Exhibit A

Re: Sunny Shores Water Co. Application for
Transfer of Majority Organizational Control

Sunny Shores Water Co. has been owned from its inception by Jack E. Mason. Jack E. Mason transferred ownership of the company to his son, Jack E. Mason II, who has owned and operated the company since 2008. Subsequent to said transfer, Jack E. Mason II, transferred ownership of the company into joint names with his wife, Debbie A. Mason. The transaction was handled as a gift between family members. There was no purchase agreement, financing or other commercial transaction.

Mr. Mason, due to the ownership of the company by his father, has been exposed to the operation of the company for most of his life. He has been actively operating the company since 2008.

Note that because the transfer was of the stock of the utility company, that there has been no change of ownership of the utility itself. It has continued to operate in the same company since its inception.

This transfer is in the public interest as Mr. Mason has been servicing the water utility since the time that his father, the previous owner of Sunny Shores Water Co., was no longer able to manage the company. Mr. Mason has extensive experience in operating the utility, has shown the financial ability to provide the service, and has shown that he is able to fulfill the commitments, obligations and representations with regard to the utility matters of the company.

After reasonable investigation and to the best of his knowledge, Applicant believes the utility system is in satisfactory condition and in compliance with all applicable standards set by the Department of Environmental Protection.

327 214

(v) Not more than two trailers may use one septic tank and only in strict conformity with all laws regulating such matters. All sanitary and police regulations of all governmental authorities shall be observed by the lot owners.

SERVICE AVAILABILITY POLICY

Note: The Company serves an area that is almost entirely built-out and does not presently have any detailed service availability policy for developers.

1. Application for the installation of new meters and service connections require the existence of a valid building/plumbing permit and payment of all fee's prior to installation of meter and water being turned on. Manatee County Resolution R-95-219 effective 10/1/95, Sunny Shore Backflow Policy effective 3/1/92 and applicable laws, regulations and codes require the installation of a Double Check Valve assembly device at the service connection, minimum clearance 6" from meter box, and vacuum breakers on all hose connections. Meter installation time is ten days to two weeks or as soon as possible after the above conditions are met.

2. All Backflow Prevention devices must be re-certified annually in order for the premise to remain in compliance with appropriate laws, codes and policies. Failure to comply shall mean disruption of service until such time as the premise comes into compliance. Turn off or turn on field charge will apply. It is not the responsibility of SSWC to remind the property owner to have them inspected. If at any time, upon inspection, they are found in non-compliance we will remind you of your responsibility to have it re-certified. This will be done prior to any other action being taken.
