Subject: Please deny Florida Power & Light's Power Plant Appeal

Please deny Florida Power & Light's Power new power plant appeal. They have not proved in their last two appeals to have any clue about the actual costs associated with their projects, and their expenditure on lobbyists pursuing a denial and complication for homeowners pursuing solar energy is ludicrous.

Instead of being a barrier to renewable energy sources, they need to shift their focus from petroleum products to solar. Building a gas-fired power plant is a waste and in no capacity should be supported nor funded in any way. In addition, their natural gas fracking projects and fuel hedging are diversion projects that need to be stopped immediately. Please be a beacon for our state and demand that Florida Power & Light shift its priorities. They have been putting up smoke screens of burned fossil fuels for much too long.

I also am appealing to you to prohibit Florida Power & Light from spending any future dollars on any lobbyist or supporting any political campaign. This is a diversion and a waste of their dollars which rarely if ever is in the best interests of our planets nor their customers.

Please take the balance of 2015 and 2016 to make a stance for what all of you know is the right thing to do, and demand compliance instead of distractions from this power company.

Thank you,

Donna Bahr-Landsea
