** What is the purpose of your testimony in this proceeding?

9

10 **A.** The purpose of my testimony is to present, for Commission
 11 review and approval, the actual true-up amount for the
 12 Environmental Cost Recovery Clause ("Environmental
 13 Clause") and the calculations associated with the
 14 environmental compliance activities for the January 2014
 15 through December 2014 period.

16

17 **Q.** Did you prepare any exhibits in support of your
 18 testimony?

19

20 **A.** Yes. Exhibit No. _____ (PAR-1) consists of nine documents
 21 prepared under my direction and supervision.

22 ▪ Form 42-1A, Document No. 1, provides the final true-
 23 up for the January 2014 through December 2014
 24 period;

25 ▪ Form 42-2A, Document No. 2, provides the detailed

- 1 calculation of the actual true-up for the period;
- 2 ▪ Form 42-3A, Document No. 3, shows the interest
- 3 provision calculation for the period;
- 4 ▪ Form 42-4A, Document No. 4, provides the variances
- 5 between actual and actual/estimated costs for O&M
- 6 activities;
- 7 ▪ Form 42-5A, Document No. 5, provides a summary of
- 8 actual monthly O&M activity costs for the period;
- 9 ▪ Form 42-6A, Document No. 6, provides the variances
- 10 between actual and actual/estimated costs for
- 11 capital investment projects;
- 12 ▪ Form 42-7A, Document No. 7, presents a summary of
- 13 actual monthly costs for capital investment projects
- 14 for the period;
- 15 ▪ Form 42-8A, Document No. 8, pages 1 through 25,
- 16 illustrates the calculation of depreciation expenses
- 17 and return on capital investment for each project
- 18 recovered through the Environmental Clause.
- 19 ▪ Form 42-9A, Document No. 9, details Tampa Electric's
- 20 revenue requirement rate of return for capital
- 21 projects recovered through the Environmental Clause.
- 22
- 23 **Q.** What is the source of the data presented in your
- 24 testimony and exhibits?
- 25

1 **A.** Unless otherwise indicated, the actual data is taken from
2 the books and records of Tampa Electric. The books and
3 records are kept in the regular course of business in
4 accordance with generally accepted accounting principles
5 and practices, and provisions of the Uniform System of
6 Accounts as prescribed by this Commission.

7
8 **Q.** What is the final true-up amount for the Environmental
9 Clause for the period January 2014 through December 2014?

10
11 **A.** The final true-up amount for the Environmental Clause for
12 the period January 2014 through December 2014 is an
13 under-recovery of \$3,915,636. The actual environmental
14 cost over-recovery, including interest, is \$3,020,040 for
15 the period January 2014 through December 2014, as
16 identified in Form 42-1A. This amount, less the
17 \$6,935,676 over-recovery approved in Commission Order No.
18 PSC-14-0643-FOF-EI, issued November 4, 2014, in Docket
19 No. 140007-EI, results in a final under-recovery of
20 \$3,915,636, as shown on Form 42-1A. This under-recovery
21 amount will be applied in the calculation of the
22 environmental cost recovery factors for the period
23 January 2016 through December 2016.

24
25 **Q.** Are all costs listed in Forms 42-4A through 42-8A

1 incurred for environmental compliance projects approved
2 by the Commission?

3
4 **A.** All costs listed in Forms 42-4A through 42-8A for which
5 Tampa Electric is seeking recovery are incurred for
6 environmental compliance projects approved by the
7 Commission.

8
9 **Q.** Did Tampa Electric include costs in its 2014 final
10 Environmental Clause true-up filing for any environmental
11 projects that were not anticipated and included in its
12 2014 factors?

13
14 **A.** No.

15
16 **Q.** How do actual expenditures for the January 2014 through
17 December 2014 period compare with Tampa Electric's
18 actual/estimated projections as presented in previous
19 testimony and exhibits?

20
21 **A.** As shown on Form 42-4A, total costs for O&M activities
22 are \$1,236,605, or 4.5 percent greater than the
23 actual/estimated projection costs. Form 42-6A shows the
24 total capital investment costs are \$294,929, or 0.5
25 percent less than the actual/estimated projection costs.

1 Additional information regarding variances that exceed
2 \$50,000 is provided below.

3
4 **O&M Project Variances**

- 5 ▪ **Big Bend Unit 3 Flue Gas Desulfurization Integration:** The
6 Big Bend Unit 3 Flue Gas Desulfurization Integration
7 project variance is \$500,835, or 9.8 percent greater than
8 projected, primarily driven by increases in the price for
9 consumables.
- 10 ▪ **Big Bend Unit 1 SCR:** The Big Bend Unit 1 SCR project
11 variance is \$330,062, or 12.5 percent greater than
12 projected. This variance is due to an increase in ammonia
13 flow to decrease ammonium bisulfate build-up in the
14 stackers.
- 15 ▪ **Big Bend Unit 2 SCR:** The Big Bend Unit 2 SCR project
16 variance is \$372,047, or 14.3 percent greater than
17 projected. The variance is due to an increase in ammonia
18 flow to decrease ammonium bisulfate build-up in the
19 stackers.
- 20 ▪ **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project
21 variance is \$131,157, or 15.4 percent greater than
22 projected. This variance is due to an increase in ammonia
23 flow to decrease ammonium bisulfate build-up in the
24 stackers.

25

- 1 ▪ **Mercury Air Toxics Standards:** The Mercury Air Toxics
2 Standards ("MATS") project variance is \$61,294, or 53.3
3 percent less than originally projected. The projected
4 costs included equipment that was to be purchased in
5 2014; however, the purchase was delayed until 2015.
6 Additionally, the projected costs include contractor
7 labor expenses; however, the company was able to utilize
8 internal labor rather than contractor labor. Internal
9 labor costs are not recovered through the Environmental
10 Clause.
- 11 ▪ **Big Bend Gypsum Storage Facility:** The Big Bend Gypsum
12 Storage Facility project variance is \$273,358, or 34.4
13 percent less than projected. The facility in-service date
14 was projected to be October 2014 but actually occurred in
15 November 2014. Accordingly, cost recovery of O&M expenses
16 was less than projected for 2014.

17

18 Capital Project Variances

- 19 ▪ **Big Bend Gypsum Storage Facility:** The Big Bend Gypsum
20 Storage Facility project variance is \$271,867, or 48.6
21 percent less than projected. The facility in-service date
22 was projected to be October 2014 but actually occurred in
23 November 2014. Therefore, cost recovery of the project
24 return on investment and depreciation were delayed,
25 resulting in lower costs than projected for 2014.

1 Q. Does this conclude your testimony?

2

3 A. Yes, it does.

5 capacity payments, and FPSC-approved environmental
6 projects.

7
8 **Q.** What is the purpose of your testimony in this proceeding?

9
10 **A.** The purpose of my testimony is to present, for Commission
11 review and approval, the calculation of the January 2015
12 through December 2015 actual/estimated true-up amount to
13 be refunded or recovered through the Environmental Cost
14 Recovery Clause ("ECRC") during the period January 2016
15 through December 2016. My testimony addresses the
16 recovery of capital and operations and maintenance
17 ("O&M") costs associated with environmental compliance
18 activities for 2015, based on six months of actual data
19 and six months of estimated data. This information will
20 be used in the determination of the environmental cost
21 recovery factors for January 2016 through December 2016.

22
23 **Q.** Have you prepared an exhibit that shows the recoverable
24 environmental costs for the actual/estimated period
25 January 2015 through December 2015?

1 **A.** Yes. Exhibit No. _____ (PAR-2), containing nine
2 documents, was prepared under my direction and
3 supervision. It includes Forms 42-1E through 42-9E, which
4 show the current period actual/estimated true-up amount
5 to be used in calculating the cost recovery factors for
6 January 2016 through December 2016.

7

8 **Q.** What has Tampa Electric calculated as the
9 actual/estimated true-up for the current period to be
10 applied to the January 2016 through December 2016 ECRC
11 factors?

12

13 **A.** The actual/estimated true-up applicable for the current
14 period, January 2015 through December 2015, is an over-
15 recovery of \$4,535,273. A detailed calculation supporting
16 the calculation of the actual/estimated true-up is shown
17 on Forms 42-1E through 42-9E of my exhibit.

18

19 **Q.** Is Tampa Electric including costs in the actual/estimated
20 true-up filing for any new environmental projects that
21 were not anticipated and included in its 2015 ECRC
22 factors?

23

24 **A.** No, Tampa Electric is not including costs for any new
25 environmental projects that were not anticipated or

1 included in its 2015 ECRC factors.

2

3 **Q.** What depreciation rates were utilized for the capital
4 projects contained in the 2015 actual/estimated true-up?

5

6 **A.** Tampa Electric utilized the depreciation rates approved
7 in Order No. PSC-12-0175-PAA-EI, issued on April 3, 2012,
8 in Docket No. 110131-EI.

9

10 **Q.** What capital structure, components and cost rates did
11 Tampa Electric rely on to calculate the revenue
12 requirement rate of return for January 2015 through
13 December 2015?

14

15 **A.** Tampa Electric relied upon the capital structure,
16 components and cost rates approved by the Commission in
17 Order No. PSC-12-0425-PAA-EU, issued on August 16, 2012
18 in Docket No. 120007-EI, to calculate the revenue
19 requirement rate of return found on Form 42-9E.

20

21 **Q.** How did the actual/estimated project expenditures for the
22 January 2015 through December 2015 period compare with
23 the company's original projections?

24

25 **A.** As shown on Form 42-4E, total O&M costs are expected to

1 be \$3,304,559 less than the amount that was originally
2 projected. The total capital expenditures itemized on
3 Form 42-6E, are expected to be \$627,932 less than
4 originally projected. The material variances for O&M and
5 capital investment projects are explained below.

6
7 **O&M Project Variances**

- 8 • **Big Bend Unit 3 Flue Gas Desulfurization Integration:** The
9 Big Bend Unit 3 Flue Gas Desulfurization project variance
10 is estimated to be \$638,508 or 10.2 percent less than
11 projected. This variance is due to a forced outage on Big
12 Bend Unit 3 that resulted in a decrease in chemical
13 consumption.
- 14
15 • **SO₂ Emission Allowances:** The SO₂ Emission Allowances
16 project variance is estimated to be \$10,930 or 41.8
17 percent less than projected. The variance is due to less
18 cogeneration purchases than projected and the application
19 of a lower SO₂ emission allowance rate than originally
20 projected.
- 21
22 • **Big Bend Units 1 & 2 FGD:** The Big Bend Units 1 & 2 FGD
23 project variance is estimated to be \$1,399,241 or 13.7
24 percent less than projected. This variance is due to a
25 forced outage on Big Bend Unit 2, which resulted in a

1 decrease in chemical consumption.

- 2
- 3 • **Big Bend PM Minimization and Monitoring: The Big Bend PM**
- 4 Minimization and Monitoring project variance is estimated
- 5 to be \$64,608 or 7.7 percent greater than projected. This
- 6 variance is due to an increase in price for routine
- 7 monthly Best Operating Practices ("BOP") inspections.
- 8
- 9 • **Polk NO_x Emissions Reduction:** The Polk NO_x Emissions
- 10 Reduction project variance is estimated to be \$9,679 or
- 11 48.4 percent less than originally projected. This
- 12 variance is due to an extended outage for Polk Unit 1.
- 13 Due to the extended outage, there was minimal maintenance
- 14 associated with this project.
- 15
- 16 • **Big Bend Unit 4 SOFA:** The Big Bend Unit 4 SOFA project
- 17 variance is estimated to be \$24,000 or 50 percent less
- 18 than projected. The actual/estimated maintenance cost
- 19 associated with this project is less than what was
- 20 originally projected because less maintenance work was
- 21 needed than projected.
- 22
- 23 • **Big Bend Unit 3 Pre-SCR:** The Big Bend Unit 3 Pre-SCR
- 24 project variance is estimated to be \$24,000 or 50 percent
- 25 less than projected. The actual/estimated maintenance

1 costs associated with this project is less than what was
2 originally projected because less maintenance work was
3 needed than originally projected.

- 4
- 5 • **Arsenic Groundwater Standard Program:** The Arsenic
6 Groundwater Standard Program variance is estimated to be
7 \$242,440 or 80.8 percent less than what was originally
8 projected. This variance is due to ongoing negotiations
9 with the FDEP regarding groundwater treatment at Bayside
10 Station.

- 11
- 12 • **Clean Water Act Section 316(b) Phase II Study:** The Clean
13 Water Act Section 316(b) Phase II Study variance is
14 estimated to be \$589,348 or 61.4 percent less than
15 originally projected. This variance is due to ongoing
16 negotiations regarding the use of existing 316(b) data.
17 As a result, there is a delay in the timing of work to be
18 done to meet the requirements of the May 2014 rule.

- 19
- 20 • **Big Bend Unit 1 SCR:** The Big Bend Unit 1 SCR project
21 variance is estimated to be \$182,976 or 8.5 greater than
22 originally projected. This variance is due to
23 actual/estimated consumption of ammonia being greater
24 than originally projected. Greater ammonia consumption is
25 expected because Big Bend Unit 1 is expected to operate

1 for a greater number of hours than originally projected.

- 2
- 3 • **Big Bend Unit 2 SCR:** The Big Bend Unit 2 SCR project
4 variance is estimated to be \$620,936 or 24.8 percent less
5 than originally projected due to an extended outage that
6 decreased the amount of ammonia consumed.

- 7
- 8 • **Big Bend Unit 3 SCR:** The Big Bend Unit 3 SCR project
9 variance is estimated to be \$207,081 or 10.2 percent
10 greater than originally projected. Greater ammonia
11 consumption is expected because Big Bend Unit 3 is
12 expected to operate for a greater number of hours than
13 originally projected.

- 14
- 15 • **Big Bend Unit 4 SCR:** The Big Bend Unit 4 SCR project
16 variance is estimated to be \$60,715 or 5.5 percent
17 greater than originally projected. The actual/estimated
18 consumption of ammonia is expected to be greater than
19 originally projected because Big Bend Unit 4 is expected
20 to operate for a greater number of hours than originally
21 projected.

- 22
- 23 • **Mercury Air Toxics Standards ("MATS"):** The MATS program
24 variance is expected to be \$46,608 or 20.3 percent less
25 than originally projected. This variance is due to Tampa

1 Electric utilizing internal labor resources for stack
2 testing. The original projection included costs for
3 contractor labor to complete the testing.

4
5 • **Big Bend Gypsum Storage Facility:** The Big Bend Gypsum
6 Storage Facility program variance is expected to be
7 \$211,895 or 16.5 percent less than originally projected.
8 This variance is due to extended usage of the old storage
9 facility, resulting in less utilization of this storage
10 facility than originally projected.

11
12 **Capital Investment Project Variances**

13 • **Big Bend Gypsum Storage Facility:** The Big Bend Gypsum
14 Storage Facility project variance is estimated to be
15 \$303,704 or 10.8 percent less than projected. The
16 depreciation rate used to project depreciation amounts
17 for this project, in the original projection, was
18 inaccurate. The company assigned the correct depreciation
19 rate, reducing the expected amount of cost recovery for
20 this project for the actual/estimated period.

21
22 **Q.** Does this conclude your testimony?

23
24 **A.** Yes, it does.
25

Q. Please state your name, address, occupation and employer.

A. My name is Penelope A. Rusk. My business address is 702 North Franklin Street, Tampa, Florida 33602. I am employed by Tampa Electric Company ("Tampa Electric" or "company") in the position of Manager, Rates in the Regulatory Affairs Department.

Q. Please provide a brief outline of your educational background and business experience.

A. I received a Bachelor of Arts degree in Economics from the University of New Orleans in 1995, and I received a Master of Arts degree in Economics from the University of South Florida in Tampa in 1997. I joined Tampa Electric in 1997, as an Economist in the Load Forecasting Department. In 2000, I joined the Regulatory Affairs Department, where I have assumed positions of increasing responsibility in the areas of fuel and capacity cost recovery. I have accumulated 18 years of electric

1 utility experience working in the areas of load
2 forecasting, cost recovery clauses, as well as project
3 management and rate setting activities for wholesale and
4 retail rate cases. My duties include managing cost
5 recovery for fuel and purchased power, interchange sales,
6 capacity payments, and FPSC-approved environmental
7 projects.

8
9 **Q.** What is the purpose of your testimony in this proceeding?

10
11 **A.** The purpose of my testimony is to present, for Commission
12 review and approval, the calculation of the revenue
13 requirements and the projected ECRC factors for the
14 period of January 2016 through December 2016. The
15 projected ECRC factors have been calculated based on the
16 current allocation methodology. In support of the
17 projected ECRC factors, my testimony identifies the
18 capital and operating and maintenance ("O&M") costs
19 associated with environmental compliance activities for
20 the year 2016.

21
22 **Q.** Have you prepared an exhibit that shows the determination
23 of recoverable environmental costs for the period of
24 January 2016 through December 2016?

25

1 **A.** Yes. Exhibit No. ___ (PAR-3), containing eight
2 documents, was prepared under my direction and
3 supervision. Document Nos. 1 through 8 contain Forms 42-
4 1P through 42-8P, which show the calculation and summary
5 of O&M and capital expenditures that support the
6 development of the environmental cost recovery factors
7 for 2016.

8
9 **Q.** Are you requesting Commission approval of the projected
10 environmental cost recovery factors for the company's
11 various rate schedules?

12
13 **A.** Yes. The ECRC factors, prepared under my direction and
14 supervision, are provided in Exhibit No. ___ (PAR-3),
15 Document No. 7, on Form 42-7P. These annualized factors
16 will apply for the period January through December 2016.

17
18 **Q.** What has Tampa Electric calculated as the net true-up to
19 be applied in the period January 2016 through December
20 2016?

21
22 **A.** The net true-up applicable for this period is an over-
23 recovery of \$619,637. This consists of the final true-up
24 under-recovery of \$3,915,636 for the period of January
25 2014 through December 2014 and an estimated true-up over-

1 recovery of \$4,535,273 for the current period of January
2 2015 through December 2015. The detailed calculation
3 supporting the estimated net true-up was provided on
4 Forms 42-1E through 42-9E of Exhibit No. ____ (PAR-2)
5 filed with the Commission on July 31, 2015.

6
7 **Q.** Did Tampa Electric include any new environmental
8 compliance projects for ECRC cost recovery for the period
9 from January 2016 through December 2016?

10
11 **A.** No, Tampa Electric is not including any new environmental
12 compliance projects for ECRC cost recovery during 2016.

13
14 **Q.** What are the existing capital projects included in the
15 calculation of the ECRC factors for 2016?

16
17 **A.** Tampa Electric proposes to include for ECRC recovery the
18 25 previously approved capital projects and their
19 projected costs in the calculation of the ECRC factors
20 for 2016. These projects are:

- 21
- 22 1) Big Bend Unit 3 Flue Gas Desulfurization ("FGD")
- 23 Integration
- 24 2) Big Bend Units 1 and 2 Flue Gas Conditioning
- 25 3) Big Bend Unit 4 Continuous Emissions Monitors

- 1 4) Big Bend Fuel Oil Tank 1 Upgrade
- 2 5) Big Bend Fuel Oil Tank 2 Upgrade
- 3 6) Big Bend Unit 1 Classifier Replacement
- 4 7) Big Bend Unit 2 Classifier Replacement
- 5 8) Big Bend Section 114 Mercury Testing Platform
- 6 9) Big Bend Units 1 and 2 FGD
- 7 10) Big Bend FGD Optimization and Utilization
- 8 11) Big Bend NO_x Emissions Reduction
- 9 12) Big Bend Particulate Matter ("PM") Minimization and
- 10 Monitoring
- 11 13) Polk NO_x Emissions Reduction
- 12 14) Big Bend Unit 4 SOFA
- 13 15) Big Bend Unit 1 Pre-SCR
- 14 16) Big Bend Unit 2 Pre-SCR
- 15 17) Big Bend Unit 3 Pre-SCR
- 16 18) Big Bend Unit 1 SCR
- 17 19) Big Bend Unit 2 SCR
- 18 20) Big Bend Unit 3 SCR
- 19 21) Big Bend Unit 4 SCR
- 20 22) Big Bend FGD System Reliability
- 21 23) Mercury Air Toxics Standards ("MATS")
- 22 24) SO₂ Emission Allowances
- 23 25) Big Bend Gypsum Storage Facility
- 24
- 25 Some of these projects are described in more detail in

1 the direct testimony of Tampa Electric Witness, Paul
2 Carpinone.

3

4 **Q.** Have you prepared schedules showing the calculation of
5 the recoverable capital project costs for 2016?

6

7 **A.** Yes. Form 42-3P contained in Exhibit No. ____ (PAR-3)
8 summarizes the cost estimates projected for these
9 projects. Form 42-4P, pages 1 through 25, provides the
10 calculations of the costs, which result in recoverable
11 jurisdictional capital costs of \$54,181,029.

12

13 **Q.** What are the existing O&M projects included in the
14 calculation of the ECRC factors for 2016?

15

16 **A.** Tampa Electric proposes to include for ECRC recovery the
17 23 previously approved O&M projects and their projected
18 costs in the calculation of the ECRC factors for 2016.
19 These projects are:

20

- 21 1) Big Bend Unit 3 FGD Integration
- 22 2) Big Bend Units 1 and 2 Flue Gas Conditioning
- 23 3) SO₂ Emissions Allowances
- 24 4) Big Bend Units 1 and 2 FGD
- 25 5) Big Bend PM Minimization and Monitoring

- 1 6) Big Bend NO_x Emissions Reduction
- 2 7) NPDES Annual Surveillance Fees
- 3 8) Gannon Thermal Discharge Study
- 4 9) Polk NO_x Emissions Reduction
- 5 10) Bayside SCR and Consumables
- 6 11) Big Bend Unit 4 SOFA
- 7 12) Big Bend Unit 1 Pre-SCR
- 8 13) Big Bend Unit 2 Pre-SCR
- 9 14) Big Bend Unit 3 Pre-SCR
- 10 15) Clean Water Act Section 316(b) Phase II Study
- 11 16) Arsenic Groundwater Standard Program
- 12 17) Big Bend Unit 1 SCR
- 13 18) Big Bend Unit 2 SCR
- 14 19) Big Bend Unit 3 SCR
- 15 20) Big Bend Unit 4 SCR
- 16 21) Mercury Air Toxics Standards
- 17 22) Greenhouse Gas Reduction Program
- 18 23) Big Bend Gypsum Storage Facility

19

20 Some of these projects are described in more detail in

21 the direct testimony of Tampa Electric Witness, Paul

22 Carpinone.

23

24 **Q.** Have you prepared a schedule showing the calculation of

25 the recoverable O&M project costs for 2016?

1 **A.** Yes. Form 42-2P contained in Exhibit No. ____ (PAR-2)
2 summarizes the recoverable jurisdictional O&M costs for
3 these projects which total \$27,074,547 for 2016.

4
5 **Q.** Did you prepare a schedule providing the description and
6 progress reports for all environmental compliance
7 activities and projects?

8
9 **A.** Yes. Project descriptions and progress reports, as well
10 as the projected recoverable cost estimates, are provided
11 in Form 42-5P, pages 1 through 31.

12
13 **Q.** What are the total projected jurisdictional costs for
14 environmental compliance in the year 2016?

15
16 **A.** The total jurisdictional O&M and capital expenditures to
17 be recovered through the ECRC are calculated on Form 42-
18 1P. These expenditures total \$81,255,576.

19
20 **Q.** How were environmental cost recovery factors calculated?

21
22 **A.** The environmental cost recovery factors were calculated
23 as shown on Schedules 42-6P and 42-7P. The demand
24 allocation factors were calculated by determining the
25 percentage each rate class contributes to the monthly

1 system peaks and then adjusted for losses for each rate
 2 class. The energy allocation factors were determined by
 3 calculating the percentage that each rate class
 4 contributes to total MWH sales and then adjusted for
 5 losses for each rate class. This information was based
 6 on applying historical rate class load research to the
 7 2016 projected forecast of system demand and energy.
 8 Form 42-7P presents the calculation of the proposed ECRC
 9 factors by rate class.

10
 11 **Q.** What are the ECRC billing factors for the period of
 12 January through December 2016 which Tampa Electric is
 13 seeking approval?

14
 15 **A.** The computation of the billing factors is shown in
 16 Exhibit No. ____ (PAR-3) Document No. 7, Form 42-7P. In
 17 summary, the January through December 2016 proposed ECRC
 18 billing factors are as follows:

<u>Rate Class</u>	<u>Factor by Voltage</u>
	<u>Level (¢/kWh)</u>
RS Secondary	0.432
GS, TS Secondary	0.431

1	GSD, SBF	
2	Secondary	0.429
3	Primary	0.424
4	Transmission	0.420
5	IS	
6	Secondary	0.423
7	Primary	0.419
8	Transmission	0.414
9	LS1	0.427
10	Average Factor	0.430

11

12 **Q.** When does Tampa Electric propose to begin applying these
13 environmental cost recovery factors?

14

15 **A.** The environmental cost recovery factors will be effective
16 concurrent with the first billing cycle for January 2016.

17

18 **Q.** What capital structure, components and cost rates did
19 Tampa Electric rely on to calculate the revenue
20 requirement rate of return for January 2016 through
21 December 2016?

22

23 **A.** Tampa Electric used the weighted average cost of capital
24 methodology approved by the Commission in Order No. PSC-
25 12-0425-PAA-EU to calculate the revenue requirement rate

1 of return found on Form 42-8P.

2

3 **Q.** Are the costs Tampa Electric is requesting for recovery
4 through the ECRC for the period January 2016 through
5 December 2016 consistent with criteria established for
6 ECRC recovery in Order No. PSC-94-0044-FOF-EI?

7

8 **A.** Yes. The costs for which ECRC treatment is requested
9 meet the following criteria:

10

- 11 1. Such costs were prudently incurred after April 13,
- 12 1993;
- 13 2. The activities are legally required to comply with a
- 14 governmentally imposed environmental regulation
- 15 enacted, became effective or whose effect was
- 16 triggered after the company's last test year upon
- 17 which rates are based; and,
- 18 3. Such costs are not recovered through some other cost
- 19 recovery mechanism or through base rates.

20

21 **Q.** Please summarize your testimony.

22

23 **A.** My testimony supports the approval of a final average
24 environmental billing factor of 0.430 cents per kWh.
25 This includes the projected capital and O&M revenue

1 requirements of \$81,255,576 associated with a total of 31
2 environmental projects and a net true-up over-recovery
3 provision of \$619,637. My testimony also explains that
4 the projected environmental expenditures for 2016 are
5 appropriate for recovery through the ECRC.
6

7 **Q.** Does this conclude your testimony?
8

9 **A.** Yes, it does.
10
11

23
24
25

1 **BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION**2 **PREPARED DIRECT TESTIMONY**3 **OF**4 **PAUL CARPINONE**

5
6 **Q.** Please state your name, address, occupation and employer.

7
8 **A.** My name is Paul L. Carpinone. My business address is 702
9 North Franklin Street, Tampa, Florida 33602. I am
10 employed by Tampa Electric Company ("Tampa Electric" or
11 "company") as Director, Environmental Health & Safety in
12 the Environmental Health and Safety Department.

13
14 **Q.** Please provide a brief outline of your educational
15 background and business experience.

16
17 **A.** I received a Bachelor of Science degree in Water
18 Resources Engineering Technology from the Pennsylvania
19 State University in 1978. I have been a Registered
20 Professional Engineer in the states of Florida and
21 Pennsylvania since 1984. Prior to joining Tampa Electric,
22 I worked for Seminole Electric Cooperative as a Civil
23 Engineer in various positions and in environmental
24 consulting. In February 1988, I joined Tampa Electric as
25 a Principal Engineer, and I have primarily worked in the

1 area of Environmental Health and Safety. In 2006, I
2 became Director of Environmental Health and Safety. My
3 responsibilities include the development and
4 administration of the company's environmental, health and
5 safety policies and goals. I am also responsible for
6 ensuring resources, procedures and programs meet or
7 surpass compliance with applicable environmental, health
8 and safety requirements, and that rules and policies are
9 in place and functioning appropriately and consistently
10 throughout the company.

11
12 **Q.** What is the purpose of your testimony in this proceeding?

13
14 **A.** The purpose of my testimony is to demonstrate that the
15 activities for which Tampa Electric seeks cost recovery
16 through the Environmental Cost Recovery Clause ("ECRC")
17 for the January 2016 through December 2016 projection
18 period are activities necessary for the company to comply
19 with various environmental requirements. Specifically, I
20 will describe the ongoing activities related to programs
21 previously approved by the Commission for recovery through
22 the ECRC.

23
24 **Q.** Please provide an overview of the environmental compliance
25 requirements that are the result of the Consent Final

1 Judgment ("CFJ") entered into with the Florida Department
2 of Environmental Protection ("FDEP") and the Consent
3 Decree ("CD") lodged with the U.S. Environmental
4 Protection Agency ("EPA") and the Department of Justice
5 ("the Orders").

6
7 **A.** The general requirements of the Orders provide for further
8 reductions of sulfur dioxide ("SO₂"), particulate matter
9 ("PM") and nitrogen oxides ("NO_x") emissions at Big Bend
10 Station. Tampa Electric has implemented the requirements
11 of the Orders, and now these agreements have been
12 terminated by the corresponding court systems. The ongoing
13 requirements of these projects, which are further
14 described later in my testimony, are now part of the Big
15 Bend Title V operating permit (0570039-072-AV). The
16 projects that are now required under the operating permit
17 are listed below.

- 18
- 19 • Big Bend Minimization Program
- 20 • Big Bend NOx Emission Reduction Program
- 21 • Big Bend Units 1 - 3 Pre-SCR Projects
- 22 • Big Bend Units 1 - 4 SCR Projects
- 23

24 **Q.** Does the termination of the Orders change any of the
25 environmental compliance requirements applicable to the

1 company's generating units?

2

3 **A.** No, the termination of the Orders does not change any of
4 the environmental compliance requirements applicable to
5 the company's generating units. They are now part of the
6 Title V operating permit.

7

8 **Q.** Please describe the Big Bend PM Minimization and
9 Monitoring program activities and provide the estimated
10 capital and O&M expenditures for the period of January
11 2016 through December 2016.

12

13 **A.** The Big Bend PM Minimization and Monitoring program was
14 approved by the Commission in Docket No. 001186-EI, Order
15 No. PSC-00-2104-PAA-EI, issued November 6, 2000. In the
16 Order, the Commission found that the program met the
17 requirements for recovery through the ECRC. Tampa Electric
18 had previously identified various projects to improve
19 precipitator performance and reduce PM emissions as
20 required by the Orders. Tampa Electric does not anticipate
21 any capital expenditures for this program during 2016;
22 however, the O&M expenses associated with existing and
23 recently installed BOP and BACT equipment and continued
24 implementation of the BOP procedures are expected to be
25 \$924,000.

1 **Q.** Please describe the Big Bend NO_x Emission Reduction
2 program activities and provide the estimated capital and
3 O&M expenses for the period of January 2016 through
4 December 2016.

5
6 **A.** The Big Bend NO_x Emission Reduction program was approved
7 by the Commission in Docket No. 001186-EI, Order No. PSC-
8 00-2104-PAA-EI, issued November 6, 2000. In the Order, the
9 Commission found that the program met the requirements for
10 recovery through the ECRC. Tampa Electric does not
11 anticipate any capital expenditures in 2016; however, the
12 company will perform maintenance on the previously
13 approved and installed NO_x reduction equipment. This
14 activity is expected to result in approximately \$130,000
15 of O&M expenses during 2016.

16
17 **Q.** Please describe the Big Bend Units 1 through 3 Pre-SCR and
18 the Big Bend Units 1 through 4 SCR projects and provide
19 estimated capital and O&M expenditures for the period of
20 January 2016 through December 2016.

21
22 **A.** In Docket No. 040750-EI, Order No. PSC-04-0986-PAA-EI,
23 issued October 11, 2004, the Commission approved cost
24 recovery of the Big Bend Units 1 through 3 Pre-SCR and the
25 Big Bend Unit 4 SCR projects. The Big Bend Units 1 through

1 3 SCR projects were approved by the Commission in Docket
2 No. 041376-EI, Order No. PSC-05-0502-PAA-EI, issued May 9,
3 2005. The purpose of the Pre-SCR technologies is to reduce
4 inlet NO_x concentrations to the SCR systems, thereby
5 mitigating overall SCR capital and O&M costs. These Pre-
6 SCR technologies include windbox modifications, secondary
7 air controls and coal/air flow controls. The SCR projects
8 at Big Bend Units 1 through 4 encompass the design,
9 procurement, installation and annual O&M expenses
10 associated with an SCR system for each unit. The SCRs for
11 Big Bend Units 1 through 4 were placed in-service April
12 2010, September 2009, July 2008 and May 2007,
13 respectively.

14
15 For the period of January 2016 through December 2016,
16 there are not any capital expenditures anticipated for the
17 Big Bend Units 1 through 3 Pre-SCR projects. The O&M
18 expenditures for Big Bend Pre-SCR projects are projected
19 to be \$42,000 for Big Bend Unit 1 Pre-SCR, \$42,000 for Big
20 Bend Unit 2 Pre-SCR and \$42,000 for Big Bend Unit 3 Pre-
21 SCR for equipment maintenance. Additionally, there are not
22 any anticipated capital expenditures for Big Bend Units 1,
23 2, and 4 SCRs. However, the capital expenditures for the
24 Big Bend Unit 3 SCR are projected to be \$2,000,000 for a
25 catalyst replacement. Additionally, the 2016 SCR O&M

1 expenses are projected to be \$2,025,000 for Big Bend Unit
2 1 SCR, \$1,613,000 for Big Bend Unit 2 SCR, \$2,032,000 for
3 Big Bend Unit 3 SCR and \$2,070,000 for Big Bend Unit 4
4 SCR. These expenses are primarily associated with ammonia
5 purchases.

6
7 **Q.** Please identify and describe the other Commission-approved
8 programs you will discuss.

9
10 **A.** The programs previously approved by the Commission that I
11 will discuss include the following projects:

- 12 1) Big Bend Unit 3 FGD Integration
- 13 2) Big Bend Units 1 and 2 FGD
- 14 3) Gannon Thermal Discharge Study
- 15 4) Bayside SCR Consumables
- 16 5) Clean Water Act Section 316(b) Phase II Study
- 17 6) Big Bend FGD System Reliability
- 18 7) Arsenic Groundwater Standard
- 19 8) Mercury and Air Toxics Standards ("MATS")
- 20 9) Greenhouse Gas ("GHG") Reduction Program
- 21 10) Big Bend Gypsum Storage Facility

22
23 **Q.** Please describe the Big Bend Unit 3 FGD Integration and
24 the Big Bend Units 1 and 2 FGD activities and provide the
25 estimated capital and O&M expenditures for the period of

1 January 2016 through December 2016.

2
3 **A.** The Big Bend Unit 3 FGD Integration program was approved
4 by the Commission in Docket No. 960688-EI, Order No. PSC-
5 96-1048-FOF-EI, issued August 14, 1996. The Big Bend Units
6 1 and 2 FGD program was approved by the Commission in
7 Docket No. 980693-EI, Order No. PSC-99-0075-FOF-EI, issued
8 January 11, 1999. In those Orders, the Commission found
9 that the programs met the requirements for recovery
10 through the ECRC. The programs were implemented to meet
11 the SO₂ emission requirements of the Phase I and II Clean
12 Air Act Amendments ("CAAA") of 1990.

13
14 The company does not anticipate any capital expenditures
15 during January 2016 through December 2016 for the Big Bend
16 Unit 3 FGD Integration project; however, O&M expenses are
17 projected to be \$5,844,840 for consumables, primarily
18 anhydrous ammonia, and ongoing maintenance. There are not
19 any anticipated capital expenditures for the Big Bend
20 Units 1 & 2 FGD project during January 2016 through
21 December 2016. O&M expenses are projected to be \$9,795,402
22 for consumables, primarily anhydrous ammonia, and ongoing
23 maintenance.

24
25 **Q.** Please describe the Gannon Thermal Discharge Study program

1
2
3

20
21
22
23
24
25

activities and provide the estimated O&M expenditures for the period of January 2016 through December 2016.

A. The Gannon Thermal Discharge Study program was approved by the Commission in Docket No. 010593-EI, Order No. PSC-01-1847-PAA-EI, issued September 14, 2001. In that Order, the Commission found that the program met the requirements for recovery through the ECRC. For the period of January 2016 through December 2016, there are not any projected O&M expenditures for this program. In the intent to issue the permit renewal, dated August 9, 2013, FDEP indicated that the proposed NPDES permit authorizes a thermal variance under 316(a) for the permit period. The company anticipates that an additional study will not be required.

Q. Please describe the Bayside SCR Consumables program activities and provide the estimated O&M expenditures for the period of January 2016 through December 2016.

A. The Bayside SCR Consumables program was approved by the Commission in Docket No. 021255-EI, Order No. PSC-03-0469-PAA-EI, issued April 4, 2003. For the period of January 2016 through December 2016, Tampa Electric projects O&M expenses associated with the consumable goods (primarily anhydrous ammonia) to be approximately \$204,000 for the

1 period.

2

3 **Q.** Please describe the Clean Water Act Section 316(b) Phase
4 II Study program activities and provide the estimated O&M
5 expenditures for the period of January 2016 through
6 December 2016.

7

8 **A.** The Clean Water Act Section 316(b) Phase II Study program
9 was approved by the Commission in Docket No. 041300-EI,
10 Order No. PSC-05-0164-PAA-EI, issued February 10, 2005.
11 The final rule adopted under Section 316(b), the Cooling
12 Water Intake Structures ("CWIS") Rule, became effective
13 October 14, 2014. Tampa Electric is currently finalizing
14 its compliance strategy for the CWIS Rule and is working
15 with the regulating authority to determine the need and
16 scheduling for biological, financial and technical study
17 elements necessary to comply with the rule. These
18 elements will ultimately be used by the regulating
19 authority to determine the necessity of cooling water
20 system retrofits for Big Bend and Bayside Power
21 Stations. Retrofits could include the installation of
22 cooling towers or screening facilities. Tampa Electric
23 projects O&M expenditures to be \$960,000 for the period
24 January 2016 through December 2016 for engineering
25 studies.

1 **Q.** Please describe the Big Bend FGD System Reliability
2 program activities and provide the estimated capital
3 expenses for the period of January 2016 through December
4 2016.

5
6 **A.** Tampa Electric's Big Bend FGD System Reliability program
7 was approved by the Commission in Docket No. 050598-EI,
8 Order No. PSC-06-0602-PAA-EI, issued July 10, 2006. The
9 Commission granted cost recovery approval for prudent
10 costs associated with this project. The Big Bend FGD
11 System Reliability project has been running concurrently
12 with the installation of SCR systems on the generating
13 units. For the period of January 2016 through December
14 2016, there are not any anticipated capital expenditures
15 for this project.

16
17 **Q.** Please describe the Arsenic Groundwater Standard program
18 activities and provide the estimated O&M expenditures for
19 the period of January 2016 through December 2016.

20
21 **A.** The Arsenic Groundwater Standard program was approved by
22 the Commission in Docket No. 050683-EI, Order No. PSC-06-
23 0138-PAA-EI, issued February 23, 2006. In that Order, the
24 Commission found that the program met the requirements for
25 recovery through the ECRC and granted Tampa Electric cost

1 recovery approval for prudently incurred costs. The new
2 groundwater standard applies to Tampa Electric's H.L.
3 Culbreath Bayside, Big Bend and Polk Power Stations.

4
5 For the period of January 2016 through December 2016,
6 Tampa Electric projects O&M expenses associated with the
7 sampling activities to be approximately \$25,000.

8
9 **Q.** Please describe the MATS program activities.

10
11 **A.** The MATS program was approved by the Commission in Docket
12 No. 120302-EI, Order No. PSC-13-0191-PAA-EI, issued May 6,
13 2013. In that Order, the Commission found that the program
14 met the requirements for recovery through the ECRC and
15 granted Tampa Electric cost recovery approval for
16 prudently incurred costs. Additionally, the Commission
17 granted the subsumption of the previously approved CAMR
18 program into the MATS program.

19
20 On February 8, 2008, the Washington D.C. Circuit Court
21 vacated EPA's rule removing power plants from the Clean
22 Air Act list of regulated sources of hazardous air
23 pollutants under section 112. At the same time, the Court
24 vacated the Clean Air Mercury Rule. On May 3, 2011, the
25 EPA published a new proposed rule for mercury and other

1 hazardous air pollutants according to the National
2 Emissions Standards for Hazardous Air Pollutants section
3 of the Clean Air Act. The proposed rule calls for
4 continued mercury monitoring requirements comparable to
5 CAMR and additional monitoring and testing of other
6 pollutants by 2014. On February 16, 2012, the EPA
7 published the final rule for MATS. The rule revised the
8 mercury limits and provided more flexible monitoring and
9 recordkeeping requirements. Additionally, monitoring of
10 acid gases and particulate matter will be required.
11 Existing sources will have through October 16, 2015 to
12 show full compliance with the rule. Tampa Electric must
13 conduct extensive emissions testing and engineering
14 studies at Big Bend Station and Polk Power Station to
15 determine what actions are required to meet the proposed
16 standards.

17
18 **Q.** What is the impact of the remand of the CAIR and vacatur
19 of the CAMR on Tampa Electric's ECRC projects?

20
21 **A.** On July 6, 2010, the EPA proposed a new rule, the Clean
22 Air Transport Rule to replace CAIR. On July 6, 2011, the
23 EPA issued the final CAIR replacement rule, now called
24 the Cross State Air Pollution Rule ("CSAPR"). CSAPR is
25 focused on reducing SO₂ and NO_x in 27 eastern states that

1 contribute to ozone and/or fine particle pollution in
2 other states. In the final rule, Florida is subject to
3 the ozone season control program (May through September).
4 In December 2011, the final rule was stayed by the United
5 States Court of Appeals District of Columbia Circuit. The
6 stay on the finalized CSAPR and the remand of CAIR have
7 minimal impact on Tampa Electric's ECRC projects
8 associated with NO_x and SO₂ abatement. These projects were
9 initiated as a result of the CD signed between the EPA
10 and Tampa Electric (the requirements now included in the
11 Big Bend operating permit); therefore, the company
12 anticipates continuing its efforts to complete and
13 maintain the projects. The completed ECRC projects
14 support compliance with CSAPR.

15
16 The vacatur of CAMR occurred after Tampa Electric had
17 begun the procurement of equipment necessary to meet the
18 intent of the original rule; however, the company was
19 able to stop a significant portion of the total equipment
20 purchase. Subsequent to the vacatur, the company has
21 continued utilizing the resources already secured to
22 establish a baseline of mercury emissions.

23
24 On May 3, 2011, the EPA proposed a new rule under
25 National Emission Standards for Hazardous Air Pollutants

1 pursuant to a court order referred to as the MATS rule.
2 The proposed rules replace CAMR and are expected to
3 reduce not only mercury but acid gas, organics and
4 certain non-mercury metals emissions. The final MATS rule
5 was released in February 2012 and required implementation
6 by April 2015. Tampa Electric continues to utilize the
7 resources already secured to establish a baseline on
8 mercury and other emissions subject to the proposed rule
9 and expects to purchase other equipment that will be
10 required to comply with the rules. The company's
11 compliance with these standards for mercury, acid gases,
12 and non-mercury metals began on April 16, 2015 at Big
13 Bend Station and Polk Power Station. Full compliance with
14 the rule is required by October 16, 2015, and Tampa
15 Electric is on course to fully comply with the MATS rules
16 by the compliance date.

17
18 **Q.** Please provide the MATS program estimated capital and O&M
19 expenditures for the period January 2016 through December
20 2016.

21
22 **A.** For 2016, Tampa Electric does not anticipate any capital
23 expenditures under the MATS program; however, O&M
24 expenditures are projected to be \$230,000 for testing
25 requirements and maintenance of equipment.

1 **Q.** Please describe the GHG Reduction Program activities and
2 provide the estimated capital and O&M expenditures for the
3 period of January 2016 through December 2016.

4
5 **A.** Tampa Electric's GHG Reduction Program approved by the
6 Commission in Docket No. 090508-EI, Order No. PSC-10-0157-
7 PPA-EI, issued March 22, 2010 is a result of the EPA's
8 Mandatory Reporting Rule requiring annual reporting of
9 greenhouse gas emissions. Tampa Electric was required to
10 report greenhouse gas emissions to the EPA for the first
11 time in 2011. Reporting for the EPA's Greenhouse Gas
12 Mandatory Reporting Rule will continue in 2016. For 2016,
13 this activity projected to result in approximately \$90,000
14 of O&M expenditures.

15
16 **Q.** Please describe the Big Bend Gypsum Storage Facility
17 activities and provide the estimated capital and O&M
18 expenditures for the period of January 2016 through
19 December 2016.

20
21 **A.** The Big Bend Gypsum Storage Facility program was approved
22 by the Commission in Docket No. 110262-EI, Order No. 12-
23 0493-PAA-EI, issued September 26, 2012. In that Order,
24 the Commission found that the program meets the
25 requirements for recovery through ECRC. The project was

1 placed in-service in November 2014. For 2016, Tampa
2 Electric does not anticipate any capital expenditures;
3 however, projected O&M expenses for this program during
4 2016 are \$900,000.

5

6 **Q.** Please describe your company's plans for compliance with
7 the recently finalized EPA Coal Combustion Residuals
8 ("CCR") Rule and provide estimated expenses if available.

9

10 **A.** On April 17, 2015, EPA issued a final rule to regulate
11 coal combustion residuals ("CCRs") as nonhazardous waste
12 under Subtitle D of the Resource Conservation and
13 Recovery Act ("RCRA"). The rule, which becomes effective
14 on October 19, 2015, covers all operational CCR disposal
15 facilities, as well as inactive impoundments which
16 contain CCRs and liquids. The Big Bend Unit 4 Economizer
17 Ash Ponds and the East Coalfield Stormwater Pond
18 (converted former slag fines pond), will be regulated
19 under the rule, at a minimum. The applicability of the
20 rule to other CCR management units at Big Bend is also
21 being evaluated at this time. Initial compliance costs
22 for structural integrity evaluations, groundwater
23 monitoring well installation, dike inspections and other
24 administrative requirements of this rule may be incurred
25 during 2016. Tampa Electric did not project and include

1 costs for this program in its 2016 ECRC factor due to the
2 uncertainty surrounding the requirements. The company is
3 continuing its evaluation and plans to petition the
4 Commission for cost recovery for this program. Potential
5 Commission-approved costs for this project will be
6 proposed for cost recovery in Tampa Electric's 2016
7 actual-estimate filing.

8
9 **Q.** Please summarize your testimony.

10
11 **A.** Tampa Electric's settlement agreements with FDEP and EPA
12 required significant reductions in emissions from Tampa
13 Electric's Big Bend and Gannon Stations have been
14 terminated due to the company having satisfied all
15 requirements as set forth by the CFJ and CD. Ongoing
16 requirements for projects originating with the Orders are
17 included in the Big Bend operating permit and discussed
18 throughout my testimony. I described the progress Tampa
19 Electric has made to achieve the more stringent
20 environmental standards. I identified estimated costs, by
21 project, which the company expects to incur in 2016. The
22 on-going requirements of these of the CFJ and CD have
23 been incorporated into Big Bend's Title V Operating
24 Permit (1050233 - 072 - AV). Additionally, my testimony
25 identified other projects that are required for Tampa

1 Electric to meet environmental requirements, and I
2 provided the associated 2016 activities and projected
3 expenditures.

4

5 **Q.** Does this conclude your testimony?

6

7 **A.** Yes.

GULF POWER COMPANY

Before the Florida Public Service Commission
Prepared Direct Testimony of
James O. Vick
Docket No. 150007-EI
April 1, 2015

- Q. Please state your name and business address.
- A. My name is James O. Vick, and my business address is One Energy Place, Pensacola, Florida, 32520.
- Q. By whom are you employed and in what capacity?
- A. I am employed by Gulf Power Company as the Director of Environmental Affairs.
- Q. Mr. Vick, will you please describe your education and experience?
- A. I graduated from Florida State University, Tallahassee, Florida, in 1975 with a Bachelor of Science Degree in Marine Biology. I also hold a Bachelor's Degree in Civil Engineering from the University of South Florida in Tampa, Florida. In addition, I have a Masters of Science Degree in Management from Troy State University, Pensacola, Florida. In August 1978, I joined Gulf Power Company as an Associate Engineer and have since held various engineering positions with increasing responsibilities such as Air Quality Engineer, Senior Environmental Licensing Engineer, and Manager of Environmental Affairs. In 2003, I assumed my present position as Director of Environmental Affairs.

1 Q. What are your responsibilities with Gulf Power Company?

2 A. As Director of Environmental Affairs, my primary responsibility is
3 overseeing the activities of the Environmental Affairs area to ensure the
4 Company is, and remains, in compliance with environmental laws and
5 regulations, i.e. both existing laws and such laws and regulations that may
6 be enacted or amended in the future. In performing this function, I am
7 responsible for numerous environmental activities.

8

9 Q. Are you the same James O. Vick who has previously testified before this
10 Commission on various environmental matters?

11 A. Yes.

12

13 Q. Mr. Vick, what is the purpose of your testimony?

14 A. The purpose of my testimony is to support Gulf Power Company's
15 Environmental Cost Recovery Clause (ECRC) final true-up for the period
16 January through December 2014.

17

18 Q. Mr. Vick, please compare Gulf's recoverable environmental capital costs
19 included in the final true-up calculation for the period January 2014
20 through December 2014 with the approved estimated true-up amounts.

21 A. As reflected in Mr. Boyett's Schedule 6A, the actual recoverable capital
22 costs were \$118,824,740 as compared to \$118,625,423 included in the
23 Estimated True-up filing. This resulted in a net variance of \$199,318
24 above the estimated true-up. The variance was primarily due to the Air

25

1 Quality Compliance Program (Line item 1.26) previously known as the
2 CAIR/CAMR/CAVR Compliance Program.

3

4 Q Please explain the capital variance of \$210,262 or 0.2% in the Air Quality
5 Compliance Program (Line item 1.26)

6 A. This variance is a result of several contributing factors. First, although
7 Mercury CEMS equipment was installed on the scrubber stack during the
8 period, Gulf delayed the installation of Mercury CEMS equipment on two
9 other stacks at Plant Crist while related updates and corrections to the
10 MATS rule are occurring. Second, some construction activities
11 associated with the Plant Daniel Bromine Injection and Activated Carbon
12 projects were moved from 2014 to 2015. Third, Gulf's Plant Crist Unit 6
13 SCR catalyst replacement was delayed while Gulf selected a new catalyst.

14

15 Q. How do the actual O&M expenses for the period January 2014 to
16 December 2014 compare to the amounts included in the Estimated True-
17 up filing?

18 A. Mr. Boyett's Schedule 4A reflects that Gulf's recoverable environmental
19 O&M expenses for the current period were \$29,192,476, as compared to
20 the estimated true-up of \$30,247,005. This resulted in a variance of
21 (\$1,054,529) or 3.5% below the estimated true-up. I will address ten O&M
22 projects and/or programs that contribute to this variance: General Water
23 Quality, Groundwater Contamination Investigation, State NPDES
24 Administration, General Solid & Hazardous Waste, Above Ground Storage
25 Tanks, Sodium Injection program, FDEP NOx Reduction Agreement, Air

1 Quality Compliance Program, Annual NOx Allowances, and SO₂
2 Allowances.

3

4 Q. Please explain the variance of (\$502,453) or (16.9%) in (Line Item 1.6),
5 General Water Quality.

6 A. This line item includes expenses related to Plant Crist’s industrial
7 wastewater pond dredging project. Due to project efficiencies and there
8 being less solids in the pond to remove, Plant Crist was able to return the
9 pond to its original bottom elevation at a lower cost than originally
10 projected.

11

12 Q. Please explain the variance of \$755,110 or 17.3% in (Line Item 1.7),
13 Groundwater Contamination Investigation.

14 A. This line item includes expenses related to substation investigation and
15 remediation activities. This variance is due to additional work being
16 required to complete soil and groundwater studies necessary to comply
17 with the Florida Department of Environmental Protection established
18 timeline. This variance is also due to an increase in the cost of the
19 Holmes Creek Substation project. The cost increase is primarily from
20 higher than expected excavation volumes of contaminated soil that
21 resulted from Gulf encountering below-ground concrete footers that were
22 deeper than expected.

23

24 Q. Please explain the variance of (\$14,401) or (29.0%) in (Line item 1.8),
25 State NPDES Administration.

- 1 A. This line item is for the State NPDES Administration fees that are required
2 by the State of Florida's National Pollutant Discharge Elimination System
3 (NPDES) program administration. Annual and five year permit renewal
4 fees are required for the NPDES industrial wastewater permits at Plants
5 Crist, Smith and Scholz. The variance in this line item is primarily a timing
6 difference due to paying Plant Crist's five year permit renewal fee of
7 \$7,500 in March 2015 instead of November of 2014 as initially projected.
8
- 9 Q. Please explain the variance of \$126,496 or 19.4% in (Line item 1.11),
10 General Solid & Hazardous Waste.
- 11 A. This line item includes expenses for proper identification, handling,
12 storage, transportation and disposal of solid and hazardous wastes as
13 required by federal and state regulations. The program includes expenses
14 for Gulf's generating and power delivery facilities. This variance is
15 primarily due to costs associated with transformer oil spills and associated
16 disposal costs for Gulf's power delivery operations that were not projected.
17 The exact number and cost of these events cannot be predicted in
18 advance.
19
- 20 Q. Please explain the variance of (\$47,905) or (32.8%) in (Line item 1.12),
21 Above Ground Storage Tanks.
- 22 A. This variance is primarily due to postponing the district office storage tank
23 integrity tests and delaying a portion of the Plant Smith aboveground
24 storage tank maintenance work to early 2015. Plant Smith originally
25 planned to coat the concrete secondary containment areas around several

1 of the tanks in late 2014; however, the work was rescheduled for early
2 2015 due to rainfall events. The Plant Crist above ground storage
3 maintenance expenses were also less than originally anticipated.

4

5 Q. Please explain the variance of (\$19,374) or (48.3%) in (Line item 1.16),
6 Sodium Injection program.

7 A. This line item includes the O&M expenses associated with the sodium
8 injection systems at Plant Smith and Plant Crist. Sodium carbonate is
9 added to the Plant Crist and Plant Smith coal supply to enhance
10 precipitator efficiencies when burning certain low sulfur coals. This
11 variance is primarily due to less sodium carbonate being required for Plant
12 Crist Units 4 and 5. The quantity of sodium carbonate is directly related to
13 how much Plant Crist Units 4 and 5 are dispatched to meet system loads
14 and during this period these units have been dispatched less than
15 originally projected.

16

17 Q Please explain the variance of (\$1,143,245) or (43.2%) in FDEP NOx
18 Reduction Agreement (Line Item 1.19).

19 A. The FDEP NOx Reduction Agreement includes O&M costs associated
20 with the Plant Crist Unit 7 SCR and the Plant Crist Units 4 and 5 SNCR
21 projects that were included as part of the 2002 agreement with FDEP.
22 More specifically, this line item includes the cost of anhydrous ammonia,
23 urea, air monitoring, and general operation and maintenance expenses
24 related to the activities undertaken in connection with the agreement. This
25 variance is primarily due to an extension of the schedule for painting of

1 structure steel associated with Plant Crist's Unit 7 SCR into 2015 and the
2 job costing less than original projected.

3

4 Q. Please explain the O&M variance (\$731,104) or (4.3%) in the Air Quality
5 Compliance Program, (Line Item 1.20).

6 A. The Air Quality Compliance Program line item primarily includes O&M
7 expenses associated with the Plant Crist Units 4 through 7 scrubber, Plant
8 Crist Unit 6 SCR and the Plant Smith Units 1 and 2 SNCRs. More
9 specifically, this line item includes the cost of urea, limestone, and the
10 general operation and maintenance activities associated with Gulf's Air
11 Quality Compliance Program. This variance is primarily due to the Plant
12 Crist units operating less than projected. Lower operation of the units
13 results in less urea and limestone being needed, as well as less
14 maintenance being required for the equipment.

15

16 Q. Please explain the variance of \$400,136 or 172.2 % in Annual NOx
17 Allowances (Line Item 1.24).

18 A. This variance is the result of Gulf expensing its remaining NOx CAIR
19 allowances after the U.S. Court of Appeals lifted the court-imposed stay
20 on EPA's implementation of the Cross-state Air Pollution Rule (CSAPR).
21 That court action ended the CAIR program in December 2014. CAIR
22 annual and seasonal emission allowances will not be transferrable to the
23 CSAPR program.

24

25

1 Q. Please explain the variance of \$44,194 or 7.2 % in SO2 Allowances (Line
2 Item 1.26).

3 A. This variance is due to a scrubber outage during the month of October at
4 Plant Crist. During that time, Crist units 4, 5, and 6 operated in the
5 scrubber by-pass mode which resulted in the need to utilize more
6 allowances than projected.

7

8 Q. Mr. Vick, does this conclude your testimony?

9 A. Yes.

ERRATA SHEET

Docket No. 150007-EI
 Name: James O. Vick
 Date: October 9, 2015

Page 4 Lines 3-6

"This variance is primarily due to a delay in replacing the FGAS fans in Plant Crist's Unit 7 SCR. In the 2014 fall outage, an inspection of the fans found that the fans had more remaining life than anticipated thus delaying the replacement of the fans."

should read:

"This variance is primarily due to two expenditures. First, in the 2014 fall outage, an inspection of the Plant Crist Unit 7SCR Flue Gas Sample (FGAS) fans found that the fans had more remaining life than anticipated thus delaying the replacement of the fans beyond 2015. Second, Gulf's Plant Crist Unit 6 flame scanners were not included in Gulf's 2015 Projection filing. The flame scanners are a necessary component of the Low NOx Burners and have reached the end of their useful life."

10-8-15

DATE

James O. Vick
 James O. Vick

STATE OF FLORIDA
 COUNTY OF ESCAMBIA

I, the undersigned authority, certify that personally appeared before me James O Vick and was duly sworn.

WITNESS my hand and official seal this 8th day of October, 2015.

Melissa A. Darnes
 Notary Public, State of Florida

MELISSA A. DARNES
 MY COMMISSION # EE 150873
 EXPIRES: December 17, 2015
 Bonded Thru Budget Notary Services

1 GULF POWER COMPANY

2 Before the Florida Public Service Commission
3 Prepared Direct Testimony of James O. Vick
4 Docket No. 150007-EI
5 Date of Filing: July 31, 2015

6 Q. Please state your name and business address.

7 A. My name is James O. Vick, and my business address is One Energy
8 Place, Pensacola, Florida, 32520.

9 Q. By whom are you employed and in what capacity?

10 A. I am employed by Gulf Power Company as the Director of Environmental
11 Affairs.

12 Q. Mr. Vick, will you please describe your education and experience?

13 A. I graduated from Florida State University, Tallahassee, Florida, in 1975
14 with a Bachelor of Science degree in Marine Biology. I also hold a
15 Bachelor's degree in Civil Engineering from the University of South Florida
16 in Tampa, Florida. In addition, I have a Master of Science degree in
17 Management from Troy State University, Pensacola, Florida. In August
18 1978, I joined Gulf Power Company as an Associate Engineer and have
19 since held various engineering positions with increasing responsibilities
20 such as Air Quality Engineer, Senior Environmental Licensing Engineer,
21 and Manager of Environmental Affairs. In 2003, I assumed my present
22 position as Director of Environmental Affairs.
23
24
25

1 Q. What are your responsibilities with Gulf Power Company?

2 A. As Director of Environmental Affairs, my primary responsibility is
3 overseeing the activities of the Environmental Affairs area to ensure the
4 Company is, and remains, in compliance with environmental laws and
5 regulations, i.e. both existing laws and such laws and regulations that may
6 be enacted or amended in the future. In performing this function, I am
7 responsible for numerous environmental activities.

8

9 Q. Are you the same James O. Vick who has previously testified before this
10 Commission on various environmental matters?

11 A. Yes.

12

13 Q. Mr. Vick, what is the purpose of your testimony?

14 A. The purpose of my testimony is to support Gulf Power Company's
15 Environmental Cost Recovery Clause (ECRC) estimated true-up for the
16 period January through December 2015. This true-up is based on six
17 months of actual data and six months of estimated data.

18

19 Q. Mr. Vick, please compare Gulf's recoverable environmental capital costs
20 included in the estimated true-up calculation for the period January 2015
21 through December 2015 with the approved projected amounts.

22 A. As reflected in Mr. Boyett's Schedule 6E, the recoverable capital costs
23 approved in the original projection total \$119,597,918 as compared to the
24 estimated true-up amount of \$123,962,048. This results in a variance of
25 \$4,364,129 or 3.6%.

1 Q. Are there any factors that impact multiple capital projects?

2 A. Yes. The recoverable capital costs included in the estimated true-up
3 calculation are approximately \$4,364,129 more than the capital costs
4 included in the 2015 Projection filing. One driver that impacts multiple
5 capital projects is the difference between the weighted average cost of
6 capital (WACC) used in the 2015 Projection filing versus the WACC
7 applied to the July through December 2015 period in this 2015
8 Estimated/Actual True-up filing. In accordance with Commission Order
9 No. PSC-12-0425-PAA-EU, the 2015 Projection filing used the WACC
10 presented in Gulf's May 2014 Earnings Surveillance Report for January
11 through December 2015. In this 2015 Estimated/Actual True-Up filing, the
12 projected July through December 2015 period uses the WACC presented
13 in Gulf's May 2015 Earnings Surveillance Report. After taking this item
14 into consideration, there is a positive variance of approximately
15 \$5,107,570 that is largely attributed to three capital projects: 1) Smith
16 Water conservation (\$315,566); 2) Crist FDEP Agreement for Ozone
17 Attainment \$165,717; and 3) Air Quality Compliance Program \$5,152,794.
18 The variances attributed to these programs will be discussed below.

19

20 Q. Please explain the capital variance of (\$315,566) or (20.4%) reflected in
21 Smith Water Conservation (Line item 1.17).

22 A. The Smith Water Conservation variance is due to delays in equipment
23 manufacturing which caused the contractor installation schedule to be
24 delayed for the piping and a temporary pump station.

25

1 Q. Please explain the capital variance of \$165,717 or 1.3% reflected in the
2 Crist FDEP Agreement for Ozone Attainment Program (Line Item 1.19).

3 A. This variance is primarily due to a delay in replacing the FGAS fans in
4 Plant Crist's Unit 7 SCR. In the 2014 fall outage, an inspection of the fans
5 found that the fans had more remaining life than anticipated thus delaying
6 the replacement of the fans.

7

8 Q. Please explain the capital variance of \$5,152,794 or 5.7% reflected in the
9 Air Quality Compliance Program (Line Item 1.26).

10 A. The line item variance is primarily due to two budget items. First, Plant
11 Daniel anticipates bringing the Unit 1 scrubber and common scrubber
12 equipment in-service in the month of October and the Unit 2 scrubber in-
13 service in November. Both units and common equipment were projected
14 to come in-service in December. Secondly, Plant Crist's modifications to
15 Plant Crist's Gypsum Cell #2 are allowing the plant to extract more
16 gypsum out of the pond and sell that gypsum. The modifications to cell #2
17 and the increase in demand for the gypsum have allowed the plant to
18 delay construction of cell #1.

19

20 Q. How do the estimated/actual 2015 O&M expenses compare to the original
21 2015 projections?

22 A. Mr. Boyett's Schedule 4E reflects that Gulf's recoverable environmental
23 O&M expenses for the current period are now estimated at \$27,076,209
24 as compared to \$28,103,327 the amount projected in the 2015 Projection
25 Filing for a variance of (\$1,027,118) or (3.7%). I will address eight O&M

1 projects and programs that mostly contribute to this variance: Emissions
2 Monitoring, General Water Quality, Above Ground Storage Tanks, Sodium
3 Injection, FDEP NOx Reduction Agreement, Air Quality Compliance
4 Program, Crist Water Conservation, and SO2 Allowances.

5

6 Q. Please explain the O&M variance of (\$86,864) or (10.8%) in (Line item
7 1.5), the Emissions Monitoring program.

8 A. The Emissions Monitoring variance is primarily due to Plant Daniel's
9 emissions testing charges costing less than projected.

10

11 Q. Please explain the O&M variance of (\$815,453) or (38.1%) in (Line item
12 1.6), the General Water Quality program.

13 A. The General Water Quality variance is primarily due to the discontinuing of
14 some 316(b) biological evaluations at Plant Smith since the plant will
15 cease operations with its coal-fired units in March 2016 and a delay in the
16 316(b) activities at Plant Crist until further discussions with DEP are
17 completed.

18

19 Q. Please explain the O&M variance of \$73,854 or 62.9% in (Line item 1.12)
20 Above Ground Storage Tanks.

21 A. The Above Ground Storage Tanks variance is primarily due to work at
22 Plant Smith related to coating of the concrete secondary containment
23 areas around several tanks. The work was rescheduled to 2015 due to
24 rainfall events in late 2014.

25

1 Q. Please explain the variance of (\$41,607) or (39.3%) in (Line item 1.16),
2 Sodium Injection program.

3 A. This line item includes the O&M expenses associated with the sodium
4 injection systems at Plant Crist and Plant Smith. Sodium carbonate is
5 added to the Plant Crist and Plant Smith coal supply to enhance
6 precipitator efficiencies when burning certain low sulfur coals. This
7 variance is primarily due to less sodium carbonate being required for Plant
8 Crist Units 4 and 5. The quantity of sodium carbonate is directly related to
9 how much Plant Crist Units 4 and 5 operated and during this period these
10 units have operated less than originally projected.

11

12 Q. Please explain the O&M variance of (\$227,577) or (11.2%) in FDEP NOx
13 Reduction Agreement (Line Item 1.19).

14 A. The FDEP NOx Reduction Agreement includes the cost of anhydrous
15 ammonia, urea, air monitoring, and general operation and maintenance
16 expenses for activities undertaken in connection with the Plant Crist FDEP
17 Agreement related to Ozone Attainment. This variance is primarily due to
18 a painting project of Plant Crist's Unit 7 SCR coming in under budget.

19

20 Q. Please explain the O&M variance \$372,874 or 2.3% in the Air Quality
21 Compliance Program, (Line Item 1.20).

22 A. The Air Quality Compliance Program currently includes O&M expenses
23 associated with the Plant Crist scrubber, the Crist Unit 6 SCR and the
24 Smith Units 1 and 2 SNCRs. More specifically, this line item includes the
25 cost of limestone, ammonia, urea and general operation and maintenance

1 activities included in Gulf's Air Quality Compliance Program. The line item
2 variance is primarily due to \$1,669,171 of MATS cost associated with
3 Plant Smith. These costs were incurred by Gulf in determining its MATS
4 compliance strategy for Plant Smith. Plant Crist scrubber limestone
5 expenses are lower than projected due to lower utilization of Gulf's coal-
6 fired units. Plant Daniels scrubber limestone expenses are higher than
7 projected due to the units coming on-line and in-service earlier than
8 projected.

9

10 Q. Please explain the variance of (\$61,915) or (20.7%) in Crist Water
11 Conservation (Line Item 1.22).

12 A. The Crist Water Conservation line item includes O&M expenses
13 associated with the Plant Crist reclaimed water system. The line item
14 variance is primarily due to lower utilization of Plant Crist's coal-fired units
15 which in turn means lower demand for sulfuric acid.

16

17 Q. Please explain the variance of (\$63,407) or (18.1%) in SO2 Allowances
18 (Line Item 1.26).

19 A. Plant Crist and Plant Daniel operated less than projected and thus fewer
20 allowances were utilized.

21

22 Q. Does this conclude your testimony?

23 A. Yes.

24

25

1 GULF POWER COMPANY

2 Before the Florida Public Service Commission
3 Prepared Direct Testimony and Exhibit of

4 James O. Vick

Docket No. 150007-EI

Date of Filing: August 31, 2015

5 Q. Please state your name and business address.

6 A. My name is James O. Vick, and my business address is One Energy Place,
7 Pensacola, Florida, 32520.8
9 Q. By whom are you employed and in what capacity?10 A. I am employed by Gulf Power Company as the Director of Environmental
11 Affairs.12
13 Q. Mr. Vick, will you please describe your education and experience?14 A. I graduated from Florida State University, Tallahassee, Florida, in 1975 with
15 a Bachelor of Science Degree in Marine Biology. I also hold a Bachelor's
16 Degree in Civil Engineering from the University of South Florida in Tampa,
17 Florida. In addition, I have a Master of Science Degree in Management
18 from Troy State University, Pensacola, Florida. I joined Gulf Power
19 Company in August 1978 as an Associate Engineer. I have since held
20 various engineering positions with increasing responsibilities such as Air
21 Quality Engineer, Senior Environmental Licensing Engineer, and Manager
22 of Environmental Affairs. In 2003, I assumed my present position as
23 Director of Environmental Affairs.

24

25

1 Q. What are your responsibilities with Gulf Power Company?

2 A. As Director of Environmental Affairs, my primary responsibility is overseeing
3 the activities of the Environmental Affairs section to ensure the Company is,
4 and remains, in compliance with environmental laws and regulations, i.e.,
5 both existing laws and such laws and regulations that may be enacted or
6 amended in the future. In performing this function, I have the responsibility
7 for numerous environmental activities.

8

9 Q. Are you the same James O. Vick who has previously testified before this
10 Commission on various environmental matters?

11 A. Yes.

12

13 Q. Mr. Vick, what is the purpose of your testimony?

14 A. The purpose of my testimony is to support Gulf Power Company's projection
15 of environmental compliance costs recoverable through the Environmental
16 Cost Recovery Clause (ECRC) for the period from January 2016 through
17 December 2016, including two new environmental programs.

18

19 Q. Have you prepared an exhibit that contains information to which you will
20 refer in your testimony?

21 A. Yes, my exhibit consists of the Coal Combustion Residual (CCR) regulation,
22 the draft Plant Scholz National Pollutant Discharge Elimination System
23 (NPDES) industrial wastewater permit, and the proposed Steam Electric
24 Power Effluent Limitations Guidelines and Standards (ELG) regulation.

25

1 Counsel: We ask that Mr. Vick's exhibit
2 consisting of three documents
3 be marked as Exhibit No. _____ (JOV-1).
4

5 Q. Mr. Vick, please identify the capital projects included in Gulf's ECRC
6 projection filing.

7 A. The environmental capital projects for which Gulf seeks recovery through
8 the ECRC are described in Schedules 3P, 4P, and 5P of Witness Boyett's
9 Exhibit CSB-3. I am supporting the expenditures, clearings, retirements,
10 salvage and cost of removal currently projected for each of these projects.
11 Mr. Boyett compiled these schedules and has calculated the associated
12 revenue requirements for Gulf's requested recovery. Of the projects shown
13 on Mr. Boyett's schedules, there are four programs that were previously
14 approved by the Commission with activities that have projected capital
15 expenditures during 2016. These programs include: Continuous Emission
16 Monitoring Systems (CEMS) – Plants Crist, Scholz, Smith, and Daniel,
17 Smith Water Conservation, Crist FDEP Agreement for Ozone Attainment,
18 and the Air Quality Compliance program.
19

20 Q. Have all of the projects addressed in Gulf's testimony and exhibits been
21 previously approved by the Commission?

22 A. No. Gulf is including two new Water Quality programs, the Coal
23 Combustion Residual (CCR) program and the Steam Electric Power Effluent
24 Limitations Guidelines (ELG) program, in addition to the programs
25 previously approved by the Commission.

1 Q. Mr. Vick, please describe the Coal Combustion Residual program that Gulf
2 seeks to recover through the ECRC.

3 A. The new program is related to the regulation of Coal Combustion Residuals
4 by the United States Environmental Protection Agency (EPA) and the
5 Florida Department of Environmental Protection (FDEP). For Gulf's
6 generating plants, these new regulatory compliance obligations are
7 pursuant to either the new CCR rule adopted earlier this year or in new
8 permit requirements added by FDEP; through National Pollutant Discharge
9 Elimination System (NPDES) permits issued for each of Gulf's generating
10 facilities pursuant to authority granted under the Clean Water Act.

11

12 On April 17, 2015 EPA published the final CCR rule in the Federal register
13 regulating CCR disposal under Subtitle D of the Resource Conservation and
14 Recovery Act (RCRA). The CCR rule is located in Title 40 Code of Federal
15 Regulations (CFR) Parts 257 and 261 (See Exhibit JOV-1). The CCR rule
16 regulates the disposal of CCR, including coal ash and gypsum, as non-
17 hazardous solid waste at active generating power plants. The CCR rule
18 includes minimum criteria for active and inactive surface impoundments
19 containing CCR and liquids, lateral expansions of existing units, and active
20 landfills (collectively referred to as "CCR Units"). Failure to meet the
21 minimum criteria can result in the mandated closure of a CCR Unit. The
22 new criteria will apply to CCR Units at Gulf's Plants Crist, Smith, and Daniel.

23

24 A draft NPDES renewal permit for Plant Scholz (FL0002283) was issued on
25 August 24, 2015 and is expected to become final in the fourth quarter of

1 2015 (See Exhibit JOV-1). This permit renewal has new conditions
2 requiring closure of the Plant Scholz CCR Unit. Pursuant to the permit, the
3 closure plan is required to be submitted to the FDEP in 2016 for review and
4 approval. Once approved, Gulf will move forward with activities required for
5 closure. The expenses associated with the Plant Scholz CCR Unit will be
6 reflected in Operation and Maintenance (O&M) Line Item 1.23.

7
8 Each plant will conduct engineering evaluations to meet the requirements
9 for continued use of its CCR Units. By the effective date of the CCR rule,
10 October 19, 2015, any CCR Unit subject to the EPA's new rule must have a
11 publicly available website established, weekly and monthly inspections
12 initiated, and a fugitive dust plan prepared. During 2015, Gulf is also
13 required to install permanent markers at all CCR ponds and have annual
14 inspections of the CCR impoundments and landfills performed by a
15 professional engineer (PE). In 2016, Gulf will prepare closure and post-
16 closure care plans for the CCR Units, conduct hydrologic and hydraulic
17 capacity studies of the CCR ponds, compile a history of the structural
18 integrity reports and design information for the CCR Units, prepare
19 stormwater management plans, and conduct annual dust control and
20 engineering inspections as well as groundwater monitoring. Costs
21 associated with these activities are O&M expenses that are reflected on
22 Line Item 1.23 of Mr. Boyett's Schedule 2P.

23
24 Gulf's projected 2015 CCR capital expenditures of \$660,000 include
25 installation of additional groundwater monitoring systems required for Plant

1 Crist, Plant Smith, and Plant Daniel. The proposed 2016 capital
2 expenditures totaling \$9,359,600 are associated with the installation of a
3 new bottom ash handling system for Plant Crist, dust suppression control
4 equipment for Plant Smith, as well as new CCR wastewater management
5 systems for Plant Crist and Plant Smith (Line Item 1.28).

6
7 Q. Mr. Vick, please discuss the new Steam Electric Power Effluent Limitations
8 Guidelines and Standards (ELG) program.

9 A. EPA is required to establish new ELG which are found in Title 40 of the
10 Code of Federal Regulations, Part 423 (See Exhibit JOV-1). This regulation
11 limits the discharge of pollutants into navigable waters and into publically
12 owned treatment works by existing and new sources of steam electric
13 power. The EPA is required to finalize revisions to the ELG by September
14 30, 2015. The proposed ELG regulations, as currently drafted, would
15 require the installation of additional controls such as wastewater treatment
16 systems and/or dry ash handling systems at Gulf's generating facilities. The
17 ultimate impact of these proposed regulations will, however, depend on the
18 specific requirements of the final rule, which could require short compliance
19 timeframes to complete modifications.

20
21 During the 2015-2016 timeframe Gulf plans to complete water balance and
22 engineering studies to evaluate further the impact of the proposed ELG
23 regulatory options. The project costs will be recorded to a preliminary
24 design and investigation account (deferred debit) until the rule is finalized
25 and Gulf has determined the best option to comply with the regulation.

1 Q. Mr. Vick, please describe the projected 2016 capital expenditures for CEMS
2 – Plants Crist, Scholz, Smith and Daniel (Line Item 1.5).

3 A. Gulf plans to relocate existing Plant Crist CEMS monitors that are currently
4 located in bypass stacks to the individual unit's duct and to upgrade Plant
5 Crist Unit 7 flue gas monitors. The CEMS monitors need to be relocated
6 and upgraded due to the Mercury and Air Toxics Standards (MATS) rule
7 requirements. Expenditures associated with these activities reflected in the
8 2016 projection filing are \$3.1 million.

9

10 Q. Mr. Vick, please provide an update on the Smith Water Conservation project
11 (Line Item 1.17).

12 A. As discussed in previous filings, Gulf has determined that it is feasible to
13 inject reclaimed water into the Plant Smith deep injection well system. Gulf
14 has installed three deep injection wells and will begin the process of
15 installing piping and initial equipment for the pump station during the latter
16 portion of 2015 and the first part of 2016. During 2016, Gulf will obtain
17 additional operational data required to design the final pump station and
18 wastewater treatment equipment as well as any additional piping.
19 Expenditures associated with these activities reflected in the 2016 projection
20 filing are \$340,807.

21

22 Q. Mr. Vick, please describe the projects included in the 2016 projection for
23 (Line Item 1.19) the Crist FDEP Agreement for Ozone Attainment.

24 A. Gulf plans to add or replace a layer of the Plant Crist Unit 7 SCR catalyst
25 and install the Plant Crist Unit 6 flame scanner during 2016. In 2016, the

1 effectiveness of the existing catalyst will have reached a point requiring
2 either a replacement layer or the addition of another layer. Under either
3 option, the replacement or additional layer will be a regenerated catalyst.
4 The projected 2016 expenditures for this line item are \$1,183,284.
5

6 Q. Mr. Vick, please describe the projected 2016 capital expenditures for the Air
7 Quality Compliance program (Line Item 1.26).

8 A. The projected 2016 expenditures for this line item include completion of the
9 work associated with the Plant Daniel scrubbers and CEMS equipment
10 needed for Plant Crist and Plant Daniel to comply with the MATS regulation.
11 Also, projected for this line item are capital retrofit projects for the Plant Crist
12 scrubber. Gulf plans to replace Plant Crist's scrubber booster fan hubs,
13 scrubber mist eliminator, and scrubber expansion joints, as well as increase
14 the capacity of its scrubber wastewater treatment plant. The projected 2016
15 expenditures for this line item is \$16,338,205.
16

17 Q. Mr. Vick, please provide an update on the status of the Plant Daniel
18 scrubber projects?

19 A. The Plant Daniel scrubber projects are currently scheduled for completion in
20 the October to November 2015 time period. On August 19, 2015, the Plant
21 Daniel Unit 1 scrubber had its initial gas flow. That activity initiated
22 approximately 60 days of testing and optimization. The Unit 2 scrubber
23 initial gas flow is planned for September, 2015. After the testing and
24 optimization, the scrubbers will be drained and inspected prior to placing the
25 scrubbers in-service. Other remaining major activities include

1 commissioning all ancillary equipment, completing the waste water
2 treatment system and finishing the liner at the gypsum storage area. The
3 total projected amount for 2016 for Daniel scrubber expenditures is \$8.5
4 million which is included in the \$16.3 million of expenditures projected for
5 the Air Quality Compliance Program, Line Item 1.26.

6

7 Q. Please discuss the status of the MATS rule and the controls and monitoring
8 equipment needed to comply with the MATS regulations.

9 A. On June 29, 2015, the Supreme Court decided that the EPA interpreted the
10 Clean Air Act unreasonably when it deemed cost irrelevant to the decision
11 of whether regulation of power plants under section 112 of the Clean Air Act
12 is "appropriate and necessary". While the Court directed that the EPA must
13 consider cost before deciding whether regulation of power plants is
14 "appropriate and necessary", the Court left it up to EPA to decide how to
15 account for cost upon remand. The MATS regulations remain in effect and
16 the EPA announced it intends to submit its cost analysis by spring 2016.

17

18 Gulf Power began installing MATS monitoring systems at Plant Crist in 2014
19 and Plant Daniel in 2015 in order to comply with the MATS rule. The Plant
20 Crist MATS monitoring system will monitor mercury and particulate
21 emissions. Mercury monitors were included in Gulf's original Compliance
22 Plan that was filed on March 29, 2007. The Plant Daniel and Plant Crist
23 mercury monitors were two of the 10 specific components of Gulf's program
24 that were agreed to as part of a stipulation approved on August 14, 2007.
25 The stipulation is included in Order No. PSC-07-0721-S-EI. The 2016

1 projected expenditures for the Plant Crist MATS monitoring systems are
2 \$3.2 million. The Plant Daniel MATS monitoring costs are included in the
3 cost projection for the Plant Daniel scrubbers.

4
5 Q. Mr. Vick, are you including the purchase of allowances in your 2016
6 projection filing?

7 A. No, we are not currently projecting the need to purchase additional
8 allowances during 2016.

9
10 Q. How do the projected Environmental O&M activities listed on Schedule 2P
11 of Mr. Boyett's Exhibit CSB-3 compare to the O&M activities approved for
12 cost recovery in past ECRC proceedings?

13 A. All of the O&M activities listed on Schedule 2P have been approved for
14 recovery through the ECRC in past proceedings other than the Coal
15 Combustion Residual (CCR) program expenses (Line Item 1.23).

16
17 Q. Please describe the O&M activities included in the air quality category for
18 2016.

19 A. There are five O&M activities included in the air quality category that have
20 projected expenses in 2016. On Schedule 2P, Air Emission Fees (Line Item
21 1.2), represents the expenses projected for the annual fees required by the
22 Clean Air Act Amendments (CAAA) of 1990 that are payable to the FDEP
23 and Mississippi Department of Environmental Quality. The expenses
24 projected for the 2016 recovery period total \$560,352.

25

1 Included in the air quality category, Title V (Line Item 1.3) represents
2 projected ongoing expenses associated with implementation of the Title V
3 permits. The total 2016 estimated expenses for the Title V Program are
4 \$144,489.

5
6 On Schedule 2P, Asbestos Fees (Line Item 1.4) consists of the fees
7 required to be paid to the FDEP for asbestos abatement projects. The
8 projected expenses for this line item are \$1,000.

9
10 Emission Monitoring (Line Item 1.5) on Schedule 2P reflects an ongoing
11 O&M expense associated with the Continuous Emission Monitoring
12 equipment as required by the CAAA. These expenses are incurred in
13 response to EPA's requirements that the Company perform Quality
14 Assurance/Quality Control (QA/QC) testing for the CEMS, including Relative
15 Accuracy Test Audits (RATAs) and Linearity Tests. The expenses expected
16 to be incurred during the 2016 recovery period for these activities total
17 \$816,217.

18
19 The FDEP NOx Reduction Agreement (Line Item 1.19) includes O&M costs
20 associated with the Plant Crist Unit 7 SCR and the Plant Crist Units 4 and 5
21 Selective Non-Catalytic Reduction (SNCR) projects that were included as
22 part of the 2002 agreement with FDEP. This line item includes the cost of
23 anhydrous ammonia, urea, air monitoring, and general O&M expenses
24 related to activities undertaken in connection with the agreement. Gulf was
25 granted approval for recovery of the costs incurred to complete these

1 activities in FPSC Order No. PSC-02-1396-PAA-EI in Docket No. 020943-
2 EI. The projected expenses for the 2016 recovery period total \$952,387.
3

4 Q. What O&M activities are included in the water quality category?

5 A. General Water Quality (Line Item 1.6), identified in Schedule 2P, includes
6 costs associated with Soil Contamination Studies, NPDES permit
7 compliance, Dechlorination, Groundwater Monitoring, Surface Water
8 Studies, the Cooling Water Intake Program, the Impaired Waters Rule, the
9 Impoundment Integrity Program, and Stormwater Maintenance. The
10 expenses expected to be incurred during the projection period for this line
11 item totals \$2,009,676.
12

13 Q. What other O&M activities are included in the water quality category?

14 A. Groundwater Contamination Investigation (Line Item 1.7) was previously
15 approved for environmental cost recovery in Docket No. 930613-EI.
16 This line item includes expenses related to substation investigation and
17 remediation activities. Gulf has projected \$3,437,656 of incremental
18 expenses for this line item during the 2016 recovery period.
19

20 Line Item 1.8, State National Pollutant Discharge Elimination System
21 (NPDES) Administration, was previously approved for recovery in the ECRC
22 and reflects expenses associated with NPDES annual fees and permit
23 renewal fees for Gulf's three generating facilities in Florida. These
24 expenses are expected to be \$36,500 during the projected recovery period.
25

1 Line Item 1.9, Lead and Copper Rule, was also previously approved for
2 ECRC recovery and reflects sampling, analytical, and chemical costs
3 related to the lead and copper drinking water quality standards. These
4 expenses are expected to total \$16,974 during the 2016 projection period.
5

6 Line Item 1.23, is the new Coal Combustion Residual (CCR) program that
7 was previously discussed on pages 4 through 6. Gulf is requesting ECRC
8 recovery for certain CCR compliance activities that will be conducted
9 beginning in 2015. The projected 2015 and 2016 CCR O&M expenses are
10 \$13.24 million.
11

12 Q. What activities are included in the environmental affairs administration
13 category?

14 A. Only one O&M activity is included in this category on Schedule 2P (Line
15 Item 1.10) of Mr. Boyett's Exhibit CSB-3. This line item refers to the
16 Company's Environmental Audit/Assessment function. This program is an
17 on-going compliance activity previously approved for ECRC recovery.
18 Expenses totaling \$9,000 are expected during the 2016 recovery period.
19

20 Q. What O&M activities are included in the General Solid and Hazardous
21 Waste category?

22 A. The General Solid and Hazardous Waste activity (Line Item 1.11) involves
23 the proper identification, handling, storage, transportation, and disposal of
24 solid and hazardous wastes as required by federal and state regulations.
25 The program includes expenses for Gulf's generating and power delivery

1 facilities. This program is a previously approved program that is projected
2 to incur incremental expenses totaling \$771,232 in 2016.

3
4 Q. Are there any other O&M activities that have been approved for recovery
5 that have projected expenses?

6 A. There are five other O&M activities that have been approved in past
7 proceedings which have projected expenses during 2016. They are the
8 Above Ground Storage Tanks program, the Sodium Injection System, the
9 Air Quality Compliance Program, Crist Water Conservation, and Emission
10 Allowances.

11
12 Q. What O&M activities are included in the Above Ground Storage Tanks line
13 item?

14 A. Above Ground Storage Tanks (Line Item 1.12) includes maintenance
15 activities and fees required by Florida's above ground storage tank
16 regulation, Chapter 62 Part 762, F.A.C. Expenses totaling \$164,181 are
17 projected to be incurred during 2016.

18
19 Q. What activity is included in the Sodium Injection line item?

20 A. The Sodium Injection System (Line Item 1.16) was originally approved for
21 inclusion in the ECRC in Order No. PSC-99-1954-PAA-EI. The activities in
22 this line item involve sodium injection to the coal supply that enhances
23 precipitator efficiencies when burning certain low sulfur coals at Plant Crist
24 and Plant Smith. Expenses totaling \$72,800 are projected to be incurred
25 during 2016 for this line item.

1 Q. What activities are included in the Air Quality Compliance Program (Line
2 Item 1.20)?

3 A. This line item includes O&M expenses associated with the capital projects
4 approved for ECRC recovery under the Air Quality Compliance Program.
5 This line item includes the cost of anhydrous ammonia, hydrated lime, urea,
6 limestone and general O&M expenses. The projected 2016 expenses for
7 this line item total approximately \$27.1 million which includes \$9.5 million for
8 limestone costs associated with operation of the Plant Crist and Plant Daniel
9 scrubbers.

10

11 Q. What activities are included in the Crist Water Conservation line item (Line
12 Item 1.22)?

13 A. The Crist Water Conservation line item includes general O&M expenses
14 associated with the Plant Crist reclaimed water system, such as piping,
15 valve maintenance and pump replacements. Expenses totaling \$570,300
16 are projected to be incurred during 2016 for this line item.

17

18 Q. Please describe the emission allowance line item (Line Item 1.27).

19 A. This line item includes projected allowance expenses for Gulf's generation.
20 Line Item 1.27 includes \$226,209 of projected expenses for SO₂ allowances
21 during 2016.

22

23

24

25

1 Q. Do each of the capital projects and O&M activities that have projected costs
2 in 2016 meet the ECRC statutory guidelines?

3 A. Yes. The projects included in Gulf's 2016 ECRC projection filing meet the
4 requirements of the ECRC statute and are consistent with the Commission's
5 precedents regarding environmental cost recovery. Each of the capital
6 projects and O&M activities set forth in Mr. Boyett's schedules include only
7 prudent costs that are not recovered through some other cost recovery
8 mechanism or base rates. The projected environmental costs are
9 necessary to achieve and/or maintain compliance with environmental laws,
10 rules, and regulations.

11

12 Q. Mr. Vick, does this conclude your testimony?

13 A. Yes.

14

15

16

25

1 GULF POWER COMPANY

2 Before the Florida Public Service Commission
3 Direct Testimony and Exhibit of
4 C. Shane Boyett
5 Docket No. 150007-EI
6 Date of Filing: April 1, 2015

7 Q. Please state your name, business address and occupation.

8 A. My name is Shane Boyett. My business address is One Energy Place,
9 Pensacola, Florida 32520-0780. I am the Supervisor of Regulatory and
10 Cost Recovery at Gulf Power Company.

11 Q. Please briefly describe your educational background and business
12 experience.

13 A. I graduated from the University of Florida in Gainesville, Florida in 2001
14 with a Bachelor of Science Degree in Business Administration. I also hold
15 a Master's in Business Administration from the University of West Florida
16 in Pensacola, Florida. I joined Gulf Power in 2002 as a Forecasting
17 Specialist where I worked for five years until I took a position in the
18 Regulatory and Cost Recovery area in 2007 as a Regulatory Analyst.
19 After working in the Regulatory and Cost Recovery department for seven
20 years, I transferred to Gulf Power's Financial Planning department as a
21 Financial Analyst where I worked until being promoted to my current
22 position of Supervisor of Regulatory and Cost Recovery. My
23 responsibilities include supervision of: tariff administration, calculation of
24 cost recovery factors, and the regulatory filing function of the Regulatory
25 and Cost Recovery department.

1 Q. What is the purpose of your testimony?

2 A. The purpose of my testimony is to present the final true-up amount for the
3 period January 2014 through December 2014 for the Environmental Cost
4 Recovery Clause (ECRC).

5

6 Q. Have you prepared an exhibit that contains information to which you will
7 refer in your testimony?

8 A. Yes, I have.

9 Counsel: We ask that Mr. Boyett's
10 exhibit consisting of nine schedules be
11 marked as Exhibit No. _____ (CSB-1).

12

13 Q. Are you familiar with the ECRC true-up calculation for the period January
14 through December 2014 set forth in your exhibit?

15 A. Yes. These documents were prepared under my supervision.

16

17 Q. Have you verified that to the best of your knowledge and belief the
18 information contained in these documents is correct?

19 A. Yes.

20

21 Q. What is the amount to be refunded or collected in the recovery period
22 beginning January 2016?

23 A. An amount to be collected of \$912,783 was calculated, which is reflected
24 on line 3 of Schedule 1A of my exhibit.

25

1 Q. How was this amount calculated?

2 A. The \$912,783 to be collected was calculated by taking the difference
3 between the estimated January 2014 through December 2014 under-
4 recovery of \$2,229,940 as approved in FPSC Order No. PSC-14-0643-
5 FOF-EI, dated November 4, 2014, and the actual under-recovery of
6 \$3,142,723, which is the sum of lines 5, 6 and 9 on Schedule 2A of my
7 exhibit.

8

9 Q. Please describe Schedules 2A and 3A of your exhibit.

10 A. Schedule 2A shows the calculation of the actual under-recovery of
11 environmental costs for the period January 2014 through December 2014.
12 Schedule 3A of my exhibit is the calculation of the interest provision on the
13 average true-up balance. This is the same method of calculating interest
14 that is used in the Fuel Cost Recovery and Purchased Power Capacity
15 Cost Recovery clauses.

16

17 Q. Please describe Schedules 4A and 5A of your exhibit.

18 A. Schedule 4A compares the actual O&M expenses for the period January
19 2014 through December 2014 with the estimated/actual O&M expenses
20 approved in conjunction with the October 2014 hearing. Schedule 5A
21 shows the monthly O&M expenses by activity, along with the calculation of
22 jurisdictional O&M expenses for the recovery period. Emission allowance
23 expenses and the amortization of gains on emission allowances are
24 included with O&M expenses. Any material variances in O&M expenses
25 are discussed in Mr. Vick's final true-up testimony.

1 Q. Please describe Schedules 6A and 7A of your exhibit.

2 A. Schedule 6A for the period January 2014 through December 2014
3 compares the actual recoverable costs related to investment with the
4 estimated/actual amount approved in conjunction with the October 2014
5 hearing. The recoverable costs include the return on investment,
6 depreciation and amortization expense, dismantlement accrual, and
7 property taxes associated with each environmental capital project for the
8 recovery period. Recoverable costs also include a return on working
9 capital associated with emission allowances. Schedule 7A provides the
10 monthly recoverable costs associated with each project, along with the
11 calculation of the jurisdictional recoverable costs. Any material variances
12 in recoverable costs related to environmental investment for this period
13 are discussed in Mr. Vick's final true-up testimony.

14

15 Q. Please describe Schedule 8A of your exhibit.

16 A. Schedule 8A includes 31 pages that provide the monthly calculations of
17 the recoverable costs associated with each approved capital project for
18 the recovery period. As I stated earlier, these costs include return on
19 investment, depreciation and amortization expense, dismantlement
20 accrual, property taxes, and the cost of emission allowances. Pages 1
21 through 27 of Schedule 8A show the investment and associated costs
22 related to capital projects, while pages 28 through 31 show the investment
23 and costs related to emission allowances.

24

25

1 Q. Mr. Boyett, what capital structure, components and cost rates did Gulf use
2 to calculate the revenue requirement rate of return?

3 A. Consistent with Commission Order No. PSC-12-0425-PAA-EU dated
4 August 16, 2012 in Docket No. 120007-EI, the capital structure used in
5 calculating the rate of return for recovery clause purposes for January
6 2014 through June 2014 is based on the weighted average cost of capital
7 (WACC) presented in Gulf's May 2013 Earnings Surveillance Report. For
8 July 2014 through December 2014 the rate of return used is the WACC
9 presented in Gulf's May 2014 Earnings Surveillance Report. The WACC
10 for both periods includes a return on equity of 10.25%

11

12 Q. Mr. Boyett, does this conclude your testimony?

13 A. Yes.

14

15

16

17

18

19

20

21

22

23

24

25

1 GULF POWER COMPANY

2 Before the Florida Public Service Commission
3 Prepared Direct Testimony and Exhibit of
4 C. Shane Boyett
Docket No. 150007-EI
Date of Filing: July 31, 2015

5 Q. Please state your name, business address and occupation.

6 A. My name is Shane Boyett. My business address is One Energy Place,
7 Pensacola, Florida 32520. I am the Supervisor of Regulatory and Cost
8 Recovery at Gulf Power Company.

9

10 Q. Please briefly describe your educational background and business
11 experience.

12 A. I graduated from the University of Florida in Gainesville, Florida in 2001
13 with a Bachelor of Science degree in Business Administration. I also hold
14 a Master of Business Administration from the University of West Florida in
15 Pensacola, Florida. I joined Gulf Power in 2002 as a Forecasting
16 Specialist where I worked for five years until I took a position in the
17 Regulatory and Cost Recovery area in 2007 as a Regulatory Analyst.
18 After working in the Regulatory and Cost Recovery department for seven
19 years, I transferred to Gulf Power's Financial Planning department as a
20 Financial Analyst where I worked until being promoted to my current
21 position of Supervisor of Regulatory and Cost Recovery. My
22 responsibilities include supervision of: tariff administration, calculation of
23 cost recovery factors, and the regulatory filing function of the Regulatory
24 and Cost Recovery department.

25

1 Q. What is the purpose of your testimony?

2 A. The purpose of my testimony is to present the estimated true-up amount
3 for the period January 2015 through December 2015 for the
4 Environmental Cost Recovery Clause (ECRC).

5

6 Q. Have you prepared an exhibit that contains information to which you will
7 refer in your testimony?

8 A. Yes, I have. My exhibit consists of nine schedules, each of which was
9 prepared under my direction, supervision, or review.

10 Counsel: We ask that Mr. Boyett's exhibit
11 consisting of nine schedules be marked as
12 Exhibit No. ____ (CSB-2).

13

14 Q. Have you verified that to the best of your knowledge and belief the
15 information contained in these documents is correct?

16 A. Yes, I have.

17

18 Q. What has Gulf calculated as the estimated true-up for the January 2015
19 through December 2015 period to be refunded or collected in the period
20 January 2016 through December 2016?

21 A. The estimated true-up for the current period is an under-recovery of
22 \$1,699,128 as shown on Schedule 1E. This is based on six months of
23 actual data and six months of estimated data. This amount will be added
24 to the 2014 final true-up under-recovery amount of \$912,783. The sum of
25 \$2,611,911 will be collected from customers during the January 2016

1 through December 2016 period. The detailed calculations supporting the
2 estimated true-up for 2015 are contained in Schedules 2E through 8E.

3

4 Q. Please describe Schedules 2E and 3E of your exhibit.

5 A. Schedule 2E shows the calculation of the estimated under-recovery of
6 environmental costs for the period January 2015 through December 2015.
7 Schedule 3E of my exhibit is the calculation of the interest provision on the
8 average true-up balance. This is the same method of calculating interest
9 that is used in the Fuel Cost Recovery and Purchased Power Capacity
10 Cost Recovery clauses.

11

12 Q. Please describe Schedules 4E and 5E of your exhibit.

13 A. Schedule 4E compares the estimated/actual O&M expenses for the period
14 January 2015 through December 2015 to the projected O&M expenses
15 approved by the Commission in Docket No. 140007-EI. Schedule 5E
16 shows the monthly O&M expenses by activity, along with the calculation of
17 jurisdictional O&M expenses for the current recovery period. Per the
18 Staff's request, emission allowance expenses and the amortization of
19 gains on emission allowances are included with O&M expenses. Mr. Vick
20 describes the main reasons for the expected variances in O&M expenses
21 in his estimated true-up testimony.

22

23 Q. Please describe Schedules 6E and 7E of your exhibit.

24 A. Schedule 6E for the period January 2015 through December 2015
25 compares the estimated/actual recoverable costs related to investment to

1 the projected amount approved in Docket No. 140007-EI. The
2 recoverable costs include the return on investment, depreciation and
3 amortization expense, dismantlement accrual, and property taxes
4 associated with each environmental capital project for the current recovery
5 period. Recoverable costs also include a return on working capital
6 associated with emission allowances. Schedule 7E provides the monthly
7 recoverable revenue requirements associated with each project, along
8 with the calculation of the jurisdictional recoverable revenue requirements.
9 Mr. Vick describes the major variances in recoverable costs related to
10 environmental investment for this estimated true-up period in his
11 testimony.

12

13 Q. Please describe Schedule 8E of your exhibit.

14 A. Schedule 8E includes 31 pages that provide the monthly calculations of
15 recoverable costs associated with each approved capital investment for
16 the current recovery period. As stated earlier, these costs include return
17 on investment, depreciation and amortization expense, dismantlement
18 accrual, property taxes, and the return on working capital associated with
19 emission allowances. Pages 1 through 27 of Schedule 8E show the
20 investment and associated costs related to capital projects, while pages
21 28 through 31 show the investment and return related to emission
22 allowances.

23

24

25

1 Q. What capital structure and return on equity were used to develop the rate
2 of return used to calculate the revenue requirements as shown on
3 Schedule 9E?

4 A. Consistent with Commission Order No. PSC-12-0425-PAA-EU dated
5 August 16, 2012 in Docket No. 120007-EI, the capital structure used in
6 calculating the rate of return for recovery clause purposes for January
7 2015 through June 2015 is based on the weighted average cost of capital
8 (WACC) presented in Gulf's May 2014 Earnings Surveillance Report. For
9 July 2015 through December 2015 the rate of return used is the WACC
10 presented in Gulf's May 2015 Earnings Surveillance Report. The WACC
11 for both periods includes a return on equity of 10.25%.

12

13 Q. Mr. Boyett, does this conclude your testimony?

14 A. Yes.

15

16

17

18

19

20

21

22

23

24

25

1 GULF POWER COMPANY

2 Before the Florida Public Service Commission
3 Prepared Direct Testimony and Exhibit of
4 C. Shane Boyett
Docket No. 150007-EI
Date of Filing: August 31, 2015

5 Q. Please state your name, business address and occupation.

6 A. My name is Shane Boyett. My business address is One Energy Place,
7 Pensacola, Florida 32520. I am the Supervisor of Regulatory and Cost
8 Recovery at Gulf Power Company.

9
10 Q. Please briefly describe your educational background and business
11 experience.

12 A. I graduated from the University of Florida in Gainesville, Florida in 2001
13 with a Bachelor of Science degree in Business Administration. I also hold
14 a Master of Business Administration from the University of West Florida in
15 Pensacola, Florida. I joined Gulf Power in 2002 as a Forecasting
16 Specialist where I worked for five years until I took a position in the
17 Regulatory and Cost Recovery area in 2007 as a Regulatory Analyst.
18 After working in the Regulatory and Cost Recovery department for seven
19 years, I transferred to Gulf Power's Financial Planning department as a
20 Financial Analyst where I worked until being promoted to my current
21 position of Supervisor of Regulatory and Cost Recovery. My
22 responsibilities include supervision of: tariff administration, calculation of
23 cost recovery factors, and the regulatory filing function of the Regulatory
24 and Cost Recovery department.

25

1 Q. What is the purpose of your testimony?

2 A. The purpose of my testimony is to present both the calculation of the
3 revenue requirements and the development of the environmental cost
4 recovery factors for the period of January 2016 through December 2016.

5

6 Q. Have you prepared any exhibits that contain information to which you will
7 refer in your testimony?

8 A. Yes, I have. My exhibit consists of 8 schedules, each of which was
9 prepared under my direction, supervision, or review.

10 Counsel: We ask that Mr. Boyett's exhibit
11 consisting of eight schedules be marked as
12 Exhibit No. _____(CSB-3).

13

14 Q. What environmental costs is Gulf requesting recovery of through the
15 Environmental Cost Recovery Clause (ECRC)?

16 A. As discussed in the testimony of Witness James O. Vick, Gulf is
17 requesting recovery for certain environmental compliance operating
18 expenses and capital costs that are consistent with both the decision of
19 the Commission in Order No.PSC-94-0044-FOF-EI in Docket No. 930613-
20 EI and with past proceedings in this ongoing recovery docket. The costs
21 we have identified for recovery through the ECRC are not currently being
22 recovered through base rates or any other cost recovery mechanism.

23

24 Q. How was the amount of projected Operations and Maintenance (O&M)
25 expenses to be recovered through the ECRC calculated?

1 A. Mr. Vick has provided me with projected recoverable O&M expenses for
2 January 2016 through December 2016. Schedule 2P of Exhibit CSB-3
3 shows the calculation of the recoverable O&M expenses broken down
4 between demand-related and energy-related expenses. Schedule 2P also
5 provides the appropriate jurisdictional factors and amounts related to
6 these expenses. All O&M expenses associated with compliance with air
7 quality environmental regulations were considered to be energy-related,
8 consistent with Commission Order No. PSC-94-0044-FOF-EI. The
9 remaining expenses were broken down between demand and energy
10 consistent with Gulf's last approved cost-of-service methodology in Docket
11 No. 110138-EI.

12
13 Q. Please describe Schedules 3P and 4P of your Exhibit CSB-3.

14 A. Schedule 3P summarizes the monthly recoverable revenue requirements
15 associated with each capital investment project for the recovery period.
16 Schedule 4P shows the detailed calculation of the revenue requirements
17 associated with each investment project. These schedules also include
18 the calculation of the jurisdictional amount of recoverable revenue
19 requirements. Mr. Vick has provided me with the expenditures, clearings,
20 retirements, salvage, and cost of removal related to each capital project as
21 well as the monthly costs for emission allowances. From that information,
22 plant-in-service and construction work in progress (non-interest bearing)
23 was calculated. Additionally, depreciation, amortization and
24 dismantlement expense and the associated accumulated depreciation
25 balances were calculated based on Gulf's approved depreciation rates,

1 amortization periods, and dismantlement accruals. The capital projects
2 identified for recovery through the ECRC are those environmental projects
3 which were not included in the test year on which present base rates were
4 set.

5
6 Q. How was the amount of property taxes to be recovered through the ECRC
7 derived?

8 A. Property taxes were calculated by applying the applicable tax rate to
9 taxable investment. In Florida, pollution control facilities are taxed based
10 only on their salvage value. For the recoverable environmental
11 investment located in Florida, the amount of property taxes is estimated to
12 be \$0. In Mississippi, there is no such reduction in property taxes for
13 pollution control facilities. Therefore, property taxes related to recoverable
14 environmental investment at Plant Daniel are calculated by applying the
15 applicable millage rate to the assessed value of the property.

16
17 Q. What capital structure and return on equity were used to develop the rate
18 of return used to calculate the revenue requirements as shown on 8P?

19 A. Consistent with Commission Order No. PSC-12-0425-PAA-EU dated
20 August 16, 2012 in Docket No. 120007-EI, the capital structure used in
21 calculating the rate of return for recovery clause purposes is based on the
22 weighted average cost of capital (WACC) presented in Gulf's May 2015
23 Earnings Surveillance Report. This rate of return used to calculate ECRC
24 revenue requirements includes a return on equity of 10.25 percent for the
25 period January 1, 2016 through December 31, 2016.

1 Q. How has the breakdown between demand-related and energy-related
2 investment costs been determined in the past?

3 A. Consistent with Commission Order No. PSC-13-0606-FOF-EI dated
4 November 19, 2013 in Docket No. 130007-EI, investment costs
5 recoverable through ECRC were broken down within the retail jurisdiction
6 based on the 12-MCP and 1/13th energy allocator. The use of this
7 allocator is consistent with cost-of-service studies approved in Gulf's prior
8 base rate cases. The calculation of this breakdown is shown on Schedule
9 4P and summarized on Schedule 3P.

10

11 Q. What is the total amount of projected recoverable costs related to the
12 period January 2016 through December 2016?

13 A. The total projected jurisdictional recoverable costs for the period January
14 2016 through December 2016 is \$197,765,402 as shown on line 1c of
15 Schedule 1P of Exhibit CSB-3. This includes costs related to O&M
16 activities of \$48,094,205 and costs related to capital projects of
17 \$149,671,197 as shown on lines 1a and 1b of Schedule 1P.

18

19 Q. What is the total recoverable revenue requirement to be recovered in the
20 projection period January 2016 through December 2016 and how was it
21 allocated to each rate class?

22 A. The total recoverable revenue requirement including revenue taxes is
23 \$200,521,584 for the period January 2016 through December 2016 as
24 shown on line 5 of Schedule 1P of Exhibit CSB-3. This amount includes
25 the recoverable costs related to the projection period and the total true-up

1 cost of \$2,611,911 to be collected. Schedule 1P also summarizes the
2 energy and demand components of the requested revenue requirement.
3 These amounts are allocated by rate class using the appropriate energy
4 and demand allocators as shown on Schedules 6P and 7P of
5 Exhibit CSB-3.

6
7 Q. Is this data and information presented from the books and records of Gulf
8 Power and kept in accordance with generally accepted accounting
9 principles and practices, and with the provisions of the Uniform System of
10 Accounts as prescribed by this Commission?

11 A. Yes.

12
13 Q. How were the allocation factors calculated for use in the Environmental
14 Cost Recovery Clause?

15 A. The demand allocation factors used in the ECRC were calculated using
16 the 2012 load data filed with the Commission in accordance with FPSC
17 Rule 25-6.0437. The energy allocation factors were calculated based on
18 projected kWh sales for the period adjusted for losses. The calculation of
19 the allocation factors for the period is shown in columns one through nine
20 on Schedule 6P of Exhibit CSB-3.

21
22 Q. How were these factors applied to allocate the requested recovery amount
23 properly to the rate classes?

24 A. As I described earlier in my testimony, Schedule 1P of Exhibit CSB-3
25 summarizes the energy and demand portions of the total requested

1 revenue requirement. The energy-related recoverable revenue
2 requirement of \$41,172,439 for the period January 2016 through
3 December 2016 was allocated using the energy allocator, as shown in
4 column three on Schedule 7P of Exhibit CSB-3. The demand-related
5 recoverable revenue requirement of \$159,349,145 for the period January
6 2016 through December 2016 was allocated using the demand allocator,
7 as shown in column four on Schedule 7P. The energy-related and
8 demand-related recoverable revenue requirements are added together to
9 derive the total amount assigned to each rate class, as shown in column
10 five.

11

12 Q. What is the monthly amount related to environmental costs recovered
13 through this factor that will be included on a residential customer's bill for
14 1,000 kWh?

15 A. The environmental costs recovered through the clause from the residential
16 customer who uses 1,000 kWh will be \$21.09 monthly for the period
17 January 2016 through December 2016.

18

19 Q. When does Gulf propose to collect its environmental cost recovery
20 charges?

21 A. The factors will be effective beginning with Cycle 1 billings in January
22 2016 and will continue through the last billing cycle of December 2016.

23

24 Q. Mr. Boyett, does this conclude your testimony?

25 A. Yes.

1 **CHAIRMAN GRAHAM:** Exhibits.

2 **MR. MURPHY:** Staff has compiled a stipulated
3 Comprehensive Exhibit List which includes the prefiled
4 exhibits attached to each witness's testimony in this
5 case and staff's exhibits. The list has been provided
6 to the parties, the Commissioners, and the court
7 reporter. This list is marked as the first hearing
8 exhibit, and the other exhibits should be marked as set
9 forth in the chart.

10 My understanding is that OPC and Gulf
11 would like to identify and add their agreement as an
12 exhibit in the hearing.

13 **CHAIRMAN GRAHAM:** OPC.

14 **MR. REHWINKEL:** Yes. Thank you, Mr. Chairman.
15 The Public Counsel and Gulf would ask that you -- we
16 passed out an exhibit just now -- that you mark as an
17 exhibit the deferral stipulation for Plant Scholz, CCR
18 Unit 1, it be given an exhibit number.

19 **CHAIRMAN GRAHAM:** It looks like staff has
20 assigned them Exhibit 46.

21 (Exhibit 46 marked for identification.)

22 **MR. REHWINKEL:** Okay. And this -- the staff
23 has accurately characterized the stipulation in the
24 Prehearing Order that you signed, but we ask just for
25 completion of the record that the exact language of the

1 stipulation and the transmittal be put into the record.
2 So that's our motion.

3 **CHAIRMAN GRAHAM:** Any other comments? Okay.
4 So, staff, am I just moving this exhibit into the
5 record?

6 **MR. MURPHY:** I think you've identified it and
7 he's moved it. You can move it in, but we would move it
8 in with our whole list at your pleasure.

9 **CHAIRMAN GRAHAM:** We'll just move it in right
10 now.

11 **MR. MURPHY:** Okay.

12 **CHAIRMAN GRAHAM:** So we'll move that into the
13 record.

14 (Exhibit 46 admitted into the record.)

15 **MR. REHWINKEL:** Thank you.

16 **MR. MOYLE:** I just want to -- out of -- to
17 make crystal clear, I mean, this is an issue that may be
18 coming back at some point, and FIPUG has taken no
19 position on it but reserve the right, you know, to get
20 engaged on the issue if and when it comes back.

21 **CHAIRMAN GRAHAM:** Sure. Anyone else? Staff?

22 **MR. MURPHY:** At this time staff asks that the
23 Comprehensive Exhibit List marked as Exhibit 1 be moved
24 into the record.

25 **CHAIRMAN GRAHAM:** We will move Exhibit 1 into

1 the record.)

2 (Exhibit 1 marked for identification and
3 admitted into the record.)

4 **MR. MURPHY:** You've already moved 46 in, so
5 staff asks that all exhibits be included in the record
6 as set forth in the Comprehensive Exhibit List, Nos.
7 2 through 45.

8 **CHAIRMAN GRAHAM:** We will move
9 Exhibits 2 through 45.

10 (Exhibits 2 through 45 marked for
11 identification and admitted into the record.)

12 So does this conclude our hearing?

13 **MR. MURPHY:** Yes. I believe that no
14 post-hearing filings are necessary and there's nothing
15 further.

16 **CHAIRMAN GRAHAM:** All right. So we will
17 adjourn docket 07.

18 (Hearing adjourned at 1:24 p.m.)

1 STATE OF FLORIDA)
2 COUNTY OF LEON) : CERTIFICATE OF REPORTER

3
4 I, LINDA BOLES, CRR, RPR, Official Commission
5 Reporter, do hereby certify that the foregoing
6 proceeding was heard at the time and place herein
7 stated.

8 IT IS FURTHER CERTIFIED that I
9 stenographically reported the said proceedings; that the
10 same has been transcribed under my direct supervision;
11 and that this transcript constitutes a true
12 transcription of my notes of said proceedings.

13 I FURTHER CERTIFY that I am not a relative,
14 employee, attorney or counsel of any of the parties, nor
15 am I a relative or employee of any of the parties'
16 attorney or counsel connected with the action, nor am I
17 financially interested in the action.

18 DATED THIS 13th day of November, 2015.
